The value of the real estate charged with the Death Duties in 1901-2 was exceptionally large, because in that year the great landed estate of which the late Duke of Westminster, who died in 1899, had been tenant for life came into account. The falling off in 1908-9 in the value of real estate of which the Department had notice to a sum of 10 per cent. below the average of ten years, and nearly 5 per cent. less than the previous lowest total, is remarkable. The decline was about equally divided between settled and unsettled property. Among the changes, as compared with the previous year, were the following:—

	1908-9.	1907-8.
Agricultural Land	£20,448,000	£22,234,000
Building Land	1,062,000	1,508,000
House Property and Business Premises ...	34,544,000	36,600,000
Mines, Minerals and Quarries	470,000	1,358,000
Chief rents, ground rents and rent charges	3,781,000	5,842,000
	£60,305,000	£67,542,000

These items account for £7,237,000 out of the total of £7,815,000, by which the value of the realty which came under notice of the Department in 1908-9, was less than that of 1907-8. In 1907-8 there were seventy-five estates over £250,000 each, with a capital value of £52,500,000, but the higher rates of duty imposed by the Finance Act of 1907 were not then fully operative, and the

Estate Duty on these seventy-five estates was only £4,520,000, whereas £300,000 more in duty were obtained from capital of £8,000,000 less in value in 1908-9. The estates between £100,000 and £250,000 each, also affected by the Finance Act of 1907, were only 199 in number in 1907-8, but their capital value was £35,250,000, whereas the 214 estates between £100,000 and £250,000 each in 1908-9 had a capital value of only £34,185,000 and yielded just about the same amount of duty as the smaller number of estates of the former year.

LARGE AND SMALL ESTATES COMPARED.

The Estate Duty was levied in 1908-9 on estates of various amounts in the following proportions:—

	No. of Estates.	Capital Value.	Estate Duty.
Over £250,000 each	74	£44,385,000	£4,813,810
Between £100,000 and £250,000 each	214	34,185,000	2,213,825
Between £25,000 and £100,000 each	288	£78,570,000	£7,027,635
Between £1,000 and £25,000 each	1,370	67,855,000	2,325,070
Between £1,000 and £25,000 each	19,594	104,879,000	3,523,040
Under £1,000 each	21,252	£251,304,000	£13,675,745
	46,272	19,599,000	298,150
	67,524	£270,903,000	£14,173,895

The amount of duty received in 1908-9 at the higher rates imposed by the Finance Act of 1907 on estates exceeding £150,000 each of persons who died after 18 April, 1907, was £5,230,910, but the sum of £778,075 was also received in 1908-9 as duty at the lower rates imposed by the Finance Act, 1894, which remained operative in respect of the estates exceeding £150,000 each of persons who had died before 19 April, 1907. The Finance Act of 1894 did not become fully effective until about five years had passed, and it is probable that for two or three years to come, duty will be received each year on a number of estates of persons who died before the Finance Act of 1907 came into force.

LEGACY AND SUCCESSION DUTIES.

Legacy Duty yielded in 1908-9, £3,335,578 on a total capital of £79,343,380 as compared with a yield in 1907-8, of £3,908,600 on a capital of £81,308,368, and the receipt from Succession Duty in 1908-9 was £695,328 on a capital of £17,419,561 as compared with a receipt from this source in 1907-8 of £732,437 on capital valued at £18,329,621. By far the largest receipt from Succession Duty during the last ten years was in 1901-2, when the yield of this duty was £1,308,936 on capital valued at £26,521,039.

PERSONALTY SITUATED ABROAD.

The gross capital value of personalty situated abroad subject to Estate Duty in the United Kingdom was £4,195,398 in 1898-9, and £4,256,837 in 1908-9. There was an exceptional increase in the value of this class of property in 1899-1900, when it was entered in the Inland Revenue accounts as £15,715,953, and again in 1901-2, when the valuation was £8,693,608, but for other eight years the annual average has

been about £5,000,000. It is difficult in some cases for the Exchequer to obtain information respecting property situated abroad and its value, and an arrangement which has been made between this country and France for the interchange of information may therefore prove useful, and perhaps may eventually be extended to other countries.

ESTATES NOT LIABLE TO DUTY.

The number of estates of which the Department had notice *not* liable to Estate Duty varied from 14,722 (of which 1,559 were insolvent estates), and 13,203 estates not exceeding £100 each, in 1898-9 to 17,677 (of which 1,802 were insolvent estates, and 18,875 estates not exceeding £100 each) in 1908-9, but the value of such estates has not shown much variation from year to year. In 1898-9 the value of estates not exceeding £100 each was £1,062,588 gross and £974,689 net, and in 1908-9 the gross value was £1,952,264, and the net value was £896,076. On the aggregate of the ten years the estates not exceeding £100 each consisted of about 65 per cent. in personalty and 35 per cent. in realty. The insolvent estates in 1898-9 had gross capital valued at £2,748,753, and debts amounting to £3,763,629, leaving a deficiency of £1,014,876, and in 1908-9 the gross capital of insolvent estates was £3,593,412, with debts amounting to £4,817,593, and a net deficiency of £1,224,491. During the ten years from 1898-9 to 1908-9, the gross capital of insolvent estates of which the Department had notice was 34½ millions, and the debts about 49½ millions, with a deficiency of 15½ millions, the capital being thus equal to about 70 per cent. of the debts, and the deficiency to 30 per cent. The number of estates not liable to Estate Duty, as not exceeding £100 each in capital value, or as insolvent, is about one-fifth of the whole number of estates which annually come under the notice of the Department, but there are probably also many small intestate estates which do not come under the notice of the Department, because it is not thought worth while to apply for Letters of Administration respecting them.

IMAGINARY WEALTH.

It has been interesting to notice that since the collapse in January, 1908, of what was known as the Druce-Portland case, which had been kept before the public for nearly ten years, and involved the assumption that Mr. Druce, an upholsterer in Baker Street, who died in 1864 at the age of 70 years, was also during the greater part of his life the same person as the fifth Duke of Portland who died in 1879 aged 79 years, there has been a remarkable diminution in the number of announcements of windfalls, unexpected inheritance of millions, and claims to fortunes and titles, which were formerly so numerous and in some respects so curiously alike in circumstances in which the claims were supposed to have arisen. At one time these "windfall" stories seemed to be chiefly of American origin, and useful warnings respecting them were issued by the United States Embassy in this country, from which the following paragraph is taken:—"There are no large unclaimed estates in Great Britain. The vast sums constantly spoken of as 'dormant in Chancery' or 'awaiting claimants in the Bank of England' are purely imaginary, and are only too often the invention of swindlers who obtain money for the

prosecution of fictitious claims to these fictitious fortunes." But from Australia, South Africa, Russia, and elsewhere came also, now and then, reports of the discovery in out of the way places, and usually in humble positions of life, of the heirs to millions "in Chancery" or in the Bank of England, or to titles and landed estates which, according to the story, were only awaiting "proof of the identity" of the claimant, and this would be readily supplied. But investigation, so far as was possible, of a large proportion of the "windfall" paragraphs published during many years had the result that in no instance was it ascertained that any claimant had obtained any considerable fortune which was supposed to be awaiting him, but that in most instances the fortunes were either imaginary, like the Russian Oviski Levi "sixty million pounds at interest in the Bank of England" or the Sir Francis Drake "twenty-five millions" (not located), or else had passed many years ago to the persons entitled to them, like the Page millions, the Jennens millions, the Tyson millions, and the James Wood millions. Nevertheless, for these and other "millions," which had long since been dispersed or had never existed, new claimants were found year by year, and every new claimant found sympathisers; for it has been truly said that "about claims to fortunes and titles, people will believe almost anything," and are ready to think that there must be something in any claim, however extravagant it may appear to be. Their sympathy is with the claimant, and oftentimes they will advance money, on profit-sharing terms, in support of the claim, but one seeks in vain for any instance of benefit either to claimant or sympathiser.

DETAILS OF THE INVESTMENT OF CAPITAL.

In the records of classification in detail of the gross capital value of personalty in the United Kingdom in the past two years, the totals being, in 1907-8 £203,374,000, and in 1908-9 £200,481,000, the comparative figures of the following items are of interest:—

Funds of the United Kingdom	1908-9.	1907-8.
Foreign and Colonial Stocks	£7,940,500	£9,130,000
Company Shares and Debentures	11,369,000	11,160,000
Cash in the House ...	88,570,000	96,671,000
Cash at the Bank.....	603,720	609,850
Money out on Mortgage	17,288,000	18,706,000
Policies of Insurance	14,730,000	13,457,000
Household Goods and Pictures	9,075,000	8,300,000
Share of Partnership Estate	6,084,000	6,864,000
Personal Estate not classified.....	9,067,000	13,173,000
	9,667,000	—2,092,000

The excess in this last item in 1908-9 is about equal to the lower value of shares and debentures and partnership estate as compared with 1907-8. Cash in the house at less than £10 for each estate has become almost a nominal sum, and probably in no other country in the world has the cheque book so completely taken the place of cash. The amount of Consols and other funds of the United Kingdom under the estates of 1908-9 is the smallest for ten years. The largest, £12,236,000, was in 1899-1900. The amount of money out on mortgage is the largest

for ten years. The lowest was in 1899-1900, £11,522,000. In comparing the price of Consols now and formerly, it appears to be sometimes forgotten that the present rate of interest on Consols is only $2\frac{1}{2}$ per cent., and that $2\frac{1}{2}$ per cent. Consols at $83\frac{1}{2}$ are equivalent in price to 3 per cent. Consols at par. A rate of interest so low as 3 per cent. appears to offer little attraction to investors now that so many other approved securities which are available to trustees, and give higher interest, can be obtained.

The valuation of household effects and pictures at only a very little more than £6,000,000, is nearly the smallest in the accounts since the value of this class of property has been separately entered. It represents on an average about £90 for the contents of each house, and on estates under £500 each is rather more than 5 per cent. of the value of the whole of the property. Of large estates, the valuation of household effects and pictures, for probate purposes, sometimes is in remarkably small proportion to the whole. Thus, more than 150 estates between £75,000 and £100,000 each, with an aggregate capital value of £15,250,000, account for only £208,000 as the value of the contents of the houses, including collections of pictures, and thirteen estates between £500,000 and £750,000 each, with an aggregate value of £3,500,000, included £28,843 for household effects and pictures, whilst three estates between £1,500,000 and £2,500,000 each, of the aggregate value of £4,880,000, returned £22,200 as the value of the contents of the late owners' houses and their collections of pictures. Very moderate valuations of household goods, and especially pictures and works of art, have, however, customarily been accepted as sufficient when probate is granted, subject of course to the expectation that if and when they are sold at higher prices, as frequently happens, corrective affidavits will be made and additional duty paid in due course.

WORKS OF ART.

Pictures, prints, books, manuscripts and works of art, or scientific collections of natural, scientific or historic interest bequeathed for national purposes or to any University, County Council, or Municipal Corporation, may, under the Finance Act of 1894, be exempted from the Death Duties if approved by the Treasury. Bequests for such purposes in 1908-9 were of the total estimated value of £12,558, and in 1907-8 only £7,557. Last year's bequests included pictures to the National Gallery, china, pottery and lace to the Victoria and Albert Museum, the Saint Hubert Psalter and Monastic Registers to the British Museum, and the Chatham and Pitt Papers to the Public Record Office, with bequests also of books, pictures, china, and plate to the corporations of Brighton, Hove, Sunderland, Stockport, and York, scientific instruments to Trinity College, Dublin, and manuscripts and geological specimens to Victoria University, Manchester.

During the five years from 1894 to 1899 there were thirty-three bequests to public institutions exempted from Estate Duty under the Finance Act of 1894 and valued at £351,000, but this sum included £326,000 as the valuation of the fine collection of plate, enamels, and carvings left to the British Museum by Baron Ferdinand de Rothschild. In the following eight years there were bequests exempted from Estate Duty

to 156 public institutions and valued at £382,268. By the Finance Act of 1896 the exemption from Estate Duty of approved works of art or collections of national or historic interest was extended to those not bequeathed to public institutions but passing under settlement, and by the Finance Bill of 1909 the exemption is to be further extended to all such objects, including those of artistic interest, approved by the Treasury, and passing under any will, and they are only to become chargeable to duty when sold. The loss to the Exchequer will not be large if the custom be continued of accepting on grant of probate very low valuations of works of art, but it does not appear that any especial provision is to be made that the Treasury shall be informed of any sale, and it has been suggested that a register might be kept of all such objects of national, historic, or artistic interest as have been exempted from Estate Duty, and that when a sale is intended the Treasury might reasonably have the right of pre-emption on behalf of the nation.

Although the National Gallery had no bequest of importance in 1909 the trustees acquired by gift a painting of high artistic merit and of especial historic interest in this country, in the portrait of Christina, Duchess of Milan, by Holbein, from a sketch made by him in three hours in Brussels in 1538, when he was sent by King Henry VIII to take a likeness of the Duchess, to whom the King was proposing marriage. Towards the purchase of this picture, which had been in the National Gallery for many years on loan from the Duke of Norfolk, the Government gave £10,000, other subscribers £30,000, and an anonymous donor £40,000. At auction sales in 1909, among the last biddings were 12,500 guineas for "The Burning of the Houses of Parliament," by Turner, and 6,500 guineas for his "East Cowes Castle," 8,400 guineas for Constable's "Arundel Mill," 6,200 guineas for a portrait by Raeburn, 5,200 guineas each for portraits by Romney and Hoppner, 5,000 guineas for Millet's "Goose Maiden," $12\frac{1}{2} \times 9\frac{1}{2}$ inches, and 3,300 guineas for "Four Mills" (1871), $8\frac{1}{2} \times 11\frac{1}{2}$ inches, by Matthew Maris, and 3,000 guineas for "Feeding Chickens" (1872), $13\frac{1}{2} \times 8$ inches, also by Matthew Maris, the last three being from the late Mr. Justice Day's collection of pictures, mostly of the Barlizon and modern Dutch schools, which were sold, it was said, at a profit of rather more than £50,000 to his estate, one picture for which he paid 28 guineas having realised 3,000 guineas.

Sir Hubert von Herkomer's picture of "The Last Muster" (1875) from the Quilter Collection sold for 3,100 guineas. The chief sales of the season 1909 were those of the collections of—

Mr. Justice Day	£98,000
Sir W. Cuthbert Quilter	87,780
Mr. E. H. Cuthbertson	78,456
Sir John D. Milburn	56,770
Mr. Holbrook Gaskell	55,636

Perhaps, however, the collector in recent years whose investments in pictures yielded the largest profit was the late Sir James Knowles, who had been for years a frequenter of Christie's sale-rooms, and had remarkably good judgment.

It is understood that the late Mr. Chauchard, of The Magazins du Louvre, in Paris, who gave £32,000 for Millet's picture, "The Angelus," has left that famous picture, painted just fifty years ago, to the Government for the collection in the Louvre.

INCOME TAX.

The Budget estimate of the amount of income tax which would be receivable by the Exchequer in 1908-9 was £33,000,000, and the amount paid into the Exchequer was £33,930,000. The leading or general rate was 1s. applied to the unearned income of all classes and to the earned income of persons with total incomes exceeding £2,000 a year, but the abatement to 9d. on earned income of certain classes under the Finance Act of 1907 gave relief in approximately three-quarters of a million cases. The amount paid into the Exchequer in 1907-8 was £32,380,000 as compared with a Budget estimate of £30,500,000, but owing to the changes in the time within which assessments may be made, some statistics for 1907-8 are yet incomplete. The produce for each penny of the tax in 1906-7 was £2,666,867. The average virtual rate of the tax was then 10'05d. in the £. In 1907-8 it was 9'71d. in the £.

The following are particulars of the assessments for 1907-8, so far as ascertainable at present, of the profits from businesses and professions:—

Amount Exceeding	And not Exceeding	No. of Persons assessed.	Gross amount of Income assessed.	No. of Firms assessed.	Gross amount of Income assessed.
£	£		£		£
50,000	—	14	1,501,174	99	9,344,701
10,000	50,000	219	3,933,619	936	17,414,141
5,000	10,000	481	3,359,011	1,657	11,701,413
4,000	5,000	286	1,302,353	884	3,976,505
3,000	4,000	571	2,011,292	1,428	4,993,972
2,000	3,000	1,495	3,684,190	2,867	7,465,300
1,000	2,000	6,156	8,995,338	7,536	11,194,016
		9,222	24,786,977	15,407	65,690,048
Gross Incomes under £1,000 each		362,375	75,896,420	39,957	16,275,195
Total		371,597	100,683,397	55,364	81,965,243

The number of persons with incomes exceeding £50,000 each was in 1906-7 twenty as compared with fourteen in 1907-8, but the number of firms with incomes over £50,000 was ninety-nine in 1907-8, as compared with ninety-two in 1906-7, but for the year 1907-8 the statistics are not yet complete. The total number of assessments on employees in the United Kingdom in 1907-8 was 513,690 with a total gross income of £123,413,776, including 409,158 Government, Corporation and public company officials with a gross income of £97,734,438, reduced by abatements and other deductions to £54,351,539 net.

The total gross income of £946,578,997 brought under the review of the Department for the year 1907-8 was made up as follows of profits from—

Ownership of lands	£51,857,803
Occupation of lands (mainly farmers' profits)	17,380,178
Ownership of houses	211,358,747
Other property	1,271,220
British, Indian, Colonial and Foreign Government securities	48,215,294
Business concerns, professions and employments	518,761,317
Salaries of Government, Corporation and Company officials	97,734,438
	£946,578,997

CHARITABLE BEQUESTS.

Bequests for religious, charitable and educational purposes to the amount of more than eighteen millions of pounds have been noticed in Whitaker's Almanack in the past four years. In 1906 and 1907 such bequests exceeded five millions in each year, and 1908 and 1909 accounted for about four millions each. The charitable bequests, of which particulars have been scheduled in the Almanack, have been as follows:—

—	Approximate amount of Bequests.	Value of Estates.
In 1906 under 60 Wills	£4,486,440	£15,246,778
In 1907 under 80 Wills	4,868,250	11,565,779
In 1908 under 80 Wills	3,548,705	12,534,850
In 1909 under 75 Wills	3,411,170	19,182,665
295	£16,314,565	£58,530,072

The bequests not scheduled probably exceeded £500,000 in each of the four years. Those scheduled are in the proportion of about 30 per cent. of the aggregate amount of the estates from which they were derived. In 1906 there was the bequest of about £1,800,000 under the will of Mr. Alfred Beit, and in 1907 bequests of £1,000,000 each from Mr. George Herring and Mr. William Whiteley were included. In 1908 the largest bequests were those of Mrs. Rylands, £500,000, and Sir W. G. Pearce, £406,000. The schedule of seventy-five charitable bequests in 1909 will be found on p. 433.

ANIMAL CHARITIES.

Miss Charlotte Bethell left £8,000 for homes for horses and dogs, and Mrs. Sarah Jackson, of Bowden, on whose death a sum of more than £30,000 became available for public uses under her husband's will, left £8,300 for hospitals and animal charities. Bequests for the care and maintenance of favourite animals have been reported under several wills, of which the majority were those of ladies. Dr. Charles Bell Taylor, of Nottingham, bequeathed from his residuary estate of over £70,000, to the Society for the Prevention of Cruelty to Animals, the National Anti-Vivisection League, the British Union for the Abolition of Vivisection, and the British Committee of the International Federation £5,000 each, and the ultimate residue to the three last-named institutions, and the London Anti-Vivisection Society.

CHARITABLE LADIES.

Lady Goldsmid, who had attained the age of 89 years, and whose estate was valued at £204,000, bequeathed about £100,000 to public uses, including £65,000 for hospitals and educational purposes. The funds of her marriage settlements are left to University College and University College Hospital. Under the will of Mrs. Greenhill, whose estate was valued at £162,000, the bequests to public uses are about £90,000, including £5,000 to St. Paul's Schools at Hammersmith, and under the will of Mrs. Caroline Ann Evans, aged 81, who left estate valued at £292,000, of which about £64,000 are for charitable institutions, there are legacies of £10,000 each for the Indigent Blind School, and the Soldiers' Institution at Portsmouth, £5,000 to the Homeopathic Hospital, and £15,000 to the Home of Recovery. Mrs. Grice, of Forest Row, from her estate of £174,000, left £5,000 to the Newport (Monmouth) Hospital, and about £65,000 to be applied for her scheme for the benefit of distressed ladies. Among the many other charitable bequests of ladies reported during the year have been those of Miss Annie Graham Sewell, £50,000, under which the Church Army, the Mission to Seamen, and the London City Mission benefit; Miss Emnia Sarah Wolfe, £40,000, of which King Edward's Hospital has a share; Dame Emma Osborne, of Tipperary, £37,000, from which the Tipperary Protestant Orphanage benefits; Mrs. Annie Jane Holborn, £23,750, for hospitals and missions; Mrs. Annie Scott, £20,000, for hospitals and the Bishop of London's Fund, and Lady Campbell Clarke, £10,000, as to £2,500 for Jewish charities, £2,500 for hospitals, and £5,000 for charities other than Jewish.

LOCAL BENEVOLENCE.

Requests for local rather than general objects have been numerous in the past year. Dr. Thomas McKie, of Edinburgh, advocate, aged 78, whose estate was £83,350, left the reversion of £30,000 chiefly to Scottish charities, and Dr. John Hall (estate £88,000) left the reversion, also of about £80,000, for Scottish orphanages and the endowment of fellowships in Glasgow University, subject to some bequests for London missions. Under the will of Mr. Alexander Fleming (84), of Glasgow, ironmaster (estate £1,300,000), a sum of £61,000 is left to charities in and around Glasgow. Mr. Francis Elgar, naval architect, bequeathed £32,000 to the University of Glasgow and the Institution of

Naval Architects; Mr. John Monro, £13,000 for public baths in Elgin and Forres, and Mr. Francis Glen MacAndrew, £12,000 for Glasgow charitable institutions. From the estate of Mr. Leslie Gordon Young, charitable institutions in and around Cheltenham will receive about £25,000; from Mrs. Isabella Bateman's estate about £30,000 will pass to charities in the Liverpool district, and Miss Isabella Gregson left £30,000 for the Liverpool Children's Infirmary, and a fund for "Gregson Memorial Annuities." Under the will of Mrs. Catherine Mary Castle, a sum of £16,500 is left in trust for gentlewomen in Bristol; Mr. James Lawes Perrin, a tobacco manufacturer, left about £24,000 to Bristol and South Wales, and tobacco trade institutions; and Mr. W. G. Lovell, of Bedford, brewer, whose estate was valued at £42,000, left £35,000 for almshouses, chiefly for agricultural labourers in North Bedfordshire. Miss Anne Marples (91), of Sheffield, bequeathed from her estate of £59,000 nearly £17,000 to Sheffield hospitals; and Mr. H. J. Randell (82), of Bridgend, whose estate was £97,500, left nearly £15,000 for the maintenance of Bridgend Cottage Hospital and other purposes in South Wales.

OTHER WILLS.

Missions and other religious institutions were, as in former years, the object of many bequests in 1909, frequently in conjunction with hospitals, but among those reported there was not any one very great legacy for religious purposes. The Right Rev. Dr. Thomas Wilkinson, of St. Cuthbert's College, Durham, left his estate of £40,000 for Roman Catholic charities, and Mrs. Waterton about £3,250 for Roman Catholic purposes in the diocese of Liverpool. Mr. Charles Morrison (81), whose estate was valued provisionally at £666,666, in respect of which a sum of one million pounds was paid on account of the Estate Duty, left £10,000 each to the East London Church Fund, the Bishop of London's Fund, the Bishop of St. Albans' Fund, the Rochester Diocesan Society, and the London Hospital. Mr. Charles Lowe left about £30,000 to the Gibraltar Mission and the Gibraltar Chaplain Sustentation Fund; Sir G. T. Livesey left the reversion of £70,000 for hospitals, temperance purposes, and pensions; and Mr. William Ford Stanley (81) about £40,000, chiefly for the Stanley Technical Trade Schools, founded and partly endowed by him.

J. H. SMEE.

ELEMENTARY EDUCATION IN ENGLAND AND WALES.

Other Schools	506,560	306,125	348,583	231,330

ATHLETICS.

THE athletic season opened on February 6, at Wembley Park, when the sixteenth annual race promoted by the North of the Thames Cross Country Association was won by A. E. Wood, of the Essex Beagles, in 40 mins. 59½ secs. Thirty clubs were represented, 299 runners out of a record entry of 343 finishing. Essex Beagles came first in the club placings with a score of 55 points, Polytechnic Harriers with 183 points were second, and Highgate Harriers with 273 points were third. On the same afternoon F. J. Lintott established a record in the ten mile race promoted by the Ranelagh Harriers for the Clutton Cup; his time was 58 mins. 17½ secs., which beat the previous record, made by J. H. Bessell in 1902, by 2 mins. 52½ secs. At Coventry, W. Hart, of the Sparkhill Harriers, won the Midland Junior Championship, the Small Heath Harriers being first in the club placings.

On February 13 the South of the Thames Championship took place at Southend, near Catford, and was won by F. C. Neaves, of the Surrey Athletic Club, in 43 mins. 48½ secs. Herne Hill Harriers came first in the club placings with 98 points, Reading Athletic Club was second with 116 points, and Surrey Athletic Club third with 118 points. The Midland Counties Senior Championship was contested over the new racecourse at Uttoxeter on February 20. W. Coales, of the Thrapston Harriers, was first man home; Birchfield Harriers being first in the club placings with 63 points, Small Heath Harriers (94 points) were second, and Derby County (102 points) third. The Northern Counties Championships took place the same afternoon over the Doncaster racecourse. The Junior event was won by the Warrington Athletic Club, J. Warburton, of Bury, being the first man home. J. Murphy won the Senior Championship; the Hallam Harriers, of which club he was a member being first with 33 points.

The Southern Counties Championship, over Epsom Downs, on February 27, was won by A. E. Wood, of the Essex Beagles. Highgate Harriers were first in the club placings with 63 points, Herne Hill Harriers with 104 were second, and Polytechnic with 168 points third. On Saturday, March 6, the National Championships took place in a blizzard of snow over the Haydock Park racecourse. James Murphy, of the Hallamshire Harriers, was the first man home; and Birchfield Harriers came first in the club placings with 61 points, Hallamshire were second with 113 points, and Sutton third with 175. On the following Saturday the Scottish National Championship was won by A. McPhee, of the Clydesdale Harriers, the West of Scotland team coming first in the club placings. The Great Eastern Railway Employees won the London Business Houses' Championship; A. G. Hill, of Diprose, Bateman & Co., being first man home.

Some interesting sport was witnessed at the annual encounter between Oxford and Cambridge, which took place at the Queen's Club on Friday, March 19. A new inter-Varsity hammer-throwing record (148 ft. 10 in.), established by R. H. Lindsay-Watson, of Trinity College, Cambridge, was the only outstanding feature of the afternoon. The previous best was made in 1907, when A. M. Stevens (Oxford) threw 146 ft. 9 in. L. F. Hull (Brasenose, Oxford) accomplished a dual success, winning the 100 yards and quarter-mile events. The Park Blues won by six events to four.

100 Yards.—L. C. Hull (Michigan and Brasenose), Oxford (1); W. T. Wetenhall (City of London and Caius), Cambridge (2); H. R. Ragg (Hereford and St. John's), Cambridge (3); J. W. Woodrow (Drake University, U.S.S., Queen's), Oxford (4).

120 Yards Hurdle Race.—G. R. L. Anderson (Eton and Trinity), Oxford (1); N. Field (Marlborough and Brasenose), Oxford (2); A. G. Boycott (St. John's, Leatherhead, and Selwyn), Cambridge (3); M. G. D. Murray (Australia and Trinity), Cambridge (4).

Quarter-Mile.—L. C. Hull (Michigan and Brasenose), Oxford (1); C. Armstrong (St. Laurence's and Jesus), Cambridge (2); C. Howard-Smith (Winchester and Brasenose), Oxford; W. T. Wetenhall (City of London and Caius), Cambridge.

Half-Mile.—P. Stormonth Darling (Winchester and New), Oxford (1); T. H. Just (St. Paul's and Trinity), Cambridge (2); G. F. Rogers (Liverpool and Brasenose), Oxford; W. H. Pelham (Eton and Trinity), Cambridge.

England, with 33 points, secured the honours in the International Cross Country Championship, which was decided on March 20 at Derby. The other countries represented finished as follows:—Ireland, 77 points, second; Scotland, 107 points, third; France, 111 points, fourth, and Wales, 187 points, fifth. The course was about ten miles. A. E. Wood, England, was first in the individual placings; J. Bouin, France, second; and E. V. Loney, England, third.

The Long-Distance Walking and Running Championships took place at Stamford Bridge on Saturday, April 17. The first three in each event were:—Seven Mile Walking; E. J. Webb (holder), Herne Hill Harriers, 52 mins. 37 secs. (1); F. T. Carter, Queen's Park Harriers, 54 mins. 44½ secs. (2); A. H. Pateman, United Harriers, 55 mins. 14 secs. (3). Ten Miles Running, A. E. Wood, Essex Beagles, 52 mins. 40 secs. (1); W. Scott, Broughton Harriers, 53 mins. 49 secs. (2); B. C. Long, Polytechnic Harriers, 53 mins. 58½ secs. (3).

The Public Schools Challenge Cups were competed for at the London Athletic Club's spring meeting at Stamford Bridge on May 1. The winners were:—100 Yards, G. H. H. Shepherd (Abingdon); 120 Yards Hurdles, P. Phillips (Highgate); 440 Yards, E. St. H. Davies (Eastbourne College); 880 Yards, L. F. Taylor (Oundle); Three-Quarter Mile Steeplechase, L. W. Holland (Abingdon); One Mile, L. F. Taylor (Oundle); High Jump, A. F. Sheldon (King's College); Long Jump, M. J. Susskind (University College).

The winners at the Irish Amateur Championship Meeting, which took place at Ballsbridge, Dublin, on May 31, were:—100 Yards, P. J. Roche (holder), Cork A.C.; 120 Yards Hurdles, T. J. Ahearne (holder), Athen; 220 Yards, W. Murray, Dublin; 440 Yards, G. N. Murphy (holder), Dublin Univ.; Half-Mile and One Mile, J. F. Fairbairn-Crawford, West of Scotland; Three Miles Walk, W. Hamilton, Belfast; Four Miles Run, Lance-Corpl. O'Neill, Connaught Rangers; Putting the Weight, D. Horgan, Banteer; Throwing the Hammer, John Murray (holder), Inchicore; Throwing the Discus, J. Murray, Dublin; High Jump, T. J. Ahearne, Athlea, w.o.

There was a record attendance at the Amateur Championship Meeting, which took place at Stamford Bridge on July 3. The results were:—100 Yards Flat.—R. E. Walker, South African A.A. (1); N. J. Cartmell, U.S.A. (2); R. Kerr

(holder), Canada (3); M. Chapman, Finchley H. (4); E. W. Haley, Herne Hill H. (5). Time, 10 secs.
 120 Yards Hurdles.—A. H. Healey, Blackheath H. (1); K. Powell, L.A.C. (2); V. Duncker, South Africa (3); C. E. Kenahan, Irish Fusiliers (4). Time, 15½ secs.

220 Yards Flat.—N. J. Cartmell (U.S.A.), Birchfield H. (1); R. Kerr (holder), Tigers A.C., Hamilton, Canada (2); E. W. Haley, Herne Hill H. (3); W. Murphy, Queen's Park H. (4). Time, 62½ secs.—best championship performance.

Quarter-Mile Flat, A. Patterson, Salford H. (1); L. J. de B. Reed, L.A.C. (2); E. H. Montague, S.L.H. (3); G. Nicol, Polytechnic H. (4). Patterson and Reed ran a dead heat in 50½ secs. On running off Patterson led all the way, and won by five yards. Time, 51½ secs.

Half-Mile Flat.—H. Braun, Munchener Sports Club (1); A. Astley, Salford H. (2); I. F. Fairbairn-Crawford, M.C.C. and West of Scotland H. (3). Time, 1 min. 57½ secs.

One Mile Flat.—E. Owen, Broughton H. and A.C. (1); A. J. Robertson, Birchfield H. (2); R. F. C. Yorke, Surrey A.C. (3); F. A. Knott, S.L.H. (4); A. E. Wood, Essex Beagles (5). Time, 4 mins. 23 secs.

Two Miles Steeplechase.—Only four finished, i.e., R. Noakes (holder), Sparkhill H. (1); H. L. Hart, Sparkhill H. (2); G. M. Parkinson, Essex Beagles (3); J. E. Dinkin, Herne Hill H. (4). Time, 11 mins. 21 secs.

Two Miles Walking Race.—E. J. Webb, Herne Hill H. (1); A. E. M. Rowland, South Canterbury H. (New Zealand) (2); T. J. Eaton, Polytechnic H. (3); G. R. J. Withers, Railway Clearing House A.C. (4). Time, 13 mins. 56½ secs.

Four Miles Flat Race.—E. R. Voigt (holder), Manchester A.C. (1); A. J. Robertson, Birchfield H. (2); A. E. Wood, Essex Beagles (3). Time, 19 mins. 57½ secs.

High Jump.—J. H. Banks, Sparkhill H., 5 ft. 9 in. (1); T. J. Ahearne, Athea, Ireland, 5 ft. 8½ in. (2); C. R. Dugmore, S.L.H., 5 ft. 7 in. (3).

Long Jump.—T. J. Ahearne, Athea, Ireland, 22 ft. 4½ in. (1); S. S. Abrahams, L.A.C. and C.U.A.C., 21 ft. 5½ in. (2); W. H. Bleaden (holder), O.U.A.C., 20 ft. 5 in. (3).

Pole Jump.—A. E. Flaxman, jun., L.A.C. and S.L.H., w.o.

Throwing the Hammer.—T. R. Nicholson, West of Scotland H., 164 ft. 8 in. (1); D. Horgan, Irish A.A.A., 137 ft. 1½ in. (2); A. H. Effe, L.A.C. and O.U.A.C., 130 ft. 3½ in. (3); E. E. B. May, O.U.A.C. and L.A.C., 126 ft. 4½ in. (4); H. A. Leeke, O.U.A.C. and L.A.C., 118 ft. 2 in. (5). Nicholson's throw is a record for the championship meetings.

Putting the Weight.—D. Horgan (holder), Irish A.A.A., 44 ft. 1 in. (1); T. R. Nicholson, West of Scotland H., 40 ft. ½ in. (2); H. A. Leeke, C.U.A.C. and L.A.C., 37 ft. 8 in. (3).

BILLIARDS.

NOT a single match of any importance was played during the season of 1908-9. This was mainly due to the retirement of C. Dawson, and with his departure from the arena, Stevenson was left without a rival worthy of his cue.

The amateurs, however, made up the financial losses of the Billiard Association through the shortcomings of the professionals, the Amateur Championship being a gigantic success. In the Southern Qualifying Competition an unknown quantity in Major H. L. Fleming took part. It was quickly seen that in the gallant officer we

had a player above the ordinary, his defeat of the ex-champion, Mr. A. W. T. Good, being accomplished in brilliant style. The competition proper was played at Bradford, the home of the then holder, Mr. H. C. Vinn, and attracted huge crowds. Again Major Fleming showed splendid form, and in the final heat defeated Mr. Vinn by 499 in 2,000 up, thus gaining the title at the first attempt.

The invitation to take part in the 1909-10 Professional Tournament has been extended to five players only—Stevenson, Diggle, Inman, Harverson, and Reece, with the Scottish Champion, T. Aitken (5,500 start) as reserve man. In Australia a remarkably fine player has come forward in George Gray, a youth of seventeen, who has stepped at once into the front rank. In a match with F. Lindrum at Melbourne he made a break of 836, of which 831 was made off the red ball alone. Both of these are world's records under Association rules, and after due investigation were passed as such by the Amateur Billiard Association of Victoria and the Billiard Association of Great Britain. The table on which the break was made was a standard one and duly tested by competent authorities.

BOXING, FENCING, AND GYMNASTICS.

IN 1909 amateur boxing was more popular than ever, especially at the Universities and Public Schools, but there were few demonstrations of gymnastics outside those promoted by such bodies that call for notice here. The first inter-University gymnastic contest, held at Oxford, was decided in the University Gymnasium on March 4, eight men a side competing on rings, parallel bars, horizontal bars, and vaulting horse. The result was a win for Cambridge, with a total of 518 points against 488 points, form shown all round being very good indeed. Great improvement in the general form was noticeable in the Oxford v. Cambridge boxing and fencing contest, decided at the Corn Exchange, Cambridge, on March 10. The Dark Blues gained a highly meritorious victory by six events to two. The Scottish Amateur Boxing Championships were decided on March 13, at Glasgow.

The gymnasium at Queen's Avenue, Aldershot, was the scene, on April 2 and 3, of the Public Schools Championship. The Champion Shield and Gold Medal were won by Berkhamstead School, whose representatives were R. Stratfield, James and W. N. Leak; whilst the winner of the gold medal for the highest individual marks was R. M. Gent, King's School, Canterbury.

Four thousand people witnessed the Championships of the Amateur Boxing Association at the Alexandra Palace on April 7. The winners were:—Bantam, J. Condon, Lynn B.C.; Feather, A. H. Lambert, Belgrave Harriers; Light, F. Grace, Eton Mission B.C.; Middle, W. Child, Cambridge A.B.C. (who had won in 1908); Heavy, C. Brown, Victoria A.C.

The Royal Navy and Army Boxing Championships, decided at Aldershot during the last week in October, were wonderfully successful. The various winners were:—Officers: Feather, Capt. R. C. Williams (R.F.A.); Light, Capt. R. V. Cowley (R.A.M.C.); Middle, Capt. Lindsay (Rifle Brigade); Heavy, Lieut. A. M. Read (7th Hariana Lancers); all were new to championship honours. Warrant, Petty, and Non-Com. Officers and Men: Feather, Warrant, Corpl. R. Darley, 1st Royal West Kent

(holder); Light Weights, Lance-Corpl. A. Baker, 1st Royal West Kent (holder); Middle Weights, Pte. Harris, 2nd Coldstreams; Heavy Weights, Gunner Hewitt, Royal Marine Artillery (holder).

The final of the Amateur Fencing Championship (Epee) was decided at Lincoln's Inn on July 5, there being eight competitors, including C. Leaf Daniell, winner in 1908. Eventually he had to contend with R. Montgomerie for the honour, of which the latter deprived him after the pair had tied.

Not a great amount of headway was made with amateur wrestling. The National Amateur Association Championships were split up amongst various affiliated clubs.

The final for the Adams Shield, the chief prize in the gymnastic world, was decided at Birmingham on April 17, when S. Hodgetts, Birmingham, won by 27 marks.

The Secretary of the Amateur Boxing Association is E. T. Calver (Room 104), 49, Finsbury Pavement, E.C.; and the Hon. Sec. of the Amateur Gymnastic Association, E. L. Levy, Liverpool Chambers, Cherry Street, Birmingham.

CRICKET.

OWING to the visit of the Australian cricketers, the season of 1909 was somewhat more crowded with games than usual, and the Test matches naturally detracted somewhat from the interest of the County Championship. Moreover, the weather was on the whole not favourable for the summer game, the unsettled conditions affecting both the play and the finances of the clubs.

The following table shows at a glance the result of every match in the Championship series. The top line gives the outcome of the home fixtures, the bottom line the result of those played away:—

County	Derbyshire	Essex	Gloucester	Hampshire	Kent	Lancashire	Leicestershire	Middlesex	N'thamptsh.	Notts.	Somerset	Surrey	Sussex	Warwick	Worcester	Yorkshire

w Won. l Lost. d Drawn. A Abandoned.

Kent won, and deserved to win, the County Championship, for the second time in its history, their previous success being in 1906. Of their 26 fixtures they won 16, lost only 2, and drew 8. Lancashire ran a good second, and Yorkshire was third.

The following table shows the final record:—

Pos'n.	County.	Played	Won.	Drawn.	Lost.	Points.	Percentage
1	Kent	26	16	8	2	14	77.77
2	Lancashire	26	14	6	4	10	55.55
3	Yorkshire	26	12	10	4	8	50.00
4	Sussex	26	7	16	3	4	40.00
5	Surrey	26	10	7	7	9	39.13
6	Middlesex	21	6	10	5	1	9.09
7	N'thamptsh.	18	9	1	8	1	5.88
8	Hampshire	22	7	8	7	0	—
9	Worcestershire	20	8	4	8	0	—
10	Notts	19	6	5	8	—	—14.28
11	Somerset	16	4	5	7	—	—27.27
12	Warwicksh.	20	3	9	8	—	—45.45
13	Leicestershire	21	3	8	10	—	—53.84
14	Essex	28	2	9	7	—	—55.55
15	Derbyshire	21	2	4	15	—13	—76.47
16	Glostershire	22	1	8	13	—12	—85.71

Exclusive of matches, Essex v. Leicestershire, at Leyton, June 24, 25, and 26, Essex v. Middlesex, at Leyton, June 28, 29, 30, and Derbyshire v. Notts, at Glossop, July 29, 30, 31, abandoned without a ball having been bowled.

According to the rule laid down by the M.C.C., "One point shall be reckoned for each win; one deducted for each loss; unfinished games shall not be reckoned. The county which during the season shall have, in finished matches, obtained the greatest proportionate number of points shall be reckoned champion county."

Kent owed their success to the fine batting of Messrs. J. R. Mason, A. P. Day, and K. L. Hutchings, and the excellent bowling of Blythe and Mr. D. W. Carr—the latter a bowler of what are now familiarly called "googlies." Mr. Mason never batted so well.

The number of centuries scored in county matches was 119, as against 153 in 1908. These were distributed: in May 30, in June 24, in July 30, and in August 35. The highest individual score was 276 by Hayes, R. Relf coming next with 272 not out. The batsmen who scored a century in each innings of a match were, viz., Hobbs, Mr. G. L. Jessop, and Llewellyn for Surrey, Gloucestershire, and Hampshire respectively. Hobbs had six centuries to his credit in the season; Denton, Llewellyn, and Sharp four each; and Mr. A. P. Day, Hayes, Mr. K. L. Hutchings, Mr. G. L. Jessop, Mr. J. R. Mason (three in succession), R. Relf, Rhodes, Tydesley, and B. B. Wilson had three centuries each. The highest total was 742, made by Surrey v. Hampshire at the Oval; the lowest was 26, made by Yorkshire on the same ground. The closure was applied 37 times, the county applying it winning in 17 instances, while in the other 20 there was no definite result.

The Australian team was successful in retaining "the ashes." Five tests were played. England won the first at Birmingham by 10 wickets; Australia won the second at Lord's by 9 wickets; Australia won the third at Leeds by 126 runs; and the remaining two, at Manchester and the Oval, were drawn. During their tour the Australians played 39 matches, of which they won 13, drew 22, and lost 4; their victors being Surrey (by 5 runs), M.C.C., England, and Lord's/Londonborough's XI. Their most successful batsmen were W. Bardsley, average 46.38; W. W. Arm-

strong, 43.52; and V. S. Ransford, 43.48. Armstrong, F. Laver, C. G. Macartney, J. A. O'Connor, W. J. Whitty, and A. J. Hopkins were all successful bowlers, but Cotter proved expensive. The team as a whole was one of the best that has ever come over, and the number of drawn games was not due to slow cricket, but in most instances to the weather.

The Oxford v. Cambridge match at Lord's, which ended on July 7, was ruined by rain, and ended in a draw. Oxford scored 257, to which the Cantabs replied with 183. Oxford declared their second innings closed at 191 for 8 wickets, and thus set Cambridge 276 to win. The latter went in at 4.15, and two hours later—when they had made 69 for 4 wickets—bad light caused the game to be abandoned. The Eton v. Harrow game was also a fiasco, there being no play on the Saturday (July 10), owing to a deluge overnight. This probably robbed Harrow of a victory, as Eton, with 3 wickets to fall, required 53 to win. The scores were: Harrow, 125 and 76; Eton, 92 and 67, for 7 wickets. In the Gentlemen v. Players match at Kennington Oval, on July 8, 9, 10, the Players won by 64 runs, scoring 203 and 189 to 110 and 213; whilst at Lord's the following week the Players triumphed by 200 runs, scoring 214 and 204 to 76 and 142. Barnes, the fast bowler, was in great form in the latter match.

A few individual records must conclude this article. Mr. J. R. Mason headed the batting averages with 65.25 for 14 innings, but the real premier honours belong to Mr. A. P. Day, with an average of 44 for 24 innings. Amongst the professionals, Hayward, Rhodes, and Hobbs all have figures of over 40, and Rhodes also took over 100 wickets, so that he must be reckoned as the best all-round cricketer of the year. Blythe was the only bowler to take over 200 wickets; those taking over 100 being Haigh, Thompson, Rhodes, Rushby, Mr. W. Brearley, Dean, A. E. Relf, Dennett, Tarrant, S. G. Smith, Wass, Hirst, Leach, Buckenham, Jayes, Fielder, and Lees. The averages point to its being a bowler's season, as might be expected from the wet pitches.

CROQUET.

YEAR by year croquet increases in popular favour, and the quality of the play is also still on the up grade. This was amply illustrated at the Championship meeting, in which the players were greatly handicapped by adverse weather conditions. In spite of this it was generally conceded that more skilful croquet had never been seen at a Championship gathering. In the semi-final round of the Open Championship there was a stern contest between C. L. O'Callaghan and E. Whitaker, the former being right at the top of his form, and winning by 3 and 13 points after losing the second game by 4. In the other semi-final match G. Ashmore defeated Mrs. Beaton, the famous lady exponent of the game being below her usual high standard. The final produced a contest in which the steadily calculated methods of Mr. Ashmore proved superior to the bright but rather erratic tactics of the Irishman, who was beaten by 28 and 26 points after winning the second game by 19. This was the third occasion on which Mr. O'Callaghan had figured as runner-up, his conquerors being R. C. J. Beaton in 1907, and C. Corbally in 1906. He had some solatium, inasmuch as he and Miss H. Johnson Houghton won the Mixed Doubles Championship. The opposing pair were G. Ashmore and Mrs.

Newton (who also reached the final stage in the previous year), the latter being defeated by 27 and 19 points, after winning the second game by 15. In the Ladies' Championship Miss N. Beausire, a member of the powerful Hooton Park Club, was successful; for though she lost the opening game with Miss B. Willis in the final round by 18 points, she won the other two by 22 and 24 points respectively. Miss H. Johnson Houghton was strongly fancied for this event, but she succumbed to Mrs. W. P. Blood in the fourth round. No fewer than eighty entered for the Handicap Singles at the most important meeting of the season, E. J. Clarke (½) beating Miss A. Wood (1½) in the final stage by 15 points. Mr. O'Callaghan won the Champion Cup at Roehampton in August, his croquet being so fine that he was assured of victory before the last two rounds were played. His final score was 14, and next to him came H. Maxwell Browne (14), R. C. J. Beaton (12), K. H. Izard (10), and H. F. W. Prince (10). Mrs. Beaton and G. Ashmore scored 6 each.

CYCLING.

AFTER the excitement engendered by the Olympic Games the previous season, cycling in 1909 was comparatively uneventful. The first big meeting of the year was at Portsmouth on June 26, when the Amateur Championships were decided. There were 12,000 people present, and splendid racing resulted. The outstanding feature was the magnificent riding of W. J. Bailey, of the Polytechnic C.C., who won the Five Miles, doing the final in 13 mins. 37½ secs., and the One Mile, final in 2 mins. 44½ secs. But for pulling his foot out of the pedal strap he would possibly have won the Quarter Mile as well, but that went to C. B. Kingsbury, of the Portsmouth N.E.C.C., whose time in the final was 32 secs. On July 2 and 3 the fine track at the Stadium, Shepherd's Bush, London, was the scene of a 24 hours race under the auspices of the National Cyclists' Union. It was estimated that about 20,000 people saw some portion of the contest, which was participated in by path and road racers of the best repute to the number of 12. Nine actually finished, three of whom broke record. The distances covered by the first six men were—

	Miles.	Yds.
J. H. Bishop (Beaumont C.C.)	513	1,430
E. H. Grubb (Vegetarian C.C.)	492	1,720
P. Herman Combes (Club Velocipedique Le Vallois)	486	1,100
H. D. Hanks (Pegasus C.C.)	471	1,740
E. R. E. Jones (Northampton Poly. Inst. C.C.)	469	340
C. C. Cole (Poly. C.C.)	459	1,100

Combes equalled record at 154 miles, and at 172 miles was eleven minutes ahead of the previous best. Bishop went ahead at 210 miles, and in 12 hours had ridden 284 miles, kept in front to the close, and for a little over 22 hours disposed of all previous records.

On July 3 and 5 the British Empire Championships were decided at Glasgow in wretched weather. All the best riders of the three countries participated except C. B. Kingsbury and Dan Flynn, the Irish flier. England won two of the three championships, and also secured the team race. W. J. Bailey was first in the Mile and Ten Miles, whilst Ben Jones took the Quarter Mile—riding over in the final,

which was ordered to be re-run, owing to a protest. In the Ten Miles Team Race, A. J. Bailey, Ben Jones, and A. J. Denny, all of England, were first, second, and third.

The World's Amateur Championships were decided at Copenhagen in the middle of August, when the victories secured by British riders in 1908 were repeated, thus proving that in one branch of the sport at least England is not decadent. In the 100 kilometres race Leon Meredith, Paddington C.C., won for the fifth time—a really remarkable achievement. His time was 1 hr. 39 mins. 8½ secs. W. J. Bailey won the 1,000 metres, beating Schiller (France) and Neumer (Germany) in the final; time, 1 hr. 32½ secs. Prior to this, on June 26, John Harvey, of Birmingham, had won the 25 Miles Amateur Championship, Meredith, the holder, being unplaced; whilst at Herne Hill on Aug. 14, Vic. Johnson and F. G. Hamlin, Putney A.C., won the Mile Amateur Tandem Championship, and C. H. Bartlett the 50 Miles.

FOOTBALL.

THE ASSOCIATION GAME.

ASSOCIATION football continues to be divided against itself, the chief amateur clubs and their organisation, the Amateur Football Association, having flourished exceedingly since 1907.

England had a great year, winning the triple crown without the loss of a goal, an unprecedented feat. The following table summarises the results in 1909:—

		Goals.	Goals.
Feb. 13	Bradford ... England	4	bt Ireland
Mar. 1	Wrexham ... Wales...	3	bt Scotland 2
" 15	Nottingham ... England	2	bt Wales 0
" 15	Glasgow ... Scotland	5	bt Ireland 0
" 20	Belfast ... Wales...	3	bt Ireland 2
April 3	Crystal Palace England	2	bt Scotland 0

The amateur International team won all their matches, including the three matches in Olympic Games. They beat Sweden twice, Holland twice, Denmark, Ireland, Wales, Germany, Belgium and Switzerland. Winning 11 matches, they scored 78 goals to 7. The League Internationals resulted as follows:—

	Goals.
Oct. 10—England beat Ireland at Belfast ...	5-0
Feb. 10—Scotland beat Ireland at Belfast...	2-1
Feb. 27—Scotland beat England at Glasgow	3-1

The Football Association Challenge Cup—or, as it is more generally called, the English Cup—was as attractive as ever, huge crowds being present at the matches. A series of qualifying matches led up to the first round, which was played on Jan. 16. It was notable for the defeat of the holders, Wolverhampton Wanderers, and of Aston Villa, Middlesbrough, Sheffield United, and Notts County. Finally, Bristol City, Derby County, Manchester United, and Newcastle United were left in to contest the semi-final ties on March 27, when Manchester United and Bristol City qualified to meet in the final at the Crystal Palace on April 24. At this there were 71,000 spectators, and Manchester won by 1-0, the winning goal being scored by A. Turnbull. Bristol were somewhat unlucky to have two of their regular men on the injured list, but they lost easy chances of scoring. Lord Charles Beresford presented the Cup and medals to the winning team. The amount taken at the gate was £6,434. The Football Association Amateur Cup was won for the second time in its history

by Clapton, who beat Aston United at Iford by 6-0.

The First League Championship was won by Newcastle United, with a total of 53 points out of a possible 76. Everton came next with 46, Sunderland third with 44, and Blackburn Rovers fourth with 41. It is estimated that six million spectators witnessed the 380 matches, an average of 16,000 a match. The attendance at Second League matches averaged 7,500 per match. In the Southern League, which had been reconstituted to 21 clubs owing to the withdrawal of Fulham and Tottenham Hotspur, Northampton took the lead from the start, and kept it to the finish, Swindon Town being second and Southampton third.

The Inter-Varsity match ended in a drawn game at Queen's Club on Feb. 20, the score being one goal each. The record now stands—Oxford 17 wins, Cambridge 17, drawn 2. The Amateur Football Association Cup was won by the New Crusaders, who beat the Casuals by 5-1. In the Arthur Dunn Cup, Old Malvernians beat Old Salopians, 3-0. New Crusaders won the championship of the Southern Amateur League. The Secretary of the Football Association is Mr. F. J. Wall, 104, High Holborn, W.C. The address of the Honorary Secretary of the Amateur Football Association is 79½, Gracechurch St., London, E.C.

RUGBY UNION.

Unfortunately the season of 1908-9 was marred by a squabble between the Rugby Unions of England and Scotland that added to the dignity of neither. The Scottish authorities, however, ultimately acknowledged that they had acted in an unconstitutional manner by submitting the whole matter to the Rugby International Board. In the season's programme Wales, for the second season in succession and for the fifth time in ten years, secured the International Championship. England was beaten at Cardiff, on Jan. 16, by a goal and a try to nil; Scotland, at Edinburgh, on Feb. 6, by a placed goal (5 points) to a penalty goal (3 points); and Ireland, at Swansea, on March 13, by 3 goals and a try to a goal. In addition, Wales also defeated the Australians and France. The relative positions and the scores in the International competition are shown in the following table:—

		W.	D.	L.	Pts.	For.	Agst.
						G.T.Pts.	G.T.Pts.
1	Wales	3	0	0	6	5 2=31	* 2 0=8
2	Scotland ...	2	0	1	4	* 4=30	* 1=16
3	England	1	0	2	2	2 3=19	5 2=31
4	Ireland	0	0	3	0	* 3 0=13	4 6=38

The tour of the Australians ("Wallabies") was not nearly so successful either financially or from a sporting point of view as previous ones made by the New Zealand and South African combinations.

A professional Australian organisation toured the British Isles from the beginning of October, 1908, to the middle of March. The feature of their displays was the magnificent play of H. H. Messenger, the three-quarter back. The Northern Union contest, England v. Wales, on Dec. 28, at Broughton, was won by the former by 5 goals and 7 tries (31 points) to 2 goals and a try (7 points).

The success of Wales over France has already been referred to. In addition to that game, the

* One penalty goal.

Frenchmen went under to England, at Leicester, on Jan. 30, 1909 (2 goals, 4 tries—22 points—to nil), and to Ireland, at Dublin, on March 20 (2 goals, a penalty goal, and 2 tries—19 points—to a goal and a try—8 points). Before dismissing the International phase of the sport, it may be mentioned that the Calcutta Cup game between England and Scotland had to be played at Richmond (March 20), owing to the Rugby Union's own ground at Twickenham not being ready. England led at the interval, but the defence of their three-quarters broke down subsequently, and the final score was 3 goals and a try (18 points) to a goal and a try (8 points) in favour of the Scots.

Enormous interest attached to the meeting of the Universities at the Queen's Club, West Kensington, on Dec. 12, 1908, and 13,500 people witnessed the match. Prior to the all-eventful day Oxford had won twelve and lost one game, and Cambridge had registered eight victories and four defeats. A finer struggle was never seen at Queen's, and the result was a draw—each side scoring a placed goal in the first half of the play. Oxford's try was obtained by H. Martin (Balliol), G. Cunningham (Magdalen) kicking the goal, whilst for Cambridge K. G. McLeod (Pembroke) converted the try scored by F. C. Pymian (Caius). Durham, for the fifth time in ten seasons, exclusive of the period when they were joint holders with Devon, won the Rugby County Championship. They won six of their seven inter-county engagements. Lancashire won the Northern Union Championship.

The Rugby Union offices are on the Union's new ground at Twickenham (Hon. Sec., C. J. B. Marriott).

GOLF.

THE most notable event of the early part of 1909 was a foursome tournament for £200, in which Jas. Braid and J. H. Taylor defeated G. Duncan and C. H. Mayo by 2 and 7.

THE OPEN CHAMPIONSHIP.

From 1860 to 1870 (both inclusive) the Championship emblem was a belt, which Tom Morris, jun., made his own by successive wins in 1867, 1868, 1869, and 1870. The Championship remained in abeyance two years, when the present cup was offered for competition. Up till 1891 it was competed for at 36 holes, but after 1891 the course was extended to 72 holes.

The serious competitions of the year wound up most successfully with the final stages of the *News of the World* £240 Professional Tournament, at Walton Heath, in October. There had previously been qualifying competitions for this event, which produced some very fine golf; and eventually Tom Ball, West Lancashire, received the gold medal and £100, Alex. Herd, Huddersfield, the silver medal and £30, and Harry Vardon and J. Hepburn, bronze medals and £15 each.

HOCKEY.

IN the more serious of the International contests England came out on top easily, for they were undefeated and scored 19 goals to 2, Wales being beaten by 6-0 at Swansea, Ireland by 8-0 at Dublin, and Scotland by 5-2 at Manchester. Shoveller played grandly against the two former countries, but was absent from the team that opposed Scotland. The last-named finished second on the list by virtue of victories over Wales (3-2) and Ireland (3-2) at Wrexham and Glasgow respectively; and Ireland third, their win of 8-1 over Wales at Cork being quite their best performance. Wales lost all their games, and only scored 3 goals as against 17 of their opponents. The Midlands and South fought hard for supremacy in the inter-divisional competition. When they met at Bournville the result was a draw of one goal each, and eventually they came out with three wins and a draw apiece, but the Midlands had the better goal average. The East finished third, North fourth, and West—who failed to win a game—last.

England's International games for 1909-10 are as follows:—England v. Ireland, in England; Scotland v. England, in Scotland; France v. England, in France. The Hon. Sec. of the Hockey Association is Mr. Philip Collins, 6, Bedford Row, W.C.

LAWN TENNIS.

THE grass court season may be written down as uneventful. Our home players of the first class are now few in number, there was no American invasion, while none of our Colonial visitors showed form approaching that of Norman Brookes or A. F. Wilding. Premier honours again fell to A. W. Gore, who, in his forty-second year, secured the Championship for the third time. M. J. G. Ritchie was the challenger, and lost the match after being two sets up. Gore and H. Roper Barrett won the Doubles, the runners-up being H. A. Parker and S. N. Donst—an Australasian combination; and Miss Dora Boothby won the Ladies' Championship after an excellent match with Miss A. M. Morton. These ladies met on several other occasions during the season, Miss Morton winning at Leicester and

Redhill, and Miss Boothby at Croydon and in the Kent Championship.

H. L. Doherty won the Open Singles at Nottingham and Scarborough, the only tournaments at which he played. T. M. Mavrogordato accomplished some good performances, the best being his victory over Barrett at the Gipsy Meeting. C. P. Dixon won at Chiswick, Lowestoft, and Folkestone; Kenneth Powell at Leicester; R. B. Powell at Brighton and the Northern Tournament; Doust at Edgbaston; and J. M. Boucher at Newport. Germany was to the fore at Eastbourne, O. Frotzheim beating F. W. Rahe, a greatly improved player, in the final of the Singles. Mrs. Lambert Chambers was out of the game all the summer, and Mrs. Sterry's match-play was limited to two or three of the later tournaments. Warwickshire won the Gentlemen's Inter-County Championship, Surrey the Ladies' Inter-County Championship, and Oxford beat Cambridge both in the Singles and the Doubles. The British Isles challenged for the "Davis" Cup, but our representatives—Dixon, J. C. Parke, and W. C. Crawley—failed to win a match against the American team. In view of the dearth of young English talent, the future career of Kenneth Powell will be watched with interest. Miss Garfit repeated her wonderful achievement of 1903 by again winning the Ladies' Welsh, Scottish, and Irish Championships.

ROWING.

AT Oxford University the "Torpids" were commenced on Thursday, Feb. 28, and concluded on Feb. 24. The racing started tamely, but improved after the first two days. Christ Church easily maintained their position as head boat, the next three crews being Balliol, New College, and Magdalen. Exeter College headed the second division and Lincoln College the third. The Cambridge University Lent eight-oared races opened on Thursday, Feb. 24, and terminated on the 27th, being chiefly remarkable for the high standard of oarsmanship maintained by Jesus College, who easily retained the headship of the river, with Third Trinity heading the second division and Selwyn the third. On March 13 Pembroke College won the Clinker Fours at Cambridge; whilst the Oxford Summer Eights, which finished on May 26, were headed by Christ Church.

The University Boat Race took place on Saturday, April 3, over the usual 4 miles 2 furlongs between Putney and Mortlake, and, for the first time for many years, the result utterly confounded the critics, as Cambridge, who were strong favourites throughout the practice, were defeated, after a splendid race over the first three miles of the course, by three lengths and a half, the full time being 19 mins. 50 secs. D. C. R. Stuart, the Cambridge stroke, brought his University career to a close with a defeat: he had previously won three races against Oxford. The Oxford eight of 1909 was the heaviest that ever rowed in the University race. The aggregate was 200 st. 10 lb., and the average 12 st. 8½ lb. No No. 7 so heavy as Kirby had ever rowed in the winning boat before, so that altogether it was a most remarkable race, and the success of Oxford reflected the greatest credit upon Mr. Harcourt-Gold (Eton and Magdalen), their coach, who four times stroked the Oxford boat himself, winning in 1896-7-8.

Cambridge University Summer Eights terminated on June 12, when Jesus College, after

making the one bump necessary to go to "the head of the river" on the first night, easily retained that place and emerged triumphant after a lapse of 24 years. King's College finished head of the second division boats. On June 11 C. A. Gladstone and H. R. Barker (Christ Church) defeated Sir R. Parker and E. V. Culme-Seymour (New College) by 2 lengths in the final heat for the Oxford University Pairs.

Once more record was beaten in the matter of entries received for Henley Regatta, which took place on July 5, 6, 7, and 8, there being four full days' racing for the first time in the history of the meeting. The entries numbered 77—the previous highest number being 74 in 1907. Unfortunately the weather was wet and cold, which caused the attendance to fall considerably below the average until the last day. The only foreign entries were in the Grand Challenge Cup for Eights (Royal Club Nautique de Gand, Belgium) and in the Diamond Sculls (Rudolph Lucas, Mayence R.C., Germany). For the third time in four years (the regatta was closed to foreigners in 1908 in view of the Olympic fixture) the Belgians won the Grand, defeating Jesus College, Cambridge, in the final after a splendid race. Most critics were of opinion that the Belgians were not so well together as the crew that won in 1907, and the visitors were generally accounted lucky to have disposed of Magdalen College, Oxford, in a previous heat, for in that race the Oxford eight was sadly handicapped by the station and bad rowing conditions. Indeed, the Magdalen cox. had his rudder hard on for the first quarter of a mile. A. A. Stuart, of Kingston R.C., a younger brother of D. C. R., won the Diamond Sculls, beating the German, Lucas, in the final through the latter's inability to stay, in 8 mins. 30 secs. The winning Grand Eight was named as follows:—Royal Club Nautique de Gand, Belgium—Urbaine Molmans (bow), 10 st. 12 lb.; Guillaume Visser, 11 st. 10 lb.; St. Kowalski, 11 st. 10 lb.; Remi Urban, 12 st. 10 lb.; Francois Vergucht, 12 st.; Polydore Vierman, 12 st. 8 lb.; Oscar de Sonville, 12 st. 7 lb.; M. M. Rudolphe Poma (stroke), 11 st. 8 lb.; Alfred Vanlandeghem (cox.) 8 st. 12 lb. The other trophies were won by:—Ladies' Challenge Plate (eights)—St. John's College, Oxford. Time, 7 mins. 9 secs. Stewards' Challenge Cup (fours)—Thames R.C. Time, 7 min. 38 secs. Wyfold Challenge Cup (fours)—Balliol College, Oxford. Time, 7 mins. 44 secs. Thames Challenge Cup (eights)—Wadham College, Oxford. Time, 7 mins. 21 secs. Silver Goblets (pairs)—Leander R.C. (B. C. Johnstone and E. G. Williams). Time, 8 mins. 30 secs. Visitors' Challenge Cup—Christ Church, Oxford. Time, 7 mins. 53 secs.

The success of Thames in the Stewards' Cup was the first they had gained at Henley since 1894. In the final they met Magdalen, Oxford, who defeated them the previous year, and it is worth noting that both clubs were represented by identically the same men on each occasion. Balliol's win in the Wyfold's was their first at the Regatta since 1901, and in beating Christ Church in the final they were only a second outside the record put up by Burton-on-Trent in 1902. The class in the Diamonds was not superlative.

A. A. Stuart followed up his Henley victory by winning the London Cup at the Metropolitan Regatta on July 20, and three days later he set the seal on his fame by securing the Wingfield Sculls, emblematic of the Amateur Championship of the Thames, from W. Kinnear, Kensington

R.C., G. L. Thompson, Trinity Hall, Cambridge, and E. de J. Edey, Auroi R.C., of whom the last mentioned strained his arm and did not finish. The time, 26 mins. 26 secs., was the slowest since 1890, but Stuart won with great ease, and, moreover, the conditions were far from good.

J. H. Secker, who after holding the title of Amateur Punting Champion from 1904 to 1907 lost it to A. Gordon-Dickson in 1908, regained the honour on July 21, 1909, the holder being unable to compete owing to an accident sustained whilst hunting. On the same afternoon F. C. Covell and H. A. Graves secured the Amateurs Double Punting Championship. On the 25th of the same month F. Nicholls, of Egham, won the Professional Punting Championship, defeating W. Haines, of Old Windsor, who had held the title from 1904.

Anxious to further the professional side of the sport, Mr. H. C. Lane and Mr. Dan Fitte, gentlemen well known in amateur rowing circles, offered sums of £200 and £500 for handicaps on the Thames during the year. The first event was confined to scullers resident in the United Kingdom, and took place on April 19 and 20. Best boats were used, the course was between Putney Bridge and Chiswick Church, and 40 men accepted their starts, which ranged from scratch (Ernest Barry, Champion of England) to 120 seconds (Beville de R. Wimberley). The event was managed by a mixed committee of well-known amateurs and professionals with Mr. Victor M. Mansell as hon. sec., and proved entirely successful from both sporting and financial aspects. Barry won his heat in the first round, as did Chas. (Wag) Harding (30 secs. start) who was Champion of England in 1895-6. Barry was defeated in the second round by William Coles, of Eritch, whilst the final heat resulted in favour of George Yeoman Pocock, of Eton, 70 secs. start, a 17-years-old son of the bargemaster of The Fishmongers' Company. He only defeated Albert Bowton, of the river Lea, 73 secs. start, by half a length, whilst William Coles, 65 secs. start, was third, and Harding fourth.

The £500 Professional Handicap was decided between Putney and Mortlake on July 15, 16, and 19. There were very few men in England who had previously rowed the Thames Championship Course at any kind of pace, hence it was quite surprising to find that thirty competitors actually took part in the twelve heats decided on the first day. On the second day Ernest Barry, who of course figured at scratch, was beaten by F. A. Bowton (who had taken second prize in the £100 handicap earlier in the year), in receipt of 60 secs. start, very easily, but a fast tide and following wind were all against scratch men making up long starts. J. F. ("Bossy") Phelps, of Putney, 15 secs. start, accounted the second best man in the country, was defeated the same afternoon by George Robert Luck, of Eritch, 65 secs. start, and eventually the final result as follows:—George Robert Luck, Eritch, 65 secs. start (£250); George Daniel Cordery, Putney, 61 secs. (£200); William Coles, Eritch, 58 secs. (£150); Frederick Albert Bowton, Stamford Hill, 60 secs. (£25). The racing conclusively proved that there is plenty of promising sculling material existent, and that it only required monetary encouragement to develop.

George Luck followed up his success in the £500 handicap by winning the race for Doggett's

Coat and Badge, which was decided on July 30 between London Bridge and Chelsea.

R. Arnst, who had won a race for the Sculling Championship of the World the previous December, met W. Webb on the Wanganui River, New Zealand, on June 22, and again proved successful. The stakes were £500, and Arnst won by 4 lengths in the record time of 18 mins. 14½ secs. Great efforts were made to match Arnst and Barry, but they proved unavailing.

A third Professional Sculling Handicap, this time between Putney and Hammersmith Bridges, was decided on October 29 and 30. There were 58 entrants, of whom 47 accepted, and 45 actually competed. Some of the rowing was very fine, and in the final heat Cecil Gipson, Herne Bay, 29 secs. start, won by half a length from William Albany, Lea Bridge, 14 secs., with Ernest Barry, Champion of England, scratch, 3 lengths further in the rear. It was notable that of the three big professional events not one went to a Putney man. Gipson is an ex-amateur who had previously met with a fair amount of success at coast regattas.

The Hon. Sec. of the Amateur Rowing Association is Mr. R. G. M. Gridley, Leander Club, Putney, or Henley-on-Thames.

SWIMMING.

THOUGH swimming in 1909 did not possess so great an attraction as it did in the previous year, which was made celebrated in sporting history by virtue of the Olympic Games being held in England, it nevertheless made considerable progress from an educational point of view. Not the least important feature of the year was the decision of the Royal Life-Saving Society to send Mr. William Henry, its general hon. secretary, on a missionary trip to Canada. The lectures and exhibitions given by Mr. Henry extended over a considerable period, with the result that several new branches of the parent society were formed, and are likely to have far-reaching results.

The remarkable form shown by Mr. Battersby at the Olympic Games was improved upon in 1909, and he was able to lower Mr. Taylor's colours in the mile and also beat world's record, his time being 24 mins. 1½ secs. The same swimmer also lowered the 300 yards record to 3 mins. 31½ secs. The quarter mile record also stands to his credit, but this was made at the end of 1908, and is 5 mins. 26½ secs.

The International Water Polo record to date is as follows:—

	Plyd.	Won.	Drn.	Lost.	Goals.
					For. Agst.
England	34	30	1	3	211 30
Scotland	29	13	1	15	69 98
Wales	29	11	3	15	85 122
Ireland	30	4	1	25	19 165

The Hon. Secretary of the Amateur Swimming Association is Mr. Hurd, 24 Cantley Avenue, Clapham, S.W.; and the Secretary of the Royal Life-Saving Society, Mr. William Henry, 8 Bayley Street, Bedford Square, W.C.

TENNIS AND RACKETS.

THE holder of the Amateur Tennis Championship, Jay Gould, did not defend his title, and the competition proved a very easy task for Eustace Miles, the old Cantab going through without the loss of a set. At Lord's, in the contest for the M.C.C. Gold Prize, Miles was

also easily successful. In the inter-Varsity matches Cambridge won the Doubles, but lost the Singles. There was no match for the Professional Championship, C. ("Punch") Fairs being left in unchallenged possession.

At rackets E. M. Baerlein again showed himself to be the best amateur, defeating H. Brougham in the challenge round of the Singles Championship by 3 games to 1. Baerlein and Percy Ashworth secured the Doubles Championship, the holders of which, F. Dames-Longworth and Vane Pennell, retired. The Public Schools Challenge Cup went to Charterhouse, who beat Eton in the final. In the Army Championships the 50th Brigade R.F.A. (Col. C. D. King and Capt. H. H. Bond) defeated the 1st Life Guards (Lieut. J. J. Astor and Lieut. Lord Somers), the holders, in the challenge round of the Doubles; while in the Singles Capt. A. Berger, A.S.C., caused some surprise by beating the holder, Lieut. J. J. Astor. Oxford easily beat Cambridge in both Doubles and Singles.

The Professional Racket Championship of England was played for by W. Hawes (Wellington) and C. Williams (Prince's Club), the latter being successful. A £100 Professional Handicap was held at Queen's Club, and this resulted in a win for T. Jennings, of Marlborough Lines, Aldershot.

THE TURF.

UNDOUBTEDLY the most pleasing feature of the Turf season of 1909 was the success attained by horses running in the colours of the King. At one time His Majesty appeared likely to figure at the head of the list of winning owners, and although that distinction eventually fell to Mr. Fairie, King Edward's winnings in stakes exceeded his own previous best, and, to the delight of his subjects, His Majesty had the pleasure of leading in the Derby winner. The three-year-olds of the season were quite up to the average, and a batch of two-year-olds of excellent promise are awaiting the campaign of 1910. Frank Wootton, who only just missed premier place amongst the jockeys in 1908, achieved that distinction despite a rest in the middle of the season enforced by a family bereavement. Wootton is not yet seventeen years old (he was born on Dec. 13, 1893), and therefore his success is all the more remarkable.

The flat race season opened at Lincoln on March 22, and the Lincolnshire Handicap, the value of which was £1,400, was carried off by the Duke of Sparta, but, as reference to this, as well as to the other chief handicaps of the year, will be found in the tabulated list of records, no further comment is necessary. Bayardo wound up his two-year-old season with such high credentials that he was expected to commence his three-year-old career with distinction. The unexpected happened, for on his first appearance, in the Two Thousand Guineas (value £5,000), at Newmarket, on April 28, he was badly beaten. Starting favourite at 13 to 8 on, in a field of 11, he could finish no nearer than fourth. Minoru, a brown colt by Cyllene—Mother Siegel, bred in Ireland, and leased for his racing career by the King, won by two lengths, with Phaleron second and Louviers third. The winner was ridden by Herbert Jones and trained by Richard Marsh. Previously Minoru had been allowed to run for the unimportant Greenham Stakes (£875) at the Newbury meeting, where he won by a length and a half

from Valens. Despite the Two Thousand Guineas success of the King's colt, he was not allowed to start favourite for the Derby—decided on May 26. That honour was reserved for Sir Martin, an American-bred colt by Ogden—Lady Sterling. Minoru, however, again ridden by Herbert Jones, won by half a length from Louviers, with William the Fourth third, Valens fourth, and Bayardo fifth in a field of 15. Sir Martin fell, and seriously interfered with William the Fourth and others; therefore it is quite possible that Minoru was lucky to win. The colt was the King's third Derby winner, his predecessors being Persimmon and Diamond Jubilee, but the victories of the last two named were achieved prior to His Majesty's accession, and Minoru enjoys the distinction of being the first colt to win the Blue Riband in the colours of a reigning monarch. Following his Epsom victory, Minoru was successful in the St. James's Palace Stakes (£1,950) at Ascot on June 17, and the Sussex Stakes (£627) at Goodwood on July 28, but he beat nothing of any note on either occasion.

In the St. Leger the King's colt met his Waterloo. Bayardo, subsequent to his Two Thousand Guineas and Derby disappointments, earned winning brackets four times off the reel. The son of Bay Ronald—Galicia picked up the thread of success in the Prince of Wales Stakes (£2,150) at Ascot on June 15; the Sandringham Foal Stakes (£1,724), over a mile and a quarter, at Sandown Park on June 25; the Eclipse Stakes of a mile and a quarter (£8,870) at Sandown; and the Duchess of York Plate (£975) at Hurst Park on July 24. It had by now been made clear that Bayardo had regained something, if not all, of his two-year-old brilliancy, and the St. Leger, in which he could again try conclusions with Minoru, was awaited with more than usual interest. The great Doncaster event (£6,450) was decided on Sept. 8, and resulted in Bayardo unmistakably demonstrating his superiority, as he beat Valens easily by a length and a half, whilst Minoru could only finish fourth.

The three-year-old fillies of 1909 were probably of moderate class only. The best were Electra, by Eager—Sirenia, Perola, by Persimmon—Edmee, and Princesse de Galles, by Gallinule—Eella. The first-named won the One Thousand Guineas (£4,100) on April 30, Princesse de Galles being second and Perola third, but, as so frequently happens amongst fillies, the form was subsequently altered. Electra could only finish second to Louviers in the Newmarket Stakes (£2,140), and was unplaced in the Oaks (£4,950), in which the winner, Perola, defeated the King's filly, Princesse de Galles, by two lengths. In the Coronation Stakes at Ascot on June 16 Princesse de Galles beat Electra by a neck, but the latter was conceding 7 lb. Electra next ran in the Nassau Stakes of a mile and a half (£700) at Goodwood on July 30. She started an odds on favourite, but was beaten two lengths by Maid of the Mist, by Cyllene—Sceptre, who in four previous attempts had won only one small race. Afterwards Electra made amends by winning the Park Hill Stakes (£1,040) at Doncaster, her nearest attendant being Princesse de Galles. That the fillies were vastly inferior to the colts was proved in the Duchess of York Plate at Hurst Park in July, when Perola, at weight for sex, was a bad third to Bayardo, who beat Valens easily by two lengths.

A very promising lot of two-year-olds were

seen out during the year, those meeting with the greatest success being Lord Rosebery's Neil Gow, a colt by Marco—Chelandry; Lemberg, a colt by Cyllene—Galicia; Greenback, a colt by St. Frusquin—Evergreen; Admiral Hawke, a colt by Gallinule—Admiral; Charles O'Malley, a colt by Desmond—Goody Two Shoes; and Yellow Slave, a filly by St. Serf—Procurem. It may well be that Neil Gow will prove the best three-year-old in 1910.

●Of the great French races the Poule d'Essai for fillies (One Thousand) was won by Ronde de Nuit, the corresponding race for colts by Verdun (who afterwards secured the Grand Prix de Paris), the French Oaks by Union, and the French Derby by Negofol.

Other events of the English turf that call for notice are the Ascot Derby (£1,475), won by William the Fourth; the Ascot Gold Cup (£3,430), won by Bomba; the Hardwicke Stakes (£2,463), in which Primer defeated Valens and eight others; and the Ascot Gold Vase (£1,040), won by Amadis. The Princess of Wales Stakes (£4,844) was won by Dark Ronald, and the Jockey Club Stakes by Phalaron.

In a field of eight for the Middle Park Plate (£3,025), on Oct. 15, Lemberg was a pronounced favourite, and won comfortably by a neck from Whisk Broom, Admiral Hawke being third; and on the 28th of the same month Whisk Broom was the only animal found to oppose Lemberg for the Dewhurst Plate (£1,527), which the latter won by five lengths.

At the end of October the turf statistics showed Bayardo as the principal winning horse of the year, with ten races, value £24,157, to his credit. Minoru, six races, £15,425; Neil Gow, four races, £10,306; Phalaron, five races, £9,684; Lemberg, six races, £9,684; Dark Ronald, three races, £7,104; Electra, two races, £5,140; and Admiral Hawke, five races, £4,993, were his nearest attendants. The defunct Bay Ronald headed the list of winning sires, nine of his descendants having won 24½ races (½ signifying a dead heat) of the total value of £33,631. Bayardo and Dark Ronald were, of course, the principal contributors to the total. Cyllene, with 21 winners of 37 races, value £33,330, was next on the list, Lemberg and Minoru being his "star" performers; Gallinule, 22 winners, 40 races, value £27,666 10s.; whose best representatives were Admiral Hawke, Phalaron, Princess de Galles, and White Eagle, was third; Marco, 20 winners, 35 races, value £19,688 10s., came fourth; Persimmon (dead), 16 winners, 24 races, value £15,955 5s.; and Eager, 20 winners, 35½ races, value £13,952 10s., sixth. The chief winning owners were Mr. Fairie, 4 horses, 18 races, £35,159; H.M. the King, 7 horses, 13 races, £20,144; Duke of Portland, 9 horses, 16 races, £15,064 5s.; Mr. J. B. Joel, 16 horses, 25 races, £13,093; Lord Rosebery, 7 horses, 14 races, £12,573.

Of the jockeys, reference has already been made to F. Wootton. At the end of October he had ridden 668 rides in public, and had won 141 races. By many good judges he was pronounced the most resolute "finisher" since the days of Fred Archer; and D. Maher, second on the list with 98 winners out of 368 mounts, more than once paid tribute to the youngster's skill. Frank

Wootton has a younger brother, Stanley, who promises to develop into a fine jockey, having, up to the time mentioned, won 27 races. Statements were made at the end of the season that Maher, Halsey, and Dillon were retiring from riding, and that F. Wootton would during 1910 be first jockey for the popular Stanley House stable at Newmarket.

YACHTING.

So far as pure racing was concerned, the season of 1909 was far more interesting than any of its predecessors since the close of last century. The season's fixture list had been arranged at a conference of owners and club representatives, convened by the Yacht Racing Association in the preceding November, and by this means a clashing of dates was avoided, while at the same time it was found possible to include some new, and revive some old, regattas. Thus, the Essex Y.C. opened the big-class racing season, while regattas at Swansea, Queenstown, and Falmouth once again appeared in the season's programme, and the Plymouth Division of the Minima Y.C. catered for the 15-metre class for the first time.

The 23-metre class consisted of only two yachts—Mr. M. B. Kennedy's *White Heather* and Sir Thomas Lipton's *Shamrock*. They sailed 40 matches against each other, and their score was exactly even at the end of the season. *Shamrock*, however, by an appeal to the Y.R.A., was awarded one of the races standing to her opponent's credit, so that the respective scores stood—*Shamrock*, 21; *White Heather*, 19. The latter, in addition, won the King's Cup at Cowes, for which *Shamrock* was not eligible to compete, thus raising her full score to 20.

The 15-metre class consisted of four regular competitors—*Mariska*, Mr. A. K. Stothert; *Ma'ona*, Mr. Almeric Puget; *Ostara*, Mr. W. P. Burton; and *Vanity*, Messrs. Watson, Payne, and Benn. The two last named were new vessels: *Ostara* designed by A. Mylne, and *Vanity* by W. Fife. *Ostara* commenced the season wonderfully well, and although the others improved as the season progressed, she easily maintained her position at the head of the class. Interest in this class was greatly enhanced by the King of Spain building *Hispania*. She was built in Spain from W. Fife's designs. *Tuiga* was also built by Fife for the Duc de Medinaceli, and *Slec* (ex *Shinnia*) was purchased by Señor Lopez. *Encarnita* was built for Marques de Cubas from French designs, and *Anemone* was built, also from French designs, for Mons. Vilmorin.

Hispania, *Tuiga*, and *Slec* visited the Solent for the Cowes and Ryde regattas, when *Hispania* proved herself a very able vessel. *Anemone* met some of the English boats at Havre, but was quite outclassed.

Considerable interest was manifested in the performances of the German Emperor's new schooner *Meteor IV*. This vessel is German throughout—design, construction, and fittings, and has German skipper and crew. She took part in the Solent regattas, having as her principal competitors the schooner *Germania*, Herr Krupp von Bohnen; *Susanne*, Herr O. Huldshinsky; *Cetonia*, Lord Iveagh; and *Cicely*, Mr. G. C. Whitaker.

ADELPHI.—(1908) Nov. 23. *The Corsican Brothers* revived (Mr. Martin Harvey), preceded by *The Conspiracy*, by Robert Barr and Sidney Lewis-Ransom. Dec. 24. The pantomime *Cinderella* (Mr. Dan Rolyat, Mesdames Carrie Moore and Phyllis Dare). (1909) April 17. *The Devil*, a play adapted from the Hungarian of Francis Mohiar by Henry Hamilton (Mr. Lyn Harding and Miss Alexandra Carlisle). June 15. *The World and His Wife*, adapted by W. F. Nieldinger; series of matinees (Messrs. Henry Ainley and Martin Harvey, and Miss N. de Silva). 21. M. Guirry opened his season of French plays with *L'Assommoir*. Sept. 15. *The Great Divide*, a new play by W. Vaughan Moody (Miss Edith Wynne-Mathison and Mr. Henry Miller). Oct. 25. *The Servant in the House*, a new play by Charles Rann Kennedy (Messrs. Sydney Valentine, J. H. Barnes, Guy Standing, Henry Miller, Miss Edith Wynne-Mathison).

ALDWICH.—(1908) Dec. 26. *Charley's Aunt* revived. (1909) Feb. 27. *Philopœna*, a musical play by Smith and Levi (Miss Marie Dressler). May 1. *One of the Best*, by Seymour Hicks and George Edwardes, revived (Messrs. Henry Ainley and Harry Nicholls, Mesdames Beatrice Terry and Nancy Price). June 22. *Nerigue* appeared in *The Spirit of Poetry* and *On Jhelum River*, with music by Amy Woodforde Findon.

APOLLO.—(1908) Dec. 1. "The Follies" opened a season of burlesque.

COMEDY.—(1909) Jan. 9. A new comedy by W. Somerset Maugham, entitled *Penelope*, produced (Mesdames Kate Bishop and Marie Tempest, Messrs. Alfred Bishop, Eric Lewis and Graham Browne). Aug. 23. *The Pin and the Pudding*, a comedy by Barton White, produced (Miss Iris Hoey, Mr. Harding Cox). Sept. 30. *Smith*, a new comedy by W. Somerset Maugham (Miss Marie Lohr, Mesdames Edyth Latimer and Kate Cutler, Messrs. A. E. Matthews, Fred Volpé and Robert Lorraine).

COURT.—(1908) Nov. 9. *Le Grand Soir* transferred from Terry's. 12. *A Bridge Tangle*, a comedy by Mr. Frank Wright and Mr. Caleb Porter, for a series of matinees (Mesdames Phyllis Embury and Gertrude Kingston, and Mr. Frank Cooper). 30. A comedy by Gerald Lawrence, entitled *Into the Light*, produced for a series of matinees (Mr. Gerald Lawrence). Dec. 6. *Isaac's Wife*, a new play by F. D. Bone and Telgumouth Shore. 28. *Little Lord Fauntleroy* revived (Miss Eva Moore and Mr. Will Dennis). (1909) April 12. Mr. Gerald Lawrence and Miss Fay Davis opened a season of Shakespeare repertoire with *As You Like It*. July 24. *Thalia's Teacup*, a comedy by Norreys Connell. 9. *Press Cuttings*, by Bernard Shaw, produced.

CRITERION.—(1909) Jan. 6. *Mrs. Goringe's Necklace* revived (Mr. Yorke Stephens and Miss Mary Moore). Feb. 1. *The Adventures of Lady Ursula* transferred from the Garrick. 25. *The Real Woman*, a new comedy by Robert Hichens (Miss Evelyn Millard, Messrs. Henry Ainley, Herbert Waring and Allan Aynesworth). April 13. *Mr. Pready and the Countess*, a new farce by E. C. Carton (Mr. Weedon Grossmith and Miss Compton).

DALY'S.—(1909) Sept. 25. *The Dollar Princess*, a new musical play adapted by Basil Hood and Adrian Ross, composed by Leo Fall (Mesdames Emmy Wehlen, Gabrielle Ray and Lily Elsie, Messrs. Robert Michaelis, W. H. Berry, Evelyn Beerbohm, Basil Foster and Joseph Coyne).

DRURY LANE.—(1908) Dec. 26. The pantomime *Dick Whittington* (Messrs. George Ali, Aubrey Fitzgerald and Wilkie Bard, Mesdames Queenie

Leighton, Marie Wilson and Marie George). (1909) Sept. 9. *The Whip*, a drama by Cecil Raleigh and Henry Hamilton (Mesdames Jessie Bateman, Nancy Price and Fanny Brough, Messrs. Basil Gill, Cyril Keightley, Vincent Clive, Charles Rock and George Barrett).

DUKE OF YORKS.—(1908) Dec. 23. *Peter Pan* revived. (1909) Feb. 15. *What Every Woman Knows* transferred from the Hicks. March 9. *Strife*, a new play by John Galsworthy; series of matinees (Mr. Norman McKinnel, Mesdames Ellen O'Malley and Lillah McCarthy). Aug. 30. *Arsène Lupin*, a new play adapted from the French of Francis de Croisset and Maurice Leblanc (Miss Alexandra Carlisle, Messrs. Eric Lewis, Dennis Eadie and Gerald du Maurier).

GALEATY.—(1909) Jan. 23. *Our Miss Gibbs*, a new musical play by "Cryptos," constructed by James T. Tanner, with lyrics by Adrian Ross and Percy Greenbank, and music by Ivan Caryll and Lionel Monckton (Miss Gertie Millar, Messrs. George Grossmith, Jun., and Edmund Payne).

GARRICK.—(1909) Jan. 5. *The Adventures of Lady Ursula* revived (Miss Evelyn Millard, Messrs. Herbert Waring and Charles Fulton). Feb. 3. *Samson*, a new play adapted from the French of Bernstein by W. Gillette (Miss Violet Vanbrugh, Mr. Arthur Bouchier). May 14. *Macbeth* revived for a series of matinees (Mr. Arthur Bouchier and Miss Violet Vanbrugh). June 2. *The Woman in the Case*, a play by Clyde Fitch (Mesdames Grace Lane and Violet Vanbrugh, Messrs. C. V. France and Herbert Sleath). Sept. 11. *Making a Gentleman*, a new comedy by Alfred Sutro (Mesdames Muriel Beaumont, Athene Seyler and Ethel Irving, Messrs. Kenneth Douglas, Edmund Maurice and Arthur Bouchier).

GLOBE, see HICKS.

HAYMARKET.—(1908) Nov. 3. *Dolly Reforming Herself*, a new comedy by Henry Arthur Jones (Mesdames Margaret Halstan and Ethel Irving, Messrs. Lyall Swete, C. M. Lowne and Robert Lorraine). (1909) Feb. 20. *She Stoops to Conquer* revived (Miss Ethel Irving, Messrs. George Giddens and Robert Lorraine). March 24. *Strife* transferred from the Duke of York's. April 1. *Bevis*, a new comedy by Hubert Henry Davies (Messrs. C. M. Lowne and A. E. Matthews, Mesdames Henrietta Watson, Madge Titheradge and Lottie Venn). May 11. *Love Watches*, by Robert de Mers and J. Caillavet (Miss Billie Burke and Mr. Julian L'Estrange). June 8. *Peter's Mother* revived (Miss Marion Terry, Messrs. Fred Kerr and A. E. Matthews). Sept. 9. Mr. Herbert French opened his season with a revival of *King Lear* (Miss Ellen O'Malley, Messrs. C. V. France, Dawson Milward, J. Fisher White, James Hearn, Charles Quartermaine, H. R. Hignett and Norman McKinnel). Oct. 12. *Don*, a comedy by Rudolf Besier (Mesdames Frances Ivor, Charlotte Granville, Christine Silver and Ellen O'Malley, Messrs. Charles Quartermaine, James Hearn, Dawson Milward and Norman McKinnel); preceded by *Gentlemen of the Road*, by Chas. McEvoy.

HICKS.—(1908) Dec. 21. *What Every Woman Knows* transferred from the Duke of York's. (1909) Feb. 17. *The Dashing Little Duke*, a new musical play by Seymour Hicks, lyrics by Adrian Ross, and music by Frank E. Toms (Miss Elsie Terriss, Messrs. Hayden Coffin and Courtice Pounds). June 1. *Unice*, a play by Lee Arthur and Forrest Halsey (Miss Fanny Ward).

The name of this theatre was changed to
THE GLOBE.—(1909) July 6. *His Borrowed*

Phumes, by Mrs. George Cornwallis-West (Messrs. Dawson Milward and Henry Ainley, Miss Gertrude Kingston and Mrs. Patrick Campbell). *Sept. 1. Madame X.*, a new play adapted from the French of Alexandre Bisson (Miss Lena Ashwell, Messrs. Arthur Wontner, C. M. Hallard and Sydney Valentine).

HIS MAJESTY'S.—(1908) *Dec. 19. Pinkie and the Fairies*, by W. Graham Robertson, with music by Frederic Norton (Mesdames Marie Löhr, Viola Tree, Stella Patrick-Campbell, Iris Hawkins and Ellen Terry, Mr. Frederick Volpe and Master Phillip Tonge). (1909) *Feb. 16. The Dancing Girl*, by Henry Arthur Jones, revived (Mesdames Alice Crawford and Marie Löhr, Mr. Tree); preceded by *Tilda's New Hat*, by George Paston. *April 7. The School for Scandal* revived (Messrs. Henry Neville, H. V. Esmond, Robert Lorraine, Basil Gill, Edward Terry, Lionel Brough and Mr. Tree, Mesdames Ellis Jeffreys, Suzanne Sheldon, Dagmar Wiehe and Marie Löhr). *June 21.* Mr. Tree opened his Shakespearean festival with *The Merry Wives of Windsor*, and appeared during the festival in *Twelfth Night*, *Julius Caesar*, *Hamlet*; Mr. Arthur Boucher and Miss Violet Vanburgh appeared in *Macbeth*, and Mr. F. R. Benson in *Richard III.* *July 5.* The run of *The School for Scandal* resumed. *Sept. 14. False Gods*, translated by J. B. Fagan from Brieux's "La Foi" (Herbert Beerbohm Tree, Messrs. William Haviland and Henry Ainley, Mesdames Evelyn D'Alooy and Patrick-Campbell).

KINGSWAY.—(1908) *Nov. 24.* A new play by H. Herman Chilton, entitled *Grit* (Miss Lena Ashwell, Mr. Norman McKinnel). (1909) *Jan. 11. Diana of Dobson's* revived (Miss Lena Ashwell). *Feb. 11. The Truants*, by Wilfred T. Coleby (Mesdames Athene Seyler and Lena Ashwell, Messrs. Dennis Eadie, C. M. Hallard and Norman McKinnel). *April 14. The Earth*, by James Bernard Fagan (Miss Lena Ashwell, Messrs. Norman McKinnel, Dennis Eadie and Allan Aynesworth).

LYCEUM.—(1908) *Dec. 23.* The pantomime *Little Red Riding Hood*. (1909) *March 7. Hamlet* revived (Mr. Matheson Lang and Miss Hutin Britton). *May 13. The Prisoner of the Bastille*, by Norman Forbes, produced (Mr. Matheson Lang and Miss Dorothy Thomas). *July 24. The Two Little Yagabonds* revived. *Sept. 4. The Proud Prince*, by Justin Huntly McCarthy (Mr. Matheson Lang and Miss Dorothy Thomas).

LYRIC.—(1908) *Nov. 25. Henry V.* (Mr. Lewis Waller). (1909) *Feb. 2. The Chief of the Staff*, by Ronald McDonald (Mesdames Evelyn D'Alooy and Auriol Lee). *15. Monsieur Beaucaire* revived (Mr. Lewis Waller). *March 3. The Three Musketeers* revived (Mr. Lewis Waller, Mesdames Evelyn D'Alooy and Auriol Lee). *April 24. The Conquest*, by George Fleming (Mr. Lewis Waller, Miss Maxine Elliott). *May 1. The Three Musketeers* revived. *11. Henry IV. (Part I.)*; series of matinees (Messrs. Robert Lorraine, Louis Calvert and Lewis Waller). *19. The Explorer* revived. *June 15. The Fires of Fate*, by Arthur Conan Doyle (Messrs. A. E. George, Fisher White, Evelyn Beerbohm, Michael Sherbrooke, Shiel Barry and Lewis Waller, Mesdames Auriol Lee, Agnes Thomas and Evelyn D'Alooy). *Oct. 13. Sir Walter Raleigh*, a romantic play by William Devereux (Mr. Lewis Waller and Miss Winifred Emery).

NEW.—(1908) *Dec. 21. Dorothy* revived (Mesdames Constance Drever and Louie Pounds,

Messrs. Arthur Williams and Hayden Coffin). (1909) *Jan. 7. Henry of Navarre*, a romantic play by William Devereux (Mr. Fred Terry and Miss Julia Neilson). *Sept. 6. The Woman in the Case* transferred from the Garrick.

THE PLAYHOUSE.—(1909) *June 3. A Merry Devil*, a Florentine farce by James Bernard Fagan (Messrs. Aubrey Smith and Cyril Maude, Mesdames Jessie Bateman and Winifred Emery). *Aug. 31. A Sense of Humour*, by Beryl and Cosmo Hamilton (Mesdames Auriol Lee and Beryl Faber, Messrs. Guy Standing and Leslie Faber).

THE PRINCE OF WALES.—(1909) *Sept. 1. Dear Little Denmark*, a musical play by Paul Reubens (Mesdames Isabel Jay and Gracie Leigh, Messrs. Bertram Wallis, James Blakley and Huntley Wright).

THE QUEEN'S.—(1909) *April 27. A Persian Princess*, a new musical play by Leedham Bantock and P. J. Barrow, with lyrics by Percy Greenbank, and music by Sidney Jones and Marie Horne (Mesdames Carrie Moore and Ruth Vincent, Messrs. Horace Mills, Aubrey Fitzgerald, W. R. Morand and George Graves). *Sept. 22.* Mr. H. B. Irving opened his season with a revival of *The Bells* (Mesdames Phyllis Embury and Suzanne Sheldon, Messrs. Harcourt Williams and H. B. Irving).

ROYALTY.—(1909) *March 20.* Mr. Charles Hawtrey opened his season with *The Noble Spaniard*, an adaptation from the French by W. Somerset Maugham (Messrs. Lyall Swete and Charles Hawtrey, Mesdames Kate Cutler and Fanny Brough). *May 27. What the Public Wants*, by Arnold Bennett (Messrs. Louis Calvert, Ben Webster and Charles Hawtrey, Miss Margaret Halstan).

ST. JAMES'S.—(1908) *Nov. 11. The Builder of Bridges*, by Alfred Sutro (Mr. George Alexander and Miss Irene Vanbrugh, Messrs. William Farren, Harcourt Williams and Dawson Milward). (1909) *Feb. 18. The Prisoner of Zenda* revived (Mesdames Frances Dillon and Stella Patrick-Campbell, Mr. George Alexander). *April 23. Colonel Smith*, by A. E. W. Mason (Mr. George Alexander and Miss Irene Vanbrugh). *May 10. The Thief* revived (Mr. George Alexander and Miss Irene Vanbrugh). *24. Old Heidelberg* revived (Messrs. J. D. Beveridge and George Alexander, Miss Eva Moore). *Sept. 2. Mid-Channel*, by A. W. Pinero (Mesdames Rosalie Toller, Nina Sevensen, Kate Sergeantson and Irene Vanbrugh, Messrs. C. M. Lowne, Eric Maturin and Lyn Harding).

SAVOY.—(1908) *Dec. 1. The Pirates of Penzance* revived (Messrs. Rutland Barrington, C. H. Workman and H. A. Lytton, Mesdames Dorothy Court, Jessie Rose and Louis René). (1909) *March 1. The Yeomen of the Guard* revived. *Sept. 29. The Mountaineers*, a new comic opera by Guy Eden, composed by Reginald Somerville (Mesdames Jessie Rose and Elsie Spain, Mr. C. H. Workman).

SHAPTESBURY.—(1909) *Feb. 8. Hamlet* revived (Miss Dorothea Baird, Mr. H. B. Irving). *15. Charles I.* revived (Miss Dorothea Baird, Mr. H. B. Irving). *22. Louis XI.* revived (Miss Dorothea Baird, Mr. H. B. Irving). *April 25. The Arcadians*, a new musical play by Mark Ambient and A. M. Thompson, with lyrics by Arthur Winperis, and music by Lionel Monckton and Howard Talbot (Messrs. Alfred Lester, Harry Welchman and Dan Rolyat, Mesdames Florence Smithson and Phyllis Dare).

STRAND, see WALDORE.

TERRY'S.—(1908) *Nov. 2. Le Grand Soir*, by M.

Leopold Kampf.—French version by M. Robert Hunièrès produced (Mlle. Sergiue). 9. *The Passing of the Third Floor Back* transferred from the St. James's. (1909) April 10. *Artful Miss Dearing*, a new comedy by Arthur Law (Miss Annie Hughes).

VAUDEVILLE.—(1909) Jan. 18. *Olive Latimer's Husband*, by Rudolph Besier (Mrs. Patrick Campbell, Mr. Lyn Harding). Mar. 4. *The Head of the Firm*, adapted from the Danish of H. Bergström by Leslie Faber (Messrs. Harcourt Williams, Evelyn Beerbohm, Leslie Faber, Mesdames Sydney Fairbrother and Henrietta Watson). April 19. *The Chorus Lady*, by James Forbes (Miss Rose Stahl). Sept. 26. *The Brass Bottle*, by F. Anstey (Mesdames Mary Brough and Viva Birkett, Messrs. Alfred Bishop, Holman Clark, Rudge Harding and Lawrence Grossmith).

WALDORF.—(1908) Nov. 28. *The Antelope*, a musical comedy by Adrian Ross, music by Hugo Felix (Mesdames Kitty Gordon and Florence Loydd, Messrs. Farren Soutar and Fred Wright). (1909) Jan. 4. *Dorothy* transferred from the New.

This theatre was renamed

THE STRAND.—(1909) Oct. 23. *The Merry Peasant*, by Victor Leon, composed by Leo Pail (Mesdames Florence St. John, Mary Glynn and Sybil Arundale, Messrs. Arthur Williams, George Giddens, Julius Walther and Courtice Pounds).

WYNDHAM'S.—(1908) Nov. 28. *Sir Anthony*, by Haddon Chambers (Messrs. Edmund Maurice, Evelyn Beerbohm and Weedon Grossmith, Mesdames Christine Silver, Suzanne Sheldon and Nina Boucicault). (1909) Jan. 27. *An Englishman's Home*, by "A Patriot" (Miss Elaine Inescourt, Messrs. Lawrence Grossmith and Charles Rock). June 22. *Brewster's Millions* revived (Mr. Percy Hutchinson). Aug. 5. *The Best People*, by Frederick Lonsdale (Mesdames Lettice Fairfax and Eva Moore, Messrs. Fred Kerr and Kenneth Douglas). Oct. 21. *The Little Damozel*,

by Monckton Hoffs (Miss May Blayney, Messrs. A. Vane-Tempest, Arthur Playfair and Charles Hawtrey).

THE AFTERNOON THEATRE (His Majesty's).—(1908) Dec. 8. William Archer's translation of Hauptmann's *Hannele* (Miss Marie Löhr, in the title rôle, and Mr. Henry Ainley); preceded by *Emily*, by Margaret M. Maek (Miss Sydney Fairbrother). (1909) Jan. 26. *The Admirable Bashville*, by G. Bernard Shaw (Miss Marie Löhr, Messrs. Ben Webster and Henry Ainley); followed by *Tilda's New Hat*. Feb. 9. *Hannele* and *Emily* reproduced. 18. *The High Bid*, by Henry James (Miss Gertrude Elliott and Mr. Forbes Robertson); preceded by *A Soul's Flight*, by Louis Tiercelin, translated by Louis N. Parker. Mar. 16. *The House of Bondage*, by Seymour Obermer (Mesdames Sarah Brooke and Eva Moore, Messrs. Herbert Waring and Aubrey Smith). April 30. *An Enemy of the People* revived (Mr. Tree). May 14. *Light o' Love*, by Arthur Schnitzler (Mr. Henry Ainley, Miss Margaret Halstan). June 4. *Admiral Guinea*, by W. E. Henley and R. L. Stevenson; followed by *The Dryad*, by Dora Bright (Mlle. Genée). 22. Ethel Smyth's opera, *The Wreckers*, produced for the first time in England.

THE STAGE SOCIETY.—(1908) Dec. 6. *The Last of the De Mollins*, by St. John Hankin, at the Haymarket. (1909) Feb. 20. *The Rights of the Soul*, translated by Miss F. M. Rankin from the Italian of Giuseppe Giacosa; followed by Turgenyev's play, *The Bread of Others*, translated by J. Nightingale Duddington, at the Kingsway. Mar. 28. *The Fountain*, a new comedy by George Calderon; preceded by a new one-act play by Margaret Maek, entitled *Unemployed*, at the Aldwych. May 2. *What the Public Wants*, a new comedy by Arnold Bennett, at the Aldwych. June 6. *A Modern Aspasius*, by H. Hamilton Fyfe, at the Aldwych.

THE FIRST ATLANTIC CABLE.

AUGUST 5th of 1908 was the fiftieth anniversary of the Atlantic Cable, that being the day of the month in 1858 on which—contrary to authoritative opinion—the engineer of one of the greatest achievements of the nineteenth century completed the laying of the submarine line between Ireland and Newfoundland, the length being over two thousand miles, and the depth nearly three miles for the greater part of the distance. The projectors were Mr. John Watkins Brett, Mr. (afterwards Sir Charles) Bright, and Mr. Cyrus West Field. Mr. Bright was also the engineer-in-chief of the undertaking, and he received the honour of knighthood in recognition of his services to the country in connection therewith, at the unprecedented age of 26.

Electrical theories were, however, mistaken at that time, and the electricians applied far too much power for the transmission of signals; the result being that the insulation suffered by degrees, until after three months' useful work the cable gradually succumbed.

After a number of cables had been laid by Sir Charles Bright, Mr. H. C. Forde, Sir William Siemens and others to India, Gibraltar, Alexandria, &c., another Atlantic Cable expedition started in 1865. This was the first line that was laid by the manufacturers of the cable, these

contractors being the Telegraph Construction and Maintenance Company, with Mr. (afterwards Sir Samuel) Canning for their chief engineer, whilst Sir Charles Bright and Mr. Latimer Clark acted as consulting engineers to the proprietors.* Notwithstanding the extra knowledge and experience gained in regard to the subject generally, this expedition met with as many mishaps as the first expedition of 1857; but in 1866—as in 1858—the same arrangements ultimately achieved success, since which the construction, laying, and working of submarine telegraphs has passed from the pioneer stage to that of ordinary routine.

The engineering methods were similar to those adopted eight years previously; but the line proved a lasting success, owing to the advances made in electrical science and in the practical working of cables. On the electrical side, in addition to the late Lord Kelvin, the names of Varley and Willoughby Smith must always be honourably associated with the subject, and the late Sir John Pender did more than any man for the commercial development of submarine telegraphy.

* "Submarine Telegraphs: Their History, Construction and Working," by Charles Bright, F.R.S.E., M.I.E.E. (London: Crosby Lockwood & Son.)

CLOSE SEASON FOR GAME, WILD BIRDS, &c.

THE following Table gives the "close" time for different kinds of Game for England, Scotland, and Ireland, during which it is illegal to pursue the game mentioned, all dates inclusive:—

GAME.	ENGLAND.	SCOTLAND.	IRELAND.
Black Game or Heath Fowl.	11th Dec. to 19th Aug. and to 31st Aug. in Somerset, Devon, and New Forest.	11th Dec. to 19th Aug.	11th Dec. to 19th Aug.
Bustard	and Mar. to 31st Aug.	None.	11th Jan. to 31st Aug.
Deer, Male.	None.	None.	1st Jan. to 6th June.
" Female.	None.	None.	Michaelmas to 6th June.
Grouse or Red Game.	11th Dec. to 11th Aug.	11th Dec. to 11th Aug.	11th Dec. to 11th Aug.
Hare	None.	None.	1st Apr. to 11th Aug.
Heath or Moor Game.	None.	As "Wild fowl."	11th Dec. to 11th Aug.
Landrail ...	As "Wild Birds."	As "Wild Birds."	11th Jan. to 19th Sept.
Moorfowl, or Ptarmigan.	None.	11th Dec. to 11th Aug.	11th Dec. to 19th Aug.
Partridge ...	2nd Feb. to 31st Aug.	2nd Feb. to 31st Aug.	2nd Feb. to 31st Aug.
Pheasant ...	2nd Feb. to 30th Sept.	2nd Feb. to 30th Sept.	2nd Feb. to 30th Sept.
Quail	As "Wild Birds."	As "Wild Birds."	11th Jan. to 19th Sept.

It is also unlawful to kill pheasants, partridges, grouse, moor game, or hares on a Sunday or Christmas Day.

In England hares, rabbits, woodcock, snipe, quail, landrail, and heath or moor game (and the eggs of swan, wild duck, teal, and widgeon) are protected under the Game Laws, though no close-time is fixed for them by those laws. In Scotland the same remarks apply to deer and hares, to the first four birds, and to wild duck; in Ireland to all these five birds, with the further addition of widgeon, teal, and plover. The close-time for all these birds (except quail and landrail in Ireland, for whose close-time see above) is, under the Wild Birds Protection Acts, 1880 to 1903, from 2nd March to 31st July, both inclusive. Otherwise this close-time applies to all wild birds throughout the United Kingdom. The penalty for killing any wild bird in such close-time, or for selling or having in possession between the 16th March and the 31st of July, both inclusive (unless the killing can be proved to have occurred at a time and place to which the Act does not apply), is a reprimand and costs for the first offence, and 5s. and costs for each bird for every subsequent offence, or, in the case of the unmentioned birds, £1 for each bird for each offence. In any case the Court may also order the forfeiture of any bird (or egg, where protected—see next column) in respect of which the offence was committed. In the Island of St. Kilda the fork-tailed petrel and St. Kilda wren are deemed to be included in the following list, and the birds marked * to be omitted therefrom.

American quail.	Kittiwake.	Scout.
Auk.	Lapwing.	Sealark.
Avocet.	Lark.	Seamew.
Bee-eater.	Loon.	Sea parrot.
Bittern.	Mallard.	Sea swallow.
Bonxie.	Marrot.	Shearwater.
Colin.	Merganser.	Sheldrake.
Cornish chough.	Murre.	Shoveller.
Coulteneb.	Night-hawk.	Skua.
Cuckoo.	Night-jar.	Smew.
Curlew.	Nightingale.	Snipe.
Diver.	Oriole.	Solan goose.
Dotterel.	Owl.	Spoonbill.
Dunbird.	Ox-bird.	Stint.
Dumlin.	Oyster-catcher.	Stone curlew.
Eider-duck.	Pewit.	Stonehatch.
Fern-owl.	Petrel.	Summer snipe.
* Fulmar.	Phalarope.	Tarrock.
* Gannet.	Plover.	Teal.
Goatsnacker.	Ploverspage.	Tern.
Godwit.	Pochard.	Thicknee.
Goldfinch.	* Puffin.	Tystey.
Grebe.	Purre.	Whaup.
Greenshank.	* Razorbill.	Widgeon.
* Guillemot.	Redshank.	Wild duck.
Gull (except black-backed).	Reeve or Ruff.	Willock.
Hoopoe.	Roller.	Wimbrel.
Kingfisher.	Sanderling.	Woodcock.
	Sandpiper.	Woodpecker.

Offenders refusing their names and addresses are liable to a further penalty of 10s., but the Acts do not apply to any person shooting on his own land, or authorizing anyone so to shoot, any wild bird not included in the above list.

On the application of the local authorities, the Secretary of State in England and Wales, the Secretary for Scotland in Scotland, or the Lord Lieutenant in Ireland, has power to vary or abolish the close-time for any bird or birds in any county by order to be published in the *Gazette*. They may also direct that the above enactments shall apply to any wild bird not specified in the list, and may further prohibit the taking of the eggs of any wild bird in any county or part thereof. The Secretary of State in England and Wales, or the Secretary for Scotland, may also on the application of the local authorities make an order providing that in any specified area the taking or killing of any particular kinds of wild birds shall be illegal during any period specified in the order. These various powers have been exercised in many cases—too numerous to recapitulate here.

By the Wild Birds Protection Act, 1904, penalties are imposed on persons setting springs, gins, &c., on poles, trees, mounds, &c., so as to injure wild birds. Persons permitting such acts are equally liable. By an Act of 1908 the use of a hook or like instrument for taking wild birds is forbidden.

HUNTING AND GROUND GAME.

There is no statutory close-time for fox-hunting or rabbit-shooting, nor is there, except in Ireland, for deer or hares; but there is an "unwritten law" which the sportsman respects as much as he does the enactments of Parliament. November 1st is the recognised date for the opening of the fox-hunting season, which continues till the following April. Otter-hunting lasts from mid-April to mid-September. The period for deer-hunting or stalking varies from about Aug. 12 to October 12 for stags, and from Nov. 10 to the end of March for hinds. By an Act passed in 1892 the sale of hares or leverets in Great Britain is prohibited from March to July inclusive under a penalty of a pound. This does not apply to foreign hares. The statutory close season for

hares in Ireland has been varied for some counties by order of the Lord Lieutenant, and it is now mostly from April 1st to August 12th.

CLOSE-TIME FOR SALMON.

I. ENGLAND AND WALES.

Under the Salmon Fishery Acts, salmon (including all migratory fish of the *genus* salmon) are protected, and a close-time is fixed for England and Wales, including the Esk in Dumfries, during which fishing for any of such fish is prohibited. The close-time for nets begins on 1st September, and for rods on 2nd November; for both nets and rods it ends on 1st February. By an Act of 1907 the Board of Agriculture and Fisheries may make provisional orders varying the law on these and other points. The close-time may also be varied by a bye-law by local boards of conservators, provided it does not begin for nets later than 1st November, with a minimum of 154 days, or for rods not later than 1st December, with a minimum of 92 days. For putts and putchers the annual close season is from 1st September to 1st May, which cannot be altered by bye-law. The following are the cases in which the other dates have been varied:—

Close-time for	Nets.	Rods.

No fresh salmon may be sold between 3rd September and 1st Feb., except such as come

Except above Woodbury Road Station, 1 Sept. to 15 Apr.
 † Above S. Biddick. †† These dates for net close season above Bullo Foot only. † Below Old Sandsfield for nets. For rods these dates do not apply in R. Eden above Irthing Foot, or in R. Ramont. † Below Lostwithiel only. † Except R. Erme, 30 Sept. (rods 30 Nov.) to 4 April. ** 15 Aug. to 15 April for putts and putchers. † Above Lostwithiel, 1 Dec. to 1 April.
 † West of Needles Lighthouse.
 † Above Lancaster Aqueduct, 12 Aug. to 15 July.

from parts beyond the seas, or as have been taken, if in the United Kingdom, in legal netting season and in legal manner. During that period all packages containing salmon consigned by any common or other carrier must be clearly marked with the word "Salmon." Salmon, dried, pickled, or cured abroad, or, if within the United Kingdom, between 1st February and 3rd November, may be sold after that date. The onus of proof that the fish were caught out of the United Kingdom, or, if within the kingdom, that they were caught during the legal netting season by legal means, or that, if pickled, they were pickled between 1st Feb. and 3rd Nov., lies with the person selling or exposing for sale. The exportation of salmon from any part of the United Kingdom is prohibited between 3rd September and 30th April, unless caught at a time at which its sale in the place where it was caught would be legal, if in the United Kingdom: the onus *probandi* lies on the person exporting. The capture and sale of "unclean" salmon, i.e., salmon recently spawned or full of spawn, are prohibited under heavy penalties. Roe may not be used as a bait in salmon angling.

A weekly close season, during which net-fishing for salmon is prohibited, is fixed in England from noon on Saturday to 6 a.m. on Monday. This close-time may be varied by the local conservancy boards, provided it is not less than 42 hours, nor more than 48 hours, and that it is fixed between Friday at midnight and noon on Monday.

II. SCOTLAND.

In Scotland the annual close time must not be less than 168 days. It is, for nets, from 27th August to 10th February, and, for rods, from 1st November to 10th February, except as follows:—

Close-time for	Nets.	Rods.
Tay	21 Aug. to 4 Feb.	16 Oct. to 14 Jan.
Forth	—	ditto.
Add, Aray, Beckaig,	1 Sept. to 15 Feb.	1 Nov. to 15 Feb.
N. & S. Esk, Fyne,	"	"
Ruel, Shira.	"	"
Beaul, Dumbeath,	—	16 Oct. to 10 Feb.
Lossie, Ness, Spey,	—	"
Halladale, Strathy,	—	1 Oct. to 10 Jan.
Naver, Borigie,	"	"
Helmsdale.	"	"
Earn	—	1 Nov. to 31 Jan.
Bervie, Carnadale,	10 Sept. to 24 Feb.	1 Nov. to 24 Feb.
Fleet, Garnock,	"	"
Ghrvan, Howmore,	"	"
Inver, Iorsa, Irvine,	"	"
Laggan, Luce,	"	"
Sorn, Ugie, Ythan,	"	"
and rivers of Orkney, Harris, & Uist.	"	"
Nith	ditto	5 Nov. to 24 Feb.
Annan, Stinchar ..	ditto.	16 Nov. to 24 Feb.
Rivers of Shetland.	ditto.	16 Nov. to 31 Jan.
Urr	ditto.	1 Dec. to 24 Feb.
Rivers of Bute	1 Sept. to 15 Feb.	16 Oct. to 15 Feb.
Thurso	—	15 Sept. to 10 Jan.
Hope, Polla	—	11 Sept. to 10 Jan.
Tweed	15 Sept. to 14 Feb.	1 Dec. to 31 Jan.

The weekly close-time for nets is between 6 p.m. Saturday and 6 a.m. Monday; and, for rods, on Sundays. The Esk, in Dumfries, is included under the English Salmon Acts.

In Scotland the law as to the sale of salmon differs somewhat from that in force in England.

III. IRELAND.

In Ireland the close-time for salmon applies also to trout. The netting close-time must never be less than 168 days. Many variations of the close season have been made, of which it is impossible to specify all the details here; the following list, however, shows the general close-time in force in the different districts, in parts of some of which, however, it is different (all dates inclusive). The second column gives the point of delimitation on the coast between the various districts, which include all rivers, &c., within their respective coast-limits.

District.	Coast Limits.	Cl.-T. Net.	C	T. Rod.

	to	16 Mar.	31	Jan.
Dundalk ...	Donaghadee ...	16 Sept. to	1	Oct. to
	to	31 Mar.	2	Feb.
Drogheda ..	Clogher Head ..	5 Aug. to	16	Sept. to
	to Skerries ..	11 Feb.	11	Feb.

In Ireland the weekly close-times is fixed at 48 hours, from 6 a.m. Saturday till 6 a.m. Monday.

Salmon and trout must not be sold in Ireland in the close season.

CLOSE-TIME FOR TROUT AND CHAR.

The capture of trout and char in England and Wales is prohibited between 2nd October and 1st February, except (1) in parts of Norfolk and Suffolk where, under the Norfolk and Suffolk Fisheries Act, 1877, the close-time for trout, for nets only, is from 10 Sep. to 25 Jan.; (2) in the Thames, where the close season is from 11 Sep. to 31 March; and (3) in the cases noted below, where, under an Act passed in 1876, the trout and char close-time (for rods and nets, except where specified) has been varied by bye-law by local boards of conservators. In the districts marked* the close-time, as altered, applies only to trout. The sale of trout and char is absolutely prohibited throughout England and Wales from 1st Oct. to 1st Feb. :-

*Eden 2 Sept. (rods 2 Oct.) to 28 Feb.
 *Usk 2 Sept. to 14 Feb. †
 Tyne 1 Oct. to 21 Mar.
 Wye 2 Oct. to 14 Feb.
 *Taff & Ely 20 Sept. to 1 Feb.
 *Cleddy 29 Sept. to 1 Mar.
 *Ogmore 30 Sept. to 28 Feb.
 *Teign 1 Oct. to 2 Mar.
 *Exe 15 Sept. to 28 Feb.

*Selont† 15 Sept. to 1 Mar. (except Anglesey, 13 Feb.)
 15 Sept. to 10 Mar.

Derwent (Cumb.) } Except Char in Crummock and

 *Suffolk & Essex 2 Oct. to 10 Apr.

*Dee 14 Oct. to 14 Feb. (rods only).
 *Coquet 1 Nov. to 3 Mar. (ditto).

In Scotland there is a close-time for trout from 15 Oct. to 28 Feb. In Ireland the close-time for trout is the same as for salmon. For pollen the close-time is from 14 Nov. to 31 Jan.

Between Sept. 3 and Feb. 1 all packages in England and Wales consigned by any common or other carrier and containing trout or char must be distinctly marked with the word "Trout" or "Char," as the case may be.

CLOSE-TIME FOR FRESHWATER FISH.

By the Freshwater Fisheries Act, 1878, a close-time for "freshwater fish" (which are defined for this purpose to include all kinds of fish, other than pollen, trout, and char, which live in fresh water, except those kinds which migrate to or from the open sea) is fixed from 15 March to 15

† River Avon between Amesbury and Bickton only: above Amesbury 25 Oct. to 31 Mar.

‡ Char close-time throughout district 20 Oct. to 1 Mar. § 2 Oct. to 2 April for R. Duddon; and 26 Sept. to 15 Feb. for R. Bela.

§§ April 30 between Lostwithiel and St. Winnow || 2 Oct. to 30 June from R. Gwill to G.W.R. Bridge.

¶ 2 Oct. to 14 Mar. in certain reservoirs.

June, both inclusive, for all parts of England and Wales except parts of Norfolk and Suffolk. The penalty for taking or selling freshwater fish in that period is £2 for a first and £5 for a subsequent conviction. The close-season, however, does not apply to eels taken otherwise than by angling or to fish taken in private waters by leave of the owner, in public waters by leave of a Board of Conservators, or taken (with the leave of the owner if in private waters) for bait or for scientific purposes. Fishery districts may be wholly or partially exempted from this close-time with the sanction of the Board of Agriculture and Fisheries. The Axe, Avon and Stour, Avon (Devon), Wye, Eden, and Towy fishery districts have been so exempted; also the Kent and Leven and Severn districts, as regards pike; the Usk as regards eels; and certain parts of the Severn as regards other fish than grayling. In the navigable rivers of Norfolk and Suffolk and the broads connected therewith, close-times have been fixed for various fish under the Norfolk and Suffolk Fisheries Act, 1877, from March 1 to June 30. For eels a separate close-time exists (so far as fixed engines in salmon rivers are concerned) in England from 1 Jan. to 24 June; in Ireland, with one or two exceptions, from 11 Jan. to 30 June. In the Severn, elvers, or the fry of eels, are protected between 1 Jan. and the last day of Feb., and between 26 April and 24 June.

PROTECTION OF CRABS AND LOBSTERS.

Under the Fisheries (Oyster, Crab, and Lobster) Act, 1877, it is prohibited to buy or sell crabs under 4½ inches, measured across the largest diameter of the back, or lobsters under 8 inches, measured from tip of beak to end of tail when spread out flat. The capture of "soft" crabs and crabs with spawn is also prohibited. By local bye-laws of Sea Fisheries Committees (*vide infra*), the minimum size of lobsters and crabs that may be lawfully taken in different parts of

the territorial seas has been increased, and in some cases the taking of lobsters with spawn is prohibited, or a close season fixed.

CLOSE-TIME FOR OYSTERS.

There are also local regulations for the protection of oysters; and by the Fisheries (Oyster, Crab, and Lobster) Act, 1877, a general close-time for the capture and sale of "Deep-Sea Oysters" is fixed from the 15th June to 4th August; and for all other kinds of oysters—except oysters taken in the waters of a foreign state—from 14th May to 4th August. This Act applies to England and Scotland, but not to Ireland. By the Sea Fisheries Act, 1868, fishing for oysters is prohibited from the 16th June to 31st August inclusive, in that part of the English Channel comprised between a line drawn from the North Foreland Light to Dunkirk, and a line drawn from the Land's End to Ushant—the territorial seas of England and France alone being excepted. This close-time, however, cannot be enforced till the Convention between England and France, included in the Act, is ratified; and, until that is done, the Convention concluded in 1839, which prohibits oyster-fishing in those limits from 1st May to 31st August, is to remain in force so far as French fishermen are concerned. It is customary, however, for both Powers to agree to suspend the operation of this close season till June 16 in each year. In Ireland, the Act 5 & 6 Vict. cap. 106, prescribes that no oysters may be taken between 1st May and 1st September, though this close season has been varied in the following cases:—

Tralee Bay	11th Mar. to 31st Oct.
Galway Bay	1st Jan. to 30th Nov.
Strangford Lough	1st Mar. to 31st Aug.
Achill Sound, Clew Bay Sligo, Ballisodare and Drumcliffe Bays ...	2nd April to 30th Sept.
Taking oysters from licensed beds is made larceny.	30th April to 1st June.

Licences for Shooting and Fishing.

GAME AND GUN LICENCES.—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springs; rabbit-warren proprietors, or others, on enclosed land, killing rabbits; persons hunting deer, or hares, with hounds; owners or occupiers, or their servants, killing deer on their own land; beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorize others to do so, without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" licence is necessary. A game licence, however, covers a gun licence. Soldiers, sailors, volunteers, or constables, on duty, or at practice, need not take out a gun licence, nor need occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence. Unless, however, the occupier is himself licensed, he cannot authorize any unlicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of any birds, and "vermin" does not include rabbits. The rates of duty are given at p. 372.

SALMON, TROUT AND CHAR LICENCES.—In all

salmon fishery districts in England and Wales, and in Ireland, a licence to fish for salmon is necessary, and in most English and Welsh rivers a similar licence is necessary for trout or char, except that a salmon licence includes the latter. In Scotland no licence is needed. A licence is available only in the district, and for the season, in which it is issued, except that in Ireland rod licences are available in all parts of that country. The rates on salmon nets and other like instruments range from £20 downwards in England and Wales, and from £30 downwards in Ireland. In the latter country the rate on draft nets, the kind most commonly used, is £3; in England and Wales it varies from £15 to £2. The licence duty on a salmon rod and line is £1 in Ireland. In England and Wales different rates are charged in different districts as follows (an asterisk signifies that lower rates of duty are chargeable for short periods, or for certain parts of the district):—

*Eden, *Derwent, *Exe, Hampshire, *Wye, *Usk, 30/-; Taw and Torridge, 24/-; *Lune, *Ribbles, *Dee, Clwyd & Elwy, *Conway, *Dovey, *Teify, Avon (Devon), *Dart, *Teign, Frome, Stour (Kent), Yorkshire, Tees, *Tyne, 20/-; *Dwyfach, Towy, 21/-; *Selont, Avon, Brue & Parret, *Camel, *Powe, 18/-; Cleddy, Taff & Ely, Ogmöe, W. Cumberland, 10/6; *Kent & Leven, Rhymney, *Ayr, Severn, Axe, Trent, Tamar & Plym, 10/-; *Esk (Yorkshire), 7/6; Ouse (Sussex), Wear, Coquet, Cuckmere, Rother, Adur, 5/-.

ENGLAND AND WALES.—The administration of the laws of close season, &c., for salmon and trout is placed by the Salmon and Fresh-water Fisheries Acts, 1861 to 1907, and the Board of Agriculture and Fisheries Act, 1903, in the hands of local boards, with the Board of Agriculture and Fisheries as the central authority. Districts may be formed and Boards of Conservators appointed for waters containing

These Boards of Conservators consist of three classes of members—those appointed annually by the County Councils of the various counties through which the rivers flow; *ex-officio* members, or those qualified by ownership of lands or fisheries of a certain value; and representative members, elected annually by the persons who have paid licence duty on instruments other than rod and line, used for salmon fishing in public waters.

NAME OF DISTRICT.	COAST LIMITS OF DISTRICT.	ADDRESS OF CLERK.
†Elden	Sark Foot to Seaton....	J. B. Slater, Carlisle.
†Derwent	Seaton to St. Bees Head	E. Hughes Dodgson, Cockermouth.
†West Cumberland	St. Bees Head to Haverigg Point.....	W. H. Chapman, Whitehaven.
†Kent, &c.	Haverigg Point to Warton	S. H. Jackson, Ulverston.
†Lune	Warton to Blackpool	J. T. Sanderson, Lancaster.
†Ribbles	Blackpool to Formby Point	H. Backhouse, Blackburn.
†Dee	New Brighton to near Meliden Church..	Henry Jolliffe, Chester.
†Elwy and Clwyd	Meliden Church to Rhos Bay	F. W. Grimsley, St. Asaph.
†Conway	Rhos Bay to R. Aber	C. T. Allard, Llanrwst.
†Selont	{ Garth Point to Llanaelhaiarn Point, and to Twyn y Parc Point, in Anglesey }	J. H. S. Roberts, Carnarvon.
†Dwyfach	Llanaelhaiarn Point to Crickieith	David Jones, Portmadoc.
†Dovey	Crickieith to Cynvelin	R. D. Richards, Barmouth.
†Ayrion	Carrig Tipog to New Quay Head	E. L. Jones, Aberystwyth.
†Teify	New Quay Head to Dinas Head	H. W. Howell, Lampeter.
†Cloddy	Dinas Head to St. Gwen's Head	R. T. P. Williams, Haverfordwest.
†Towy, Loughor, & Taf	St. Gwen's Head to Worm's Head	W. M. Griffiths, Carmarthen.
†Ogmore and Ewenny	Portcawl to Cold Knap	S. H. Stockwood, Bridgend.
†Taff and Ely	Cold Knap to Bute Dock	A. Waldron, Cardiff.
†Rhydny	Bute Dock to Ty ton y Pill	Horace Lyne, Newport (Mon.).
†Tesk and Ebbw	Ty ton y Pill to Collister Pill	
†Wye	Collister Pill to Cone Pill	Major Beresford Peirse, D.S.O., Here-
†Severn	Cone Pill to Avon Battery	P. J. Stallard, Worcester [Iord.
†Avon, Brue & Parret	Avon Battery to County Boundary	T. F. Barham, Bridgewater.
†Taw and Torridge	North Coast of Devon	W. H. Toller, Barnstaple.
†Canal	West Boundary of Devon to Peel Point..	G. J. L. Ellis, Wadebridge.
†Fowey	Peel Point to Rame Head	W. Pease, junior, Lostwithiel.
†Tamar and Plym	Rame Head to Stoke Point	W. W. Matthews, Tavistock.
†Avon (Devon)	Stoke Point to Start Point	W. Beer, Kingsbridge.
†Dart	Start Point to Hope Ness	E. Windeatt, Totnes.
†Tegon	Hope Ness to Clerk Rock	H. Michelmore, Newton Abbot.
†Exe	Clerk Rock to Ottermouth	H. Ford, Exeter.
†Otter	Ottermouth to Beer Head	—
†Axe	Beer Head to Portland Bill	W. G. Forward, Axminster.
†Frome	Portland Bill to Hampshire Boundary ..	P. E. L. Budge, Wareham.
†Hampshire Rivers	East Boundary of Dorset to Ryde	C. J. Haydon, Bournemouth.
†Adur	West Tarring to Portobello	E. W. Osbornow, Brighton.
†Ouse (Sussex)	Portobello to Seaford Head	E. Holman, Lewes.
†Cuckmere	Seaford Head to Fairlight	H. J. Woodhams, Berwick, Polegate.
†Rother	Fairlight to Dungeness	T. J. Smith, Rye.
†Stour (Kent)	North to South Foreland	—
†Suffolk and Essex	Dovercourt Light to Covenhithe Coastgd. Sn.	A. T. Cobbold, Ipswich.
†Norfolk and Suffolk	—	H. Brittain, Norwich.
†Ouse and Nene	W. Boudry of Norfolk to Lapwater Hall	Joseph Miller, Bedford.
†Welland	Lapwater Hall to Western Point	S. B. Sharpe, Market Deeping.
†Witham	Western Point to Gibraltar	H. Snaith, Boston.
†Trent	Ingoldmell's Point to Trent Falls	C. K. Eddowes, Derby.
†Yorkshire	Trent Falls to Hayburn Wyke	J. E. Jones, Market Street, York.
†Esk (Yorkshire)	Hayburn Wyke to Skinningrove Beck ..	W. Brown, Whitby.
†Tees	Skinningrove Beck to Hardwick Hall ..	T. M. Barron, Darlington.
†Wear	Hardwick Hall to Souter Point	W. E. Raine, Sunderland.
†Tyne	Souter Point to Newbiggin Point	J. Gibson, Hexham.
†Coquet	Newbiggin Point to Hawick Burn	C. Percy, Alnwick.

salmon or freshwater fish. Such Boards have been appointed for 53 Districts. [The districts generally include all rivers running into the sea between the points named, and in the cases marked † also include the sea for a distance of three miles from the shore, or to the mid-channel in estuaries.]

There are also certain bodies created by local statutes, having authority over the fisheries, e.g., the Thames Conservancy Board, Lee Conservancy Board, and Conservators of the Medway.

These Boards have power to make bye-laws, not only for the regulation of the fisheries for salmon and freshwater fish, but also, in certain

cases for the regulation of other kinds of fishing which are prejudicial to such Fisheries. They are also empowered to issue licences for fishing for salmon, trout, &c.

SCOTLAND.—In Scotland there are 105 Fishery Districts, nearly each separate river forming a district of itself, but only 37 Boards of Conservators. The powers of these Boards are limited to the Salmon Fisheries.

IRELAND.—In Ireland there are 23 districts, embracing between them the whole country, each with a separate Board of Conservators.

SEA FISHERIES DISTRICTS.—Under the Sea Fisheries Regulation Acts, 1888 to 1894, the Board of Agriculture and Fisheries has power to form sea fisheries districts within the territorial waters of England and Wales, and to appoint local Fisheries Committees, either for a single county or borough, or for several jointly. They have power to make bye-laws, to be confirmed by the Board of Agriculture and Fisheries, regulating or prohibiting the use of instruments for the capture of sea fish (including

shell fish and crustaceans, but excluding salmon, the deposit of rubbish on fishing grounds, &c. The following districts have been created, including in each case the coast and territorial seas adjoining between the points respectively mentioned:—
1. Northumberland (coterminous with that county). 2. North Eastern, from Northumberland to Donna Nook in Lincolnshire. 3. Eastern, from Donna Nook to Great Yarmouth. 4. Kent and Essex, from Dovercourt to Dungeness, and including the Thames estuary to London Stone near Yantlet Creek. 5. Sussex (coterminous with that county). 6. Southern, from the western boundary of Dorset to Hayling Island. 7. Devon. 8. Cornwall (each coterminous with the respective counties). 9. Glamorgan, from Nash Point to Worms Head. 10. Milford Haven, from Worms Head to Cemmaes Head. 11. Lancashire and Western, from Cemmaes Head to Haverigg Point. 12. Cumberland, from Haverigg Point to Sark Foot.

Similar districts may be formed in Scotland under the Sea Fisheries Regulation (Scotland) Act, 1895.

Seasonable and Unseasonable Fish.

THE following table shows the periods when the different kinds of edible fish mostly in use are "in season" and "out of season."

The letter *p* signifies that the fish are then

in their prime or most plentiful; the letter *a* signifies that the fish may be obtained, but are not at their best; the letter *c* signifies that it is "close-time" as fixed by statute.

(a) This is for sea crayfish. River crayfish can be obtained in the summer and autumn. It is illegal to take fresh-water crayfish from March to June.

(b) Foreign oysters can be sold in the close season, and are to be had almost all through the year, even though they have been laid down in English beds for temporary storage.

(c) In the close season salmon from Holland, and also from certain British rivers where net fishing is permitted later in the year than usual are largely sold.

(d) For the first six months the bulk of our London supply of shrimps comes from Holland but Dutch shrimps are far inferior to the English which are plentiful from July to December.

Automobilism, 1908-9.

NOTWITHSTANDING the dire prophecies as to the future of the industry and the trade which obtained very generally in the fall of 1908, the support accorded by the manufacturers and agents and the public to the Seventh Annual Exhibition of Motor Cars and their accessories, held by the Society of Motor Car Manufacturers and Traders, did not appear to endorse such direful presage. There were no vacant stands beneath the great sweeping roof at Olympia, and the daily attendance of the public was, on the average, greater than that of any previous show. Certainly there were 35 cars less than in 1907, but that slight shrinkage was due to the shaking out of several unstable firms during the year, and the fact that exhibitors had realised that the best effects were not obtained by crowding cars on the stands. A total of 525 cars and chassis was shown, as opposed to 560 in 1907. The attendance for the eight days rose to a grand total of 151,850 people, 8,047 passing the turnstiles on the first day, the record attendance for the week being 25,695 on the Wednesday. Although 160,532 individuals visited the 1907 exhibition, this excess is accounted for by the fact that last year no trial runs were given, so that the turnstiles registered no re-entries after such experiences.

The concrete opinion of those most capable of judging was to the effect that the 1908 show was undoubtedly the best held up to date. In quality, design, and workmanship, together with consideration of the requirements of users and the purposes for which the cars were required, the average of 1908 was far above that of 1907. This was particularly remarkable in the matter of body construction, many coach builders having at last realised that they must construct bodies for mounting on motor car chassis and not endeavour to adapt carriage bodies to motor cars.

In the matter of engines there was a distinct tendency to concentrate on small motors of four cylinders and also upon cars fitted with engines of $3\frac{1}{2}$ ins. to 4 ins. bore, and $4\frac{1}{2}$ ins. to 5 ins. stroke. Small six-cylinder engines, many of them of uniquely compact design, were favoured. Many of the small four-cylinder engines were found to be cast *en bloc*, a method which has been further adopted by many firms since the show. This design of large four-cylinder engine only obtained in a few instances. Several motors were *desaxé*; that is, had their crank shafts set slightly to the left of the vertical plane in which their pistons travelled. This is done to reduce the angularity of the connecting rods on the downward power stroke as much as possible, so reducing the side thrust of the pistons on the walls of the cylinders. Five bearings to the crank shaft were fairly common, and crank shafts in such case could be lightened considerably. In the matter of ignition, the high tension magneto advanced considerably. Indeed, some makes of magneto have become so reliable that no alternative ignition systems were fitted. With but one or two exceptions, foreign cars only adhered to low tension magneto ignition. Valves were generally larger, and much closer attention had been given to cam profiling to obtain silence. Efforts in this direction were found in devices attached to the valve lifters or tappets, which served to keep them in continuous contact with their respective

cams. It was curious to note that while there was a tendency to lengthen the stroke of the lower powered engines, the reverse appeared to be the case with motors of over 20 h.p. Thermosyphon cooling was decidedly on the increase, its simplicity and efficiency when properly installed greatly recommending it, particularly for low powered small cars.

Dash lubrication alone was seldom found. In the majority of cases an oil pump was fitted, though here and there it served only to lift the oil to sight feeds on the dashboard, whence the lubricant found its way by gravity to the crank shaft bearings. There were many instances in which the oil was drawn by the pump from a sump formed in the base of the crank chamber, and delivered to the crank shaft and big end bearings of the connecting rods by pipes and ducts drilled in the crank shaft. In very few, if any, instances, however, was the oil forced to the gudgeon pin. The little end bearing of the connecting rod and the walls of the cylinders were fain to rely upon dash for their lubrication. In many cases steps were taken to prevent the oil rising above a certain level in the crank chamber and so causing the emission of smoke from the silencer.

Although nothing of a very startling nature developed in carburetters there were, nevertheless, many instances of attempts to refine this highly important and somewhat stubborn unit. Two and even three jets were used, and in some cases a small jet and an independent mixing chamber and mixture tube for running on low speeds. In very few of these devices was any attempt made to control the flow of petrol by mechanical means actuated automatically or manually, the volume of the spirit delivered being left chiefly to the suction of the cylinders and the operation of the automatic air valve. With the exception that vacuum pots to check the bursting of these valves were occasionally fitted, no control other than spiral springs or gravity was provided to these valves. Few, if any, carburetters were fitted with means for the hand control of petrol or air. On the whole the improvements effected in the carburettor up to date tend to the quiet working of the engine when running light, ample efficiency at low speeds, rapid acceleration, and good pulling at high speeds. Nevertheless here there is still a field open to genius, for the actual results obtained from a given quantity of petrol compared to its theoretical efficiency are still wide as the poles asunder.

Change speed gears, except for small details, were very much as before. Occasionally a four-speed box would have direct drive on its third speed and a geared fourth, but this was not very generally followed. Every car in the show over, say, 10 h.p. which was fitted with a three-speed gear box would have been better for all-round general use with another speed.

Chain transmission was found in a good many instances, and greater favour shown to that *sine qua non* in chain transmission, an oil tight oil bath chain case. Drive by propeller shaft was almost universal, particularly for low and medium powered cars, and the tendency to make these shafts with but one universal joint preponderated. Torque members, those very necessary adjuncts, were more common than formerly, though at times they were left to perform also the duties of radius rods. With two or three of the leading makes radius rods

were entirely omitted, and the drive delivered from the axle to the frame through the medium of the back springs. This, of course, precludes the use of swinging shackles on the forward end of these springs, a point somewhat opposed to easy suspension.

There was also an excellent tendency to cast gear boxes in one piece in box form, and provide large inspection lids. The above construction certainly makes for oil tightness. In the majority of cases the selecting rods and gear-striking and gear-locking mechanism were enclosed in the gear box.

Leather-faced cones and multiple disc clutches were quite the order of the day, although metal to metal cones and single discs were occasionally found. There was a distinct tendency to use smooth plates in the multi-disc clutches, and to decrease rather than increase the number of the discs.

So perfect and so reliable have ball bearings become that they are found everywhere in every good car, save for the crank shaft, for the carriage of which gun metal or white metal bearings mostly obtain. Ball bearings are, however, occasionally used in this connection, and in one case roller bearings.

Brakes were not remarkable for much improvement save that methods of adjustment for wear were made more accessible. The same may be said of steering gears, except that several safety fittings were evident. Nothing was shown to replace the laminated steel spring for the comfortable suspension of the body, although three-quarter elliptical springs seemed to be preferred to the rear inverted cross spring, which gives a tendency to roll.

Detachable wheels were not numerous, while detachable rims, though occurring frequently, still left much to be desired in the matter of detached tyre mounting. Body makers, as already suggested, showed more concern for the comfort of passengers, but in many cases seats were too high, too narrow, and made without sufficient backward slope. Since the Show, however, there has been much improvement in these points. The Paris Show, which was confined to pleasure vehicles only, remained open from Nov. 28 until Dec. 31, but its novel features had already been discounted by the exhibition which preceded it at Olympia. The French makers depend so much for the bulk of their sales on the British market that they dared not keep back their 1909 models for their own Exhibition. It was noticeable that all the important French makers were fain to follow the English lead, and to include six-cylinder cars amongst their patterns. The Silent Knight engine, for which the great firm of Panhard were reported to have secured rights, attracted much attention, but the Belgian firm responsible for the Minerva cars were the only exhibitors of one of these interesting engines. Specially light engines for aeroplane propulsion, however, distinguished the French from the British Exhibition. The Grand Prix of America, run on Nov. 27 by the A. C. of America, 196 miles, was won by a F. I. A. T. car, driven by Wagner, from Hémery, driving a Benz, by 56 secs. only. The winner's time for the full distance was 6 hrs. 10 mins. 31 secs.

Although the conditions of the French Grand Prix had been much in the air during the month of December, the circuit chosen, and the preparation of the roads commenced, it was suddenly

announced that a caucus of the French makers had come to an understanding between themselves that they would take part in no races whatever in 1909. The result of this combine was that no Grand Prix race was held in France this year.

Also in December the Royal Automobile Club issued a tabulated statement of the number of motor vehicles registered in the United Kingdom up to Sept. 30, 1908. The totals were as follows, England and Wales 137,345, Scotland 20,907, Ireland 6,139. As a matter of fact it is probable that these figures considerably over-state the actual totals, for it is not clear that the registration authorities have taken into account the registrations which have lapsed since Jan. 1, 1904. These would include cars sold without numbers, and no new car bought to take its place and use them, failure to transfer numbers on sale of car, etc., which in three or four years would make quite a considerable total. It would be to the interest of motorists at large and the industry if the registration authorities were compelled by law to keep their lists correctly and up to date.

In December of last year, too, a statement that the Treasury experts were contemplating a petrol tax was published in the motor journals, *The Autocar* remarking, by the mouth of its parliamentary representative, that it was an impost which found special favour with the Chancellor of the Exchequer. How true that report was is now but too well known to all concerned.

The question as to the manner or side upon which a motor car should pass a tram car, which after the issue of certain regulations by the Local Government Board had been a matter of doubt and discussion in motoring circles, the case of *Burton v. Nicholson*, heard in the Divisional Court on Jan. 12 last, settled the matter for the time being. The summons was for passing a tram car proceeding in the same direction other than on the off side, and the Bradford Stipendiary convicted, but stated a case. The higher Court dismissed the appeal, which left it that in any case soever, a motorist passing or overtaking a tram car must do so on its, the tram car's, off side.

Some weeks later the Motor Union received a communication from the Local Government Board with reference to the above appeal, in which they announced the recession of the paragraphs 3 and 4, Art. IV. of the Motor Cars (Use and Construction) Order 1904. The ultimate effect was to leave the question of motor car traffic with regard to the passing or overtaking tram cars to the common sense of the motor car driver.

The values of the imports and exports of motor cars during the year 1908, compared with the two preceding years, show that while the imports of foreign cars had decreased, the exports of British cars, as compared with 1906, have made very satisfactory progress, though there was a falling off as compared with 1907. The excess of imports over exports, though still undesirably large, shows signs of diminution. Imports of foreign motor cars, chassis and parts, 1906, £4,371,660, re-exported £422,294; 1907, £4,552,786, re-exported £382,665; 1908, £4,112,461, re-exported £395,321. Net imports for 1908, £3,753,140. Exports of British cars, £1,262,803. Excess of imports over exports, £2,490,337.

The First Annual Dinner of the Royal Auto-

mobile Club and its Associated Clubs was held on Jan. 14 in the Grand Hall of the Hotel Cecil, H.S.H. Prince Francis of Teck presiding. It was shown that the associated bodies together represented a total of 14,680 members.

On Wednesday, March 17, that most enterprising and energetic body, the Automobile Association, in order to demonstrate what could be done in the matter of transporting troops per motor car, did by the loaned cars of their members carry a battalion of Guards, over 1,000 rank and file, from London to Hastings by road in an appointed time. Over three hundred automobiles were employed in this service, which, with certain ordered halts upon the road, occupied no more than 4½ hours. All this was done without a hitch and without accident, and of all the self-propelled vehicles engaged, only two broke down. After the event it was said that the authorities contemplated a further experiment of the kind on a larger scale, to wit, no less than the transport of a brigade from London to the coast, but up to the moment of writing this has not been attempted.

The Annual Dinner of the Royal Automobile Club was held in the Royal Theatre, Covent Garden, on March 18, H.R.H. The Prince of Wales, K.G., presiding. The Annual General Meeting of the Motor Union was held on April 21, Mr. W. Joynton Hicks, M.P., the automobilists' Parliamentary champion, presiding. Statistics as to membership showed the wonderful growth of this useful and hard-working association. In March, 1903, the membership numbered 97, and five years later 4,500. On March 31, 1907, the roll stood at 6,700 individual members, while 38 clubs and other motor organisations were affiliated. No less than £870 was expended in 1908 in settling important points of principle by taking test cases to the High Court. The income during that year amounted to £10,788 with £10,336 invested in securities.

By the Budget speech made by the Chancellor of the Exchequer in April, automobilists, long threatened with increased taxation, learnt that the blow had fallen. The general facts of the crushing impositions upon a young and struggling industry are too well known to need more than the barest recapitulation here. The carriage licences which have hitherto obtained are to be swept away, and an arbitrary horse-power scale as follows, imposed in their stead. Commencing with cars at 6½-h.p., which must pay £2 2s. per annum, the ill-considered advances run thus:—12-h.p., £3 3s.; 16-h.p., £4 4s.; 20-h.p., £5 6s.; 33-h.p., £8 8s.; 40-h.p., £10 10s.; 60-h.p., £21; above 40-h.p., £42. In calculating the h.p. the R.A.C. rating is to be followed—that is, diameter of cylinder squared, multiplied by the number of cylinders and divided by 2.5. An import tax of 3d. per gallon of petrol has also been imposed, and has been payable since the passing of the Finance Bill. This has resulted in increasing the cost of petrol by 4d. per gallon, or over 30 per cent. A total sum of over £600,000 is expected to be derivable from these sources, which money it was said was to be devoted to the improvement of existing roads and the construction of special motor roads. Since then, and dead against all the promises and undertakings of the Chancellor, the House of Lords has decreed that this money, or part of it, must be handed over to the road authorities in mitigation of the cost of the ordinary road

upkeep. Thus the motorist is made to pay twice over for roads, once through the rates and again by reason of motor taxes. Towards the end of October, by effect of urgent representations on the part of the owners and users of commercial motor vehicles, the Chancellor of the Exchequer agreed to exempt the industrial side from the 1½d. per gallon duty on petrol for a period of eight months.

In the early part of June the text of the Finance Bill was issued, when it was found that no attention whatever had been paid by the authorities to the urgent representations of the motor organisations in and out of Parliament, and that the industry and the trade were to stagger on under an incubus which no class of road-using traffic had ever before been submitted to. It was provided that any sum produced by these duties in excess of £55,000 should be paid into a separate account to be established under regulations made by the Treasury, and to be appropriated in such manner as Parliament may determine towards the development of roads in the United Kingdom. This was done later by the Development Bill.

Wednesday, May 26, to Tuesday, June 1, was occupied by the reliability trials held by the Irish Automobile Club. Forty-seven cars divided into eight classes took part, and were driven from Dublin through Lurgan to Portrush, Bundoran, Galway, Killarney and back to Dublin. Non-stop runs were made in Class A by 15-h.p. Bedford; Class B: 8-h.p. Rover and 10-h.p. Riley; Class C: 10-h.p. Humber, 12-h.p. Riley and 12-h.p. Star; Class C 1: 12-h.p. Marlborough; Class D: 15-h.p. Marlborough, 16-h.p. Humber, 30-h.p. Cadillac, 15-h.p. Rover, 15-h.p. Straker-Squire, 30-h.p. Cadillac (2), 16-h.p. Humber (2); Class E: 15-h.p. Deasy, 20-h.p. Vauxhall and 20-h.p. Vauxhall (2); Class F: 18-h.p. British Gladiator and 20-h.p. Sunbeam; Class G: 40-h.p. Gladiator.

During the summer a very interesting loan exhibition of historical cars was assembled at the White City, Shepherd's Bush, a steam car of 1861, a steam bicycle of 1881, and many pioneer vehicles, ranging from 1895 to 1904, were shown.

The month of June was likewise remarkable for a motor tour of the Duchy of Cornwall by their Royal Highnesses the Prince and Princess of Wales. The route followed was from Budstowe through Launceston, Bodmin, St. Columb, Newquay, Padstow, St. Austell, Liskeard, Tavistock, Princetown, Two Bridges, Postbridge, Moreton Hampstead and Exeter. In no other way could these august personages have made closer acquaintance with their ancient inheritance.

The Scottish Reliability Trials which, owing to the inaction of the Royal Automobile Club, this year take precedence in events of the kind, were held from June 14 to 19. No less than 65 cars left Glasgow to be driven over 1,000 miles of the most difficult and trying roads in Scotland. The cars were timed up seven severe hills and were divided into nine classes, according to price. The trials were throughout treated to perfect weather, an unusual occurrence with this North British undertaking.

On June 20 the only competition of importance held in France during 1909 was the Volturette Cup Race, promoted and organised by L'Auto, which took place on the Boulogne Circuit. The distance covered was 282½ miles in twelve rounds. Twenty cars participated, and the event fell to a Lion-Peugeot, driven by Guippone, in 5 hrs. 56 mins. 29½ secs. = 48 miles per hour.

Three British cars only, all Calthorpes, competed, the vehicle driven by Burgess winning the cup presented by the Bennett Steamship Co. for regularity of speed on the part of any one car. They were purely standard cars, whilst the first four cars in were nothing but speed freaks.

The Saltburn Speed Trials, organised by the Yorkshire A. C., proved one of the most successful functions of the year. Nothing remarkable was achieved in the way of speed save 118.09 m.p.h. by Mr. A. Lee Guinness on a 200-h.p. Darracq in an attempt to beat his own record of 121.6 m.p.h.

On July 2 a deputation representing the Motor Union and the Coventry Motor Industry was received by the Chancellor of the Exchequer. The object of the deputation was to protest against the excessive motor taxation, and to represent to the Chancellor the very ill effect it must have upon the industry. Notwithstanding, Mr. Lloyd George remained inflexible.

In July the International League of Touring Associations held a congress in London, after which a large number of the foreign delegates were taken as guests by the Motor Union from London to Swansea, visiting many points of interest on the way, and winding up in South Wales with races on Pendine Sands. The visitors were most hospitably entertained for four days by the Welsh Automobile Club.

At the Shelsley Walsh Hill Climb on July 17, the open event was won by a 24-h.p. Vauxhall, driven by Mr. Percy Kidner, and the classic Henry Edmunds Cup by a 20-h.p. Vauxhall, driven by Mr. A. S. Hancock. Amongst the good and instructive work performed during the year was the Headlight Trials, carried out on July 19 and 20 at the Crystal Palace, when exacting scientific tests were made of a large number of lamps, electric and acetylene, supplied by the makers.

In the early part of August a circular letter issued from the War Office dealing with a scheme which included the outline of a plan whereby automobilists should place their cars at the disposal of the country.

Late in August another motoring body sprang into existence, known as *The Autocar League*, and formed for the purpose of combining every motorist in the country with the object of taking concrete automobile opinion on subjects affecting the motor weal, and acting thereon. That portion of the Development Bill which bore upon the disposition of the motor taxes was debated in Committee on Sept. 22, when it was decided that the funds should be devoted to the improvement of present roads, the making of special roads, and that the speed limit should obtain upon the latter.

Motor Marks.

COUNTIES.—Anglesey, E.Y.; Bedford, B.M.; Berks, B.L.; Brecon, E.U.; Bucks, B.H.; Cambridge, C.E.; Cardigan, E.J.; Carmarthen, B.X.; Carnarvon, G.C.; Cheshire, M.; Cornwall, A.F.; Cumberland, A.O.; Denbigh, C.A.; Derby, R.; Devon, T.; Dorset, F.X.; Durham, J.; Ely, Isle of, E.B.; Essex, F.; Flint, D.M.; Glamorgan, L.; Gloucester, A.D.; Hereford, C.J.; Herts, A.R.; Hunts, E.W.; Kent, D.; Lancs, B.; Leicester, A.Y.; Lincs. THE YEAR'S WEATHER AND THE CROPS.

November, 1908, was very favourable for farming operations of all kinds, and good progress was made. *December*. The favourable weather continued for the greater part of this month, which closed with farm work unusually forward. In *January* the favourable conditions continued during the first two weeks, and the winds had the effect of drying the land quickly. Rainfall was scanty, and in places the land by the middle of the month was almost ready for seed. During the third week severe floods in Scotland and Ireland stopped work in many places. On heavy lands the frost at the end of the month was welcome, for its effect in breaking down the soil. *February* opened with good prospects. The land at this time of year had rarely been so dry, and by the close of the second week a good deal of corn had been drilled. About this time the fruit growers in Kent suffered severely from gooseberry mildew, and on the 16th it was reported that 2,000 acres were infected. During the third week morning frosts proved a hindrance, and in the last week severe frost and snow almost stopped work on the land. In some of the eastern counties the want of water began to make itself felt, and many farmers had to begin carting water. The cessation of work through the cold weather which began in the last week of February lasted till the middle of *March*, and during three weeks the harrow and the drill had to be laid aside. The rain and snow were welcome as replenishing the water supply, but farmers were getting anxious. About the 18th, however, the weather broke, and sowing re-commenced. Ireland suffered less from this period of bad weather than either England or Scotland. The end of March found farm work generally in a backward state. During *April* the weather was generally favourable for farmers, and good progress was made. By the end of the second week the drilling of corn was almost completed. Later the planting of potatoes and mangels was done with the land in admirable condition, and the seed of both crops went into an excellent tilth. At the close of the month the country looked well, and the promise for all crops was good. *May* was dry, and it seemed as if the March dust was two months behind time. At the beginning of this month the crops, as a whole, looked well, the land was not only dry but friable, and pro-

gress was made with weeding. As the month went on the want of rain made itself more and more felt. During the fourth week, however, good rains set in just in time, proving of enormous advantage, and benefiting the crops greatly. The first half of *June* was rainy and cold, and as unpropitious for haymaking as May had been for the growth of the grass. The green crops were growing fast, but weeding was hindered by the rain. North of the Trent, however, the farmers were still suffering from drought. In the third week the weather was favourable, and good progress was made. The weather then again became unsettled, interfering greatly with haymaking. *July* opened with better weather, but it soon again became unsettled, and throughout the month the lack of sunshine was much felt. In the third week there was much hay still uncut, and the month closed with the great bulk of the corn crop still green. On the 27th there was heavy rain and strong wind in some districts, which laid the corn badly. *August*.—A very welcome change set in at the beginning of the month, and lasted for rather more than a fortnight. All crops improved immensely, and harvest operations were in active progress. A check came, however, with the third week, and from then till the end of the month unsettled conditions prevailed. The middle of *September* proved fine and dry, but the first week and the last 10 days were unsettled. On the 17th the fine period was broken by a heavy thunderstorm and torrents of rain in the southern counties. During *October* the same unsettled conditions prevailed, rendering the close of the harvest exceedingly difficult and anxious. The season generally was said to be the worst for harvest since 1879. Barley suffered most, but all crops were affected.

The year was one of abundant crops of poor quality, harvested for the most part with difficulty. In some places ploughing was started before harvest was finished. The official estimate by the Board of Agriculture of the yield of the various crops, taking 100 as the standard, is wheat 104, barley 105, oats 98, potatoes 102, roots 105, and hay and grass 95. Hops were a very poor crop; the official estimate of the yield was 6.59 cwt. per acre, as against 12.10 cwt. per acre in 1908.

Storms and Floods in 1908-1909.

(1908) *November*.—On the 14th there was a gale in Ireland, 24 men saved by lifeboat off co. Down. On the 16th great flood in Port Elizabeth, damage estimated at £200,000, a rivulet changing in 2 hours to a torrent 200 yards wide and 20 to 30 feet deep. About the 19th great floods in Sicily, 500 houses reported washed away in town of Riposto. 22nd severe gale in England, breach of 150 feet made in Southend pier. 27th fog in Channel, s.s. *Tongariro*, with 251 passengers on board, after collision, beached at Dover with no loss of life. 29th flood in Barbados. *December*.—Dense fog and 3rd, s.s. *Lusitania* unable to enter Mersey all day; collieries stopped for want of wagons; lives lost in Paris. 10th gale at Yarmouth, lives lost. 15th flood at Newport, Mon. 21st fall of cliff, owing to rain, in St. Margaret's Bay. 23rd fog in Suez Canal, delaying traffic. 26th-29th very heavy snow, trains snowed up, especially in the north. At New Deer, Aberdeen, no mails for over 5 days. 28th gales with loss of life. 29th heavy snow on the Continent; many deaths from cold reported in Paris. (1909) *January*.—Very heavy snow and floods in Scotland about the middle of the month, trains snowed up and much damage done. 22nd floods on the Rand, 140 lives lost by flooding of mine; much other damage. 23rd White Star liner *Republic* in collision in fog, 175 miles east of New York, over 700 persons on board; assistance summoned by wireless telegraphy. 31st heavy snow storms in America. On *February* 1st severe cold experienced in New York. On the 4th a hurricane in Austria, with heavy floods; a train of 13 goods trucks driven several miles by the wind. 5th severe floods in Germany; worst for 30 years. The Main at Frankfort rose 18 feet, 26 lives lost. Gale on east coast of England. 12th fog off Ushant, causing loss of a ship. 22nd exceptional snow storms in S.W. Russia, completely disorganising railway traffic. 25th black rain observed in Ireland. *March*.—2nd-3rd extraordinary snowfall in Kent, drifts filling the lanes in places to the hedge tops. Heavy snow in London also. Strong south-easterly gale on 3rd-4th. Sandown military races abandoned on 4th owing to snow. 18th heavy snow storms in Russia, blocking the railways. 29th terrific cyclone in New Hebrides. Huge wave swept over Teouma, destroying many lives and much property. *April*.—Extraordinary mirage observed at Grimsby on 8th. 14th Niagara Falls blocked with ice, all power plants and factories closed, river choked for 20 miles. On the 21st attempts were made to dislodge the ice by dynamite. The ice was piled up nearly 60 feet above the normal surface of the water in places. 27th thunderstorm at Great Yarmouth, church struck and belfry set on fire. 29th heavy snow on the Perthshire hills. *May*.—7th magnificent rains in South Australia. 10th extraordinary weather in India; heavy rains (26 inches in 7 days) and destructive cyclone; 47 vessels sunk in Calicut Roads. 19th much ice at St. John's,

Newfoundland. Allan liner *Mongolian*, with several hundreds of passengers on board, wedged in. s.s. *Madura* reported iceberg 3,300 feet long and 400 feet high. 20th hot wind at Lymouth. 24th storm on Spanish coast, loss of 60 fishing boats and 100 lives. 29th cyclone in Texas, 30 lives lost, houses fired by lightning. *June*.—1st good rains in South Australia. 10th fog in New York, steamer with 660 persons on board went aground, all saved. 19th thick fog off Dover, Red Star liner *Zealand*, with over 1,500 passengers and crew, in collision, no lives lost. 22nd hot weather in New York, many deaths from the heat reported. 29th excessive heat in New York; President giving a dinner had it served on the roof of the White House. *July*.—Heavy fog in Straits of Dover, s.s. *Whakatan* in collision and beached at Dover. 7th floods in Colorado, Ohio, Missouri and Mexico—great damage. 22nd monsoon prospects at Bombay better than for 20 years. 30th great floods at Manchuria, 1,000 persons reported drowned, 7,000 houses submerged. *August*.—6th heavy fog on Welsh coast, s.s. *Langton Grange* ran aground. 8th fog on east coast, Yarmouth steamer delayed 20 hours. 9th three deaths from heat reported from the Midlands. 12th four deaths from the heat, one, a child, in London. 17th heavy snow in Johannesburg, interrupting traffic. On the same day 11 deaths from heat reported from St. Louis, where temperatures up to 112° were recorded. Five bullocks killed by lightning at Newmarket. 22nd destructive forest fires in Canada due to hot dry weather. Drought in the Midlands. Widespread rains in India, assuring the crops. 28th floods in Mexico, 2,000 lives lost, damage reported to be £6,000,000; floods spread over district 400 miles by 300 miles. *September*.—1st gale in N.E. Scotland, lifeboat nearly wrecked. On the 16th Cunard liner stranded in Mersey through fog. 17th heavy thunderstorms, soldiers injured by lightning at Fulbrook. 20th schooner wrecked off Caister, 9 men saved by lifeboat. 21st hurricane in Mexican Gulf, 300 lives reported lost, £2,000,000 damage from tidal wave which swept 2 miles inland. 22nd storm in France, lives lost, much damage. 24th severe gale in Orkney, driver on coach killed by lightning. 28th great floods in South Wales, iron bridge swept away, lives lost; 9 persons rescued through hole in roof of cottage; water 6 feet deep in some houses. *October*.—Gales in the Atlantic during the early part of the month. Hurricane in Cuba. Cyclone in Bengal on 18th, much damage, many lives lost, heavy goods trains derailed. 20th heavy rains in Morocco, convoys could not move. 21st severe gale over the United Kingdom, travelling during part of its course as fast as 60 miles per hour, wind force 10-11 by Beaufort scale. Disastrous floods in Kent and Sussex from 27th. Villages in valley of the Medway only reached by boats. Rainfall in 3 days at Margate nearly twice the average for the month; railway bridge near Etchingham collapsed.

In the month of August, 1908, earthquake shocks were recorded by Professor Milne at the Isle of Wight, and a strong shock was felt at Mistretta; Terni, in the Province of Perugia; Messina, in Sicily, and in the surrounding country, and in California the town of Eureka was severely shaken and a fissure half a mile long opened in the earth. Towards the end of September shocks were felt off Leaulpeo. The steamer *Rodames*, of the Cosmos Line, was lifted up and let down again by a tidal wave with such force that four people on board were killed and two injured by falling spars. Professor Belars, of Austria, reported that shocks were recorded by his instruments on September 28 at 6.32 a.m., the origin being about 1,875 miles distant, probably in Persia or the Caucasus; the same shock was also registered at Shide.

In October several tremors were registered at both Shide and Laibach, and at the end of the month a powerful shock was felt in Saxony, the town of Branbach having thirty distinct shocks, accompanied by loud explosions, between 1 o'clock in the afternoon and 10 o'clock at night. On November 5 violent earth-tremors were felt throughout Calabria, especially at Reggio, Barcone, Bruzzano, and Messina in Sicily. In Saxony, at 3.40 on the same date, a very severe shock and loud reverberations were experienced. The inhabitants of Plauen ran into the streets in their night attire. The water in the Sohler Curative Springs near Elster had become 6 degrees warmer since the shock of the 3rd inst. At Halle the shock was followed by a snowfall; in Gotha houses were shaken and walls cracked. The zone of disturbance extended to Dresden and far into Prussian Saxony.

In November the volcano of Kilauea exhibited phenomena never before known during the eighty years that it has been under observation. The molten lava frequently rose from the central pit from 10 feet to 400 feet within a few hours and then suddenly fell again. The area of this pit is between 40 and 50 acres; the amount of matter rising and falling must, therefore, have been enormous. Earthquake shocks occurred at Spa, in Belgium, and were also recorded in India and Austria. At the beginning of December an earthquake was felt in Portugal, chiefly at Arrudo, Clivaes, and Fuesca. The shock lasted seven seconds, and many buildings collapsed, and factories and mills were partly destroyed. Large fissures opened in several districts and rivers overflowed their banks. On December 12 unusually large earthquakes, distant about 6,000 miles, were recorded by Professor Milne at Shide, and also by Professor Belar in Austria. At Casablanca, the sea, after having receded several hundred yards from the shore, suddenly came back with great violence, wrecking many boats and damaging the harbour. This was probably due to a seismic disturbance in the Atlantic near the Moroccan coast. Shocks were felt in Saxony and Thuringia on December 18 at about 6 a.m.

Messina Earthquake.—On December 28, 1908, occurred the most awful earthquake of modern times. Professor Milne recorded, at about 4.20 a.m. (G.M.T.), a very bad shock, followed by fourteen others, the vibrations continuing for four hours. The centre of the disturbance was in S. Italy and Sicily, where about 200,000 people were killed and many thousands injured. The chief towns ruined were Messina, Reggio, Palmi, Bagnara, Seminara, Scylla, Santa Eufemia,

Monteleone, Sinopoli, Castellace, Mileto, Pallaro, Villa San Giovanni, &c. The private property destroyed in Messina was valued at £80,000,000, and at Reggio £40,000,000, whilst the Government lost £12,000,000 on the fortifications of the Straits of Messina, £6,000,000 on the port and harbour works, £80,000 on the lighthouses, £2,000,000 on the port of Reggio, and £1,250,000 on the port of Villa San Giovanni. About 2,200 vessels, large and small, were destroyed at Messina, 1,000 at Reggio, 300 at Catania, 250 at Villa San Giovanni, and 400 at Riposto.

Before the earthquake a brilliant aurora borealis was seen on the Calabrian side of the Straits, accompanied by dull subterranean rumblings. Then the sea receded 300 yards from the shore, and an enormous wave gathered up and rushed with tremendous force on the two coasts, sweeping the beach and overthrowing the houses near. At Messina the water was thrown 14 feet above the quay, and the vessels broke adrift, some being lifted into the town. King Victor and Queen Helena themselves aided in the work of rescue from the ruins at Messina. The façade of a building five storeys high fell down at the King's feet when he was walking through the town.

The Mayor of Reggio was extricated from the debris by his family after hours of hard work, but died as soon as he had been rescued. Out of 100 post office employees at Messina only six were saved; of 280 railwaymen eight alone answered the roll call; and of 200 soldiers at the Messina barracks only eight escaped. At Reggio the Prefecture, Cathedral, Lyceum, and other public buildings were destroyed, and the barracks fell in, killing about 2,000 soldiers.

The towns and villages situated on the west coast-line from Monteleone to Reggio suffered the most. Immense orange groves near the road from Lazzaro to Reggio were destroyed, and many hundreds of acres of land inundated. Vesuvius, Etna, and Stromboli were quiescent during the whole period of the disturbance. The number of killed in each town will never be exactly known, but roughly the figures are as follows:—Palmi, 4,500; Sant Eufemia, 1,500; Messina, 108,000; Bagnara, 800; Reggio, 31,000; Villa San Giovanni, 3,700; Pallaro, 3,300; Scylla, 2,800; Mileto, 2,300.

Most of the Powers sent monetary help to the stricken country, and British, U.S.A., and Russian warships gave provisions and shelter to many thousands of refugees.

On January 3, 1909, a violent shock was felt at the island of Stromboli; it was accompanied by an eruption of the volcano and prolonged subterranean rumblings. Buildings were damaged, and intense panic prevailed. There was also a shock at Caltagirone, in the interior of Sicily, where the ground sank, several houses collapsed, and a few people were killed. On January 12, earthquake shocks occurred in northern and central Italy, causing severe panics but little real damage to the inhabitants; the chief towns shaken were Bologna, Genoa, Milan, Venice, Florence, Padua, Ravenna, &c.

Very severe shocks of earthquake were registered on the instruments at the following places on January 22:—Reggio, Messina, Smyrna, Isle of Wight, Rome, Mileto, Hamburg, Potsdam, Uccle, Plauen, Heidelberg, Stuttgart, Groottingen, Ebro Observatory, Cape Town, and St. Petersburg. At Reggio subterranean rumblings

were heard, and several walls collapsed. At Messina shocks lasted eight seconds, and wooden shelters were violently shaken.

On February 22 an earthquake occurred in the vilayet of Sivas. Many Government buildings and houses fell, and about thirty people were killed or injured. In the district of Koylhisar many inhabitants were left without any shelter, the authorities having to provide tents for them. On the 15th an earthquake lasting ten seconds was felt near Budapest, but no serious damage resulted. Terrific shocks were registered at the Florence, Padua, and Bologna observatories on March 12 and 13, and on the former date three strong shocks accompanied by loud explosions occurred in Messina. On the 14th a violent shock lasting thirty seconds was felt at Stroemstad in Sweden, also in Norway at Frederikstad and Frederikshald.

A severe shock was experienced at Lima on April 11; the movement, which ran from east to west, was accompanied by rumblings, dense fog, and clouds of dust. On April 22 a violent shock caused great alarm at Madrid and Lisbon. The sea near Espinho, in the district of Vizeu, rose 30 feet above the highest previous tide-level, causing many buildings in the town to collapse. At Lisbon fires occurred in the lower town, and a large number of churches were cracked, but no one was injured.

On May 14, at 10.17 p.m., a shock lasting from 30 to 60 seconds was felt in Winnipeg and for 500 miles to the W.; at Regina and Moose Jaw patients in the hospitals were shaken out of bed.

It was most severe in the Saskatchewan province, where articles in the houses tumbled off shelves and mantelpieces, etc. Strong shocks of earthquake, accompanied by a tidal wave, were felt at Korinchi (Upper Padang, Sumatra) on June 3. Two hundred and thirty people were killed and many injured, and much damage was done.

On June 10, at 9.13 p.m., a violent shock was felt throughout the South of France. At Marseilles clocks stopped and people rushed into the streets in alarm, but no real damage was done. A second shock was recorded at 9.40. It was also felt at Aix, where windows were broken and houses cracked; at Avignon the shock was very violent, M. Bouilly, the astronomer, being hurled from his seat when making observations. At Enguilles and Lambèze several houses collapsed. Shocks were felt at 9 p.m. at Perpignan, Cette, Nice, Toulon, Cannes, Montpellier, and Beziers, and about 60 people were said to have been killed.

In the same month shocks occurred in the province of Atacama, Chile; no one was killed but many were injured, and several houses were wrecked. In July an earthquake destroyed several villages and many people in the province of Elis in Greece. On July 30 two severe shocks were felt at Mexico City. Five people were killed and three mortally injured, and many houses were destroyed. At Acapulco half the city was ruined, and many people were killed and injured. The State of Guerrero also suffered, and fifteen people were reported killed at Santa Julia.

ASTRONOMICAL OBITUARY.

Obituary.—Professor Simon Newcomb died on July 11; he was born in Nova Scotia in 1835. In his early days he was a school teacher in Maryland, and, having made the acquaintance of Professor Henry, of the Smithsonian Institution, was appointed a computer on the staff of the American Nautical Almanac. In 1861 he took charge of the Naval Observatory at Washington, as Professor of Mathematics in the U.S. Navy. Professor Newcomb was the author of a great number of books and papers, not only of value to the student of exact astronomy, but several of very great interest to the uninitiated in the higher mathematics—such, for instance, as his 'Popular Astronomy,' 'The Stars: A Study of the Universe,' 'Astronomy for Everybody,' &c. He was awarded the gold medal of the Royal Astronomical Society in 1874 for his researches on the orbit of Uranus and Neptune. The observed deviations of the Moon's motion from that assigned to it by Hansen's lunar tables led him to undertake a revision of the lunar theory. Newcomb was the recipient of degrees from many universities, as well as marks of distinction from famous scientific societies throughout the world.

HAILEY'S COMET.

Halley's Comet.—The search for this comet, expected to return to perihelion in the spring of 1910, was commenced towards the end of 1908, but at that time without success. It was not discovered till the 11th of September, 1909, by

Dr. Max Wolf, of Heidelberg. On August 28, Dr. Wolf suspected some images of the comet on a plate, but did not consider it certain till confirmation was obtained on September 11. In the light of this announcement a further scrutiny of the photographs taken at Greenwich on September 9, showed that the comet had been photographed on them also. The comparison between Dr. Wolf's plates and those of Greenwich showed complete accordance, and there is no doubt that this very interesting comet has again visited us after an absence of 75 years. The difference between the observed and calculated place, considering the difficulties of the calculations, agreed very nearly. The perihelion passage will occur on April 10, 1910. It is calculated that at the end of the year the comet will be about the 11.5 magnitude.

TRADE UNION STATISTICS.

Trade Unions.—The trade union statistics show remarkable progress. At the end of 1872, the year after the passing of the Trade Union Act, 1871, the funds stood at £107,290, while in 1906 they amounted to £5,864,342. The remarkable growth of these bodies can be seen from the following figures:—

	Annual Income. £	Funds. £
1872	120,977	107,290
1890	990,872	1,102,147
1906	2,709,665	5,864,342

The membership increased from 203,732 in 1872 to 645,451 in 1890, and to 1,719,031 in 1906.

In the first half of the seventeenth century (1633 has been cited as the best approach to a definite date) we meet with the earliest mention of the introduction of *rails* for the lessening of friction upon roads. Beamis of wood, some six or seven inches in breadth, were about this time laid down to facilitate the draught of the waggons in the vicinity of some of the coal-mines at Newcastle; and as a matter of necessity the addition of "sleepers" had speedily to follow. In 1738, at Whitehaven, it is stated that iron was first substituted as the material of the rails; and in 1767 it appears established that this revolution was adopted at Coalbrookdale, being followed nine years later at the Sheffield Colliery. As yet, however, only thick plates of iron were fastened to the surface of the wooden rails, and it was not till 1789 that "edge rails" were introduced, the credit of their adoption being assigned to William Jessop, on the Loughborough and Nantpantan line. James Watt had conceived the idea of utilizing steam for locomotion, and there is a record of a model locomotive having been used in Cornwall in 1784. George Stephenson, however, in the year 1825, was the first to bring the project fairly into practical shape.

The first Act obtained for the construction of a railway was that of the Surrey Iron Railway Company in 1801, for a line $9\frac{1}{2}$ miles long from Wandsworth to Croydon. In 1804 an Act was passed "for making and maintaining a railway or tramroad from the town of Swansea into the parish of Oystermouth, in the County of Glamorgan, and for the hauling or drawing of waggons or other carriages passing upon the said railway or tramroad with men, horses, or otherwise." On the 21st of February, 1804, Trevithick's patent locomotive steam engine was tried at Penydarran, near Merthyr, and conveyed along a tramroad 10 tons of bar iron, and about 70 persons, a distance of 9 miles. The application passed the third reading as a railway or tramroad. The word "otherwise" was evidently intended to cover the use of Trevithick's engine, and this Act may therefore be considered the first in which steam was contemplated as the motive power. The line is now known as the Swansea and Mumbles Railway. Then followed the Kilmarnock and Troon, the Severn and Wye, the Gloucester and Cheltenham, Plymouth and Dartmoor, Stratford-on-Avon and Moreton, and other small undertakings, about twenty-five in number altogether, with an aggregate of 325 miles, and an authorized capital somewhat over a million. It is almost unnecessary to add that animal power only was contemplated in their working. The Stockton and Darlington Act was obtained in 1821, with a capital of £102,000; and it is remarkable that, while animal power was to be relied upon for working the line, the clause in the Act states "with men and horses or otherwise." George Stephenson came upon the scene immediately after this Act was obtained, and was appointed engineer of the line; and at his urgent request, Edward Pease, the promoter, applied for a new Act empowering the company to work the railway with locomotive engines. Great opposition was encountered, but the Bill finally passed in 1823, and the line, which was 25 miles in length, was opened on the 27th of September, 1825. The Monkland and Kirkintilloch Railway, a colliery line near Glasgow, opened in 1826, was really the first to follow the example of the Stockton and Darlington, and several other small lines—many

of them worked partly by fixed and partly by locomotive engines—quickly adopted the new traction power. The inauguration of the Liverpool and Manchester line in 1830, attended as it was with a tragic result, was the first to impress upon the people that a revolution in travelling had really taken place. Leicester to Swannington came next, but that from London to Birmingham was the largest that had yet been projected. A great struggle took place with landowners and other influential personages, opposed not only to this Bill in particular, but to the introduction of railways generally. Undaunted courage and perseverance on the part of the promoters prevailed, and the Bill, which was rejected in 1832, passed in 1833, but not until landowners and others had been conciliated by having the price originally estimated for their land, &c., doubled and even trebled. The expenses of carrying this Bill, which was probably the most momentous Parliamentary campaign in the history of railways, were over £70,000. The line was opened throughout in 1838, and the first train accomplished the distance at an average speed of over twenty miles an hour. The tide of public opinion was now fairly turned, and ran as strongly in favour of railways as it had before been against them. The Grand Junction, the London and Greenwich, London and Southampton, the Great Western, Birmingham and Derby, Bristol and Exeter, Eastern Counties, Manchester and Leeds, Midland Counties, North Midland, South Eastern, London and Croydon, Birmingham and Gloucester, together with a large number of small Bills, were all passed in four years from the passing of the London and Birmingham Bill, and before that line was opened. Thus in four or five years was witnessed the laying of the foundations of nearly all the existing great trunk lines of railway in this country.

Up to 1840, inclusive, notwithstanding the delays and difficulties which surrounded railway projects, even in the earliest stages of legislation, 299 Acts, authorizing the construction of 3,000 miles of line, had been passed. The inevitable reaction set in, and in 1841-2-3 only a few small Bills were passed by the Legislature; but as the Liverpool and Manchester, the London and Birmingham, and other leading concerns were paying 10 per cent. dividends, and some of the smaller lines were yielding even larger returns, attention was naturally drawn to the remunerative character of this class of property, and the supply of railway shares became far below the demand. A flood of new projects appeared before the public, and the Legislature even, labouring apparently under the general excitement, encouraged promoters by relaxing or withdrawing the general opposition which had previously been offered. In 1844, 797 miles were authorized; in 1845, 2,883 miles; and in 1846, the prodigious total of 4,790 miles, under no less than 272 Acts, obtained Parliamentary sanction. The succeeding years saw some abatement, but still there were 1,663 miles passed in 1847, and 300 in 1848. These figures illustrate the rise and fall of the great fever known as the "railway mania."

The Railways Regulation Act of 1840, the first of the General Acts, provided for a month's notice being given to the Board of Trade before opening; for returns of traffic to be made by the companies, as also of accidents involving personal injury; for Government inspection of works, for the approval of bye-laws, &c. Afterwards were

passed Acts for their better regulation, and for the conveyance of troops, 1842, the Railways Further Regulation Act of 1844, the Railways Clauses Consolidation Act, 1845, and the Canal and Railway Carriers Act of the same session. Then followed legislation on the leasing and sale of railways, on the gauge, on cheap trains, passenger duty, &c.

RAILWAYS IN 1908.

The number of persons employed in working the railways of the United Kingdom in 1908 was 621,341, and there were in use 23,721 locomotive engines, 51,863 carriages for the conveyance of passengers, 19,960 other vehicles attached to passenger trains, 745,802 waggons for the conveyance of live stock, minerals, and general merchandise, and 21,205 miscellaneous vehicles.

Capital embarked in Railways.—The total amount of capital authorized by Parliament to be raised for the construction of railways in the United Kingdom amounted on the 31st December, 1908, to £1,398,101,142. Of this sum, £1,310,533,212 (which includes £196,364,618 nominal capital caused by the consolidation or conversion of stocks) exists and forms the capital account of the various railway companies, and shows an increase over the year 1907 of £16,467,550, or 1·3 per cent. The £1,310,533,212 is composed of £124,433,848 guaranteed,

£338,545,966 debenture, £343,929,125 preferential, and £497,633,387 ordinary stocks and shares, besides a sum of £11,990,886 raised by loans. The net receipts for the year amount to £43,486,526, equal to 3·32 per cent. on the total capital sunk, as compared with £44,939,729 in 1907, with a corresponding capital of £1,294,065,662, which gave a net receipt of 3·47 per cent. It may be seen, therefore, from the foregoing figures that the total amount of capital raised at the close of the year was over £1,310,000,000, of which more than £196,000,000, or approximately 15 per cent., was due to nominal additions. These nominal additions formed approximately 18½ per cent. of the ordinary stock, 13 per cent. of the guaranteed and preference, and 12½ per cent. of the loans and debenture stocks. The total amounts of capital at the end of 1908 compared with 1907 show an increase of about £2,500,000 in the ordinary, £9,500,000 in the guaranteed and preference, and £4,500,000 in the loans and debenture stocks, making a total increase of £16,500,000. The proportions which the various classes of stock bore to the total paid-up capital differed but slightly from the year 1907, the ordinary stock forming 37½ per cent., the guarantee and preference 35½ per cent., and loans and debenture stock 26½ per cent. of the total. The proportion of net earnings

Stratford-upon-Avon and Midland Jct. Ry. Railway	1836	T. H. Riches	Edwd. Edwards	Ingledew & Sons	Cardiff.

to capital shows a general tendency to decline. This, however, arises partly from nominal additions to capital on the conversion of stocks, such nominal additions now representing, as already stated, 15 per cent. of the total capital of the companies. Another cause of the decline is the increased wages and curtailment of the hours of labour of railway servants, and the rapid growth of local taxation, which is increasing in an alarmingly disproportionate ratio to the net profit and to the benefits which the companies derive from the expenditure of the rates. That this burden of taxation shows a constant tendency to grow heavier year by year is illustrated by the fact that while for the year 1899 an amount of £3,582,048 was paid by the Railway Companies for rates and taxes, in 1908 the amount had increased to £4,884,442, giving an addition of £1,302,394 in ten years, under this expenditure.

Gross Earnings of the Railways.—The earnings for the year 1908 amounted to £119,894,327, as compared with £122,548,923 for the year 1907, which gives a decrease of £2,654,596 (this decrease being entirely in the goods traffic), and is equal to 1·4 per cent. On the gross earnings the increase in the passenger receipts is £513,805, made up as follows:—

	1908. £	1907. £	Inc. or Dec. £
1st Class	3,271,163	3,362,730	-91,567
2nd „	2,715,382	2,810,324	-94,942
3rd „	32,110,894	31,519,009	+591,885
Season & Periodical Ticket Holders	4,518,373	4,409,944	+108,429
	42,615,812	42,102,007	+513,805

The numbers carried were:

	1908. No.	1907. No.	Inc. or Dec. No.
1st Class.....	30,888,103	33,363,225	-2,475,122
2nd „	34,089,562	36,697,600	-2,608,038
3rd „	1,213,137,823	1,289,420,490	-76,282,667
	1,278,115,488	1,259,481,315	+18,634,173
Sens. & Periodical Tk. Holders }	*721,801	*715,598	+6,203

* For 1907 and 1908 the equivalent number of holders of annual tickets is given. Previous to 1902 the returns were not wholly but only partially on this basis; they are, as regards the years 1902 to 1908, on a uniform basis.

Except that the increases are somewhat smaller, these increases and decreases are very similar to those shown for the years 1907 and 1906, there being in each case increases in the receipts from third class ordinary passengers. With regard to numbers, some companies carried a greater and others a smaller number of third class ordinary passengers in 1908 than in 1907. The reduced numbers observable in the case of certain of the companies are no doubt largely due to tramway and motor omnibus competition in the neighbourhood of large urban areas. The increase on the total number of third class ordinary passengers appears to be mainly attributable to the passengers carried by the “tube” railways of the Metropolis, having increased from 130 millions in 1907 to 161 millions in 1908, the increase being much greater than that shown in the preceding table, in the number of third class ordinary passengers, in which these are included.

The receipts from season ticket holders show a further considerable increase, following on those of previous years, the increase in the receipts from third class season tickets having been in 1904, £171,000; in 1905, £131,000; in 1906, £137,000; in 1907, £134,000; and in 1908, £96,000. The earnings for the conveyance of parcels, mails, and such other traffic as is generally carried by passenger trains, amounted in 1908 to £9,048,674, as compared with £8,873,336 in 1907, being an increase of £175,338, or 2·0. The total figures of traffic falling under the heading of “goods” are £58,888,347, as compared with £61,202,831 in 1907—a decrease of £2,314,484, or 3·8. The aggregate is made up of £29,196,522 from merchandise; £28,196,439 from minerals; and £1,495,386 from live stock. The total quantity of goods carried in 1908 was 491,595,056 tons, as compared with 515,887,116 tons in 1907, showing a decrease of 24,292,060 tons, or 4·7 per cent.; owing, however, to the revision of the list of articles included under the head of “minerals,” the tonnages of minerals and general merchandise previous to the years 1903, 1904, 1905, 1906, 1907, and 1908 are not comparable with those for previous years.

Expenditure.—The total working expenses of the whole of the railways for the year 1908 amounted to £76,407,801, equal to 64 per cent. of the gross earnings, as compared with a total of £76,609,194 for the year 1907, equal to 63 per

cent. The decrease compared with 1907 amounts to £201,393, or 0·3 per cent. The total number of miles travelled by passenger and goods trains during the year 1908 was 423,200,145, or 5,179,777 less than in 1907. Analysing the expenditure, we find the item £21,851,313 for locomotive power; £6,200,149 for repairs and renewals of carriages, &c.; £11,075,894 for maintenance of permanent way, stations, &c.; and £21,659,405 for traffic expenses. The locomotive expenses in 1908 amounted to 12'41d. per train-mile.

Compensation.—The amount paid for compensation for personal injuries sustained during the year 1908 amounted to £114,580, as compared with £162,700 for the year 1907, resulting in a decrease of £47,720. In the movement of goods the companies have paid for damages and losses £437,603, as compared with £431,970 in 1907—an increase of £5,633. We subjoin a statement showing the amounts paid by the principal companies under both heads:—

The Midland Railway Company took the initiative in passenger traffic reforms, having run third-class carriages by all trains from 1st April, 1872; afterwards, from 1st January, 1875, greatly reducing the first-class and abolishing second-class fares. From 1st November, 1891, the Great Northern Railway Company also abolished second-class fares to all stations north of Hatfield; from 1st January, 1893, the Great Eastern abolished them in the provinces; the Cambrian followed on 1st May of the same year, but re-introduced them in 1899. They have also disappeared from all journeys between London and Scotland, and on the 1st of July, 1897, the Furness Company discontinued second-class accommodation. On July 1st, 1905, the Metropolitan District Company commenced to work their electric train service, the cars being first and third class only; and from 1st October, 1908, the Great Western issued first and third class tickets only on the South Wales branches.

Total of United Kingdom £14,980 £437,603

Net Result of Working the Railways.—The gross receipts, compared with those of the preceding year, show an increase from passengers (which includes season ticket, carriage, horse, dog and post office mail traffic) of £689,742; from goods, a decrease of £2,314,484; and a decrease from rents, tolls, insurance and steamboats, &c., of £29,255; and a total decrease from all sources of £1,654,596. The net receipts for 1908 on the capital outlay give a sum of 3·32 per cent., compared with 3·47 per cent. for the year 1907, and 3·45 per cent. for the year 1906. As may be seen, however, on page 739, nearly 16½ millions additional capital has been raised during the year 1908, a large proportion of which is "locked up" in works either unfinished or only partly finished, therefore unproductive. Increased working expenses, caused by diminished hours of labour and a proportionate increase in the number of men employed, and increased wages, have largely operated on the net profit. The increase in the amount of wages has for some years been gradually getting larger. A few years ago the amount paid as wages was less than 20 per cent., but now the wages bill represents over 25 per cent. of the total. Rates and taxes are also yearly increasing in a disproportionate ratio to the net profit; for instance, some of the railway companies are paying an annual sum for rates and taxes equal to 1 per cent. on the ordinary stock of those companies or about 6½ per cent. of the gross receipts, and where this burden is due to the building of tramways by municipalities the position is of course exceptionally hard. In fact, since the County Councils came into existence twenty-one years ago, many extra duties have been imposed upon railway companies. The Education Act alone has brought about an enormous increase in the rates. But even with these increasing expenses a percentage of 3·32 on the net receipts for the year must be viewed as a very favourable result.

RAILWAY ACCIDENTS.

To the public generally, one of the most interesting points in connection with the working of the railways is the immunity from accidents, as evidenced for a considerable number of years past in the amount paid by the companies by way of compensation for personal injury to passengers. In 1907 and 1908 the cost per passenger train-mile for personal injury was 0·15d. and 1·04d. respectively. In loss and damage of goods, the cost in 1907 was 0·64d., and in 1908 0·66d. per goods train-mile. The number of personal accidents on railways to passengers, railway servants, and others, reported to the Board of Trade during the year, show a total of 1,128 killed and 28,485 injured (as compared with 1,211 killed and 25,975 injured in 1907).

The increase since the year 1897 in the number injured is owing to an order recently made by the Board of Trade regarding the mode in which the returns are to be compiled by the railway companies. Hitherto some companies have only reported accidents of gravity, but they are now directed to report all accidents which prevent the servant injured from being employed for five hours on his ordinary work on one of the three working days next after the accident. We will now proceed to investigate under three distinct heads, viz., accidents to passengers, accidents to railway servants, and accidents to persons other than passengers or railway servants, and the various causes from which these accidents arose:—

1st. Accidents to Passengers— Killed. Injured.

1. From accidents to trains, rolling stock, permanent way, &c.	—	283
2. From falling between trains and platforms when entering or alighting from trains	38	1,152
3. From falling off platforms and being struck or run over by trains	8	19
4. While crossing the lines at stations	18	12
5. By the closing of carriage doors	—	748
6. From falling out of carriages during the running of trains ...	19	64
7. Whilst ascending or descending steps at stations	3	370
8. By being struck by barrows or falling over packages, &c., on platforms	—	142

Mar. 16	Lanc. & Yorkshire	Collision between two passenger trains	Bolton	—	3	—	—
April 8	N. B.	Collision between light engine and mineral train	Dysart	—	—	1	1
May 15	Cheshire Lines	Passenger train left rails	Manchester	—	1	—	—
Oct. 6	Met.	Fire in passenger train	Swiss Cottage ...	—	—	—	1
Oct. 7	L. & S. W.	Collision between passenger train and light engine	Clapham Jct. ...	—	6	—	2
Nov. 3	Lanc. & Yorkshire	Collision between goods train and empty passenger train	Royton	—	—	1	2
Dec. 19	Liv. Over'd	Collision between passenger train and buffer-stop	Seaforth Sands	—	22	—	—

In addition to these accidents, other casualties, in which the movement of vehicles used exclusively upon the railways are not concerned, have occurred, viz., 8 killed and 4,018 injured whilst loading, unloading, or sheeting waggons, 3 killed and 421 injured while working at cranes or capstans, 11 killed and 449 injured by falling off platforms, ladders, scaffolds, &c., in addition to a large number of accidents from various other causes, either the result of want of caution or misconduct.

3rd. *Accidents to Persons other than Passengers or Servants.*—Under this head is classed casualties whilst passing over railways at level crossings; this caused 51 deaths and 44 injuries in 1908 (as compared with 50 deaths and 39 injuries in 1907). There were 291 deaths and 99 injuries resulting from persons trespassing on the railways, and 188 persons committed suicide upon the lines in 1908 (as compared with 169 in 1907).

The Cheap Trains Act, 1883, provides that fares not exceeding the rate of one penny per mile shall be exempt from duty, but fares for return or periodical tickets shall be exempt from duty only where the ordinary fare for the single journey does not exceed that rate. Duty shall be payable at a reduced rate of 2 per cent. on fares exceeding the rate of one penny a mile between stations within one urban district. Such

district will contain not less than one hundred thousand inhabitants, and must be of a continuous urban as distinguished from a rural or suburban character.

Officers or men in the King's forces, regular, reserve, or auxiliary, or in any police force, when conveyed by railway on any occasion for the public service, are, when travelling in bodies under one hundred and fifty in number, to be charged three-fourths the rates for ordinary passengers; when over that number, at half rates. The Act does not extend to Ireland.

Hiring of Special Trains.—Although the majority of railway companies have no fixed charges for hire of special trains, the general charges are five shillings per mile, plus the ordinary fare for each passenger according to class of vehicle hired. The railway companies, however, reserve to themselves the right to make whatever charges they may think fit in accordance with circumstances of hiring special trains.

The Workmen's Compensation Act, 1897.—This Act, which received the Royal assent on August 6, 1897, came into operation on July 1, 1898. The amount paid for compensation under this Act to railway employees during the year 1908 was £264,302.

The Railway (Prevention of Accidents) Act, 1902.—By this Act, where the Board of Trade consider

RAILWAY SPEED.

* Boys and girls: persons under 18 years of age.

† Includes conductors and gatemen on electric trains.

that avoidable danger to persons employed on any railway arises from anything done or omitted to be done by the companies, or from want of proper appliances or plant, they may, after giving a reasonable opportunity of removing the danger, make rules for that purpose, by compelling them to use plant or appliance to the satisfaction of the Board, or the disuse of any plant or appliance which involves danger. The Act also empowers the Board to make rules in order to minimise danger generally. The penalties for non-compliance with these rules is a fine of £50, or in the case of a continuance of the offence (after conviction) a fine of £10 for every day during that

continuance. The Board of Trade may appoint such persons as appear to them to be required for carrying this Act into effect, and may hold such inquiries and make such experiments as they think expedient for that purpose.

THE RAILWAY CLEARING HOUSE.

THIS Institution was opened in Jan. 1842, and in addition to the work of clearing through bookings of passenger and luggage traffic, is the medium through which agreements relating to rates and fares, &c., are arrived at. *Chairman*, Charles Mortimer; *Secretary*, Frank Mansfield; *Offices*, Seymour Street, N.W.

Indian Railways.

THE construction of Railways in India, which commenced in 1853, has been conducted on three different systems: first, the employment of companies under a system of guarantee; secondly, by the State through its own officials; and thirdly, by assisted companies either with or without guarantee or subsidy from the State, and working with capital wholly raised by themselves or partly with capital provided by the State.

The total length of Railway open in India on 31st December, 1908, was 30,576 miles. This mileage includes tramways working outside municipal limits, which are treated as light railways. The capital outlay was £274,611,400. The gross receipts for 1908 amounted to £29,884,600; the working expenses to £18,001,667, or 60·24 per cent. of gross receipts. The net revenue amounted to £11,882,933, which gave a return of 4·33 per cent. per annum upon the capital invested. The number of passengers carried in the year was over 321 millions. The Indian Railways have in their service 525,583 employees, of whom 7,344 are Europeans, 9,951 Eurasians, and 508,288 Natives. The number of servants killed and injured during the year from all causes was

454 killed and 725 injured; passengers, 277 killed and 754 injured; other persons, 1,406 killed and 373 injured; total, 2,137 killed and 1,852 injured.

The Railways of India have up to the end of 1899 involved a yearly loss to the Indian revenues, but the working of the year 1900 resulted for the first time in their history in a net gain to the State, and for 7 consecutive years the working showed a gain, until the current year, which has resulted in a loss of £1,557,596 to the Government. The reasons for this set back being the abnormal trade depression and the calamity of famine during the year 1908.

The principal recent event was the constitution of a Railway Board, consisting of a chairman and two members—with the necessary clerical establishment—to whom is entrusted the general control and administration of the railways in India, hitherto exercised by the Government of India in the Railway Branch of the Public Works Department.

Chairman, Lt.-Col. Sir F. R. Upcott, K.C.V.O., G.S.I.

Members, W. H. Wood; Sir T. R. Wynne, K.C.I.E.

STATEMENT OF CAPITAL, REVENUE, DIVIDENDS, &c.

In the year 1894 an Act was passed making it legal for Indian Railway Companies to pay interest out of capital during construction, subject to the Secretary of State's specific sanction, and to certain other conditions.

• These figures include all lines worked.

Shipbuilding at Home and Abroad.

We have been supplied with the following information by "Lloyd's Register of British and Foreign Shipping":—

MERCHANT AND OTHER VESSELS (not Warships)
LAUNCHED IN THE UNITED KINGDOM DURING
RECENT YEARS.

Year.	No.	Gross Tonnage.
1896.....	696	1,159,751

1905.....	795	1,623,168
1906.....	886	1,828,343
1907.....	841	1,607,890
*1908.....	523	929,669

* In addition, there were launched in the United Kingdom during 1908 36 Warships of 74,186 tons displacement, of which 26, of 49,566 tons, were for the British Government.

Of the merchant steamers (454 in all) launched in the United Kingdom during 1908 10 vessels were over 10,000 tons, the largest being the *Rotterdam*, of 24,149 tons, and the *Lapland*, of 17,540 tons; 18 were between 6,000 and 10,000; 58 were between 4,000 and 6,000 tons each; and 121 were

between 1,000 and 4,000 tons. No sailing vessels of over 1,000 tons were launched in the United Kingdom during 1908.

MERCHANT AND OTHER VESSELS (not Warships)
UNDER CONSTRUCTION IN THE UNITED KINGDOM
AT VARIOUS DATES. (Vessels not to be classed
by Lloyd's Register are also included.)

30th September.	No.	Gross Tonnage.
1890.....	406	652,248

DESCRIPTION OF VESSELS BUILDING IN THE UNITED KINGDOM IN 1875 AND 1909 RESPECTIVELY.

DATE.	STEEL.		IRON.		WOOD.		TOTAL.	
	STEAM.		SAIL.		STEAM.		SAIL.	
	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.
*30 Sept. 1875	144	162,325	110	105,081	6	1,065
30 Sept. 1909 268	773,429	12	3,898	10	729,268
							773,429	22

* The figures for this date include vessels preparing, but not actually commenced.

These figures show that the average size of vessels building at the present time is over 3½ times that of vessels built thirty-three years ago. Then, steel was not used for shipbuilding purposes;

now, it has entirely supplanted iron. Then, the tonnage in hand was equally divided between steamers and sailing vessels; now, the proportion of sailing to steam tonnage is insignificant.

MERCHANT AND OTHER VESSELS (not Warships)

* Wooden Vessels trading on the Great Lakes of North America are not included in the Register Book.

† In the absence of satisfactory information the records of numerous small sailing vessels (brought under the provisions of the Southern Russian and the Dutch East-Indies) have been omitted from the Register Book.

* Wooden Vessels trading on the Great Lakes of North America are not included in the Register Book.

† In the absence of satisfactory information the records of numerous small sailing vessels (belonging chiefly to Greece, Turkey, Southern Russia, and the Dutch East Indies) have been omitted from the Register Book.

‡ Japanese sailing vessels of under 300 tons net are not recorded in Lloyd's Register Book.

FIRST STEAMBOATS—EARLIEST LINES—HISTORICAL SKETCHES—EVOLUTION FROM STEAM PACKET TO STEAM PALACE ON THE ATLANTIC—OWNERS OF THE LARGEST FLEETS, STEAM AND SAIL—BIGGEST AND FASTEST STEAMERS.

In the early part of the 18th century numerous inventors propounded schemes for applying steam power to vessels to be run upon rivers and canals, but only their names can be given in the chronological list of the first steamboats (*vide* page 753).

1824 witnessed the birth in England of the railway system. With the introduction of the "iron horse" the General Steam Navigation Company arose to champion the adoption of steam. The national benefits calculated to result from steam power, enabling vessels to enter and quit harbour regardless of wind and tide, were emphasised by the directors in the prospectus. Ocean trade was then carried on with sailing ships, mostly under 500 tons each, and all the steamboats in the United Kingdom only numbered 109.

Since the beginning of the last reign, steam-propelled vessels have vanquished the time-honoured "clippers." Iron for building purposes, being stronger, supplanted wood, but had itself to yield to steel as soon as that lighter material could be produced cheaply.

The "auxiliary screw" only stayed long enough to enable the unobtrusive "propeller" to make sure of superseding, for ocean services, the unwieldy "paddle-wheels." "Compound engines," which largely reduced coal consumption, paved the way for "triple-expansion" ones. These were next duplicated to drive "twin screws," with which all steamers of the highest class are fitted, and now steam turbines, having been tried successfully, have been adapted to the largest and fastest liners, increased speed per indicated horse-power, diminished coal consumption, and reductions in weight of machinery, engine-room staff and vibration being obtained.

Space being so limited, the evolution "from steam packet to steam palace" in the North Atlantic trade is presented in tabular form (page 754).

To Canada belongs the credit of having built and engined the first steamer to cross the Atlantic. This was the *Royal William*, launched at Wolfe's Cove, Quebec, 1831. In 1833 she went from Pictou, N.S., to Gravesend, arriving Sept. 11th, after 22 days' passage.

The pioneer steamer from the Old World to the New was the Cork packet *Sirius*. Leaving Cork April 6th, 1838, she reached New York April 23rd, having been compelled to burn everything available. On the same day the *Great Western*, the first specially built for the Atlantic service, paddled in, having left Bristol April 8th—a wonderfully quick passage of 14½ days. A third company started with the *Royal William*; she was the earliest steamer with watertight compartments, and the first to cross from Liverpool, July, 1838, taking 19 days.

The *Royal William* had been chartered from the City of Dublin Steam Packet Company, now the oldest steamship company in the world.

The Irish company was practically the god-father of the Peninsular and Oriental Company, so called when the mail services upon this side of Egypt were combined in 1839 under the time-honoured flag of the "P. & O.," which received its charter in 1840.

The failure of the earliest Atlantic companies

did not deter the establishment and development of the Cunard Company. Samuel Cunard, to the discomfiture and astonishment of the Great Western Company, secured the subsidy of £80,000 a year for a monthly Atlantic service of 4 steamers. The gun-brigs were thereupon superseded as mail carriers, and a brighter era was auspiciously commenced by the despatch of the *Britannia*, 1,139 tons, on July 4th, 1840.

In 1839, the Royal Mail Steam Packet Company undertook the conveyance of mails to the West Indies at a time when a steam passage of even a fortnight's duration was to many a subject of wonder; and in 1840 the Pacific Steam Navigation Company was formed to run a service between Panama and Valparaiso.

Owing to the revolution mechanical science caused in the carrying trade of the sea, antiquity by itself counted gradually less even in the conservative kingdom of the sailor, and as the old order changed, shipowners who neglected to advance with the growing wants of the times fell out or dropped behind. As the size of steamships increased, the heavy cost of construction necessitated the establishment of corporations with great strength of capital, which control the principal ocean routes. The origin of each leading company is briefly outlined in a series of "Historical Sketches," and the largest British and foreign owners are referred to.

The *Great Britain* was 322 × 40 × 31; tonnage 3,270; h.p. 1,500.

The *Great Eastern* was 680 feet long, paddle engines 1,710 h.p. and screw engines 1,000 h.p.; tonnage, 18,928; 14 knots speed; daily coal consumption, 300 tons; longest day's run, 333 knots.

Some homeward runs by clippers were of sufficient interest to be chronicled here. The *Red Jacket* in 1854 crossed from New York to the Mersey in 13 days; the *Dreadnought*, 1,413 tons, 220 × 45 × 26, eclipsed all previous runs in 1862, when she reeled off between Sandy Hook and Queenstown the enduring record of 9 days 17 hours. The *Thermopylæ's* maiden voyage in 1868, of 60 days between London and Melbourne, remains the fastest ever known. In 1869 the *Patriarch*, 1,339 tons, made for the same owners (the Aberdeen Line) the record passage of 68 days between London and Sydney.

In 1814 the steamboats of all kinds registered in the United Kingdom amounted to less than 1,000 tons, increased to nearly 8,000 tons by 1820. There were 766 British steamers afloat in 1838, in all just short of 150,000 tons. The invaluable Register Book which is published by the Committee of Lloyd's Register of British and Foreign Shipping shows that on June 30th, 1909, nearly every other steamer upon the high seas was under the British ensign, the steamship empire-builders of Greater Britain owning 9,758 vessels, 17,702,714 gross tons, exclusive of 1,807 ships (1,123,728 tons) belonging to the dwindling disciples of time-honoured canvas.

The British flag still flies over nearly one-half of the entire shipping tonnage of the world, but this preponderance is steadily decreasing, and a perusal of the statistical tables which are appended evidences the ever-increasing activity of foreign nations for the carrying trade of the sea.

FIRST STEAMBOATS, PIONEER SAILINGS AND EARLIEST LINES.

1707. Denis Papin experimented on River Fulda with paddle-wheel steamboat.
1736. Jonathan Hulls patented designs similar to modern paddle boat.
1769. James Watt invented a double-acting side-lever engine.
1783. Marquess of Jouffrey made experiments in France.
1785. James Ramsey, in America, propelled a boat with steam through a stern-pipe.
1785. Robert Fitch, in America, propelled a boat with canoe-paddles fixed to a moving beam.
1787. Robert Miller, of Edinburgh, tried primitive manual machinery.
1788. Miller, with Symington, produced a double-hull stern-wheel steamboat.
1802. *Charlotte Dundas*, the first practical steam tugboat, designed by Symington.
1804. *Phoenix*, screw-boat designed by Stephens in New York; first steamer to make a sea voyage.
1807. *Clermont*, first passenger steamer continuously employed; built by Fulton in U.S.A.
1812. *Comet*, first passenger steamer continuously employed in Europe; built by Miller in Scotland.
1818. *Rob Roy*, first sea-trading steamer in the world; built at Glasgow.
1819. *Savannah*, first auxiliary steamer, paddle wheels, to cross the Atlantic; built in New York.
1821. *Aaron Manby*, first steamer (English canal boat) built of iron.
1823. City of Dublin Steam Packet Co. was established.
1824. General Steam Navigation Co. was established at London.
1824. George Thompson & Co. (Aberdeen Line) were established.
1825. *Enterprise* made the first steam passage to India.
1825. *William Fawcett*, pioneer steamer of the P. & O. S. N. Co.
1830. T. & J. Harrison (Harrison Line) were established at Liverpool.
1832. *Ellurkah*, iron steamer, took a private exploring party up the Niger.
1834. Lloyd's Register for British and Foreign Shipping established.
1836. F. Green & Co. established at London.

1836. Austrian Lloyd Steam Navigation Co. established at Trieste.
1837. *Francis B. Ogden*, first successful screw tugboat; fitted with Ericsson's propeller.
1838. *Archimedes*, made the Dover-Calais passage under two hours, fitted with Smith's propeller.
1838. *R. F. Stockton*, built for a tugboat, fitted with Ericsson's propeller, sailed to America; first iron vessel to cross the Atlantic; first screw steamer used in America.
1839. *Thames*, pioneer steamer of the Royal Mail Steam Packet Co.
1839. George Smith & Sons (City Line) were established at Glasgow.
1840. *Britannia*, pioneer steamer of the Cunard Line.
1840. *Chile*, pioneer steamer of the Pacific Steam Navigation Co.
1845. *Great Britain*, first iron screw steamer, precursor of modern Atlantic steamer.
1845. Thos. Wilson, Sons & Co., Ltd. (Wilson Line) established at Hull.
1847. Pacific Mail Steamship Co. established in America.
1849. Houliher Brothers & Co. established at London.
1850. Bullard, King & Co. (Natal Line) established at London.
1850. Messageries Maritimes de France established.
1850. Inman (now American) Line, established at Liverpool.
1851. *Tiber*, first steamer of the Bibby Line, established 1851 at Liverpool.
1852. *Forerunner*, pioneer steamer of the African Steamship Co.
1853. Union Steamship Co. was established (now Union-Castle Line).
1853. *Borussia*, first steamer of the Hamburg-American Packet Co., established 1847.
1854. *Canadian*, first steamer of the Allan Line, established 1850.
1855. British India Steam Navigation Co. was established.
1856. *Tempest*, first steamer Anchor Line.
1857. *Waldensian*, first steamer of J. T. Kennie, Son & Co. (Aberdeen Line).
1858. *Bremen*, first Atlantic steamer of the Norddeutscher Lloyd, established 1856.
1858. *Great Eastern* launched into the Thames, Jan. 31; commenced, May 1, 1854.

* Turbine engines. † The four fastest short-trip steamers in the world.

Historical Sketches.

For other large Steamship Owners, see p. 772.

ABERDEEN LINE, between London and Australia *via* South Africa, is managed by the owners, Messrs. George Thompson & Co., Ltd. (founded at Aberdeen, 1824), who have long occupied a prominent position in the Australian cargo and passenger trades, due to the "runs" of their noted clippers to Melbourne and to Sydney, the general high standard of their fleet, and its exceptional immunity from loss over more than half a century. Their ss. *Aberdeen*, built in 1881, was the earliest ocean steamer to demonstrate decisively the superior merits of triple-expansion engines. The tonnage does not include any sailing vessels, but the reputation of the line is well sustained by modern steam favourites bearing such time-honoured names of former "fliers" as *Miltiades*, *Moravian*, and *Salamis*. Two twin-screw steamers, *Miltiades*, 6,793 tons, and *Marathon*, 6,794 tons, each 15 knots, were recently added to the company's fleet, while the new twin-screw steamer *Pericles*, 10,925 tons gross register, is the largest vessel. This vessel is the largest British-owned ship, carrying 1st and 3rd class passengers, trading to Australian ports.

Fleet, 6 vessels; 37,450 tons.

London Office, 7, Billiter Square, E.C.

AFRICAN STEAMSHIP COMPANY, the earliest African line, originated from a private expedition of the *Elburkah* up the Niger in 1832, its success leading to others for opening up the West Coast of Africa or suppressing the slave trade. This company received its charter in 1852, with an annual subsidy of £30,000 for a monthly mail, passenger, and freight service performed continuously ever since, the pioneer boats *Forerunner*, *Faith*, *Hope*, and *Charity* rendering valuable aid in the Crimean War. In 1891 the company came (see p. 760) under the management of Messrs. Elder, Dempster & Company, of Liverpool, and now maintains seven distinct services from Liverpool, Hamburg, Rotterdam, and Antwerp to West and South-West Africa, the one from the last-mentioned port being under contract with the Congo Free State.

Fleet, 29 steamers; 90,603 tons.

London Office, 17, Leadenhall Street, E.C.

ALLAN LINE.—The Allan Line of Steamers was originally called the Montreal Ocean Steamship Company, formed by the Allan Brothers, who, as sailing-ship owners, had been connected with Canada since June, 1819, when the founder of the line, Alexander Allan, sailed in command of his brig *Jean*, of 73 tons register, from Greenock to Quebec, since which the connection with Canada has been continuous. The mail service began in April, 1856, with the sailing of the *North American*. The line has since continued to meet and promote the postal, commercial, and passenger requirements of the now vast Dominion, and has carried the mails nearly the whole of the time and is still doing so. Since 1859, sailings have been weekly. The steamers go to Halifax and St. John, N.B., when the St. Lawrence is closed. The itinerary includes Glasgow, Liverpool, Londonderry, and London, embracing on the other side, in addition to several Canadian ports, Boston, New York, Philadelphia, and the River Plate. In 1905 the *Virginian* and *Victorian* (540' x 66' x 40' 6"; 17½ knots), the first turbine-

propelled Atlantic steamers, successfully augmented the service; both have beaten all records, the passage of *Virginian* (10,754 tons) in August, 1908, between Rimouski and North of Ireland in 5 days 4 hours being the fastest. In August, 1909, the *Victorian* made the passage from Liverpool to Montreal, including all stoppages and delays, in 6 days 22 hours, running at an average speed of 18·4 knots per hour. Time from land to land 3 days 22 hours. The largest steamer is the *Corsican*, 11,436 tons. *Hesperian* and *Grampian* are the latest additions.

Fleet, 27 steamers; 156,047½ tons.

Head Office, 25, Bothwell Street, Glasgow.

AMERICAN LINE (see International Mercantile Marine Co.).—The International Navigation Co., the proprietary organisation, established in Philadelphia, 1871, started between Philadelphia and Liverpool (calling at Queenstown), 1873, with the four American-built, brig-rigged screw steamers *Pennsylvania*, *Ohio*, *Illinois*, and *Indiana*, which, supplemented by the British steamers *Abbotsford* and *Kenilworth*, formed a regular weekly line. In 1886 the company acquired the Inman Line—which had been running in Liverpool-New York trade since 1856—then composed of the passenger steamers *City of Montreal*, *City of Berlin*, *City of Richmond*, *City of Chicago*, and *City of Chester*, and continued to employ these steamers under the name of the Inman & International Steamship Co., Ltd. In 1887 a contract was entered into with Messrs. J. & G. Thomson, Clydebank, to build the *City of New York* and *City of Paris*, the pioneers of twin-screw passenger ships in the Atlantic trade, and the largest steamers then afloat. In 1893 the Inman & International Steamship Co., Ltd., was merged into the American Line, the mail steamers exchanging Liverpool for Southampton, their names being shortened to the bare titles of cities. The *New York* and *Paris* (the latter since re-named *Philadelphia*) were, under special Act of Congress, naturalised into United States register. In 1895 the William Cramp & Sons Ship & Engine Building Co., Philadelphia, delivered the steel twin-screw steamships *St. Louis* and *St. Paul*, each 11,629 tons. These, with the *New York*, 10,798 tons, and *Philadelphia*, 10,786 tons, did good service as fast cruisers in Spanish-American War. The four steamers named perform weekly mail service between Southampton and New York, calling at Cherbourg West-bound, and Plymouth and Cherbourg East-bound.

The Liverpool-Philadelphia service of the American Line is now maintained by the twin-screw steamers *Haverford* and *Merion*, each 11,621 tons, *Friesland*, 6,409 tons, and *Westernland*, 5,665 tons, forming a regular weekly line from Liverpool Wednesdays, from Philadelphia Saturdays, calling at Queenstown on both the West-bound and East-bound voyages.

Fleet, 8 steamers; 80,303 tons.

London Offices, 1, Cockspur Street, S.W.; and 38, Leadenhall Street, E.C.

ANCHOR LINE.—In 1852 a service was established from the Clyde to Portuguese and Spanish ports extending later to upper Mediterranean ports. Some years later additional services between Glasgow and New York *via* Mobile; Mediterranean and New York; and Glasgow and

Liverpool to Bombay, and to Calcutta were inaugurated, which trades have since been vigorously prosecuted with fine steamers, the sizes increasing with the development of the trades. *Columbia*, 8,292 tons, *Caledonia*, 9,222 tons, and *California*, 8,662 tons, are latest additions to New York service; a sister ship to the latter is building. *Olympia*, 5,124 tons, *Massilia*, 5,091 tons, *Circassia*, 6,716 tons, and *Castalia*, 6,388 tons, and *Elysia*, 6,368 tons, have recently been added to Indian service. About 90,000 passengers are carried annually.

Fleet, 20 steamers; 114,184 tons.

London Office, 4, St. Mary Axe, E.C.

THE ANGLO-SAXON PETROLEUM COMPANY, Ltd., which was founded in 1907 to carry on the combined business relative to the tank steamers and oil installations of the "Shell" Transport and Trading Company, Ltd., the Royal Dutch Petroleum Co., and the Asiatic Petroleum Co., Ltd., has now a fleet owned or managed by them of 30 steamers, two lighters and two tugs, with a gross tonnage of over 120,000 tons, and a carrying capacity of nearly 150,000 tons of kerosene. The trade in which these craft are engaged is the transport of petroleum and its products in bulk or in cases from the producing centres in Sumatra and Borneo to ports all over the world, and especially for the conveyance of benzine in bulk to Europe and to the United States. The steamers belonging to the company are all fitted for oil-fuel burning, and are so constructed as to be speedily converted from oil-fuel to coal burning or *vice versa* as circumstances require.

London Office, 20 Billiter Street, E.C.

ATLANTIC TRANSPORT CO., Ltd. (see International Mercantile Marine Co.), originated in London in 1886. In 1889 the boats were all transferred to the Atlantic Transport Co., Ltd., registered in London for the purpose, the prime movers and principal stock-holders being Americans. The company in 1896 purchased the controlling interest in the National Steamship Co., a line which dated back to 1863 and, after flourishing into front rank, declined by degrees. When the Atlantic Transport Co. commenced a line was run from London to Baltimore, *via* Swansea; soon Philadelphia was added to the itinerary, subsequent growth leading to a service to New York, necessitating large steamers built specially for the carriage of cargo, refrigerated meat and live stock, together with only first-class passengers. Saloon accommodation has increased from 50 to 250, which can be carried by the new twin-screw steamers *Minnehaha*, 13,443 tons, *Minneapolis*, 13,448 tons, *Minnetonka*, 13,440 tons, and *Minnewaska*, 14,317 tons.

Fleet, 16 steamers; 123,654 tons.

London Office, 38, Leadenhall Street, E.C.

AUSTRIAN LLOYD STEAM NAVIGATION COMPANY, established in 1836, belongs to Trieste, whence services are kept up to and from Adriatic, Mediterranean, and Levant ports, served by three branch lines. Besides a line to the West as far as Brazil, there is an accelerated fortnightly mail service between Trieste and Bombay; also an ordinary monthly service as between Trieste, Bombay, China, and Japan. The itinerary now includes a monthly line to Calcutta. The largest steamers are the *Austria*, 7,588 tons, and *Erzherzog Franz Ferdinand*, 6,046

tons, *Nippon*, 6,350 tons, and *Vorwaerts*, 5,990 tons.

Fleet, 72 steamers; 242,000 tons.

London Agents, M. Samuel & Co., 104 and 105 Bishopsgate Street Within, E.C.

BIBBY LINE.—This line was founded in 1807 by Mr. John Bibby, the grandfather of the present representatives, the fleet at that time consisting of small sailing vessels. In 1851 the steam fleet was commenced with the *Tiber* and the *Arno*. In 1891 the *Lancashire*, whose passage of 23 days 20 hours, in July, from Liverpool to Rangoon stands the fastest, started the present service, which runs to Colombo and Rangoon, *via* Marseilles, from which port of call Ceylon is 18 days' passage, and Burnah 23. The fast and modern steamers of this line, which belong chiefly to the Bibby family, are all built by Harland & Wolff, and authorised by the Indian Government for officers returning on expiry of furlough, it being the recognised route to Burmah; easy connections being made with Southern India generally by a daily steam service between Colombo and Tuticorin. Largest steamer, *Warwickshire*, 7,966 tons.

Fleet, 8 steamers; 54,509 tons.

London Office, 10 & 11, Mincing Lane, E.C.

THE BOOTH LINE was founded in 1866 by Messrs. Alfred Booth & Co., of Liverpool. In 1869 Messrs. R. Singlehurst & Co.'s Red Cross Line was founded. These two lines have since been closely identified with the rapid progress of the Amazon ports of Pará and Manaos. A further service between North Brazil and New York was started in 1882. In 1901 the Booth and Red Cross Lines were amalgamated in The Booth Steamship Co., Ltd., under the management of the former owners. The steamers sail at frequent intervals from New York, Liverpool, Havre, Vigo, Leixões, and Lisbon to Pará, Manaos, Maranhão, Ceará, and Parnahyba, a large passenger business is done between the Portuguese ports and the Amazon. The twin-screw steamers *Antony*, 6,439 tons, *Lamfrane*, 6,275 tons, and *Hilary*, 6,325 tons, have a speed of 14 knots and carry 200 saloon and 350 third-class passengers. The company is interested in and manages The Iquitos Steamship Co., Ltd., whose steamers trade from Liverpool and New York more than 2,000 miles up the river Amazon to Iquitos, in Peru. The *Manco*, of 2,979 tons, and carrying 60 saloon passengers, is the latest addition to this service. The Company carries the royal mails to Pará and Manaos; also the mails between New York and Brazil; and the combined fleets include 17 passenger steamers.

Combined fleet, 36 steamers (three building); 114,470 tons.

London Office, 11, Adelphi Terrace, W.C.

Tel. Addresses: Booth, Liverpool; Luslad, London.

BRITISH AND AFRICAN STEAM NAVIGATION COMPANY (1900), Ltd., established in 1858 a mail, passenger, and cargo service of steamers, named after various ports, trading stations, and rivers on the West Coast of Africa, to which they run from Liverpool, Rotterdam and Hamburg. Waterways have been discovered, explored, and brought into prominence by their captains; one, the *Jones*, being so called after Sir A. I. Jones, K.C.M.G., the presiding genius of the firm of Messrs. Elder, Dempster & Co., of Liverpool, who acquired this company in 1900, and consider-

ably enlarged its fleet. Owing to the head of the firm's extraordinary energy, Messrs. Elder, Dempster & Co. are now established at Liverpool, London, Manchester, Bristol, Cardiff, Hamburg, Antwerp, Grand Canary, Santa Cruz, Teneriffe, New Orleans, Montreal, Mobile and Galveston. Their rapidly extending trade enterprises are upon a comprehensive and enormous scale, but space only admits of the following summary of the lines controlled by this wonderful firm:—

Name of Company.	No. of boats.	Gross tonnage
African Steamship Co.	24	70,475
British & African S.N.C. (1900) Ltd.	35	92,618
Elder, Dempster Shipping, Ltd.	26	78,717
Imperial Direct W. India Mail Serv. Co.	5	23,572
Cie. Belge Maritime du Congo	3	16,058
Elder, Dempster & Co.	12	33,120
Building	8	29,578
	123	346,138

Fleet, 35 steamers; 92,618 tons.

London Office, 4, St. Mary Axe, E.C.

BRITISH INDIA STEAM NAVIGATION COMPANY.—In 1855 the founder of this company, the late Sir William MacKinnon, arranged to establish the Calcutta and Burmah Steam Navigation Company for the performance of mail services for the East India Company, with which object it was incorporated in 1856, the *Baltic* and *Cape of Good Hope* being sent out in 1857 to start the business. In 1862 a fresh mail service was entered into which included additional routes, and the name of the company was officially altered to its present title—more in keeping with its business, which strikingly benefited from the opening of the Suez Canal, through which the company's steamship *India* conveyed the first cargo of Indian produce. The Aden-Zanzibar mail service was put on in 1872, and from then until now new routes have been constantly added to its itinerary, the extent of which will not admit of more than a bare outline. The company is under contract with the Home and Indian Governments for mail services to Arabia, Persia, India, Burmah, East India, the Mauritius, and also runs other services to Batavia, Queensland, &c. In 1899 a three-weekly line from Calcutta to Manila was established, which has since been extended to Yokohama, Kobe, and Moji. This important undertaking, with its far-reaching organisation and connections, supplies over 100 ports with commercial facilities; it is under the management of Messrs. MacKinnon, MacKenzie & Co., in India; Messrs. Gray, Dawes & Co. having represented the company in London since 1866. The s.s. *Queda*, 7,703 tons, is the largest. Latest additions, *Reva*, 7,267 tons (turbine steamer), and *Rohilla*, 7,365 tons (twin-screw).

Fleet, 111 steamers; 452,820 tons.

London Office, 23, Great Winchester Street, E.C.

THE BUCKNALL STEAMSHIP LINES, Ltd., was formed in 1900 to take over and extend the British and Colonial Line from London to S. and E. African ports, established in 1892, for passengers and cargo; also lines between N. York and S. Africa, N. York and Australia and New Zealand, N. York and India, N. York and Manchurian and Far East Ports. London

and other English ports to ports on the Red Sea and Persian Gulf ports *via* Marseilles.

Fleet, 28 steamers; 112,425 tons.

London Office, 23, Leadenhall Street, E.C.

CANADIAN-AUSTRALIAN LINE was established in 1893, and runs in connection with the Canadian Pacific Railway. The steamers *Aorangi*, 4,268 tons, *Manuka*, 4,505 tons, and *Moana*, 3,915 tons, are under contract with the Canadian, New South Wales, Queensland, and Fijian Governments for a four-weekly mail service between Vancouver, Victoria (B.C.), Honolulu, Brisbane, and Sydney, N.S.W.

London Office, 138, Leadenhall Street, E.C.

CANADIAN PACIFIC RAILWAY.—The rail mileage, including branch lines and systems operated by the Company, about 14,500, extends from Atlantic Ocean to Pacific Ocean. THE EMPRESS LINE, a three-weekly service between Vancouver and Japan and China, was established 1891. A contract exists between the British Government and the Canadian Pacific Railway under which mails are carried from Liverpool in the following time: To Hong Kong, summer, 818 hours; winter, 853 hours. Mails and passengers are carried in "Empress" Atlantic steamers from Liverpool to Quebec, where close connection is made with the "Imperial Limited," one of the fastest long-distance trains in the world, which runs daily and covers the distance between the two oceans in about 100 hours. During 1903 15 large Atlantic steamers, aggregating 94,026 tons, were purchased from Messrs. Elder, Dempster & Co. The steamers in the Atlantic Ocean services include the *R.M.S. Empress of Britain*, 14,189 tons, and *Empress of Ireland*, 14,191 tons, 18,000 H.P. (largest and fastest to Canada). The *Empress of Ireland* made a record westbound passage, Liverpool to Quebec, of 6 days 1 hr. 7 mins., and the *Empress of Britain* made a record eastbound voyage from Rimouski (Quebec) to Liverpool of 5 days 6 hrs. 26 mins. There is also an Upper Lake Service (Port William-Owen Sound Route), a British Columbia Coast Service, and a British Columbia Lake and River Service.

Fleet, 63 steamers; about 123,000 tons.

London Office, 62 to 65, Charing Cross, S.W.

CHARGEURS RÉUNIS of Paris (Port of Registry, Havre) was established in 1872, and is the third largest shipping company in France. Services are maintained to Indo-China, West Africa, Brazil, River Plate, Gulf of California, China, and Japan. The fleet consists of 27 steamers from 3,000 to 10,000 tons. Six of which are 15-knot twin-screw vessels.

Fleet, 27 steamers; 160,000 tons.

London Agents, Hackett, Ausender & Co., 123, St. Dunstan's Hill, E.C.; Gellatly, Hankey & Co., Dock House, Billiter Street, E.C.

CHINA MUTUAL STEAM NAVIGATION COMPANY, Ltd. See Ocean Steam Ship Co., page 767.

CITY LINE.—Messrs. George Smith & Sons, who sold their line and fleet in 1901 to Mr. J. R. Ellerman, celebrated their jubilee at Glasgow in 1889, fifty years after their *Constellation*, 344 tons, sailed thence for Calcutta. Sailings are from Glasgow and Liverpool to Calcutta and back to London; as well as to Bombay and Karachi, returning to Liverpool; all the steamers carrying passengers regularly to and from Malta and

Egypt, in addition to the above ports. Large extensions have been made in the passenger fleet, over £1,000,000 having been spent in recent years upon new steamers.

Fleet, 20 steamers; 119,283 tons.

London Agents, Montgomerie & Workman, 36, Gracechurch Street, E.C.

CLAN LINE began a fortnightly service from Glasgow and Liverpool to Bombay and Karachi in 1878, adding one to South and East African ports in 1881, and another to Colombo, Madras, and Calcutta in 1882, a joint service from N. York direct to South and East African ports appearing in 1893. Since then a direct service has been added to the principal South African ports, Malabar Coast, and Chittagong. Twenty-eight turret-deck steamers figure in the fleet, of which the *Clan Colquhoun*, 5,856 tons, is the largest. The line is under the management of Messrs. Cayzer, Irvine & Co., Limited, of Glasgow, Liverpool, Manchester and London, whose chairman, Sir Charles Cayzer, Bart., was the founder.

Fleet, 49 steamers; 202,622 tons.

London Office, 115, Leadenhall Street, E.C.

COMPAGNIE GÉNÉRALE TRANSATLANTIQUE, established 1862, is the second largest company in France, and is heavily subsidised by that Government. With its fine fleet of mostly fast boats, the company maintains important connections between Havre (its head port), St. Nazaire, Bordeaux, Marseilles, &c., and various Mediterranean, African, West Indian, and North, Central, and South American ports. *La Provence*, 13,753 tons, 22 knots, *La Lorraine*, 11,146 tons, and her sister ship *La Savoie*, 11,168 tons, are now in the service, having been built on French soil, according to terms of mail contract, at the company's own shipyard. They are the largest ever constructed in France, and have a speed of 21 knots. Four steamers building are included in the total.

Fleet, 88 steamers and tugs; 309,218 tons.

London Office, 36, Leadenhall Street, E.C.

COMPANIA TRASATLANTICA of Barcelona and Cadiz is the leading company in Spain, the largest steamers in the fleet being *Alfonso XII.*, 6,748 tons, *Antonio Lopez*, 5,975 tons, and *Manuel Calvo*, 5,617 tons.

This company in 1883 succeeded Messrs. A. Lopez & Co., who were established in 1860. Regular mail and passenger services are maintained to New York, Antilles, Canary Islands, Mexico, Colon (for Pacific ports), River Plate, North Africa, Philippines, &c. Liverpool agents, Messrs. Larriaga & Co., who conduct a regular service between Liverpool and Cuba, Galveston and Manchester.

Fleet, 21 steamers; 81,392 tons.

THE CUNARD STEAMSHIP COMPANY, Ltd., completed 69 years of successful Atlantic service on July 4, 1909. Starting in 1840 with the *Britannia*, a wooden paddle steamer, which made her first voyage between Liverpool and New York in 14 days 8 hours at the rate of 8½ knots per hour, which was a wonder of her time, the Cunard Company's steamers have steadily advanced in size and speed, till their Atlantic fleet contains steamers crossing from Liverpool to Boston (the *Ivernia* and *Saxonia*) with 2,000 passengers and 10,000 tons of freight, and to New York (the *Caronia*, *Carmania*, and *Campania*), which later makes the passage in a little over 5 days at an average speed of more than 21 knots (25 miles) an hour. The *Ivernia* and

Saxonia have also earned a reputation for remarkable steadiness, which confers the greatest possible immunity from sea-sickness. The *Carpattia* (1903) is a twin-screw steamer of 13,603 tons constructed on similar lines to the *Ivernia* and *Saxonia*, and equally steady, all three providing unrivalled accommodation. The New York and Mediterranean service is conducted with the *Carpattia*, *Utonia*, and *Pannonia*, and conveys passengers at moderate rates to Gibraltar, Naples, Palermo, Venice, Trieste and Fiume, with the option of crossing Europe by train and returning to New York or Boston by Cunard steamer from Liverpool. There is a freight service to Boston from Liverpool, also one to Havre, Portugal, Mediterranean, the Adriatic, and Black Sea ports. All the passenger ships of the Cunard Company are fitted with Marconi's system of wireless telegraphy. The *Cunard Daily Bulletin*, a thirty-two page illustrated paper published on board these boats, records news received by wireless telegraphy, and is the first real ocean newspaper. The *Lusitania*, *Mauretania*, *Caronia*, and *Carmania* are fitted with the Stone-Lloyd system of patent watertight doors, rendering these steamers practically unsinkable. All the passenger boats on the New York and Boston service are fitted with the patent submarine signalling apparatus. In August, 1903, an agreement was made with the British Government by which the Cunard Co. were to build two new steamers, to be, with all other Cunard ships, at the disposal of the Admiralty for hire or purchase whenever they may be required, the Government lending the company £2,600,000 to build the ships and granting them a subsidy of £150,000 a year. One, the *Lusitania*, 31,550 tons, was launched on June 7, 1906, and the *Mauretania*, 31,938 tons, on Sept. 19. (See p. 757.) They are quadruple screw turbine steamers, about 70,000 horse-power, the largest, fastest, and most palatial steamers in the world. The *Lusitania*, Sept., 1907, on her maiden voyage to New York, broke all records for maiden trips with a passage of 5d. 4h. 54m., or an average of 23 knots, 593 knots being the highest day's run. The safety and comfort of passengers is the especial care of the Cunard Company, and every precaution is taken to ensure the best possible ships, the most capable officers, and the most reliable crews to worthily uphold the honourable traditions of the company. The total given includes the *Caronia*, 20,000 tons, fitted with reciprocating engines, and the *Carmania*, 20,000 tons, turbine steamer. The Cunard Company are building a new ship, which will be engaged in the Liverpool to Boston service, and will also make trips between New York and the Mediterranean. She will be about the same size as the *Caronia* and the *Carmania*.

DOMINION LINE.—(See International Mercantile Marine Co.) Formerly the Mississippi and Dominion Steamship Company, Ltd. Founded in 1870, the proprietary company since 1884 has been the British and North Atlantic Steam Navigation Company, Ltd. A weekly passenger service in conjunction with the White Star Line is maintained in the summer, whilst in the winter the Dominion Line maintains a weekly passenger service to Halifax and Portland (Maline) between Liverpool and Quebec and Montreal, as well as a regular weekly freight service from Liverpool to Portland throughout the year. There is also a fortnightly freight service between Avonmouth and Quebec and Montreal in the summer, and Portland in the winter. The largest steamer is the *Norseman*, 9,546 tons.

Fleet, 13 steamers; 82,591 tons.

London Office, 38, Leadenhall Street, E.C., and 1, Cockspur Street, S.W.

DONALDSON BROTHERS (Donaldson Line) began business at Glasgow in 1854. The twin-screw steamers *Athenia* and *Cassandra* are the latest additions, fitted with very superior and excellent accommodation for passengers and regularly engaged in Canadian trade. The principal trade of the firm is between Glasgow and Montreal, steamers sailing every Saturday from Glasgow and every Thursday from Montreal during the open navigation of the St. Lawrence. In winter-time the service is a weekly one to St. John, N.B. The steamers are fitted with cold storage, also with mechanical ventilation. The St. John, N.B., service in the summer months is fortnightly, and the other regular services of the firm are Glasgow to Baltimore and Glasgow to Newport News and Norfolk, Va., and a fortnightly service of steamers between Montreal and Rotterdam. A new cargo steamer, similar to the S.S. *Cassandra*, is building.

Fleet, 13 steamers; 68,838 tons.

ELDER, DEMPSTER & CO.—See p. 760.

ELDERS & FYFFES, Ltd. This company, which was formed in 1901, is the outcome of the immense development of the West Indian banana trade. The service began in 1902 with 4 steamers adapted for the carriage of fruit; but these have since been disposed of, as being not sufficiently up to date for the safe conveyance of fruit. The company have since had built 10 steamers with special arrangements for the fruit trade and accommodation for a limited number of first class passengers, the vessels being fitted with all the latest appliances, the largest being the *Tortiguero* (4,161 tons), *Reventazon*, *Chirripo*, and *Barranca* (each 5,000 tons). Regular services are maintained between Jamaica, Santa Marta, Costa Rica, and Colombia, from Manchester; and from Bristol (Avonmouth). In the coffee season large consignments are brought from Costa Rica. In 1904 the company was entrusted by the British Postal authorities with the carriage of parcels mail to Costa Rica. The small inter-insular steamers employed at the Canary Islands are not included below.

Fleet, 10 steamers, 45,000 tons.

London Office, 10, Bow Street, W.C.

ELLERMAN LINES, Ltd.—The Ellerman Lines of steamers comprise the following:—The *Ellerman Line*, which trades between Liverpool and Portugal, Italy, Sicily, Adriatic, Alexandria, Gibraltar, Malta, Syria, Smyrna, Constantinople, and Odessa, was founded in 1840, and was con-

ducted by Messrs. John Bibby, Sons & Co. under the style of the "Bibby Line" until the year 1870, when it passed into the hands of Messrs. Frederick Leyland & Co., and was thereafter known as the "Leyland Line" until the Leyland Line was acquired by the Morgan combination, who sold the Mediterranean portion of their business to (now) Sir J. R. Ellerman, Bart., then chairman of the Leyland Line, the line in January, 1902, passing into the ownership of the Ellerman Lines, Ltd.—The *City Line*, see p. 760.—The *Hall Line*, which traces its history back for about forty years, has a regular service of passenger and cargo steamers between Liverpool and Bombay and Karachi, calling at Marseilles on the homeward passage. Also in conjunction with the Harrison and Clan Lines from Glasgow and Liverpool to South and East African ports.—The *Papayanni Line*, which was acquired from Messrs. Papayanni & Co., was established in the early forties, trading between Liverpool and the Mediterranean, touching at Tangiers, Algiers, Malta, Syria, Smyrna, Constantinople, Odessa, and Alexandria. In May, 1901, the business was sold to Sir J. R. Ellerman, Bart., and in January, 1902, passed into the ownership of the Ellerman Lines, Limited.—*Westcott & Laurance Line*. This business, established in 1856, was in December, 1901, acquired by the Ellerman Lines, Limited, the services consisting of lines between Antwerp and London to Malta, Alexandria, Smyrna, Odessa, Constantinople, Batoum, Novorossisk, &c.—*Coverley and Westray Line*. This line runs its service of steamers between London and Oporto, taking both passengers and cargo. By arrangement with the Company, the Bucknall Steamship Lines have come under the management of Sir John Ellerman.

Fleet, 79 steamers; 311,964 tons.

London Registered Office, 12, Moorgate Street, London, E.C.

FEDERAL STEAM NAVIGATION CO., Ltd.—Upon the retirement of the noted firm of Messrs. Money Wigram & Son, Mr. Allan Hughes (the chairman of the company), who had been connected with them, organised the above line in 1885, the steamers of which fly a similar flag and bear names similar to the well-known Money Wigram's Blackwall packets, some of which were early to the fore in the adoption of the screw as an auxiliary. The fleet consists of large steamers engaged in conveying general merchandise to Australia and New Zealand, returning to South Africa and London with wool and frozen produce, being fitted with very large capacity for refrigerated cargoes. The twin-screw steamers *Dorset*, 7,630 tons, and *Suffolk*, 7,573 tons, are the largest.

Fleet, 11 steamers; 70,299 tons.

London Office, 2, Fenchurch Avenue, E.C.

FORWOOD BROTHERS & CO. This line, running to Morocco, Canary Islands, and

Madeira, was established in 1872; and during 1908 was taken over by the Royal Mail Steam Packet Co. The sailings are now fortnightly from London, the voyage occupying 22 to 23 days, and the line specially caters for those desiring short sea trips for health or pleasure. Two new steamers, the *Agadir* and *Arzila*, each of 2,722 tons, have been added to the service.

Office, 18, Moorgate Street, London, E.C.

GENERAL STEAM NAVIGATION COMPANY, Ltd., established 1820, incorporated by Act of Parliament 1824, and incorporated under the Companies Acts 1862 to 1900 in 1902, is essentially a London institution. Besides East Coast services to Scotland, Continental trades are served between Hamburg in the north and Bordeaux in the south; other lines extend to the Mediterranean, Adriatic, Levant, and Black Sea. The sea-going services include the *Sheldrake*, 2,697 tons; *Adjutant*, 2,392 tons; the *Ortolan*, 1,719 tons, *Grebe*, 2,037 tons, and *Drake*, 2,267 tons. The turbine *Kingfisher*, the fast paddle steamer *Eagle*, *Golden Eagle*, and three similar popular pleasure boats run during the summer season to seaside resorts in Essex, Kent, Suffolk, and Norfolk.

Fleet, 54 steamers; 58,239 tons.

London Office, Trinity Square, E.C.

GLEN LINE of steamships, which began about 37 years ago to run from London to the Straits, China, and Japan, belongs to Messrs. McGregor, Gow & Co., whose service for cargo and passengers is one of the most important of the few lines now owned privately, and has superseded the famous racing tea-clippers. *Glen Logan* is 5,838 tons, and *Glenroy* 4,901 tons.

Fleet, 9 steamers; 40,586 tons.

London Office, 1, East India Avenue, E.C.

HAMBURG-AMERICAN LINE, in point of carrying capacity, owns the largest fleet in the world, with the exception of the International Mercantile Marine Co. (Morgan Combine). The packet company began its Transatlantic service in 1847 with sailing vessels. The ss. *Borussia*, 2,026 tons, appearing in 1855, was followed by other steamers, monthly departures being kept up from 1856 until 1860, when the ships were sold, and enough steamers purchased to make fortnightly departures to New York, the sailings being increased to weekly ones in 1866. In 1888 the company decided upon twin-screws, and the *Columbia*, *Auguste Victoria*, *Normannia*, and *Furst Bismarck* successively joined the ever-swelling fleet. The *Deutschland* (16,502 tons, built at Stettin, 1900) held for some years the record for ocean steaming with an average speed on a homeward passage of 23'51 knots. The "P" ships are noticeable for their size as cargo and passenger ships, being each over 13,000 tons, with accommodation for 350 cabin and 2,400 'tween deck passengers, and very large cargo space. The Company's largest and best equipped Transatlantic steamers are the new leviathans *Amerika*, 22,622 tons, and *Kaiserin Auguste Victoria*, 24,581 tons. Both represent the latest developments in ocean travel, and are fitted with every comfort and luxury. The routes of the weekly twin-screw express steamers carrying the American and European mails are: Hamburg, Southampton, Cherbourg to New York, returning via Plymouth and Cherbourg. Other services leave Hamburg every Thursday for New York via Boulogne-sur-Mer and Southampton, returning via Plymouth and Cherbourg, in addition to

which there are regular services from Hamburg to Montreal, Halifax, Boston, Philadelphia, Baltimore, New Orleans, Galveston, West Indies (6 lines), North, Central, and South Brazil, River Plate, Panama, Mexico (4 lines), Venezuela, Colombia and West Coast of S. America. There is also a service to Eastern Asia, to the West Coast of Africa, and to Arabia and Persia; and others from New York to China and Japan, from New York to West Indies, New York to Brazil, and Stettin via Helsingborg, Gothenberg, and Christiansand to New York, returning via Christiania and Copenhagen. Mediterranean Steamship Lines run from Genoa via Palermo and Naples to New York. In 1908 services were started from Hamburg to West Africa and New York to Brazil. This company also manages the passenger business of the Union Line to New York, the Hamburg South American Company to Brazil and the Argentine Republic. Winter and summer cruises are conducted by the specially designed twin-screw steamers *Oceania*, 7,859 tons, the fine ocean pleasure yacht, and the steamer *Meteor*, 3,613 tons. 280,404 passengers were carried, in 985 voyages (miles traversed, 6,866,000), in 1907, and 5,573,000 cubic metres of cargo.

Fleet, 164 steamers, 869,762 tons; and 223 river steamers, lighters, &c., 46,093 tons.

London Offices, 22, Cockspur Street, S.W.; 81, Strand; 77 & 78, Gracechurch Street, E.C.

HAMBURG SOUTH AMERICAN STEAMSHIP COMPANY was established at Hamburg in 1871, the largest steamers being *Cap Arcona*, 9,832 tons; *Cap Vilano*, 9,467 tons. Regular passenger services are maintained from Hamburg via Belgium, France, Portugal, and Spain, to Brazil, Uruguay and Argentine. A new service has been established from New York to Brazil. There is also a Patagonian coasting line from there down to Punta Arenas and the Terra del Fuego.

Fleet, 42 steamers; 106,732 tons.

HANSA COMPANY, of Bremen, established in 1881, maintains regular cargo services from Bremen, Hamburg, and Antwerp fortnightly to Bombay and Karachi; fortnightly to Colombo, Madras, and Calcutta; thrice-weekly to Rangoon; a fortnightly service between Bremen, Antwerp, and the River Plate. Lines have also been established from New York to Calcutta and to South African ports, Savannah to Bremen and Hamburg, and Middlesbrough to India (four weekly). The *Drachenfels*, 7,006 tons, is the largest steamer; the total is exclusive of 16 lighters (5,821 tons), 2 tugs, and 2 launches.

Fleet, 52 steamers; 249,775 tons.

London Agents, J. H. Wackerbarth & Co., 26, Billiter Buildings, E.C.

HARRISON LINE was established in 1830, and is managed by Messrs. Thos. and Jas. Harrison, of Liverpool, under the name of the Charente Steamship Company, Limited, regular services being maintained to and from West Indies, United States, Mexico, Brazil, East Indies, South and East Africa, and South of France.

Fleet, 43 steamers; 217,000 tons.

London, Thos. & Jas. Harrison, Dock House, Billiter Street, E.C.

HOLLAND-AMERICA LINE, of Rotterdam, was established in 1872, and maintains a regular passenger and freight service between that port and New York *via* Boulogne-sur-Mer, as well as a direct line between Amsterdam and Newport News. The twin-screw steamers *Potsdam*, 12,522 tons, *Rijndam*, 12,527 tons, *Noordam*, 12,531 tons, have been surpassed in size by the *New Amsterdam*, 16,967 tons, and the *Rotterdam*, 24,149 tons. The quickest passages between New York and Boulogne-sur-Mer are about nine days.

Fleet, 12 steamers; 125,363 tons.
London Agents, Browne, Geveke & Co., 102, Fenchurch Street, E.C.

HOULDER BROTHERS, & CO., Ltd., which became a public company in 1883, was established in 1849 by the late Mr. Edwin Houlder. Regular steamship services for passengers and cargo are maintained between England and Australia and New Zealand, England and River Plate ports, England and South and East Africa, and from New York and Australia and New Zealand. The steamers of the "Grange" Fleet, under the company's management, are specially fitted for the conveyance of frozen meat, in which an important trade is carried on to this country from Australia and the River Plate. The two twin-screw steamers, *Drayton Grange* and *Oswestry Grange*, are respectively 6,664 tons and 7,368 tons. The twin-screw steamer *Everton Grange* is 8,096 tons.

Fleet, 11 steamers; 58,896 tons.
Head Office, 146, Leadenhall Street, London.

THE HOUSTON LINE was formed in 1883 by the senior partner of the firm of R. P. Houston & Co., of Liverpool. Regular services of freight steamers are maintained to and from United Kingdom to River Plate and South Africa; United States to River Plate and South Africa; Corunna and Vigo to River Plate; also Galveston to Liverpool and Continental ports; and from Australia to U.K. and Continent; River Plate to United States; also to Antwerp and Hamburg. The *Hyacinthus*, 5,756 tons, heads the list. 500 tons of harbour craft are not included in the total given.

Fleet, 24 steamers; 90,803 tons.
London Office, 16, Leadenhall Street, E.C.

IMPERIAL DIRECT WEST INDIA MAIL SERVICE COMPANY, Ltd., from Bristol to Kingston, Jamaica, W.I.—The *Port Morant*, 2,831 tons, opened this service from Bristol, Feb. 16, 1901, followed by *Port Antonio*, 4,458 tons; *Port Royal*, 4,455 tons; *Port Maria*, 2,910 tons; *Port Kingston*, 7,584 tons, and *Port Henderson*, 5,167 tons, with a capacity for 40,000 bunches of bananas, all new steamers. The *Port Kingston* accommodates 160 first and 60 second class passengers; the *Port Antonio* and *Port Royal*, 100 first and 50 second class; and the *Port Henderson*, 80 first and 40 second class. They are subsidised for the carriage of H.M. mails, and specially fitted up for conveying fruit, being expected to bring home 20,000 bunches of bananas every voyage. The *Port Kingston*, sailing every six weeks, also calls at Bermuda homeward bound. This praiseworthy effort to foster the West Indian-Bristol trade was promoted by (now) Sir Alfred L. Jones, K.C.M.G., whose firm (Elder, Dempster & Co.) manage the company.

Fleet, 6 steamers; 25,152 tons.
Head Office, Colonial House, Liverpool.

INTERNATIONAL MERCANTILE MARINE COMPANY.—A company formed in 1902, embracing the American, Atlantic Transport, Dominion, Leyland, Red Star, and White Star lines, together representing, with vessels building, a total of 132 steamers and 1,159,704 tons.

JOHNSTON LINE gradually entered the Mediterranean, Black Sea, Danube, and American trades, and keep up regular lines from Liverpool, London, and Antwerp. *Quermore*, 7,300 tons, and *Rovanmore*, 9,456 tons—amongst the finest freight and live-stock carriers in existence—head the well-built, well-kept, and well-managed steamers belonging to Messrs. Wm. Johnston & Co., Ltd., of Liverpool.

Fleet, 19 steamers; 78,106 tons.
London Office, 1, St. Mary Axe, E.C.

KOSMOS COMPANY, of Hamburg, performs a direct service from Hamburg, Antwerp, and London, to the West Coast of South, Central, and North America, *via* Straits of Magellan. The line was begun in 1873 to Chile and Peru, and afterwards extended to various other Central American ports, the service having recently developed to the inclusion of Mexican ports, Frisco and Seattle. There are fortnightly departures to Chile and Peru from Hamburg and Antwerp, also a sailing from London every four weeks to Chile, Peru, Ecuador, Central America, Mexico, Frisco, and Seattle. The steamers range from the *Pentaur*, 3,060 tons, to the *Roda*, 7,266 tons, and the *Helium*, 7,246 tons.

Fleet, 38 steamers; 186,476 tons.
London Agents, Browne, Geveke & Co., 102, Fenchurch Street, E.C.

LAMPART AND HOLT LINE.—The Liverpool, Brazil, and River Plate Steam Navigation Company, Limited, was formed in 1865, being popularly known as the Lampart and Holt Line, after its first and present managers. The steamers are run at regular intervals from Glasgow, Liverpool, Manchester, London, Antwerp, Havre, and New York to Bahia, Rio de Janeiro, Santos, Montevideo, Buenos Ayres, and Rosario; also to the ports of Chile, Peru, and Ecuador, on the West Coast of South America. There is also a line from New York to Manchester. All the steamers are fitted with telescopic masts. Those running between New York and South America form an excellent passenger and mail line, while many of the ordinary cargo steamers have first and second-class accommodation for a limited number of passengers. Others have been specially constructed to carry large numbers of horses, cattle, and sheep. The latest addition to this company's large fleet is the fine passenger steamer *Vasari*, with a carrying capacity of 8,401 tons. Other vessels are the *Vardi*, 6,578 tons, *Veronese*, 7,063 tons, and *Voltaire*, 8,406 tons. In addition to their own steamers there are 11 vessels with a total tonnage of 70,650 tons, which run regularly under the "L. & H." flag.

Fleet, 33 steamers; 211,000 tons.
London Office, 36, Lime Street, E.C.

LEYLAND LINE.—This old-established business was converted into a public company in 1892, after the death of its founder, Mr. F. K. Leyland. The company's fine fleet now includes the *Deoniant*, 10,418 tons; *Winifredian*, 10,405 tons; *Bohemian*, 8,548 tons; *Canadian*, 9,301 tons, and *Cestrian*, 8,823 tons. In 1900 the company acquired by purchase the business

of the West India and Pacific Steamship Co., an old-established concern, with a fleet consisting of 22 steamers with a gross tonnage of 111,183 tons, and maintaining services from Liverpool to St. Thomas, Colon (for ports on West Coast of America), Kingston (Jamaica) and Mexican ports; also Barbados, Trinidad, and Spanish Main ports, returning to Liverpool from Galveston or New Orleans. Special attention has been paid to the cotton trade, and the steamers of the company engaged in it have the largest cotton-carrying capacity of any entering the port of New Orleans. In addition to the Liverpool and Boston weekly service, the company maintain a line between Liverpool and New Orleans for both passengers and cargo, as well as one between London, Antwerp, and New Orleans. Lines for cargo only are run between London and Boston, Antwerp and Montreal, and Manchester and Boston.

Fleet, 42 steamers; 248,820 tons.

Head Office, 27, James Street, Liverpool.

London Offices, 1, Cockspur Street, S.W., and 38, Leadenhall Street, E.C.

WILLIAM LUND commenced in the sailing business in 1861, and in 10 years ably carved his way to the ownership of a fleet of sailing ships. After the Suez Canal was opened he changed to steam, and in 1880 he began his Blue Anchor Line of passenger steamships from London to and from Adelaide, Melbourne and Sydney with the ss. *Delcomyn*, 1,838 tons, this being the first regular direct steam cargo service between England and Australia; the *Narrung*, *Wakool*, and *Wilcannia* are each about 5,000 tons, and steam 13 knots. Recently, the twin-screw steamers *Commonwealth*, 6,611 tons, and *Geelong*, 7,954 tons, have been added to the line. They are all first-class passenger steamers, and carry H.M. mails between South Africa and Australia. The *Geelong* has gone from London to Adelaide, *via* Cape of Good Hope, in 36½ days. The average passage to Cape Town is 21 days, and to Australia 42 days.

Fleet, 6 steamers; 38,995 tons.

London Office, 3 & 5, East India Avenue, E.C.; West End Office, 21, Cockspur Street, S.W.

MANCHESTER LINERS, LIMITED (first and present chairman, Sir Christopher Furness, M.P.), was formed in 1898 to work steamship lines of modern cargo carriers to and from the port of Manchester, &c. Itinerary includes Canada, Philadelphia, Pensacola, and New Orleans, and back to Manchester. Largest is *Manchester City*, 7,666 tons.

Fleet, 14 steamers, 63,295 tons.

London Office, 4, Fenchurch Avenue, E.C.

MESSAGERIES MARITIMES DE FRANCE.—From a concern for inland mail carriage, the present noted company developed. In 1851 an over-sea contract was entered into for the French mails to Italy, Egypt, Syria, the Levant, and Greece. There are five services to Mediterranean and Black Sea ports, the last two trades being taken up in 1857. The India and China mail contract was secured in 1861. There is a service every 28 days to Australia and New Caledonia, *via* Aden, Bombay, and Colombo; connecting at Colombo with the China main lines. A fortnightly service is maintained to Aden or Jibouti, Colombo, Singapore, Saigon, China, and Japan, with monthly connections for

Pondicherry and Calcutta, and fortnightly for Java and the Tonquin ports. There are departures on 25th of every month to Aden, Jibouti, Mahé (Seychelles), Madagascar and Mauritius, with branch lines at Diego-Suarez for ports on east and west coasts of Madagascar, Delagoa Bay, and Durban, and on 10th of every month to Jibouti, Mombasa, Zanzibar, Madagascar and Mauritius. The foregoing, with a weekly cargo line to London *via* Havre, sail from Marseilles. The mail service from Bordeaux to Brazil and River Plate, commenced in 1861, now leaves fortnightly, with a steamer once a month for cargo only. Cargo steamers are run from Antwerp to the Far East every two months, and from Marseilles every month to the French Possessions in Indo-China. The largest passenger steamers are the *Atlantique*, 6,446 tons; *Armand-Behic*, 6,385 tons; *Ville de la Ciotat*, 6,378 tons; *Australien*, 6,365 tons; *Polynesien*, 6,363 tons.

Fleet, 65 steamers; 294,973 tons.

London Office, 97, Cannon Street, E.C.

THE MOOR LINE of steamers, which trade to all parts of the world, was commenced in 1885 by Messrs. Walter Runciman & Co., of Newcastle-on-Tyne; the fleet is composed of modern-built vessels. The *Castlemoor*, 3,732 tons, and *Pearlmoor*, 4,119 tons, are the largest.

Fleet, 31 steamers; 106,789 tons.

London Office, 55 and 56, Bishopsgate St., E.C.

NATAL LINE.—In the middle of the last century, the firm of Bullard, King & Co. established a line of clipper ships between England and Natal, and in 1879 inaugurated the present service with the *Pongola*. Steamers are despatched every 10 days from London direct to Natal, Delagoa Bay, Beira, and East African ports, which offer special facilities for passengers and cargo for those ports. Besides a through service at regular intervals between South African ports and China and Japan, another fortnightly one, under contract with the Natal Government, from Cape Colony and Natal *via* East African ports to Madras and Calcutta, calls at Ceylon. The *Umzumbi* is 3,388 tons and 13 knots, and the *Umhlali*, the latest addition, is the same size and speed. Quickest passages: Outward, *Umvoti*, 22 days, 23 hours; Homeward, *Umtata*, 21 days, 12 hours.

Fleet, 14 steamers; 35,000 tons.

London Office, 14, St. Mary Axe, E.C.

NAVIGAZIONE GENERALE ITALIANA.—Under this title were united the lines which formerly belonged to Florio, of Palermo, and Rubattino, of Genoa, having the head office at Rome. There are lines to and from Italy to India, China, New York, Brazil, and River Plate, in connection with the company's Mediterranean, Adriatic, and Levant services. In 1901 this company joined La Veloce Navigation Italiana Co. in making the services weekly (instead of fortnightly), Genoa and Naples to New York, and from Genoa to Monte Video and Buenos Ayres. The largest is the *Sannio*, 9,203 tons.

Fleet, 109 steamers (2 building); 293,000 tons.

London Agents, A. Laming & Co., 8, Leadenhall Street, E.C.

THE NEDERLAND LINE (Stoomvaart Maatschappij, "Nederland"), of Amsterdam, is under mail contract with the Government of the Netherlands to maintain a mail service between

Holland and Java. The Nederlander Steam Navigation Company was established in 1870, and now maintains three separate services, viz., two from the Netherlands to the Dutch Indies, one carrying the Royal Mails, passengers, and goods, and the other cargo only. The third is a cargo line between Java and Bengal. *Mail Line*.—The Company has nine mail steamers, one of which is laid up as reserve mail steamer. The other eight sail every alternate Tuesday from Southampton to Colombo, Sabang Bay, Singapore, Batavia, Samarang, and Sourabaya, *via* Lisbon, Genoa, Port Said, and Suez. Colombo is, however, not to be touched by those homeward bound mail steamers leaving Batavia between June 1 and Aug. 15. Only the outward bound mail steamers call at Southampton, Tangier, and Algiers. The steamers employed in the mail service are continually being replaced by more modern ships. The three newest-built steamers, the sister-ships *Rembrandt*, 5,860 tons, *Vondel*, 5,846 tons, and *Groenius*, 5,833 tons. The connections with ports in Netherlands India are made with the steamers of the Koninklijke Paketvaart Maatschappij. The cargo services employ 14 steamers.

Fleet, 23 steamers; 105,659 tons. Building 1 mail steamer, 8,300 tons.

London Agents, Keller, Wallis & Co., 2 King William Street, E.C.

NEW ZEALAND SHIPPING COMPANY, organised at Christchurch, New Zealand, in 1873, carried on business for ten years with sailing ships specially built for passengers and the trade. The first direct steamer, *Stad Hartem*, conveyed (in 1879) 600 emigrants to the enterprising colony; four years later the *British King* began the Government mail contract, for which five steamers were built. Of the present fleet, eleven are twin-screw steamers, the largest being the *Turukina*, 8,349 tons, and *Ruapehu*, 7,885 tons. New Zealand emphasises its British characteristics by sending here nearly all its produce, which the development of the frozen industries has multiplied. This company's *Mataura* sailed from Port Chalmers in 1882, with 150 tons of mutton prepared on board in the absence of the necessary plant ashore. The passenger steamers sail from London every fourth Thursday *via* Plymouth, Tenerife, Cape Town, and Hobart, returning round Cape Horn *via* Montevideo and Rio de Janeiro. Rates are low compared with the conveniences and table supplied to all classes. This Company's new steamer *Olaki* was the first vessel fitted with turbine engines in combination with the usual reciprocating engines.

Fleet, 17 steamers; 118,410 tons.

London Office, 138, Leadenhall Street, E.C.

NIPPON YUSEN KAISHA.—In 1868 steamship communication was opened between Tokyo and Osaka by a company which gave way to a Mail Line under Imperial control in 1871. In 1882 the Union Navigation Company was started, but in three years the proved inexpediency of having two State-aided concerns resulted in amalgamation, and the above, known as the Japanese Mail Steamship Company, was established in 1885. Regular services were kept up from Kobe to Vladivostok, Tientsin, and Korean ports; a line between Japan and Bombay being put on in 1892. The importance of the company rose with the size of its fleet owing to the war with China in 1894, fifty of its steamers being engaged at one time transporting the 120,000

fighting men with their 100,000 attendant coolies. Independent of a complete Japanese coastal system, extending to all the principal ports in Japan, as well as to Keelung from Kobe, and to Bonin Islands from Yokohama, the European passenger line runs fortnightly from Japan to Antwerp and London, starting from Middlesbrough on the return journey; the American line is a fortnightly service connecting at Seattle with the Great Northern Railway for inland United States points. There is also a monthly line to and from Australia, and other services to China, Corea, Asiatic Russia, Hawaii, Straits Settlements, and India. By continually adding boats (the *Kamo Maru*, 8,524 tons, and five sister ships have lately been built in Japan for the European Line) the fleet which hails from the kingdom of the Mikado has made such phenomenal progress that it now takes a prominent place amongst the first companies in the world. Steam launches (1,138 tons), 4 hulks, and 24 lighters, and 40 steam launches and tugs are not included in the total given. Six steamers are building (6 each, 8,600 tons).

Fleet, 79 steamers; 306,674 tons.

London Office, 4, Lloyd's Avenue.

NORDDEUTSCHER LLOYD sprang into existence in 1856, initial operations taking the form of lines to Hull and to London. On 19th June, 1858, the *Bremen*, 334 × 42 × 28, sailed to New York *via* Southampton with 22 cabin passengers, 92 steerage, and 150 tons of cargo, followed by the *Weser*, the service being made fortnightly in 1866. Extensions to Baltimore 1868, New Orleans 1869, West Indies 1871, Brazil and River Plate 1875, evidenced the growth towards front rank which was assumed in 1881 with fast mail-boats built for an express Atlantic service, now maintained weekly from Bremen to New York *via* Southampton and Cherbourg. The Imperial German Mail Service from Bremen and Hamburg *via* Antwerp, Southampton, and Genoa to Eastern Asia and Australia, with various branch lines, began in 1885, and was followed in 1891 with an express line between Italy and New York in conjunction with the Hamburg-American Line. In 1892, the first twin-screw steamer, *H. II. Meier*, joined the fleet, which from that date has been completely reorganised and doubled. In 1897 the *Kaiser Wilhelm der Grosse* promptly won and for a time held the palm for ocean speed: in March, 1900, she crossed from Cherbourg to Sandy Hook in 5 days 20 hours 58 minutes, averaging 22.33 knots per hour over 3,148 miles distance run. In 1900 the steamers and trade were acquired of the Scottish Oriental Co. and the East Indian Ocean S.S. Co., and extensions made between Penang and Belawan (Deli) and between Singapore and Palembang, Asahan, and Sandakan (Borneo). The line from Singapore to Labuan has been extended one way to Sulu and the Archipelago, and the other way to Manila. Steamers have been built for the development of the company's Chinese coasting business, and which now carry the German postal flag far into the interior of China up the Yangtze. A branch line has been established between Hong Kong and Sydney *via* Mariana Islands, Carolines, New Guinea, and Queensland. In 1901 sailings were resumed from Bremerhaven to Cuba. In 1904 the Singapore and Sydney line *via* Batavia, &c., was superseded by a new line from Sydney to Yokohama *via* New Guinea, Manila, and Hong Kong; additional lines being also estab-

lished between Genoa and New York, and between Marseilles and Alexandria, *via* Naples. In 1906 the company started a weekly service to the Levant. The *Kronprinz Wilhelm*, 14,908 tons, 35,000 H.P., joined the steady N.D.L. fleet in 1901, followed by the *Kaiser Wilhelm II.*, 19,361 tons, 43,000 H.P., built by the Vulcan Works at Stettin, and *Kronprinzessin Cecilie*, 19,503 tons, 45,000 H.P., all magnificent monuments to German shipbuilding and industrial art. The fleet includes 59 twin-screw ocean steamers (17 over 10,000 tons each), also 65,071 tons of river steamers and lighters, and 2 training ships, 5,823 tons, not included in total given below. The *George Washington*, 27,000 tons, built in 1909, is the largest steamer in the company's fleet. River craft, 65,071 tons; 661,258 passengers carried in 1907; 6,254,700 miles traversed; 4,390,051 tons cargo carried.

Fleet, 195 ocean steamers; 752,037 tons.
London Agents, Keller, Wallis & Co., 2, King William Street, E.C.

OCEAN STEAM SHIP COMPANY, Ltd., and CHINA MUTUAL STEAM NAVIGATION CO., Ltd.—The Ocean Steam Ship Company was formed in 1865 by Mr. Alfred Holt. The *Agamemnon* began the line on April 10th, 1866, sailing from Liverpool for Singapore and China *via* Mauritius. The Cape route was given up on the opening of the Suez Canal. The company maintains (in conjunction with the China Mutual S.N.C., Ltd., which was formed in 1882, and of which Messrs. Alfred Holt & Co. acquired the control in 1902) a weekly service of cargo steamers from Glasgow, Bristol Channel ports, and Liverpool to the Straits Settlements, China, and Japan, with a four-weekly extension across the Pacific to British Columbia and Puget Sound; a three-weekly one from Amsterdam *via* Liverpool to Sumatra and Java, and another between Singapore and West Australian ports. In 1901 a monthly line was begun from Glasgow to Australia. The *Antiochus*, *Bellerophon*, *Cyclops*, *Keemun*, *Ningchow*, *Omyia*, *Protesilaus*, *Tycoer*, and *Titan* are from 8,000 to 9,000 tons each.

Fleet, 62 steamers; 350,279 tons.
London Agents, J. Swire & Sons, 8, Billiter Square, E.C.

ORIENT LINE.—The Orient Company, who provided Australia with her first direct service of full-powered steamers in 1877, have, since 1883, been contract mail carriers. Their latest contract, concluded last year, is with the Commonwealth Government, and is for a term of years ending in 1920. It calls for an accelerated service, and to make provision for its efficient performance the Company have this year added to

their fleet five twin-screw steel vessels all over 12,000 tons register. The passenger accommodation afforded in these vessels has been planned to provide the comfort and luxury which is now-a-days so essential, while the special needs for a voyage through varying climates have called for and received special consideration. The time occupied on the voyage from London to the first port in Australia is about 32 days. The steamers sail from London on alternate Fridays, calling at Gibraltar, Marseilles, Naples, Taranto, Port Said, Suez, Colombo, Fremantle, Adelaide, Melbourne, Sydney, and Brisbane. The outward and homeward steamers are timed to connect at Marseilles, so as to provide a sea voyage from London and back of 14 to 15 days, with one or two days on shore. The Orient Line are noted for their excellent system of pleasure cruises by large ocean steamships, varying in length from two to ten weeks to various parts of the world, according to season.

Fleet, 10 steamers; 96,375 tons.
Managers, R. Green & Co., and Anderson, Anderson & Co.

Head Office, Fenchurch Avenue, London, E.C.; *West End Branch*, 28, Cockspur Street, S.W.

PACIFIC MAIL STEAMSHIP COMPANY.—This well-known American line, which was established at San Francisco in 1847, maintains services to Central America, Japan, China, Honolulu, &c. The *Korea*, 11,276 tons, and *Siberia*, 11,284 tons, recently built in the United States, steam 18 knots, and the *Manchuria*, 13,638 tons, and *Mongolia*, 13,639 tons, each 16 knots.

Fleet, 21 steamers; 99,651 tons.
London Agent, Rudolph Falck, 49, Leadenhall Street, E.C., and 22, Cockspur Street, S.W.

PACIFIC STEAM NAVIGATION COMPANY, incorporated by Royal Charter in February 1840, began business with the *Chile* and *Peru*, receiving a small subsidy. A bi-monthly service between Valparaiso and Panama necessitated four more steamers in 1852, the Pacific trade developing and fresh branches of commerce being opened up. Compound engines were welcomed and adopted in 1856, thereby reducing the costly consumption of coal, the scarcity of which article had been the earliest difficulty. The company's powers were enlarged in 1865 to run as far as the River Plate. In 1867 the capital was increased for the onerous performance of a monthly mail service from Liverpool, through the Straits of Magellan to Valparaiso, the *Pacific*, 1,630 tons, sailing from that port May, 1868. The success of the new line resulted in three sailings a month, and an extension to Callao by 1870. Again, two years later, the capital was added to, the *Sorata*, 4,038 tons, starting in 1873 a weekly service under contract with H. M. Postmaster-General from Liverpool to Callao *via* France, Spain, Portugal, Brazil, and River Plate. The fleet owned by the company contains a long list of noble vessels (called after South American places), with which its reputation is well sustained for safety, speed and comfort. The *Oreoma*, 11,532 tons, the *Oriana*, 8,086 tons, *Ortega*, 7,966 tons, and *Oronsa*, 7,989 tons, all twin-screw steamers, are the latest additions to the fleet.

Fleet, 44 steamers; 182,938 tons.
Head Office, 31-33, James Street, Liverpool.
PENINSULAR & ORIENTAL STEAM NAVIGATION COMPANY.—Mr. Brodie McG. Wilcox began to sow the seeds in 1825, and from the

William Fawcett, 206 tons: 60 h.-p.: 74×15×8, blossomed the Peninsular Company, subsequently ripening into the above institution, which was incorporated 1840 (see p. 752), and celebrated its Jubilee 1887. Universally known as the "P. & O.," it glories in the motto, "Quis separabit."

Mails were conveyed by Post Office sailing packets from Falmouth to Lisbon before the contract was given to the Peninsular Company. The Indian mails were at that time taken in Government steamers from Bombay to Suez. Prior to the completion of the railway, 1857 (followed by the Suez Canal, 1870), everybody and everything had to take the caravan route across the desert to Cairo, intimately associated with the name of Lieut. Waghorn, who organised quicker and better facilities. Nile steamers afterwards superseding the sailing boats between Cairo and Alexandria. From Alexandria, Home Government steam packets carried the mails to Gibraltar, where the Peninsular Company received them. They soon suggested and pressed a better service than this upon the Government, and eventually a line from England *via* Gibraltar and Malta to Alexandria was begun by the *Oriental*, 1,620 tons, and *Great Liverpool* 1,540 tons, for which purpose the above company was constituted. The P. & O. Company secured the contract for the mails between Suez and Calcutta in 1842, the first sailing being the *Hindustan*, 1,800 tons; but the East India Company obstinately refused to hand over their inferior Bombay-Suez Line until 1854, by which period the P. & O. had engaged to run to China and Singapore. The first service to Australia was interrupted by the Crimean War, 11 P. & O. boats being employed for the transport of troops. The necessity growing for an independent Australian mail line, the Government called for tenders in 1856, but the P. & O. declined the onerous conditions, which were swallowed by the European and Australian Steam Navigation Company, who soon failed. The Royal Mail Company stopped the breach hut temporarily, and the Government, having learnt a lesson, accepted the tender of the P. & O. Company in 1859.

The mails are invariably ahead of the contract times, which now have been reduced to the following:—

Indian mails:	Bombay,	13½ days from Lond.
China	"	Shanghai 30½ "
Australian	"	Adelaide 28½ "

The *Caledonia*, 7,558 tons, has landed the mails at Bombay within 121 days from London *via* Brindisi, and the steamer's own passage between Bombay and Plymouth has been less than 17 days. The *Isis* and *Osiris*, running in the Brindisi-Port Said Express Service, have delivered the Egyptian mails within four days from the Metropolis of the Empire. The *Malwa*, *Mantua* and *Morea*, each about 11,000 tons, and 18 knots speed, are the newest and largest mail steamers in the company's service, making, with those already in commission, a total of eight sister ships known as the "M" class. The *Salsette*, a 19-knot steamer of 5,842 tons, has been placed on the Bombay-Aden Mail Service. 3,100,000 miles are traversed every year.

Fleet, 56 steamers; 400,000 tons.

London Office, 122, Leadenhall Street, E.C.

THE PRINCE LINE is the substantial handiwork of Mr. James Knott, of Newcastle-on-Tyne, since he despatched the *Saxon Prince* in 1881 as the pioneer of his present big fleet of ubiquitous

steamers, of which the largest are the *Spanish Prince* (6,505 tons) of nearly 10,000 tons carrying capacity, and the *Norse* and *Royal Princes*, each of 9,500 tons capacity, and with a speed of 12 knots. The line has regular services from Manchester, Middlesbrough, Antwerp, London and Dunkirk to Tunis, Malta, Alexandria, Syrian Coast, Cyprus, Levant, and Smyrna, with return services to Manchester, Liverpool, Dunkirk, London, and other ports in the United Kingdom and Continent. Other lines maintained are those from Antwerp and London to the River Plate, and returning to the United Kingdom; New York to the Brazils and River Plate, and back to New York; New York to the Brazils, thence New Orleans, and from the latter port to the United Kingdom and Continent; Italian ports and Greece and the Levant to New York, with a return service to Italy, Greece and the Levant, carrying on the said line emigrants and cargo, New York to China, Japan, Philippines, Straits, and back to New York; New York to South African ports and back. During last year the steamers of the company carried 15,000 emigrants from Grecian and Italian ports to New York.

Fleet, 37 steamers; 121,405 tons.

London Office, 118, Fenchurch Street, E.C.

THE RED STAR LINE was established in 1872, and at first maintained a service between Antwerp and Philadelphia with the steamers *Nederland*, *Switzerland*, &c., but since then has developed and now maintains regular services between:—

1. Antwerp and New York with the powerful twin-screw steamers *Vaderland*, *Kroonland*, *Finland*, and *Zeeland*, each of 12,000 tons register, and with up-to-date accommodation for first, second, and third class passengers.

2. Antwerp, Boston and Philadelphia by a triangular service with the steamers *Menominee*, *Marquette*, *Manitou*, &c., these steamers having accommodation for cabin passengers only.

3. Antwerp and Baltimore by a regular service of cargo steamers.

Moreover, the line, when occasion requires, has a supplementary service between Antwerp and New York carrying third-class passengers and cargo by steamers of the *Samland* type.

The New York steamers call, West and East-bound, at Dover during the summer season for landing and embarking first and second class passengers only.

The latest addition to the company's fleet is the steamer *Lapland*, built at Messrs. Harland & Wolff's Yard, in Belfast, 605 feet long, and 17,540 tons register, with most luxurious arrangements for about 700 cabin passengers on five decks.

Fleet, 14 steamers; 122,521 tons.

London Office, 1, Cockspur Street, S.W.; and 38, Leadenhall Street, E.C.

JOHN T. RENNIE, SON & COMPANY, ABERDEEN DIRECT LINE.—The steamers of this line leave the West India Dock every ten days for Natal, Delagoa Bay, Beira, and Chinde, calling at Portland and the Canary Islands (Las Palmas and Tenerife alternately); they also take passengers for East African ports as far as Mombasa and Madagascar. The line was inaugurated in the year 1856 with sailing ships which traded regularly between London and Natal. Steam was first tried in 1857 with the *Waldensian* and *Madagascar*, which were the

first steamers on the South African coast, and carried the mails from Cape Town as far as the port of Durban. The present service was commenced in 1882 with the *Dabulamanzi*, 1,679 tons. In 1886 the *Matabele* was the first steamer in the South African trade to be fitted with triple expansion engines, and steamed nearly 7,000 miles from London to Port Natal, without a single stoppage. The East African service was commenced in the year 1892, and the steamers of the Aberdeen Line now maintain a regular service as far north as Beira, calling at Delagoa Bay and Inhambane, and carrying goods also to the British concession at Chinde and Quilimane, these ports forming the best and cheapest routes for passengers for Rhodesia, Matabeleland, Nyassaland, British Central Africa, and the African Lakes District. Steamers carry British parcels (no cargo) mails from London to Portuguese East Africa, Rhodesia, and Nyassaland, and the British and Portuguese mails from Durban to the various ports they serve. The passenger fares are moderate and the accommodation, especially on the newer steamers, superior. The ss. *Inkosi*, 3,576 tons, 13 knots, has gone from London to Natal in 23 days 10½ hours' steaming time, and the *Insizwa* has completed the homeward passage in 22 days 2½ hours. The *Inanda* (4,090 tons, 13 knots, latest addition) and *Inkosi* were the first ocean-going steamers outside transatlantic boats to be fitted with Marconi's system of wireless telegraphy.

Fleet, 9 steamers; 26,700 tons.

London Offices, 4, East India Avenue, E.C., and 21, Cockspur Street, S.W.

ROTTERDAM LLOYD line of steamers to Java, *via* Suez Canal, is under special mail contract with the Netherlands Government. The service was established in 1883 by the present managers, Messrs. Wm. Ruys & Sons, one of the oldest and most important shipowning and shipbroking firms in Holland. The steamers are despatched from Rotterdam, *via* Southampton, fortnightly, for Padang, Batavia, Cheribon, Samarang and Sourabaya, calling at Lisbon, Tanger and Marseilles, from which last port passages of 20 days have been made to Batavia. The largest are the *Sindoro*, 5,468 tons, and *Goentoe*, 5,894 tons, both twin-screw steamers, 15 knots speed; one mail steamer is building of 5,700 tons; and one cargo steamer, of 9,000 tons dead-weight; 44 voyages in 1907; about 850,000 miles traversed.

Fleet, 19 steamers; 107,600 tons.

London and Southampton Agents, Escombe, McGrath & Co.

THE ROYAL MAIL STEAM PACKET COMPANY was incorporated 1839 by Royal Charter with a subsidy of £240,000. In 1857 the company temporarily took over the carriage of the Australian mails *via* Suez. In 1868 the West Indian Mail Line was extended to Colon. In 1869 the South American main line was continued to Buenos Ayres (doing away with branch steamers from Brazil), developing by 1872 into a fortnightly service, and later into a weekly service. Cargo services are now operated from Glasgow, Avonmouth, Cardiff, Hull, London, and Antwerp to the West Indies and Central America; and from Newport, Swansea, and Antwerp to Brazil; also a line to Cuba and Mexico from Newcastle, Antwerp, and London, *via* Havana direct. The West Indian Mail subsidy, which had dwindled to £85,000 a year, was allowed by the Government to lapse in

1905, much against the expressed wishes of the Colonies. The company availed themselves of the freedom to extend their West Indian Main Line service to New York *via* Jamaica, maintaining their communications with the West Indian and British Guiana Colonies. In August, 1907, a contract was made for a fortnightly inter-colonial service from and to Barbados, distinct from the transatlantic service (run without subsidy). The *Aragon*, 9,795 tons, which sailed on her maiden voyage July 14, 1905, is the first of a series of similar vessels for the Brazil and River Plate route. The *Amazon*, 10,036 tons, and *Araguaya*, 10,537 tons, were launched in 1906, the *Arion*, 11,072 tons, and *Asturias*, 12,500 tons, in 1907. The R.M.S.P. service to Australia (carried on for a short time in 1857) was resumed at the end of 1905, the Company then acquiring a half-interest in the Australian mail service. In 1907 the company acquired a half share in the "Shire" Line, thus extending their operations to Japan, China, and the Far East. From London (Albert Dock), the ports of call including Port Said, Suez, Penang, Singapore, Hong Kong, Shanghai, Nagasaki, Kobe, and Yokohama. In 1908 the Company acquired Messrs. Forwood Bros. & Co.'s line to Gibraltar, Morocco, Canary Islands, and Madeira (see pp. 762-3). A service of magnificent cruising cruisers (of 11,000 tons each) to Norway was successfully inaugurated in 1909. The winter of 1909-1910 has witnessed the placing on the New York station of a service of yachting cruises by R.M.S.P. *Arion* (11,072 tons), and the establishment of a regular service from New York to Bermuda. Two new inter-colonial mail steamers, R.M.S.P. *Berice* and *Balanta* (twin-screw), were placed on the West India station at the end of 1909. Several steamers of 13,000 tons are building for the Australian mail service.

Fleet, 50 steamers; 211,831 tons.

London Office, 18, Moorgate Street, E.C.

SHAW, SAVILL AND ALBION COMPANY, LIMITED.—This company, successors to Messrs. Shaw, Savill & Co. and The Albion Co., established over 50 years ago, maintain a regular service of fast steamers between London and New Zealand. Their passenger steamers are despatched from London to New Zealand every four weeks, calling on the outward journey at Plymouth, Tenerife, Cape Town, and Hobart (to tranship Australian passengers), and on the homeward journey, *via* Cape Horn, they call at Monte Video and/or Rio de Janeiro, Tenerife, and Plymouth. The company also despatch fast direct cargo steamers monthly from London to various ports in New Zealand; while, in addition, a service of cargo steamers from Glasgow and Liverpool to New Zealand is maintained at regular intervals. The company own 12 steamers, including the twin-screw steamers *Kia Ora*, 6,553 tons, *Manari*, 7,062 tons, and *Matania*, 6,488 tons. The more recent additions to the passenger fleet are the twin-screw steamers *Arara*, 9,372 tons, and the *Tatani*, 9,557 tons, which were launched in November, 1906, and September, 1908, respectively. The fleet has been augmented in the current year by the addition of two large twin-screw steamers, each of 10,000 tons. All the steamers are fitted with patent refrigerators for the conveyance of frozen meat, as well as butter, cheese, and fruit, from New Zealand, and aggregate a total carrying capacity equal to about 3,000,000 carcasses of

sheep annually. The White Star Co. have associated with this line their ss. *Athenic*, ss. *Corinthic*, ss. *Ionie*, and ss. *Delphic*, not included in the totals given.

Fleet, 12 vessels; 89,000 tons.

Head Office, 34, Leadenhall Street, London, E.C.

THE UNION-CASTLE LINE.—Early in 1900 the two well-known steamship companies, the Union Steamship Company, Limited, and the Castle Mail Packets Company, Limited, the former company having been formed in 1856 and the latter one in 1881, who for many years had performed the mail service between England and S. Africa, were formally amalgamated, under the title of the Union-Castle Mail Steamship Company, Limited, the joint concern being managed by Messrs. Donald Currie & Co., who were the managers of the Castle Line. The Royal Mail steamships of the line, under contract with the Colonial Governments, are despatched from Southampton every Saturday for the Cape of Good Hope and Natal, calling at Madeira. The Intermediate steamships are despatched every Friday from London, calling at Southampton on the following day, for the Cape Colony, Natal, Delagoa Bay, Beira, and Mauritius, taking passengers at lower rates than the Mail steamers. These steamers proceed alternately *via* Las Palmas or Teneriffe, and call once a month with mails at Ascension and St. Helena under contract with His Majesty's Government. At intervals, as the trade requires, extra steamships are despatched from England to the South African ports; steamers also call at Lobito Bay as required. Special tourist fares are arranged for the spring and summer to Madeira and the Canary Islands; also to Hamburg and Antwerp all the year round. The steamers of the fleet are amply furnished with every contrivance for the safety, comfort, and convenience of all classes of passengers. The largest steamers in the fleet are: *Kensworth Castle*, 12,975 tons; *Armadale Castle*, 12,973 tons; *Walmer Castle*, 12,546 tons.

Fleet, 41 steamers; 204,411 tons.

London Office, 3 & 4, Fenchurch Street.

UNION STEAM SHIP COMPANY OF NEW ZEALAND.—This company, established in 1875, is now the most important shipping concern in the Southern Hemisphere, and testifies to the expansion of both colony and company. In 1901 the company established a four-weekly mail service from Sydney to Vancouver, and discontinued running a steamer on the San Francisco mail route. The *Aparima*, 5,700 tons, the *Moeraki*, 4,400 tons, and *Manuka*, 4,400 tons, are twin-screw steamers added recently, and *Makura*, 8,975 tons, with a speed of 14 knots; the turbine steamer *Maheno*, 5,500 tons, is 17 knots. The *Looyana*, an 18-knot turbine steamer of 1,000 tons, is in the service between Melbourne and Launceston, a distance of 276 miles; the first steamer of this kind in the Southern Hemisphere. The Company has also a four-weekly service of steamers between Wellington and Papeete (Talut) in conjunction with the Oceanic Steamship Co. of San Francisco, whose steamers run from Papeete to San Francisco.

Fleet, 64 steamers; 157,444 tons.

London Office, 34, Leadenhall Street, E.C.

DET FORENEDE DAMPSKIBS SELSKAB (The United Steamship Co.) of Copenhagen celebrated its 40th anniversary in 1906. It is the largest maritime undertaking in Denmark.

The company's far-reaching operations cover services with Russia, Germany, Norway, United Kingdom, Belgium, France, Spain, Italy, the Levant, also North and South America, 20 of the fastest steamers being fitted with refrigerating machinery for the transport of dairy produce. The Scandinavian Amerika Passenger Line is maintained between Copenhagen and New York, *via* Christiania and Christiansand, for which service 4 twin-screw steamers, each over 10,000 tons, have recently been built, with a speed of 16 knots, each with accommodation for 1,500 passengers. The largest steamer is the *United States*, 10,101 tons. One ice-breaker and salvage steamer, 14 sea-going lighters, and 7 tug-boats belong to the company (3,790 tons). In 1905 3,405,278 miles were traversed.

Fleet, 122 steamers; 150,335 tons.

London Agents, The United Shipping Co., Ltd., 108, Fenchurch Street, E.C.

ANDREW WEIR & CO. were established in 1885 by the senior partner, when the barques *Willowbank*, 862 tons, and *Francis Thorpe*, 1,343 tons, were acquired. Starting building for themselves in 1886, the size of the fleet, known as the Bank Line, grew to 43 clippers, which gradually diminished as the number of steamships increased, the first belonging to the firm being the ss. *Dunerie*, 1,878 tons, in 1896; now the ss. *Kumeric*, 7,000 tons, heads a list of 24 steamers grossing 100,640 tons. The *Cedarbank*, 2,825 tons, is the biggest of the 16 sailing ships, representing a further 32,190 tons, this being still one of the largest sailing fleets in the world. Both fleets are mostly employed in general trades. They have the following lines of steamers: New York to the Far East; New York to the River Plate; Calcutta to the River Plate; Calcutta to the West Coast of South America; Calcutta to the United States; Calcutta to Durban and South African ports; Puget Sound and British Columbia to China and Japan; and an Australian mail line from San Francisco to New Zealand and Australia. Since 1896 a regular service has been conducted between the Tees and the Forth.

Fleet, 40 vessels, steam and sail; 133,030 tons.

Head Office, 6, Lloyd's Avenue, E.C.

WHITE STAR LINE.—(See International Mercantile Marine Co.) The Oceanic Steam Navigation Company, Ltd., better known as the White Star Line, was founded in 1859 by the late Mr. T. H. Ismay. The *Oceanic* (3,807 tons, 430 feet long) sailed from Liverpool on her first voyage to New York on 2nd March, 1871. The *Britannia*, 5,004 tons, *Germania*, 5,070 tons (1874-5), *Teutonic*, 9,984 tons (1889), *Majestic*, 10,147 tons (1890), were followed by *Oceanic II.*, 17,274 tons. In August, 1899, the *Medic*, 11,935 tons, inaugurated a service from Liverpool to South African and Australian ports. In 1903 the four largest steamers of the Dominion Line were taken over and renamed, a regular service being inaugurated from Liverpool to Boston *via* Queenstown and from New York and Boston to Mediterranean ports. Early in 1907 the Wednesday Royal United States Mail service was transferred from Liverpool to Southampton. The new service was auspiciously inaugurated by the palatial new twin-screw steamer *Adriatic*, 24,541 tons. The New York mail steamers of the White Star Line now leave Southampton each Wednesday morning, call at Cherbourg the same after-

noon, and then proceed to Queenstown to take the mails on board. Homewards the steamers leave New York every Wednesday, and steam direct to Plymouth (where the mails and such passengers as so elect are landed); from thence to Cherbourg, and end the voyage at Southampton. As a consequence of this change, the White Star Line's passenger steamers from Liverpool for New York now sail each Saturday, and this service is maintained by the magnificent twin-screw steamers *Baltic*, *Cedric*, *Celtic*, and *Arabic*, the average gross register of which is over 20,000 tons. To enable American visitors to arrive at London at the earliest possible moment after touching at a British port, the White Star Line New York steamers usually called at Holyhead during the past summer and autumn and disembarked London passengers before proceeding on to Liverpool. By such means a considerable saving of time was effected. Holyhead was also made use of for the embarkation of London passengers with gratifying results, and it is likely that the call both westwards and eastwards will be continued next summer. The Boston steamers are now despatched from Liverpool on Wednesdays or Saturdays, instead of Fridays as heretofore; and in addition to the foregoing, the White Star Line also has services between Liverpool and New York (cargo and live-stock), Liverpool, South Africa, and Australia (passengers and cargo), Liverpool and Australia (cargo), Liverpool and New Zealand (cargo), New York and Mediterranean ports (passengers and cargo), Boston and Mediterranean (passengers and cargo). For the London and New Zealand passenger and cargo services, under the auspices of the Shaw, Savill & Albion Co., Ltd., the White Star Line has had built the *Athenic*, *Corinthia*, and *Ionie*, each 12,230 tons, the largest vessels in the New Zealand trade. The *Celtic II.* (20,904 tons) sailed from Liverpool for New York on her maiden voyage July 26, 1901. She has been surpassed in size by the *Cedric*, 21,035 tons, by the *Baltic*, 23,876 tons, and by the *Adriatic*, 24,541 tons. *Olympic* and *Titanic*, which in point of size will eclipse everything afloat, are building. Each will be 45,000 tons register, and will probably be propelled by a combination of turbine and reciprocating machinery. Early in 1909 the White Star Line entered the Canadian trade, maintaining a weekly service between Liverpool, Quebec, and Montreal, in conjunction with the Dominion Line. The new steamers *Laurentic*, 14,892 tons, and *Megantic*, 14,500 tons, are the largest despatched to Canada, and have been especially built for this service. They have rapidly won a favourable reputation with the travelling public, and the venture has proved a pronounced success. The *Laurentic* is a triple-screw steamer, propelled by a combination of turbine and reciprocating machinery, and the

Megantic is twin-screw propelled by reciprocating machinery alone. All the services are maintained entirely with twin-screw steamers (except the *Laurentic*, which is triple-screw), and the average size of the White Star steamers is the largest in the world (13,000 tons per steamer), including some of the largest cargo and live-stock carriers in existence.

WILSON LINE.—Founded at Hull about 1835 and converted into a private Company in 1891 (Thos. Wilson, Sons & Co., Limited). The Company is now the largest private shipowning company in the world, and has continued its many trades with increasing energy and success. The fleet usually consists of 90 to 100 steamers, varying by the exclusion of old, and addition of modern and up-to-date tonnage. The home trades, Hamburg, Antwerp, Ghent and Dunkirk are worked by the Wilsons and North-Eastern Railway Shipping Company, Limited. The Swedish, Norwegian, Baltic, Mediterranean, Black Sea, and Indian trades, by Messrs. Wilson's vessels, with weekly communication from Hull to Gothenburg, Stockholm, Copenhagen, Christiansand, Christiania, Stavanger, Bergen, Drontheim, St. Petersburg, Reval and Riga by first class passenger steamers (some of them fitted with the Marconi wireless telegraphic apparatus). To Danzig weekly; to Sicily and the Adriatic fortnightly; Marseilles, Genoa, Leghorn and Naples, fortnightly; to Alexandria fortnightly; and to Bombay and Karachi fortnightly. Three large new steamers, the *Hidalgo*, *Rinaldo*, and *Basano*, have recently been acquired for the Bombay and Karachi trades to supplement the steamers already running. To Boston and New York weekly; to Australia, by Messrs. Milburn & Co.'s steamers, monthly. To and from Jersey almost daily during the potato season. From Valencia and the Spanish coast weekly during the fruit season. The expensively equipped passenger steamer *Arao* was added to the Norwegian service in 1909.

Fleet, 95 steamers; 190,885 tons.

London Agents, The United Shipping Co., Ltd., 108, Fenchurch Street, E.C.

WILLIAM ARTHUR PHILPOTT.

Bankers.

LLOYDS BANK LIMITED, 72, LOMBARD STREET, E.C.

Offices.

I, FREDERICK'S PLACE, OLD JEWRY, E.C.

This Trust was established in 1893 to acquire Freehold and Long Leasehold Shop Properties solely for investment purposes. Properties of a speculative nature are studiously avoided.

The Capital is divided into "A" and "B" Shares.

The "A" Shares are fully subscribed and paid up.

The "B" Shares carry a cumulative dividend of 5 per cent. per annum, and are issued as required. Only fully-paid Shares are issued, so that they involve no liability.

Both classes rank equally for priority as to Capital and Dividends.

All Dividends have been regularly and fully paid since establishment.

The present Rental Income, arising from lettings on full repairing Leases, exceeds £23,800 per annum, more than half of which is derived from freeholds.

The growth of the Trust is shown by the following Statement :—

Year.	Investments at Cost.	Annual Rent Roll.	Reserve Fund.	Subscribed Capital.
	£	£	£	£
1893	3,074	220	27	1,050
1896	43,280	3,321	275	12,860
1899	118,112	8,571	930	41,945
1902	200,964	13,375	1,976	69,610
1905	296,948	19,094	3,148	107,280
1909	377,550	23,848	5,000	128,760

The Reserve Fund is invested in Consols.

A copy of the 17th Annual Report and Balance Sheet, giving full details of all investments, can be obtained on application.

EDWARD WELSH, *Secretary.*

HATCH, MANSFIELD & CO. LTD

WINE MERCHANTS.

Telegraphic Address:
"LUSCIOUS, LONDON."

Telephone No:
GERRARD, 5325.

By special appointment to His Majesty King Edward VII.
47, PALL MALL, LONDON, S.W.

DIRECTORS:

SIR ERNEST F. G. HATCH, Bart., <i>Chairman.</i>	
EARL OF DENBIGH.	A. ROSS MITCHELL, Esq.
Hon. J. MANSFIELD.	C. W. HUGHES, Esq.
J. H. G. LANG, Esq.	C. G. RAYNE, Esq.
(Bell, Rannie & Co.)	(Newcastle-on-Tyne).

HOME DEPARTMENT.

THE extent of the Company's business has been largely augmented by the purchase of those of

BELL, RANNIE & CO. (Established 1715),
LONDON, EDINBURGH, PERTH, DUNDEE & AYR.

BARTON & CO. (Established over 100 years),
Late of St. James's Street, LONDON, S.W.

C. G. RAYNE & CO. (Established 1868),
NEWCASTLE-ON-TYNE.

DREMEL & CO. (Established 1858), LONDON.

JENNER & CO. (Established 1837), SANDGATE (Kent).

TATHAM, HUGHES & EARLE (Established 1820),
24, Philpot Lane, LONDON, E.C.

The extensive stocks of the Company, together with those of the above Firms—which were taken over *en bloc*—afford a selection of Wines and Spirits which, whether in point of quality or quantity, is not to be surpassed.

THE Company is also represented by the following Branches:

MANCHESTER...16, Albert Square.

LIVERPOOL...16, Berey's Buildings,
George St.

The Company's quotations are the lowest anywhere obtainable.

The Company pays carriage to any railway station in Great Britain, to any port in Ireland, and on quantities of 23 dozen bottles or their equivalent to any port in the world.

The Company only deals in wines of approved vintages.

The Company publishes the fullest particulars of every wine and spirit they quote, and affords every possible guarantee for authenticity.

HATCH, MANSFIELD & CO. LTD

WINE MERCHANTS.

AGENCIES ABROAD.

TO meet the requirements of Englishmen resident abroad the Company has adopted the policy of establishing a series of agencies throughout the world, whereby customers may obtain in either the smallest or largest quantities the identical Wines and Spirits supplied to leading Families and Clubs in England, and at the same time have the benefit of all the guarantees for quality and authenticity which the system of the Company affords.

The following are the Company's Agencies Abroad:—

INDIA	BOMBAY	Greaves, Cotton & Co.	
	CALCUTTA	A. O. Ginivan.	
	MADRAS	Oakes & Co.	
	ADEN	Pallonjee, Dinshaw & Co.

STANDARD ENGLISH DICTIONARIES.

Large fcap. 4to, cloth, 4s. 6d. net; half-Persian, 7s. 6d. net.; half-morocco, flexible, 9s. net.

THE STUDENT'S ENGLISH DICTIONARY.

Literary, Scientific, Etymological and Pronouncing. By JOHN OGILVIE, LL.D. New Edition, thoroughly Revised and Greatly Augmented. Edited by CHARLES ANNANDALE, M.A., LL.D., Editor of the New Edition of "The Imperial Dictionary." Extensive and useful Appendices. Nearly 800 Engravings on Wood.

"Leaving out of account the unwieldy and expensive recent editions of Webster and Worcester, we have no hesitation in saying that this is by far the most useful one-volume English dictionary at present existing."—*Athenaeum*.

In one Vol., fcap. 4to, cloth, 3s. 6d.; half-roxburgh, 5s. 6d.; half-morocco, 7s. 6d.

THE CONCISE DICTIONARY OF THE ENGLISH

LANGUAGE. Etymological and Pronouncing, Literary, Scientific and Technical. By CHARLES ANNANDALE, M.A., LL.D. New Edition, Revised and Extended.

"Stands towards other dictionaries of the smaller character in the relation of the 'Imperial' to rival lexicons—in other words, it holds the 'premier' place."—*Spectator*.

In Four Vols., imperial 8vo, half-roxburgh, £1 net; or half-morocco, £5 net.

THE IMPERIAL DICTIONARY OF THE ENGLISH

LANGUAGE. A Complete Encyclopaedic Lexicon, Literary, Etymological, Scientific, Technological and Pronouncing. By JOHN OGILVIE, LL.D. New Edition, carefully Revised and greatly Augmented. Edited by CHARLES ANNANDALE, M.A., LL.D. Illustrated by above 300 Engravings on Wood.

"So far as vocabulary and treatment are concerned, we should not wish for anything better than the new 'Imperial.' The etymology is clear and concise, and the illustrations are copious, appropriate, and well executed."—*Times*.

HAYDN'S DICTIONARY OF DATES AND UNIVERSAL INFORMATION.

Twenty-fourth Edition.

For more than Sixty Years HAYDN'S DATES has been firmly established in public favour as a book which is indispensable in every office, library, and home, and as a Work which has no rival.

The SPECTATOR: "Haydn's Dictionary is so complete, was so carefully constructed at first, and has been so well kept up to date, that a little self-assertion is justified."

The DAILY MAIL: "Nowhere else in the world is to be found a work so universal and up-to-date."

HAYDN'S DATES IS INDISPENSABLE TO EVERYONE.

EDUCATION.**MESSRS. GABBITAS, THRING & CO.,****36, Sackville Street, Piccadilly, W.,**

have a Department specially organised for advising Parents and Guardians as to the best Educational Establishments for Boys and Girls in the United Kingdom or on the Continent. The Firm have had experience as Educational Agents for more than thirty years, and can give information and advice as to: (1) Public and Endowed Schools; (2) Preparatory Schools; (3) Schools or Tutors' Establishments adapted specially for preparing Boys for Engineering, Agricultural, Scientific, or Commercial Careers; (4) Private Tutors preparing for Army, Civil Service, and University Examinations, or receiving backward or delicate Pupils requiring special attention; (5) Finishing Schools; (6) Schools for younger Girls; (7) Girls' Schools giving a thorough general education and preparing for Examinations; (8) Professors, Pasteurs, and Private Families receiving Pupils wishing to study abroad. To enable the Firm to advise efficiently it is necessary that *full particulars should be given*; especially as to the age of the Pupil, previous education, and present standard of attainments, special subjects of study, locality, whether a large or small establishment is preferred, and the fees it is intended to pay.

The Firm also can assist in procuring the services of Private Tutors, Resident, Travelling, Non-Resident, or Visiting, of whom they always have a large number on their Lists.

Transfers of and Partnerships in Boys' and Girls' Schools are also negotiated by the Firm. The Firm during their long career have been instrumental in sending Masters and Tutors to the leading Schools and Tutors' Establishments, and are in the closest touch with all Educational matters. Masters and Tutors seeking Posts can have a Prospectus on application, free of charge.

WHITAKER'S SCHEDULE REGISTERS

OF

BOYS' AND GIRLS' SCHOOLS.

Whitaker's system of Schedule Registers has been established in order to enable Parents and Guardians, in search of a suitable school, to ascertain all those particulars which cannot be contained in an advertisement in Whitaker's publications except at too great expense to the Principals.

Two pages in each Register are allotted to every School. The Schedules are most comprehensive, and the particulars are classified under five headings, viz., *General Information, School Buildings, Education, Special Features, and Domestic Arrangements.*

Only one form of Schedule is used, consequently all essential points can be obtained at a glance from the Register more quickly and easily than by reading through the ordinary prospectuses. Schedules are supplied free to advertisers to be type-written by them.

See page 822.

METROPOLITAN SECTION.

CLISSOLD PARK, N.

Occupies an elevated healthy position, with numerous parks and open spaces, contributing to make it a first-class residential neighbourhood.

BOYS.

Established 1876.

MODERN SCHOOL. PARADISE HOUSE.

Principal - T. S. WHITE, B.A.

To develop healthy, moral tone, providing PROFESSIONAL AND COMMERCIAL EDUCATION on sound liberal lines.

Curriculum.—Includes usual English subjects; Modern Languages (conversational); Mathematics; Science (Laboratory); Carpentering; Typewriting. *Physical Development.*—Football, Cricket, Fencing, Riding, Fives, Regular Drill, Gymnasium, Plunge Bath. Country excursions for Natural History. Debating and Public Speaking developed.

Domestic arrangements under personal supervision of Mrs. White.

CROUCH HILL, N.

Middlesex, occupies an elevated position on a range of hills which stretch northward towards Highgate and Barnet. The locality enjoys a fine record for salubrity, officially mentioned as one of the Health Resorts within the County of London.

GIRLS.

DURHAM HOUSE,

102, CROUCH HILL.

HIGH SCHOOL FOR GIRLS.

Principals - Miss THOMPSON, B.A. (Lond).

Specially arranged to combine the most modern educational requirements with comfort and refinements of home life.

Spacious, well-ventilated rooms, and special care paid to sanitation. Large Garden. Tennis and Recreation Ground. Healthy, picturesque neighbourhood.

Aim of the School:—Preparation for life by harmonious development of Moral, Intellectual, and Physical Powers.

SPECIAL ATTENTION TO HEALTH AND PHYSICAL DEVELOPMENT. BOARDERS RECEIVED.

EALING, N.W.

Supplied with all essentials for a healthy residence; gravel soil, moderate elevation, good water, drainage, and lighting facilities.

GIRLS.

SCHOOL FOR THE DEAF, EATON RISE, EALING, MIDDLESEX.

On the PURE ORAL SYSTEM, *i.e.*, LIPREADING and SPEAKING.

Religious teaching, lessons, and games carried out on that system, the children communicating with one another and with other people by speech. The instruction approximates as nearly as possible to that of hearing children.

Deaf children (girls only) received as Boarders or Day Pupils.

Pleasant, healthy locality. Good garden. Every care. Apply Principal.

HIGHBURY PARK, N.

The Medical Officer of Health writes:—"Highbury has an exceptionally low death-rate for an urban district. It is situated on rising ground, and close to the fine Clissold Park. It is a very healthy district."

BOYS.

HIGHBURY PARK SCHOOL,

43 and 45, HIGHBURY PARK, N.

Principal - W. A. INGRAM (L.A.).

Special Feature.—Recommended by the Electrical Standardizing Institution, Southampton Row, W.C. Their 60 guineas Scholarship gained 1907. *General Aim.*—Provides varied, useful Education. PROFESSIONAL OR COMMERCIAL. All Examinations taken.

Curriculum.—Languages (conversational), Practical Arithmetic, Book-keeping, Shorthand, Correspondence, Sciences (Practical Laboratory), Latin, Greek, Drill. *Playground.*—Fives Court, Gymnasium, Cricket, Football, Swimming, Rifle Clubs. *Preparatory Department.*—For little and backward boys.

HIGHGATE, N.

The Medical Officer of Health writes:—"A residential suburb, $\frac{1}{4}$ miles N.N.W. of London. Average altitude is nearly 400 ft. above sea-level. District particularly healthy; the mortality and incidence of disease being among the lowest in the country. Exceptionally well provided with open spaces, being on the borders of Hampstead Heath, and containing the Highgate Wood, Queen's Wood, and an 18-hole golf course. Within easy access of London."

BOYS.

GROVE HOUSE SCHOOL

BOYS' BOARDING AND DAY SCHOOL.

(Established 1825.)

Principal—A. E. C. DICKINSON, M.A., LL.D.

Registered under Order-in-Council, 1902.

Principal - - - Miss CHIGNELL.

Assisted by large Staff of highly-qualified English and Foreign Resident Mistresses and London Professors.

Daughters of Gentlemen. Thoroughly sound Education, careful Moral and Social Training. Preparation principal Examinations. Over-pressure avoided.

Specialities—Modern Languages, Music, Drawing, Painting, Nature Study.

Situated on high ground on the southern slope of a hill (London, 9 miles).

Large Gardens, Field, Bicycling, Tennis, Swimming, Gymnastics (remedial work when desired).

THE EDUCATIONAL SUPPLEMENT.

WHITAKER'S LIST OF SCHOOLS AND CLIMATES (SEASIDE AND INLAND).

In the selection of a SCHOOL, the climate to meet individual requirements is often of primary importance to Parents and Guardians, and Educational facilities must generally be considered when deciding upon a locality for residential purposes. A decision is difficult where so many districts in England, Scotland, Ireland, and Wales have evenly balanced claims and diversity of advantages. Many places are noted for the number, variety, and excellence of the PRIVATE COLLEGES and SCHOOLS which flourish under favourable hygienic conditions, but isolated efforts of individuals to draw attention to the special advantages of their local surroundings having proved disappointing, Whitaker's List of Schools and Climates (Seaside and Inland) was established, and now constitutes the special educational supplement to "Whitaker's Almanack."

Entire charge where parents abroad.

ASHFORD.

Ashford, in Kent, has a dry, bracing climate. Rainfall, low; prevailing winds, W. and S.W. Educational facilities splendid, there being the Ashford Grammar School, Ashford County School, and Ashford School for Higher Education.

BOYS.

**THE GRAMMAR SCHOOL,
ASHFORD (KENT).**

Founded 1635. Re-constituted and removed 1879.

MODERN EDUCATION for BUSINESS, PROFESSIONS, and MATRICULATION at Universities, under supervision and inspection of Board of Education. Lofty, well-lighted Classrooms. Excellent Laboratories, Gymnasium, and Workshop. New buildings, standing high on gravelly soil and surrounded by open country. Bracing air. School Games carefully organised. Playing Fields, 5 acres. Domestic arrangements under Headmaster's wife and Matron.

Headmaster—

A. SYDNEY LAMPREY, B.A. (Cantab.)

ASSTEAD.

A healthy, elevated Surrey village and rural residential district between Epsom and Leatherhead, 16 miles from London. Ashtead Woods, once a Saxon forest, are common lands. Surroundings are similar to Leatherhead, 2 miles.

GIRLS.

PARSONS MEAD.

Principal - - - Miss ELLISTON,

Assisted by competent Mistresses and
Visiting Professors.

HOME SCHOOL FOR DAUGHTERS OF GENTLEMEN

To prepare girls for HOME LIFE; cultivate interest in Literature, Music, Art; to play games energetically without losing interest in quiet, useful occupations.

School Course.—Comprehensive, embracing all usual subjects for modern education.

Healthily situated in own grounds (6 acres), Hockey Field, Tennis and Croquet Lawns, Riding, Swimming. PERFECT SANITATION.

Kindly recommended by Dr. Eustace Smith.

BANSTEAD.

A healthy Surrey village with beautiful Downs, &c., 17 miles from London, 500 ft. above sea-level. Climate dry and bracing. Soil porous—chalk and gravel. Prevailing winds, S.W. Low death rate.

GIRLS.

**GARRATTS HALL,
BANSTEAD, SURREY.**

Principal - Mrs. HORACE ADDISON DAVIES.

For young gentlewomen of good social position, from all parts of the Empire and Foreign Countries.

Aim.—To instil highest principles of true womanhood; train girls to become Home-makers.

Education.—Cultured, on Modern lines. Large staff Resident Specialists. Music, Art (studio), Languages, Literature.

Recreation.—All games; Golf; Riding (own stables), Driving, Cycling, Hunting.

Premises.—Fine mansion in grounds of 45 acres; 550 ft. elevation; Sanitation certified.

BASINGSTOKE.

Is 240 ft. above sea-level, and one of the most bracing places in Hampshire. Has exceptionally good water supply and sewerage. Good train service; two packs of hounds; an excellent cricket ground; golf links.

GIRLS.

Established 1896.

GREENBANK HOUSE.

Principal - - - Mrs. RUTH SMITH.
Assisted by Certificated Governesses and Visiting
Masters.

Modern Education.—Thorough preparation for Home and Business life. *Specialities*.—Music, Drawing, Painting. *Examinations*.—Cambridge Locals and Musical. Passed all candidates entered. *Modern Premises*.—Detached, well ventilated. Sanitation good. S.W. aspect. Large garden. Isolation ward. Library, Croquet. Tennis. Little boys (5-10) received. Domestic arrangements under Principal's supervision. Special provision for delicate, backward pupils.

Entire Charge, Parents Abroad.

BEN RHYDDING.

A salubrious health resort in the West Riding of Yorkshire, almost adjoining Ilkley. Fine scenery, moorland expanse, bracing mountain air, exceptionally pure water supply. Golf and hydropathy. 16 miles from Leeds; 210 miles from London. Mid., G.N., and N.E. Rlys.

**CLEVEDON HOUSE SCHOOL.
WHARFEDALE GRANGE.**

Principals - { E. W. STOKOE, M.A.
S. KENNINGTON, M.A.

PREPARATORY FOR BOYS 7-14 FOR PUBLIC
SCHOOLS AND ROYAL NAVY.

Delicate Boys receive special attention. Entire charge taken of those whose parents are abroad.

PREMISES—High position; dry soil; extensive, well-timbered grounds.

Spacious Class-Rooms and Dormitories. House heated throughout. New Wing just added.

Sanitary arrangements and Water Supply excellent.

Cricket and Football Field. Tennis Courts. Large open-air Swimming Bath. Miniature Rifle Range. Private Golf Links.

BATH.

The Medical Officer of Health writes:—"Bath City and County Borough. Health resort. Somerset. Pop. 50,000. Only Hot Springs in British Isles. 'Most perfectly equipped modern bathing establishments in Europe.' Extensive Roman remains. Subsoils, freestones, clay, sand, and gravel. Elevation, 60 to 750 ft. Climate: where sheltered, similar to southern marine climates; where exposed, good range of temperature and bracing winds. Sunshine (1908), 1,740 hrs. and rainfall, 24.13 ins. Water supply, pure and abundant springs."

Bath stands alone in Great Britain as a City of considerable size, and much reputation, the beginnings of which have been determined by the existence of Thermal Springs. Traditions assert that the first discovery of the Spring and acquaintance with their healing virtues was made in primitive times before the advent of the Romans.—Vide: *Climate and Baths of Great Britain and Ireland* (see p. 855).

GIRLS.

GROSVENOR COLLEGE.

Principal - Mrs. LOCK.

School Course includes Religious Instruction, French, Natural Science, Class Singing, Needlework and usual English Subjects, Lectures for Advanced Pupils, Shorthand and Typewriting, Domestic Economy, Cooking.

BEXHILL-ON-SEA.

Sunshine, 1908: Bexhill, 1,880 hours; London, 1,305 hours.

The Medical Officer of Health writes:—"Bexhill has always been celebrated for the longevity of its inhabitants. The death rate for 1907 here was only 7'93. The town holds a first place among health resorts, owing to the general salubrity of the climate; genial influences of invigorating breezes and brilliant sunshine; perfect drainage; the purity of its water; and its freedom from epidemics. The sea-bathing is excellent. Residence at Bexhill is very beneficial in anæmia, scrofula, and tuberculous complaints, and in diseases of the respiratory organs, which may be sent here with advantage during the greater part of the year. Especially suitable for convalescents and delicate children" (see p. 856).

Area of Borough	8,013 acres
Rateable value	£118,036
Population	16,126
Inhabited houses	2,932
Mean annual temperature	50° F.
Hours of bright sunshine	1,880 hrs.
Total rainfall	23'89 in.

Premises. — In 8 acres of ground. Carpenters' Shop, Drilling, Gymnastics, Sports.

FEES: 30 To 60 GUINEAS.

BRIGHTON.

The Medical Officer of Health writes:—"Brighton has the bracing qualities of places on the East Coast with a larger amount of sunshine and more shelter during unfavourable weather. Its rainfall is moderate; the roads dry rapidly after rain. The sunshine is 18 per cent. in excess of that of London, and the superiority is especially great in winter. Brighton is 7 per cent. warmer in winter and 10 per cent. cooler in summer than London. It has an unlimited pure water supply and perfect sanitary arrangements."

Brighton combines with the advantages of a seaside position some of the peculiarities of a large town, and extending as it does some distance inland, it presents great varieties in the individual aspect, in the altitude, and in the distance from the sea of particular sites. It may be almost divided into three towns, viz., Kemp Town at the east, Hove at the west (see Hove, page 831), and Central Brighton. Brighton is favoured in the possession of an aspect south and south-west, and with the advantages arising from the slope of the chalk downs and the open valley dividing the latter. The Brighton sky is famed for its clearness and brightness, and the air for its bracing quality. Sunshine (1908), 1,925 hours. Pop. 123,478 (census 1901). L. B. & S. C. Rly. (see p. 858).

BOYS. BRIGHTON COLLEGE.

The MISSES PIPSON receive a limited number of Young Ladies to enjoy advantages of THOROUGH education with the comforts of a HOME.

Visiting Masters and Resident Certificated French Governesses.

Pupils prepared, if desired, for the Oxford and Cambridge Exams., and the Music Exams. of Associated Board of R.A.M.—R.C.M.

Fees: Resident pupils, inclusive, £60 a year.

Prospectus and references on application.

BRECON.

The Medical Officer of Health writes:—"The climate of Brecon is distinctly bracing, with an average rainfall. The sanitation is good and the water supply pure and abundant. Death rate, 1908, 14.1 per thousand."

GIRLS.**BOUGHROOD HOUSE SCHOOL.**

Principal - Miss CONSTANCE GARLICK.

The Misses Garlick, assisted by Resident and Visiting Mistresses.

Thorough modern English Education, Painting, Singing, Games, &c.

Entire charge taken of children whose parents are abroad.

Prospectus on application.

BURNHAM.

Burnham (Somerset), on the east side of Bridgewater Bay, $7\frac{1}{2}$ miles N. of Bridgewater, occupies a very healthy situation amidst fine coast scenery, with a dry sandy soil and excellent water supply. The climate of this part of the Bristol Channel possesses special recuperative properties, and is beneficial to pupils of delicate constitution, who generally show a marked improvement in health. The late Ven. Archdeacon Denison, in describing its attractions, said that it was the "healthiest place in the world" (see p. 853).

BOYS.**ST. DUNSTAN'S SCHOOL,**

Headmaster: K. H. BIRD, M.A. (Camb.).

Boys from 6 to 14 prepared for Public Schools and Royal Navy. Thorough grounding in all subjects, with special attention to the modern side of education. Very young boys under a Lady. Nature Study and Science encouraged.

Physical Culture, Military Drill, Miniature Rifle Range.

School noted for care of delicate children.

Entire charge taken of Indian and Colonial Boys.

GIRLS.**GARDENHURST.**

FOR THE DAUGHTERS OF GENTLEMEN.

Principals - - The Misses HAINS.

Assisted by Resident English, French, and German Governesses, &c.

General Course of Instruction includes English, Latin, Mathematics, French, German, Science, Physical Culture, Class Singing, and Plain Sewing.

Numerous special optional subjects.

Training and instruction on most modern principles; aptitude and capability of each pupil studied. *Premises.* - Modern, specially built, in own grounds. Tennis, Croquet, Hockey, Cricket, Archery.

Special care given to, and entire charge taken of Colonial, &c., Pupils.

CHELTENHAM.

The Medical Officer of Health writes:—"The climate of Cheltenham is similar to the rest of West Central England, being mild with a moderate rainfall, humidity, and degree of bright sunshine. Bronchitis and catarrhal diseases generally are well suited here, whilst acute rheumatism is rare. Children of school age and elderly people do remarkably well. Within a mile of the Borough boundary the Cotswold Hills rise to an altitude of 1,000 feet, and these bracing heights are accessible by tramcars." Sunshine (1908), 1,591 hrs. (see p. 860).

BOYS.**BRANDON HOUSE.**

Mr. F. R. GURNEY, B.A. Oxford.

Assisted by a first-rate Staff of University men.

Gentlemen's Sons received (7-14) to prepare for Public Schools and Navy.

Situation.—Healthiest part, in own grounds. Large Playing Field. Electric Light. Sanitary certificate renewed annually.

All Games; Gymnasium (very fine). Carpenters' Shop; Swimming; Boxing; Fencing.

May, 1909. Mathematics Scholarship at Cheltenham College, £40.

April, 1909. Two Naval Cadetships at Osborne.

July, 1909. Musical Scholarship at Radley, £30.

Special Terms for Sons of Officers.

GIRLS.**ECKINGTON HOUSE, LANDSDOWNE.**

HOME SCHOOL FOR THE DAUGHTERS OF GENTLEMEN.

Principals - - The Misses CHAMBERS.

Assisted by Certificated English, French, and Music Governesses and Visiting Professors.

Pupils prepared (if desired) for University Locals and Royal Academy Music Examinations.

Large detached house. South aspect. On high ground. A few minutes' walk from the town. Good Garden and Playing Field. Tennis, Croquet, Hockey, Riding, Swimming.

The Misses Chambers offer ANGLO-INDIAN and COLONIAL children a happy refined HOME with every care. Moderate Fees. Highest references to parents of pupils.

BUXTON.

The Medical Officer of Health writes:—"Buxton is famous for its magnificent scenery, baths, &c.; in centre of Peak district, 1,000 ft. above sea-level—the highest in England—and nowhere is the air purer or more bracing. Water supply exceedingly good and soft. Epidemics are unknown. Prevailing winds, west and south-west. Buxton has a drier atmosphere than the great majority of other resorts; difficult to find a more healthy place or one more suitable for growing boys and girls." Sunshine (1908), 1,268 hrs. (see p. 859).

BOYS.**PARK HOLM.**

Mr. T. A. LACE, M.A. (Cantab),

Receives into his house twelve Pupils to be prepared for the Army, Universities, and all Public Examinations.

Four experienced Resident Tutors (University honours).

Careful attention is given to the outdoor life of the Pupils.

Games.—Cricket, Hockey, Golf, Tennis.

GIRLS.**"MARLBOROUGH" RESIDENTIAL COLLEGE FOR GIRLS**

(BOARDERS ONLY),

CHISLEHURST,

Kent, distant twelve miles from London. Enjoys the charm of still retaining its rural character, interpersed with spreading commons, carefully preserved in all their native wildness, which furnish delightful walks and rides. The climate is very healthy, the soil chalk and gravel. The neighbourhood, too, is rich in historic associations, Chislehurst being the home of the Walsinghams, of the antiquarian Camden, and of the last of the Napoleonic Emperors. Camden House, once the ex-Imperial residence, is now converted into the headquarters of the Golf Club, which generously places some of the large rooms at the disposal of the public for the purposes of concerts, lectures, and other entertainments.

GIRLS.

Established 1871.

COED-BEL.

FOR DAUGHTERS OF GENTLEMEN.

Principal - - Miss HAMILTON FOX.

9 Resident Mistresses.

School Course—Religious Instruction, usual English Studies, Mathematics, Science, Languages, Class-singing, Drawing, Physical Exercises, Church of England. Optional: Music, Painting, Dancing, Elocution, Drilling, Gymnastics, Handicrafts, Dressmaking, Riding.

Premises—Modern, Electric Light, S. aspect, gravel soil, Bedrooms (30) cubicle system; Grounds of 4 acres, and Playing Field, Tennis Courts, Croquet, Cricket, Library, Gardening. *Special attention Health, Hygiene, Sanitation.*

GIRLS.

**TUDOR HALL SCHOOL,
CHISLEHURST, KENT**

(Formerly for over 50 years at Forest Hill, S.E.)

Principal—Miss MARGARET WORTERS.

Advanced Modern Education for Girls of good social position. BOARDERS ONLY.

London Professors attend daily. Special feature made of Weekly Lectures in English, French, and German. Large Resident Staff, including Certificated Gymnastic Mistress and Trained Nurse as Matron.

Entire charge taken of Pupils.

House stands in park of over 100 acres, in which all games are played. Aspect, south; gravel soil; elevation, 350 feet.

Fees from 120 guineas per annum.

BOYS.

**ST. HUGH'S SCHOOL,
CHISLEHURST.**

PREPARATORY FOR OSBORNE AND
PUBLIC SCHOOLS.

Principals—

Rev. J. F. JOHNSON, M.A. (Oxon.)

Mr. A. S. JOHNSON, M.A. (Cantab.)

Specialities—

French, by Phonetic Method. Sound Education.
 Good Food. Sufficient Recreation.

Terms and References on application to—
 Rev. J. F. Johnson.

CLIFTON (BRISTOL).

The Medical Officer of Health writes:—"Pop. 44,573. Educational centre and health resort. Situated on carboniferous limestone hills. Open Downs of 442 acres at elevation of 300 ft., commanding views of Bristol Channel. Climate equable and bracing. The mean temperature during the winter is rather lower than the south coast, but in March and April somewhat higher. The rainfall is not excessive, and does not differ much from that of the south coast. Water supply pure and constant" (see pp. 853, 858).

GIRLS.

ROYAL PARK HOUSE.

SCHOOL FOR GIRLS AND KINDERGARTEN
TRAINING COLLEGE.

Principal - Miss BLANCHE WORKMAN
(B.A. London).

House pleasantly situated near the Downs, with Gardens and Tennis Lawn; commands sunny aspect. Ventilation and drainage perfect. Few strict rules enforced—purpose being to make the life as homelike as possible. Health record excellent. Every care and home comfort. Sound modern education. Entire charge of children from India and Colonies. Pupils from 7 to 19 years old.

BOYS.

COLCHESTER HOUSE,

CLIFTON PARK.

Headmaster - A. C. DOUGLAS, M.A.
(Charterhouse and Oxford).

Boys from the age of 7 are prepared and trained for the Public Schools and Osborne. Headmaster's Wife looks after the health and comfort of the Boys with the assistance of a Lady Matron.

Drill and Gymnastics are taught by a Swedish Instructor.

Children of parents living abroad are taken for the holidays.

Governess for quite small boys.

CLACTON-ON-SEA.

Pop. 7,453. G.E. Ry. Faces nearly due south; is protected by cliffs and built upon a gravel subsoil. The air is bright, clear, and bracing, and much brilliant sunshine is experienced. Fogs are very rare at Clacton, and rainfall small. The prevailing wind is from the south-west. The chief peculiarity is its dryness, due to small rainfall, porous nature of the soil, and well-made roadways. Clacton-on-Sea is especially suitable to chest cases which require a bracing climate. Water and drainage excellent. Analysis of water made every month. Sunshine, 1908, 1,733 6 hrs. (see p. 860).

GIRLS. OXFORD COLLEGE.

Principals - - - The Misses MUIR.
Assisted by Certificated (English, Foreign)
Resident and Visiting Teachers.

HIGH-CLASS SCHOOL FOR GIRLS.

Preparation all Public & Musical Examinations.

Premises.—Large, detached, modern (30 rooms).
Sanitation perfect. Separate beds. Unlimited
diet. Home comforts.

On Cliff, facing Sea; south aspect.

Hockey, Tennis, Cricket, Gymnastics, Cycling,
Swimming.

Entire charge where parents abroad.

GIRLS.**HIGH SCHOOL FOR GIRLS,
SOUTHLIFF.**

Headmistress - Miss F. M. SMITH.
Highly-qualified Staff.

BOARDING AND DAY SCHOOL. KINDERGARTEN.
Aim.—Thorough development of Mental and
Physical Powers and training of Character. *Curriculum.*—Usual subjects preparatory for Public
Examinations (London Matriculation, Cambridge
Locals, Royal Academy and Royal College of
Music, Royal Drawing Society). Physical
Culture. *Premises.*—On cliffs. Close Sea. South
aspect. Spacious, well-lighted rooms. Large
garden. Library. Sanitation perfect.

Sea Bathing. Tennis. Hockey. Cricket.

Entire charge of Foreign and Colonial pupils.

COLCHESTER.

The Medical Officer of Health writes:—"Essentially a bracing place on elevated ground receiving air fresh from the sea nine miles away. Air very pure and free from mists and fogs, but cold in spring. Sunshine above the average. Rainfall low, averaging 18 inches."

BOYS**THE CEDARS,
STANWAY.**

SCHOOL FOR THE SONS OF GENTLEMEN
(Resident Pupils only).

Principals - - Mrs. and Miss MANLEY
(Assisted by Resident Governesses and
Visiting Tutors).

Situated within 1½ miles of Mark's Tey Station
(G. E. Main Line). Pupils are prepared for the
Public Schools and may remain to the age of 14
years. Home comforts. Delicate boys receive
special attention. Constant supply of Alderney
milk and butter from School dairy.

*Entire charge taken of boys whose parents
are abroad.*

COLWYN BAY (see p. 860).

The Medical Officer of Health writes:—"Colwyn Bay has become one of the most important health resorts of the north. The town is well protected from the prevailing winds and enjoys a large amount of sunshine, 1,674 hours, 1908. Climate in winter remarkably mild and equable."

GIRLS.**NANT-Y-GLYN ROAD.****PLAS-TIRION.****HIGH-CLASS FOR GIRLS.**

Principals - { Miss WHITEHOUSE, A.C.P.
Miss R. M. WHITEHOUSE.

Assisted by Resident French and English Miss-
tresses and Visiting Masters and Mistresses.

The Ordinary Course of Study includes all
usual subjects. Special attention is given to
languages. Pupils prepared for Examinations
(Oxford Local, and Associated Board of R.A.M.
and R.C.M., &c.)

Premises.—Detached. Healthily situated.
Schoolrooms, large and airy. Separate Bed-
room cubicles. Library. Garden. Tennis Lawn.
Sea Bathing.

CROYDON.

The Medical Officer of Health writes:—"Croydon owes its prosperity and progress to its being within 10 miles of London, with an excellent train service, and to various natural advantages. It is one of the largest as well as one of the healthiest towns in the country."

BOYS.**OXFORD HOUSE SCHOOL,
BIRDHURST LODGE, SOUTH CROYDON.**

Principal, ARTHUR E. P. VOULES, M.A. (Oxon.).
Vice-Principal, PERCY REYNOLDS, B.A. (Lond.).

DAY AND BOARDING SCHOOL.**PREPARATORY FOR PUBLIC SCHOOLS.**

The School has recently been removed from
Birdhurst Rise to Birdhurst Lodge, an old
family mansion standing in 4 acres of park-like
grounds, providing excellent football and cricket
grounds. Boys are admitted at 7 years of age.

Arrangements can be made for taking entire
charge of boys whose parents are abroad.

Inclusive Fees: For boarders, £20 to £35 per
term; for day boys, £4 to £10 per term.

DARTMOUTH.

Medical Officer of Health writes:—"One of the healthiest spots in England, with charming surroundings. Situated at the mouth of the river Dart, noted for its boating and fishing. Excellent water supply, sanitation perfect, and an ideal educational centre."

GIRLS.**HIGH SCHOOL FOR GIRLS,
MOUNT PLEASANT.**

Principal - Miss DAVIDSON, L.L.A.
(Registered Teacher in Col. B.).

Building situate on high ground, commanding
view of Kings Wear and Channel.

High School methods adopted. Young ladies
over school age admitted as Parlour Boarders
and trained in Housekeeping, Cookery, and
General Domestic Science. Pupils can be pre-
pared for University and other Examinations.

Swimming, Bathing, Boating, and all outdoor
exercises. Special arrangements for pupils where
parents are abroad.

DEAL (see **WALMER**, p. 845).

Kent. M.B. Pop. 11,000. S. E. & C. Ry. 84 m. from London. Location: 8 m. N.N.E. Dover. Front: 2 m. marine drive between houses and asphalted promenade on sea-wall; bandstand. Beach: Shingle. Boating; excellent sea-fishing. Sea Bathing: Not mixed; public baths. Pier: 1,100 ft.; pavilion.

The Medical Officer of Health writes:—"S.E. & C. Ry. 84 miles from London. Location, 8 miles N.N.E. Dover. Elevation little above sea level. Aspect, east. Climate, bracing, dry, breezy. Water supply from chalk wells, constant. Drainage modern. Soil, chalk, sand and clay. Beach, shingle. Excellent sea-bathing and golf (links recently added to rota of championship greens)" (see p. 861).

BOYS.**WINCHESTER HOUSE SCHOOL.***Principal—***Rev. E. H. W. LEACHMAN, B.A.,**

BOYS.**SUNNYMEAD SCHOOL,
ST. LEONARDS ROAD, UPPER DEAL.****Principal - - Mr. C. G. SKENE (Oxon.)**

Mr. SKENE having had great experience in large Preparatory and minor Public Schools, is prepared to coach boys for the PUBLIC SCHOOLS, ROYAL NAVY, or OXFORD and CAMBRIDGE LOCALS.

Thorough individual attention is given to every pupil. Special attention is paid to backward and delicate boys.

School Course embraces usual subjects. All Games, Drilling, Shooting, Photography, Gardening, Swimming, Cycling. *Entire charge taken and special provision made for Pupils from abroad.*

DEVIZES.

This bracing, health-restoring town is a municipal borough in Wiltshire. Pop. 6,500. 8½ m. from London, G.W. Ry., 20 m. E.S.E. of Bath (connected by motor omnibuses and tramways), standing dry and open, 400 to 500 ft. above sea-level.

GIRLS AND BOYS.**THE COLLEGE.****GIRLS, BOYS, AND KINDERGARTEN.****Principal - - - ADA M. BENNETT.**

Assisted by a large Staff of Resident and Visiting Masters and Mistresses.

Primary Aims.—Development of individual character and reasoning powers; fitness for brunt of life rather than examination room; unforced play; health; no evening work; handicrafts for Boys, household management for GIRLS. School Library, Museum, Gymnasium. Annual public athletic sports. Special facilities for Music, Art, and Languages. Separate boarding-house for Girls adjoining College Grounds.

Entire charge of children whose parents are abroad.

Special terms for Anglo-Indians.**DONCASTER**

Has population of 31,408. Situated in centre of agricultural district, and is 75 ft. above sea-level. The climate is mild and equable. Rainfall during 1908 was 22'69 ins.

GIRLS.**GIRLS' HIGH SCHOOL,
HALL GATE.****Principal - - - Miss HARKER.**

Assisted by thoroughly qualified Teachers.

Objects—Thoroughness of instruction in essentials. Sound and liberal Education.

School Course includes, in addition to ordinary subjects, Political Economy, Literature, French, Latin, and Drill. Examinations are held and reports sent out at the end of each term.

Pupils prepared for Cambridge Local and other Examinations.

DORCHESTER,

The City of Avenues, is remarkable for its long boulevard thoroughfares. Fine trees. This once important Roman station is now a quiet, well-built, and healthy town on the Frome, 8 miles N. of Weymouth. Population, 9,458. L. & S. W. Ry. (see p. 861).

GIRLS.**ST. MICHAEL'S.****Principal - - Miss L. JENNINGS.**

Higher Education for Upper Middle-Class Girls, 4-18 years and over (Boys 4-8 received).

School Course.—Thorough English education; also French. Class-Singing. Theory of Music. Needlework. Drilling. Limited number. Home comforts. Individual care.

Special provision Delicate and Backward Girls.
Entire charge taken.

Usual Examinations prepared for. All pupils entered last three years passed. Three gained Distinctions.

Premises.—Modern. Spacious, lofty rooms. Every convenience. Sanitation certified. Garden. Playing Field. Tennis, Croquet, Hockey, &c.; Cycling. Fees, 27 to 30 guineas.

DOVER.

Dover is sunny, dry, and invigorating, enjoys a low rainfall, dry subsoil, and protection by its tall cliffs from cold winds. Aspect south, climate bracing, water supply constant, drainage modern, soil chalk; baths, swimming, &c. Sunshine, 1908, 1,832 hours.

GIRLS.

GODWYNEHURST SCHOOL,
CASTLE HILL.

Principal - Mrs. J. STANTON WISE.

Assisted by Certificated Mistresses and Masters.

Curriculum.—Includes all ordinary Subjects for EDUCATION OF GENTLEMEN'S DAUGHTERS. Pupils prepared for usual Exams.

Premises.—Modern, detached, 2½ acres grounds, high elevation, sanitation perfect; Tennis Courts, Croquet Lawn. Careful attention given Physical Exercises and Games.

GIRLS.

THE PRIORY SCHOOL,

20, FOLKESTONE ROAD.

Principals - The Misses FALLOON.

Assisted by Certificated Resident and Visiting Mistresses.

Comprehensive Modern Education for Girls from 5 to 18 years.

Preparatory for Oxford, Cambridge Locals and Preceptors. Special attention Languages.

Modern Premises.—Specially ventilated. Detached. In own grounds, S. aspect. Gymnasium, Hockey, Tennis, Cricket, Cycling, Swimming.

Domestic arrangements under Principals.

Successful with Delicate Pupils.

Little boys to 9 years received.

Entire charge Parents abroad.

EASTBOURNE—see p. 826.

EXETER.

Occupies ridge-like hill, rising from east bank of the Exe to 433 feet. Open to the south-east but otherwise sheltered. Chief climatic features, warm, soft, mild, equable, calm, and free from storms. G.W. and L. & S.W. Rlys. (see p. 864).

GIRLS.

**PENNSYLVANIA HILL,
EGERTON HOUSE.**

Principal - - - Miss GARDINER.

Aim of the School.—To supply sound and modern education, with individual attention to health and study. Careful moral and physical training.

Foreign Languages thoroughly taught, grammatically and conversationally.

School House.—Situated in own grounds in the healthiest and best part of Exeter. Large premises, with lofty and well-ventilated rooms.

Daily Drill.—Games under supervision. Tennis and Croquet Lawns.

Entire charge is taken of children whose parents reside abroad.

EDINBURGH.

For nearly 200 years the Metropolis of Scotland, apart from its historical associations, has been famous as an educational centre. Its University dates from 1582. The town is built on several hills, and the altitude of different portions varies considerably. In the matter of climate this beautiful city has been well endowed by Nature. Influenced in the matter of its bracing properties by the city's proximity to the sea. Winter temperature same as London; summer temperature lower. Sunshine (1908), 1,270 hrs. (see p. 863).

GIRLS.

CRAIGMOUNT.

The education provided by the Misses GOSSIP is that of a high-class Ladies' School. The instruction, which is thorough and on modern lines, has for special aim the mental growth and the individual progress of the pupils.

While preparation for home life rather than for a University career is the end kept in view, the course of study includes all the usual branches of an English Education. Modern languages taught by Resident Foreign Mistresses.

The School has its own Gymnasium and Swimming Bath, and its Tennis Courts are within its own grounds.

The situation is exceedingly healthy.

The tone of the School is carefully guarded.

GIRLS.

(Established for 40 years.)

**ST. BRIDE'S SCHOOL,
ETTRICK BANK.**

This School is inspected by Scotch Education Department.

Staff.—Highly qualified Specialists. *Education.*—That of a first-class High School combined with much individual attention. *Specialities.*—Modern Languages, French, Drawing, and Music.

Science Scheme forms a basis for Housewifery Course later. Swimming and all Games are coached by, and Remedial Gymnastics are given by a Resident Gymnastic Mistress. Every attention is paid to health. Entire charge taken of Indian and Colonial girls.

Principals.—

Mrs. MUIRHEAD, A.Mus., and Miss BIRD, M.A.
(of the Cambridge Training College).

EXMOUTH.

Occupies a sheltered position on the Exe, 11 miles from Exeter. It is a pretty watering-place with considerable natural attractions. The climate is remarkable for its equability—cool in summer, and comparatively warm in winter (see p. 863).

GIRLS.

SOUTHLANDS SCHOOL,

"FAIRFIELD."

Principals - - - { The Misses JESSIE and
FANNY VINTER

(Late Scholars Girton College, Cambridge,
M.A. Trin. Col., Dublin).

Assisted by a large and efficient Staff.

Thorough education for the Daughters of Gentlemen.

Large House, in its own grounds of 2½ acres. Facing the Sea. Good Playing Field and Lawn. Private Bathing-house. The Lady Matron is a trained nurse.

Full charge taken of children whose parents are abroad.

EASTBOURNE,

Sussex. Municipal Borough. Population, about 50,000. L.B. & S.C. Rly. 62 miles from London. Elevation, from sea level to 140 feet above; the districts of Mead and Upperton stand upon very high ground. Climate mild, invigorating, moderate rainfall. Bathing excellent.

The Medical Officer of Health writes: "Its advantages as a health resort are much sunshine, pure air, absence of fog, clean, quickly drying roadways, large parks and gardens with many trees, a plentiful and good water supply from wells sunk in the deep chalk, and the proximity to the breezy, health-giving South Downs. The climate is generally beneficial in anæmia, scrofula and tubercular diseases; and its effects are especially beneficial in the case of convalescent children. Death-rate 1908, inclusive, 9.9 per 1,000; of residents, 8.3. Full benefit of winter sun is secured. Warm, sunny shelter always obtainable in centre of town. Beachy Head breaks S.W. winds, and diverts much rain, dryness of soil being promoted by great porosity of chalk. More sunshine recorded than in any other place in England for two years following, 1906 and 1907, and nearly first in 1908, sunshine, 1932 hours" (see p. 862).

BOYS.

ST. BEDES.

PREPARATORY SCHOOL FOR THE PUBLIC SCHOOLS AND ROYAL NAVY.

Recognised by the Board of Education.

Headmaster - G. H. GOWRING, M.A.

Entire charge taken pupils from abroad, or during parents' absence. Fees: Tuition (£15) and Board and Laundry, £58.

FELIXSTOWE.

Population, 8,550. G.E. Railway. Aspect, south. Beach, shingle; sand as tide recedes. Excellent bathing. Felixstowe occupies a sheltered but very sunny position, the soil (red crag) ensuring a dry surface. The climate is dry, bracing, and exceptionally sunny, the amount of bright sunshine during 1908 being 1,751 hours as compared with 1,582 hours for the whole of the East of England; while the average for the last six years is 1,806 hours (see p. 854).

BOYS.

Established 1883.

EASTWARD HO COLLEGE.

Principal: B. B. THOMPSON, Inter. Arts (Lond.).

To prepare Gentlemen's Sons for Professional and Commercial Careers. Junior Department for little boys.

Situation.—On Cliffs, facing Sea.

Premises.—Light, spacious, and well-ventilated.

Physical Culture.—A special feature.

Complete charge of Colonial pupils.

Domestic Arrangements.—Under Mrs. Thompson and Matron.

COMPLETE CHARGE OF COLONIAL PUPILS.

Backward and delicate boys receive special attention.

GIRLS.

ST. JOHN'S HOUSE SCHOOL.

Principals - Mrs. and Miss WERNER, Assisted by efficient Staff, offer combination of most careful PHYSICAL TRAINING with THOROUGH MODERN EDUCATION to 20 Girls (6 to 18 years).

Entire charge when desired.

Inclusive Fees.—30 to 40 guineas per annum.

FILEY

Is a small town on the Yorkshire coast 7 miles S.E. of Scarborough, standing on a high elevation. Well drained; air pure and very bracing, excellent bathing, fishing, and golf. Six miles of level sands renders it suitable for children. Beneficial for all kinds of debility.

GIRLS.

CLARENCE HOUSE.

Principal - - - Miss McCALLUM.

Assisted by Resident English, French, and German Mistresses and Visiting Professors.

Clarence House, situated in the best part of Filey, was specially built in 1901 for the purpose of a School and has every modern convenience.

Liberal education combined with comforts and refinements of home. Every attention paid to health and moral training.

Special care given to delicate Girls.

Entire charge taken of Wards in Chancery and those whose parents are abroad.

FOLKESTONE.

The Medical Officer of Health writes:—"Aspect, S. & S.E. The town is one of the best planned seaside resorts. The comparatively very healthy and dry climate is due to the porous nature of the geological formation, and, in addition, the facilities for drainage make mists, damp and fogs almost unknown. The water supply is constant, and the water exceedingly pure. The sanitation of the town is carefully guarded, and precautions taken from time to time to maintain its efficiency. For an educational centre it is particularly adapted." Sunshine (1908), 1,787 hours.

GIRLS. MONTAGUE HOUSE, WESTBOURNE GARDENS.

Principals - - The Misses CAREY.
Resident English, German and French Mistresses. Assisted by Experienced, Highly Qualified, and 18 Visiting Professors.

THE BURSAR,
Epsom College, Epsom.

HARROGATE.

The Medical Officer of Health writes :—"Harrogate is the most important centre in Yorkshire for thoroughly equipped private secondary schools. The enterprise and educational zeal of highly qualified teachers, aided by the salubrity of the climate, have made these schools famous in every part of the United Kingdom. Harrogate is known as the 'Queen of English (Inland) Watering Places,' and is world-renowned for the medicinal properties of its waters and its magnificent baths, which are acknowledged to be the finest in Europe. The distinguishing features of the climate of Harrogate are its bracing atmosphere, low humidity, and abundant sunshine. The mortality is and always has been remarkably low. During the last 10 years the average death-rate has been 11·2. The incidence of disease amongst the resident population is low. Epidemic diseases are uncommon, and when they occur they are most frequently from imported cases. Respiratory diseases are infrequent and rheumatic fever is seldom seen. Harrogate is undoubtedly one of the best-drained towns in the kingdom. Sunshine records, average for 6 years, 1756 hours."

Harrogate, M.B. Population, 32,000. North Eastern Rly. Location, 18 miles N. of Leeds, 20 miles W. of York. Elevation, 320 feet to 600 feet above sea-level. Neighbourhood, open moorlands. Climate, bracing. Dry, clear air. Water supply, constant, soft. Drainage, modern. Soil, alluvial grit and shale. Total sunshine (1908), 1,353 hours (see p. 866).

BOYS.

HARROGATE MODERN COLLEGE.

SUCCESSFUL AND EXCLUSIVE BOARDING
SCHOOL FOR BOYS.

Magnificent situation overlooking "Stray," surrounded by pine forest.

HASTINGS—see p. 832.

HUNSTANTON-ON-SEA,

Norfolk. U.D.C. Pop., 1,893 in winter. G.E. Ry. Location on coast between Cromer and King's Lynn. Within 8 miles of Sandringham, the Norfolk residence of H.M. the King. Aspect, westerly. Soil, chalk. Beach, sand. Climate, bracing. Water, pure and plentiful.

The Medical Officer of Health writes:—"Hunstanton shares with all the East Coast watering-places a great reputation for convalescents. Apart from this, Hunstanton seems specially adapted for children. The rapidly-drying soil, the absolutely safe bathing, the magnificent sands for exercise in wet or dry weather, perfect drainage, and splendid water combine to make it an ideal place for them. The number of schools and the wonderful physical progress of weakly children bear testimony to these advantages" (see p. 866).

BOYS. THE GLEBE HOUSE.

PREPARATORY SCHOOL FOR THE PUBLIC SCHOOLS, AND FOR THE R.N. COLLEGE, OSBORNE.

Headmaster, Mr. H. CAMBRIDGE BARBER, M.A.

(late Hastings Exhibitioner of Queen's College, Oxford).

Mrs. WILSON.

Assisted by Governess (Higher Froebel Cert.).

Buildings.—Specially adapted for Co-educational School, facing Sea, overlooking private Playing Field.

Object.—Combines careful Home Training with thorough School grounding, to bridge the gap from home to school life.

Curriculum.—Gives constant variety and prevents fatigue. Importance attached to speaking and writing grammatically. Pressure systematically avoided. Inclusive Fees. NO DAY PUPILS.

HOVE.

The Medical Officer of Health writes:—"The climate of Hove is singularly dry and fresh, being open to the bare Downs on the north, and the sea on the south. There is nearly always a good breeze, which in fine weather blows off the sea by day and off the Downs at night, thus preventing any feeling of oppressive heat or intense cold. London's foggy days are generally fine and sunny at Hove. It is specially recommended for those suffering from overwork or too active life in a busy town, and as a bracing change from the damper climate of the south-west of England. The humidity of the air is as low as 50 to 60 per cent. in the summer; the ground dries rapidly after rain. Rheumatism is rare. The death returns show that almost half of the persons who die reach the age of 60, and several live to be 90."

See BRIGHTON (p. 858).

BOYS. **HOLLAND HOUSE,** CROMWELL ROAD. PREPARATORY FOR PUBLIC SCHOOLS AND NAVY.

Headmaster: W. B. C. CAWOOD, M.A.
(Keeble Coll., Oxford).

GIRLS. **ADDISCOMBE COLLEGE,** 26, WILBURY ROAD.

Principals—

Miss CADWALLADER (Ladies' Coll., Cheltenham).
Miss MARSLAND (Newnham Coll., Camb.).

Miss L. E. CADWALLADER, B.A. (Lond. Univ.).

Affords Gentlemen's Daughters high-class, modern Education. Individual physical, mental capacities studied. *Curriculum:* Comprehensive, includes Religious Knowledge (Church of England). French, German (resident Foreign Teachers). *Music.*—Highly qualified Assistants and Visiting Masters. *Orchestra.* *Premises.*—Commodious, detached. Sanitation perfect. Close to Sea, healthiest part. *Playing Field.*—Tennis, Cricket, &c. Gymnasium, Riding, Swimming, Cycling.

HOYLAKE.

The Medical Officer of Health writes:—"Situated facing the sea, at the extreme point of the Wirral Peninsula. Sub-soil sandy. Rainfall average 27 ins. Very equable temperature—Climate is excellent for convalescents, for growing boys and girls; the air is bracing and very pure." Sunshine, 1903, 1,562 hours.

BOYS. **KINGSMEAD SCHOOL**

Principal - - A. T. WATTS, M.A., B.Sc.
Assisted by J. H. WATTS, B.A., H. WATTS, M.A., and others.

Private Boarding School. Limited number Day Boys received.

The training develops an intelligent sound mental conception, and manly Christian character.

Curriculum.—Scripture, Latin, Conversational French, Mathematics, Elementary Science, Greek, German, and all usual English Subjects. Usual Examinations prepared for.

Situation.—On Sea Coast. School House in own Grounds. Playing Field, 5½ acres. Football, &c. Sea Bathing. Drill.

Household arrangements under Lady-Matron.

HASTINGS.

Mild winter climate. Compares favourably with many southern Continental resorts. Summer here is cool, to the surprise of strangers, who expect the contrary. Aspect, temperature, soil and sky combine to make Hastings a home of safety and comfort for weakened constitutions desirous of avoiding severe weather. Climate decidedly conducive to recovery from attacks of bronchitis and catarrh; many cases of phthisis do well on the breezy heights all the year round. Sunshine, 1908, 1,887 hours (see pp. 841, 877).

GIRLS.

BRAYBROOKE COLLEGE FOR GIRLS.

Recognised by Board of Education.

Pupils prepared, if desired, for Public Examinations. English, French, Mathematics, Science, Drawing, Drill. Senior and Junior Classes.

GIRLS.

WELLINGTON COLLEGE, 3 and 4, WELLINGTON SQUARE and CASTLE HILL ROAD, HASTINGS.

Headmistress—Miss HELEN BATHGATE. Assisted by a registered English and Foreign Staff.

Private Day School for Girls. Gymnasium, Kindergarten, Lecture Hall. Modern methods. A special feature: Modern Languages (direct method).

Passes in Public Exams. last three years, 433.

Boarding House for 12 Pupils next door.

House-Mistress—Miss EMILY L. BATHGATE.

Fees.—(Inclusive of instruction in the Day School), 55 to 65 Guineas per annum.

References to Parents and Friends in INDIA, JAPAN, AUSTRALIA, NEW ZEALAND, CAPE.

JERSEY.

Population, 52,706. Mild climate, exceptionally large amount of sunshine, and luxuriant vegetation. Specially suitable for delicate, strumous, or rickety children. The breadth and full development of the children in Jersey is particularly noticeable. Sunshine, 1908, 2,001 hrs. (see p. 866).

THE JERSEY MODERN SCHOOL.

Principal - W. LAWRENCE CLIFT, B.A.

Aim.—To provide at moderate cost liberal and practical education of high-class character, and modern type. Kindergarten Class special feature. Individual attention. French taught conversationally. Typewriting and Shorthand, and Book-keeping for commercial purposes.

Premises.—Extensive, south aspect, excellent sanitation, well lit, well-ventilated rooms.

Sanatorium by the Sea. Playing Field.

Boarders receive Home Comforts, while the mild and salubrious climate is exactly suited to delicate children. French and Colonial pupils specially provided for.

ILFRACOMBE.

Air is moist and unirritating. A large average amount of sunshine. Range of temperature is comparatively small. Climate therefore favourable to all forms of respiratory trouble; peculiarly suited to children affected with catarrh or kidney diseases. Thunderstorms rare.

GIRLS.

OXFORD PARK LADIES' SCHOOL.

Principals - Mrs. and the Misses WARE.

SOUND MODERN EDUCATION.

Careful training under Christian influence, with home comforts. Preparation for Camb. Locals, Associated Board of the R.A.M. and R.C.M., and other Exams., as required. List of successes supplied on application. Attention given to physical development.

Young Children carefully watched over, and entire charge taken.

The House is most healthily situated on high ground, overlooking the Sea.

ILKLEY.

The Medical Officer of Health writes:—"A health resort of high reputation due to its invigorating moorland air, the beauty of its scenery, and the purity and healing qualities of its waters. Children and flowers thrive vigorously. Ilkley is noted for its beautiful, high-spirited, well-grown children."

GIRLS.

ILKLEY HIGH SCHOOL.

Principal - Miss MAY, B.A.

School work conducted on High School principles, especially adapted to pupils requiring individual attention, and is immediately under personal superintendence of Principal.

Development of moral as well as mental faculties is the chief aim, and every endeavour made to combine home comforts with school life. School situated 500 feet above sea level, and gets full benefit of bracing atmosphere from the Moors.

Special Games Mistress and Foreign Resident Mistress.

Entire charge taken where parents abroad.

KING'S LYNN.

97 miles from London, G.E. Rly., 41 from Cambridge, 151 from Hunstanton. An ancient market town and seaport situated on the north-east coast. The climate is a very healthy one, and the rainfall average low.

BOYS.

KING EDWARD VII. GRAMMAR SCHOOL.

Founded in Reign of Henry VIII.

Under direct patronage of His Majesty the King.

LOWESTOFT.

Has the distinction of being the most easterly town of Great Britain. It has long enjoyed a great reputation as one of the leading health resorts, the climate being magnificently bracing. Amongst its many and varied attractions are two promenade piers, one of which overlooks the exceptionally fine harbour and yacht basin; the Club House adjoining the latter is the headquarters of the Royal Norfolk and Suffolk Yacht Club. Exceptional facilities exist for both fresh and salt water angling and yachting. Oulton Broad (in Broadland) is only 2 miles distant. There is a golf course (9 holes) at the southern end of the town. The water supply is pure and constant and the drainage system is modern. Sunshine (1908), 1,703 hrs. Estimated population (1909) 36,542. Death-rate per 1,000 pop. (1908), 12.2. Means of access: G.E. Ry., 117½ miles from London, 2½ hours by express train (see p. 868).

BOYS.

LOWESTOFT COLLEGE.

Headmaster - Rev. JOHN CLEGG, B.A.

Location.—College House stands 150 feet above sea level in the most healthy and bracing part of Lowestoft, overlooking the North Sea.

Sanitary arrangements have been submitted to the test of the Municipal Authorities.

Objects.—To furnish liberal education, principally of a modern character, but provision is made for Boys whose parents wish them to proceed to the Universities.

All games under supervision.

GIRLS. EASTHOLME SCHOOL FOR GIRLS.

Principal - Miss E. E. SMITH.

Assisted by Resident and Visiting Mistresses. To combine comfortable home, thoroughness in studies, industrious habits, and high standard of conduct.

School Courses.—Usual English subjects, Mathematics, French, Latin, Drawing, Class Singing, Calisthenics, Needlework. *Optional*—Instrumental Music, Painting, German, Gymnastics, Dancing, Swimming.

Preparation for Examinations if desired.

Private pupils received for Music, Art, &c.

Premises.—Large; healthily situated. Sea views. Certificated sanitation.

Garden, Tennis, Croquet, Hockey, &c.

GIRLS.

GUNTUN CLIFF SCHOOL, NORTH LOWESTOFT.

HIGH-CLASS SCHOOL FOR GIRLS.

Junior and Middle School affiliated with Parents' National Educational Union.

Premises.—Modern, in own grounds, elevated (300 ft.). Grass and gravel Playing Grounds. Sanitation certified. Gymnasium. Girls' Sitting Room. *Fees* £50 to £70.

MALVERN.

The Medical Officer of Health writes :—"Malvern is picturesquely situated on the eastern and western slopes of the range of Malvern Hills, with extensive and magnificent views on both sides. The Hills, which rise to an altitude of 1,400 feet, are easily accessible for delicate persons, either on foot or by carriage. The climate has a most beneficial effect on invalids. The houses are so placed as to receive more than the ordinary amount of sunshine. Weakly children, especially those suffering from tubercular glands or continually recurring catarrhs, in nearly all cases do remarkably well here. The rainfall is low, and the soil dries with remarkable rapidity. The water supply is bountiful and of great purity, and the sanitary state of the district generally of a high standard. Persons having houses to let can obtain "Sanitary Certificates" from the Urban Council, and these are not granted unless the sanitary arrangements are thoroughly up-to-date. The average annual (corrected) death-rate for the past five years is as low as 9·9 per 1,000 of the population. Outbreaks of infectious diseases are few and quickly suppressed, as the Malvern Urban District Council are provided with every means for promptly dealing with any case that may arise. No trouble or expense is spared in making Malvern the 'Queen of Health Resorts.' Pop. 18,000" (see pp. 852, 870).

BOYS.

THE SCHOOL, MALVERN LINK.

W. DOUGLAS (Scholar, Keble College, Oxford),

equips boys for a professional or business
career.

Individual attention, home life, liberal diet.

*Entire charge of Foreign and Colonial Pupils
if desired.*

Illustrated Prospectus on application to
Principal.

MARGATE AND CLIFTONVILLE.

M.B. Population, 26,000. Means of access, S.E. & C.D. Rly. Location on N.E. corner of coast of Kent, 76 miles from London. Elevation from a little above sea-level to 105 feet. Water supply constant, from the country district of Wingham, 14 miles from Margate. Four miles west of the North Foreland, Margate has a world-wide reputation for the dryness of its climate, and the health-giving sea breezes to which it is exposed possess exceptional qualities.

The Medical Officer of Health writes:—"Nearly three thousand children are sent yearly to Margate for their education. The chief reasons for the world-wide reputation of Margate as a health resort appear to be: Its dry, bracing climate, the town is exposed to the sea breezes from all quarters except the west; it has the smallest rainfall in England; there is a notable absence of fog; the subsoil is chalk, and the roads rapidly dry even after the heaviest rain. In addition to a large expanse of firm, dry sands there are promenades extending along the cliffs and the sea-front for more than three miles, and a sheltered park in the Dane Valley. The above exceptional advantages combine to make Margate a specially desirable residence for growing children during their school days." Sunshine: Margate, average for 17 years, 1,617 hours. Margate stands on two hills separated by the Dane Valley. The East Hill district is called CLIFTONVILLE; it is the highest part of the town. Hours of sunshine (1908), 1,623 (see p. 871).

BOYS.

HERNE HOUSE SCHOOL, CLIFTONVILLE (MARGATE)

(In connection with Heath Brow School, Boxmoor, Herts).

Aim.—A thorough and efficient Education on High School System, combined with every home comfort.

Curriculum.—Divinity, English Language and Literature, Composition, usual English Subjects, Class-Singing, Theory of Music, Drawing, French, Latin, and Drill. *Usual Exams.* prepared for. Great attention pupils' Health; Physical Exercises, Outdoor Games. *Premises*.—Detached; Elevation, 360 feet; Playing Field; Library. *Fees*.—40 to 50 Guineas.

Special provision Colonial and Foreign Pupils.

ST. ANNE'S-ON-SEA.

The Medical Officer of Health writes:—"The climate is of a medium character. It is built entirely on sand, and this fact, together with the exceptionally small rainfall it enjoys, gives the atmosphere a feeling of dryness, lightness, and vigour."

GIRLS.

LINDEN HURST COLLEGE.

HIGH-CLASS BOARDING SCHOOL FOR GIRLS.

Charming Position on Sea Front.

Pupils prepared for Public Examinations at parents' request.

PHYSICAL TRAINING a special feature.

FEES MODERATE.

Principal - Miss MARK.

Assisted by Certificated Governesses and Visiting Masters.

References on application.

ST. LAWRENCE.

Situated in the most favoured position healthy Thanet, Ramsgate possesses natural advantages which have made it the most delightful holiday and residential resort on the Kentish coast. St. Lawrence is now included in the municipal borough (see p. 873).

BOYS.

ST. LAWRENCE COLLEGE.

A Church of England Public School on slope of Hill, facing south; Sea on three sides; 160 acres, Steam Laundry, Swimming Bath, Gymnasium; Carpenters' and Metal Workshops; Classical, Modern Science and Army sides.

Junior School kept entirely separate.

Headmaster - Rev. C. C. SHERWOOD, M.A.

Council—

President—J. F. W. DEACON, Esq., J.P., D.L. Rt. Hon. Lord KINNAIRD, Sir JOHN KENNAWAY, Bishops of DURHAM, LIVERPOOL, SODOR and MAN, DEAN OF CANTERBURY, &c., &c.

Fees £75. Junior School, £65.

RAMSGATE.

The Medical Officer of Health writes:—"The climate of Ramsgate is equable, invigorating, and bracing, unmarred by sudden change. In the summer the sun's rays are deliciously tempered by cool sea breezes. Fogs are practically unknown. The average annual rainfall for the last 5 years is 20.96 inches. The amount of bright sunshine in 1908 was 1,814 hrs. During the last 5 years there have been altogether 9,040 hrs. of bright sunshine, giving an annual average of 1,808 hrs. and 5 mins., and a daily average of almost exactly 5 hrs.

The Archbishop of Canterbury, speaking at Ramsgate on January 28th, 1907, said:—"He felt that England owed to Ramsgate a considerable debt, for there were scattered throughout the land a large number of people who owed their good health to the holidays they were able to spend year by year at Ramsgate, and who were strengthened by its splendid air to continue their labours for another year. He congratulated them upon being among those who were able to confer so large a benefit on their country" (see p. 873).

BOYS.

SEAFORD.

Population, 4,300. On the Sussex Coast, 58 miles from London, between Brighton and Eastbourne. L.B. & S.C. Rly. Climate of Seaford is equable, but bracing for south coast health resort. Never very cold in winter, and summer heat always tempered by cool sea breeze, so that hottest days in summer are not relaxing. The climate is dry, rainfall being small and, owing to chalky sub-soil, quickly absorbed. There is a large amount of sunshine enjoyed, and nothing to intercept it.

BOYS.

NEW LANDS,

SEAFORD, SUSSEX.

Mr. WILLIAM A. WHEELER, B.A.

(Keeble College, Oxford),

Mr. J. M. HAY GRANT, B.A.

(Emmanuel College, Cambridge),

With Assistant Masters, prepare BOYS (8-14) for Public Schools and Royal Navy.

USUAL COURSE OF INSTRUCTION.—Scripture, English, French, Latin, Greek or German, and Mathematics.

Playing Field (4 acres). Boys' Games carefully organised. Drilling, Boxing, Dancing.

Miss E. Wheeler takes special and personal care of the health and comfort of the boys.

GIRLS.

SOUTHLANDS,

SEAFORD, SUSSEX.

FIRST-CLASS SCHOOL FOR GENTLEMEN'S DAUGHTERS.

Principal—Miss PANNETT, L.L.A. (Honours).
Assisted by large staff.

The School provides a liberal, cultured education, THOROUGHLY MODERN in scope and methods, with individual training in all essentials. Health conditions carefully studied.

Premises.—Modern, on Sussex Downs, above Sea. 3 acres grounds. Sanitation certified. Games, Gardening, Cycling, Riding, Sea-Bathing. *Illustrated Prospectus and List of Examination successes on application.*

References to parents of present pupils.

SHERINGHAM.

The Medical Officer of Health writes:—"Situating on North Norfolk coast. Climate bracing, low rainfall, absence of fog, sandy soil. Excellent golf links (18 holes), recreation ground, bathing. The amount of sunshine is distinctly above the average."

BOYS.

THE HAZARD,**SHERINGHAM.****P. A. UNDERHILL, M.A. Oxon.**

Boys prepared for Entrance and Scholarship Examinations at Public Schools, also for Osborne. The School Course includes all the usual subjects and is adapted for boys 7 to 14.

The House is situated on East Cliff overlooking Sea, in its own grounds. Modern Drainage. Good Water. Rifle Shooting, Cycling. Organised Games every afternoon. Carpentering. Large playing field. Mrs. Underhill is a certificated Hospital Nurse.

SKEGNESS.

On the Lincolnshire coast. Population, 3,744. Highly recommended by medical faculty especially for children requiring keen, invigorating air and dry atmosphere. Fine stretches of broad, clean sand. Sanitation and water supply most effective. 18-hole golf course. Sunshine (1908), 1,630 hours.

GIRLS.

BRYTHWEN.**HIGH SCHOOL FOR GIRLS.**

Principals - Misses A. and K. ROBINSON.
(Registered under Col. B.)

Situated within three minutes' walk of Sea, in quiet part of Skegness. Modern sanitary arrangements.

Pupils receive instruction in all branches of English (Scripture, History, Geography, Grammar, Elocution), Literature, Modern Languages, Arithmetic, Mathematics, Science, Shorthand, Drawing, Singing, Music, Needlework, &c., and can be prepared, if desired, for the higher Examinations. Healthy sports of all kinds are encouraged. Recreation Ground 2½ acres.

COLONIAL AND FOREIGN PUPILS received by arrangement.

SOUTHBOURNE-on-SEA

At eastern extremity of Christchurch Bay. Is much more exposed and more bracing than Bournemouth, of which it is a modern eastern extension. The air is free from all contamination by smoke. Equable climate, much sunshine, moderate rainfall (see p. 876).

GIRLS.

ST. CUTHBERT'S SCHOOL.*Principals—***Miss WILLIAMSON and Miss ROBERTS.**

Buildings comprise two Houses, Senior and Junior, accommodating 40 Boarders, standing in 10 acres of beautiful grounds overlooking Sea. Good Playing Field.

The education aims at general culture, physical and social. Special attention given to English, Modern Languages, Music. School Orchestra. Department. Opportunity of attending good concerts.

Efficient staff, including resident Foreign Mistresses, Trained Physical Mistress. London Professors attend for Music and Lectures.

SOUTHAMPTON.

County borough. Pop. estimated 117,312.

L. & S.W. Ry. London, 75 m.

The Medical Officer of Health writes:—"Southampton enjoys one of the mildest climates in the British Isles, the mean temperature during the ten years 1898-1907 being 51.4 degrees. Mean of maximum temperature in air, ten years (1898-1907), 58.5; mean of minimum, 44.2. The warmth of the climate is probably due to the nature of the soil and the contiguity of the New Forest to the south-west of the town, across which the prevailing winds blow. The average rainfall is 30.6 inches, the number of rainy days being low. Southampton is also favoured in the matter of sunshine, the annual average duration of sunshine being 1,705 hours." Sunshine (1908), 1,787 hours (see p. 876).

BOYS.

HARTLEY**UNIVERSITY COLLEGE.**

Principal : S. W. RICHARDSON, D.Sc. (Lond.),
M.A. (Camb.)

Students are prepared for the Degrees of the London University, for Scholarships at Oxford and Cambridge, for the Medical, Engineering, and Teaching Professions, and for the Civil Service.

The College is affiliated to Oxford and Cambridge, and recognised by the Royal Colleges of Physicians and Surgeons.

Assisted by fully-qualified Staff.

The School (established 1892) aims to develop Intellectual and Physical Faculties to enable pupils to continue education after leaving school. Usual Examinations prepared for. Electric Light. Sanitation perfect.

Careful attention to health. Physical training important feature. Outdoor games.

Children of parents residing abroad received whole year, special terms.

HIGHEST REFERENCES.

GIRLS.

PEMBROKE HOUSE SCHOOL**(POLYGON ROAD).**

Director of Education—

Mrs. WYCLIFFE VAUGHAN.

Efficient Teaching Staff.

School Course provides an Education for Girls thorough in every branch, adapted for modern requirements.

Subjects taught:—Religious Knowledge and Church History, English in its various branches, Latin, Mathematics, Modern Languages, Science, Music, Art, Needlework, Dancing, Drilling, Gymnastics, Swimming.

Special attention paid physical development. House arrangements, those of well-ordered home. Well-being and happiness of pupils studied.

SOUTHEND-ON-SEA.

The Medical Officer of Health writes:—"The climate of Southend-on-Sea (which includes Westcliff-on-Sea) is dry, sunny, and mildly bracing. Estimated population, 61,000. Annual rainfall low, averaging about 20 inches per annum. Water supply excellent. Streets open and planted with trees." Sunshine (1908), 1,727 hours.

GIRLS. SOUTHEND COLLEGE.

Principal - Miss HELEN E. MAUDE O'MEARA.

HOME SCHOOL FOR THE DAUGHTERS OF GENTLEMEN.

Six Resident Mistresses and Visiting Professors.

School System.—To teach girls to become good and gentle women, fitted for the varied duties of life. Covers work (and play) necessary every age, 3 to 19 years.

House.—Close Stations and Sea. Contains well-ventilated Class-rooms, Sitting-rooms, Bed-rooms (16), Large Lecture Hall, Gymnasium.

Recreation.—Cycling, Tennis, Hockey, Cricket, Croquet, Badminton, Archery, Swimming.

SOUTH MOLTON.

The Medical Officer of Health writes:—"The district is hilly, the climate bracing. The geological formations are millstone grits and sandstones. Rainfall about 40 inches. Old people, those returning from the tropics, and children do well in this climate."

WEST BUCKLAND SCHOOL.

Headmaster - Rev. E. C. HARRIES, M.A.

School.—Founded in 1858 by the late Earl Fortescue and Prebendary Brereton. A Public School for Professional and Middle-class people. Moderate Fees.

Aims.—To prepare Boys for Professional and Commercial careers.

Situation.—Entirely rural, elevation 650 ft. Most healthy.

Building.—Suitably adapted for 120 Boys (Boarders).

Athletics.—Encouraged. 20 Acres. Officers' Training Corps.

India and Colonies.—Boys met. Entire charge undertaken.

SOUTHPORT.

The Medical Officer of Health writes:—"Southport is by its character as a modern 'Garden City' eminently suited as a place for schools. All its houses, detached or semi-detached, have their own gardens. Its soil is sandy, clean, and dry. The streets are broad, well kept, and planted on each side with trees. The air, generally from the sea, is clean, pure, and of even temperature. The water supply is a public one, excellent in quality and quantity. The air of Southport is very mild, dry, and also equable. In the height of summer it is not unduly hot, but it is pre-eminently a winter resort, and has almost a model atmosphere for kidney complaints and bronchial affections."

Health Statistics, &c.—Climate, mild, breezy, bracing; recommended for delicate children; cool summer; mild winter. Aspect, west. Sunshine (1908), 1,549 hours. Water supply constant and of highest purity. Sanitation, perfect. Soil, sand (see p. 877).

BOYS.**SOUTHPORT MODERN SCHOOL**
A FIRST-CLASS BOARDING SCHOOL FOR BOYS.

In a most beautiful and healthy seaside town. Splendid buildings, specially constructed for scholastic purposes. Hygienic arrangements perfect. Excellent staff, including B.A., B.Sc., &c. A village, on gravel soil, 300 ft. above sea level, $\frac{1}{2}$ m. from Derby, on Midland main line to London and Nottingham. Excellent railway facilities. Entirely in the country, with the advantages of proximity to a large town.

BOYS.

Established 1860.

SPONDON HOUSE SCHOOL, SPONDON.

E. A. PRIESTLAND, M.A.

C. H. T. HAYMAN, B.A.

Assisted by other Masters.

FOR SONS OF GENTLEMEN. PREPARATORY FOR
PUBLIC SCHOOLS AND ROYAL NAVY.

School Course.—Thorough grounding all necessary subjects. Backward boys individual attention. Numerous successes. *Premises.*—Detached; gravel soil; elevation 300 ft.; $\frac{1}{2}$ acres grounds; Cricket, Football Field, Private Chapel, Fives Courts, Gymnasium, Carpenters' Shop, Swimming, Miniature Rifle Shooting. Boy Scouts.

Entire charge taken Boys whose Parents abroad.

Fees.—65 to 75 gs.

SURBITON.

The Medical Officer of Health writes:—"A favourite healthy Thames riverside resort, 50 to 100 feet high. Climate is mild and equable, specially suitable for children and those who have lived abroad. Extremes of temperature, wind or wet are rarely found. Water-supply good; three recreation grounds, and fine golf courses."

BOYS.

SHREWSBURY HOUSE,

SURBITON.

Principal—

V. C. H. MILLARD, M.A. Cantab., F.R.G.S.

Assisted by a strong and efficient staff, prepares boys, up to fifteen years of age, for the Public Schools, Navy, &c.

Founded in 1873, the School has since been carried on with much success, maintaining its reputation for high tone and character. Official health statistics extremely satisfactory.

Every encouragement given to games. Large playing field. Many Scholarships won.

Health and comfort of boys prime consideration. Rifle Range, Carpenters' Shop, &c.

TAPLOW.

The Medical Officer of Health writes:—"Taplow is situated on gravel soil and on an eminence above the Valley of the Thames. It is the centre of a district, the scenery of which ranks among the most beautiful in England. Very healthy district."

THE GRAMMAR SCHOOL,

TAPLOW, BUCKS.

Half an hour from Paddington. On high ground. Gravel soil.

Principal:—Rev. ALFRED W. BATCHELOR,
M.A., D.C.L., L.C.P.

An excellent education at a moderate inclusive fee. Pupils are entered for University Locals and College of Preceptors, for which the School is the centre. Gymnasium, Swimming Bath. Lecture Hall, Tennis Courts, Workshops, 30 acres of Playing Fields, Bicycle Stables, Rifle Range, Isolated Sanatorium. Entire charge taken if desired. Holiday arrangements.

SWANAGE.

Lies close within the southern horn of a beautiful bay on eastern extremity of Isle of Purbeck. Exposure of the bay is due east. Greater part of shore retains its natural characteristics—a fine strip of beach backed by low cliffs of sand and clay. It enjoys shelter from N., S. and W. Climate is mild, air being pure and dry. Good drainage. Sea is of a brilliant blue. Trees flourish in abundance (see p. 876).

BOYS AND GIRLS.

"OLDFELD."

PREPARATORY FOR BOYS AND GIRLS.

Principals - Mr. and Mrs. F. G. HICKSON.

Boys—6 to 14 years, prepared for PUBLIC SCHOOLS, NAVY, &c.

Physical Development specially studied. Swedish Drill daily.

Games and walks carefully arranged. Sea-Bathing.

Entire charge Pupils from abroad.

Fees—50 guineas inclusive.

TOTNES.

The climate of Totnes is mild, with an average rainfall during the last ten years of about 40 inches. There are seldom more than occasional frosts until the end of January, and little snow.

GIRLS.

Established 1884.

TOTNES GIRLS' SCHOOL

AND KINDERGARTEN.

Principals—

Miss MAY WINDEATT, Member of I.S.M.
Mrs. H. PINN.

An efficient Staff of Resident and Visiting
Mistresses.

Thorough modern Education provided to equip for Teaching and Nursing Professions, Business, and Home Life. Pupils prepared for the usual Public Examinations. 250 SUCCESSSES obtained during the last 10 years. Nature Study and Needlework. Healthy locality. Mild climate. Boarders (10) under a Principal's supervision. Library. Gymnasium. Tennis. References to Parents and others.

TUNBRIDGE WELLS—see p. 846.

TAVISTOCK.

The Medical Officer of Health writes:—"Tavistock is delightfully situated on the western side of Dartmoor, known as the Gothic Town of the West, and in the valley of the lovely River Tavy. The district offers various attractions to sportsmen. Charming walks, moor air bracing. Healthy drainage, and water supply excellent. There is a golf course of 18 holes. Excellent climate, very mild, with little frost." Tavistock is 16½ m. north of Plymouth. There is a fine decorated church and some ancient churches. Sir Francis Drake was born here, and there is a statue to his memory.

BOYS. KELLY COLLEGE.

Founded and Endowed by Admiral Benedictus Marwood Kelly.

Headmaster—Rev. E. I. A. PHILLIPS, M.A., B.Sc.
Assisted by large Competent Staff

School Buildings situate on high ground facing Dartmoor, cost £50,000 and contain all improvements required by modern school hygiene.

Thorough, complete education, Classical Modern Science Sides.

Special Foundations for Sons of Deceased Naval Officers.

Premises.—In own grounds, high elevation on Whitechurch Downs.

Special attention PHYSICAL CULTURE (resident Gymnastic Mistress) and Outdoor GAMES.

Entire charge taken of Indian Children.

TORQUAY (see p. 878).

The Medical Officer of Health writes:—"Sunshine, equability of temperature, dryness of the air, and a singular absence of fogs may be regarded as the main characteristics of the winter climate of Torquay." Sunshine (1908), 1,797 hours.

BOYS. RICHMOND LODGE.

Headmaster—

G. W. PRIESTLEY, B.Sc., A.R.C.S. (Lond.).

Classics and English—A. S. DODDS, M.A.
(Hons. Queen's Coll., Oxon.).

A well-known successful and efficient Preparatory School, of about 30 Boys, in the best part of Torquay. Sunny, airy classrooms in bracing and elevated situation. Only a few Boys received in Headmaster's house, under the care of Mrs. Priestley. Well-equipped laboratories.

Preparation for Army, Civil Service, or the Universities. Special opportunities for Boys intended for Scientific careers, Engineering, Mining, &c. Many previous successes.

Colonial and Indian Pupils received.

WALLASEY.

The Medical Officer of Health writes:—"A rapidly-growing residential town on Cheshire side of mouth of Mersey. It enjoys all advantages of healthy seaside resort, air being exceptionally pure and bracing, hours of bright sunshine recorded are above average for the country." Golf.

BOYS. (Established 30 years.)

ELLERAY PARK SCHOOL.

Principal - - J. M. STUART EDWARDS, M.A. (Oxon.)

Assisted by strong staff (University Graduates and Qualified Assistants)

Preparatory for Public Schools and Navy (7-15).

School Course.—Divinity, usual English Subjects, Classics, Mathematics, French. *Extras.*—Music, Drawing, Dancing, Gymnastics, Carpentering, Swimming. *Situation.*—In own grounds (11 acres), high, near Sea. *Premises.*—Large, commodious, well warmed, ventilated, gymnasium, workshop. *Domestic arrangements* under Mrs. Stuart Edwards. Extensive Cricket, Football Grounds. Swimming.

Speciality suitable weak, delicate boys.

WALMER (see DEAL, pp. 824, 861).

Population 5,614. S. E. & C. Ry. 84 miles from London. It is a southward continuation of Deal. Select place of residence. Quiet seaside resort, and one of the healthiest spots on the coast of Kent. Climate, dry and very bracing. Pure air.

BOYS. BELMONT HOUSE.

Principal - - - WALTER INGE, A.C.P.

Preparatory for Public School, Professions, Banks. Special subjects. French, Mathematics.

Aim.—Build up perfect physique, train every activity of mind and body as foundation for future advancement and capability.

Premises.—On top of hill near Sea, most tonic air possible. Sanitation perfect. Gymnasium, Carpenters' Shop, Laboratory and Rifle Range. Playing Fields (5 acres).

Gardens.—Each has his own.

Domestic Arrangement.—Directly under Mrs. Inge.

Entire charge taken of children from abroad.

TUNBRIDGE WELLS.

The Medical Officer of Health writes:—"35 miles from London. Charmingly situated in the neighbourhood of sylvan beauty. The climate is particularly healthy, dry, bracing, and invigorating, almost entirely free from fogs. The soil is chiefly sandstone. Death-rate, 11.7; Zymotic death-rate, 0.3. Excellent and abundant water supply. Its popularity as a place of residence and health resort now depends upon its situation, soil, surroundings, and climatic advantages, coupled with its easy accessibility to London. Sunshine (1908), 1,797 hours." This inland watering-place and select residential town is situated chiefly in Kent, but partly in Sussex. It is a handsome town, built in an irregular manner alongside an extensive common surrounded by hills. The Parade (paved with pan tiles in the reign of Queen Anne) consists of a colonnade of shops. At one end of the Pan tiles is the Pump Room, used for indoor entertainments, and at the other are the celebrated wells (see p. 877).

BOYS.

HURSTLEIGH.

(Established 1863.)

Principal - M. J. HONNYWILL, M.A.

Assisted by Efficient Masters.

WESTCLIFF-ON-SEA.

Westcliff-on-Sea is a modern extension of Southend-on-Sea, of which it is an integral portion. It has developed along the top of the cliffs towards the west into a high-class residential district, much in favour with City men and with visitors who like a quiet resort alongside of a lively one. The entire combined fronts of Southend-on-Sea and Westgate-on-Sea extend for five miles, with four miles of promenade.

The Medical Officer of Health writes:—"Westcliff-on-Sea, in the borough of Southend-on-Sea, is the modern residential portion of the town. It enjoys the climatic advantages of Southend, with quiet, select surroundings. Its southern aspect upon gradually rising ground, equable temperature, protection from cold winds, remarkable amount of sunshine (on an average 4½ hrs. daily throughout the year in 1908, and about 7 hrs. daily on the average in June, July and August, 1909), low rainfall (18.69 inches in 1908), and its excellent sanitation, combine to make it an ideal place of residence for invalids and children."

BOYS.**ALLEYN COURT.**

PREPARATORY FOR PUBLIC SCHOOLS AND ROYAL NAVAL COLLEGE, OSBORNE.

Headmaster - - T. R. WILCOX, B.A.

Splendid situation in own grounds, facing south. All sanitary arrangements certified perfect. Separate sanatorium.

Premises detached, Garden; Tennis, Croquet, Sports, Bathing, Botany rambles.

Fees, 45 to 70 guineas.

WHITAKER'S SCHEDULE REGISTERS

OF

BOYS' and GIRLS' SCHOOLS.

Whitaker's system of Schedule Registers has been established in order to enable Parents and Guardians, in search of a suitable School, to ascertain all those particulars which cannot be contained in an advertisement in Whitaker's publications.

Two pages in each Register are allotted to every School. The Schedules are most comprehensive, and the particulars are classified under five headings, viz., *General Information, School Buildings, Education, Special Features, and Domestic Arrangements.*

Only one form of Schedule is used, consequently all essential points can be obtained at a glance from the Register more quickly and easily than by reading through the ordinary prospectuses.

See page 822.

Hants. County Borough. Pop. 75,000. *Means of access:* L. & S.W. Ry. (107½ m. from London) and Midland Ry. *Location:* Extreme S.W. coast of Hants, in sheltered bight between Poole Harbour and Christchurch. *Neighbourhood:* Cliffs, pine-woods, valleys, luxurious growth of trees and shrubs. *Aspect:* South. *Climate:* Mild, equable temperature. *Sunshine:* 1,908, 1,932 hrs. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Sand and gravel. *Front:* High cliffs, covered foliage, intersected rustic paths, broken by deep chines. *Piers:* Bournemouth, 1,238 ft., bandstand, refreshment and newspaper kiosks; Boscombe, 600 ft. *Beach:* Sandy, no currents, double tides render bathing always practicable. *Bathing:* Mixed. *Baths:* Swimming baths, Turkish and electric at Hydros. *Excursions:* New Forest, 15 m.; Corfe Castle, 18 m.; Wimborne, 9 m.; Christchurch Priory, 4 m.; Salisbury, 31 m.; Stonehenge, 38 m. Steamboat excursions to Swanage, Weymouth, Isle of Wight, Southampton, &c. *Seasons:* Winter and summer. *Annual fixtures:* Regatta, cricket week, horse show, chrysanthemum show, tennis, golf, and croquet tournament. Widely-spread town built within recent years on a heath covered with pines, which surround and permeate the locality, contributing to this fashionable town's position as a health resort, aromatic exhalations from pines benefiting pulmonary complaints. East Cliff (oldest residential quarter) separated from West Cliff (newest portion, more elevated) by River Bourne. Town extended more inland through valley than along coast. Valley affords maximum protection from wind, laid out 2 miles as public pleasure gardens, stream running through. Here Invalids' Walk, sheltered, quiet, sunny promenade. Municipal orchestra and bands, 2 theatres, winter gardens (vocal and instrumental concerts), Shaftesbury Hall (entertainments, lectures, concerts, gymnasium), free libraries; science, art, and technical schools; drill halls, 3 arcades; boating, fishing, coaching, hunting; 2 golf links, Meyrick Park and Queen's Park (18 holes; ladies, 9 holes); 3 large parks, provision for all outdoor pastimes; good educational facilities; excellent London railway service, and direct communication Midlands and North. Electric tramways (see p. 87).

BOURNEMOUTH. TOWER MANSIONS, CHRISTCHURCH ROAD.

Ideal High-class Pension, standing in its own Grounds on the East Cliff directly opposite Boscombe Chine Gardens, facing due South, with Sea Views. Close to Sea and Pier. Near Golf Links. The Vertical System

Original Inventor and Patentee—T. BOWATER VERNON.

TIMES.—"By this system the most complex body of documents can be arranged with admirable simplicity."
"The 'vertical' is the coming system."—*American Publication.*

LETTERS

The CERES System can be had in Boxes, Cabinets, Writing Tables, &c., for private, professional, and commercial use; also in Japanned Tin and Leather Despatch Cases for travelling and security.

A Single Locked Box in Mahogany or Japanned Tin, &c., for all current Letters and Papers.

CABINETS in 3, 4, and 6 drawers, Quarto or F^ocap., or made to order up to any size. Also in Inlaid Mahogany, and to any design.

The Records of the whole of the Medical Profession registered by the General Medical Council since 1858, some 75,000, are now arranged on this system, and form the most perfect register of its kind in London. Officials contemplating alterations in keeping their records should examine this system before coming to a decision.

THE CERES CARD SYSTEM.

Card Cabinets on the Largest Scale and with latest improvements. (See explanatory pamphlet.)

THE CERES WRITING COPIER.

(PATENTED.)

Thousands in use by all Classes and Trades.

Perfection at Last.

Ordinary Pen and Ink.

Press-Copying at an end.

A Perfect Copy and a Dry one, and your Letter shows no sign of having been Copied.

A WRITING TABLET, holding Writing and Copying Paper, Letters, &c. Everything at hand.

For BUSINESS PURPOSES, a perfect system in substitution for Press-copying, at half the cost.

For PRIVATE USE, a simple apparatus always ready to copy the occasional important letter.

Full particulars, with specimen of writing and copy, on application; also Illustrated Catalogue of the Ceres Vertical System of Letter Filing, which is fast displacing all flat plans. Quote *Whitaker*.

CERES LTD., 10, JOHN STREET, ADELPHI, LONDON.

(OPPOSITE THE SOCIETY OF ARTS, AND CLOSE TO CHANCERY CROSS.)

VERY SUITABLE FOR PRESENTS.

MUCH USED IN INDIA AND ABROAD.

ATLANTIC TRANSPORT LINE.

LONDON to NEW YORK every Week

The only Passenger Line from London to New York direct.

FLEET.—S.S. MINNEAPOLIS, 13,401 tons; S.S. MINNEHAHA, 13,403 tons; S.S. MINNETONKA, 13,400 tons; S.S. MINNEWASKA, 13,400 tons. These new steamers are completely up-to-date, and have luxurious accommodation, large State Rooms, Music Room, Smoking Room, Electric Light, and Refrigerator. Cuisine and Service excellent. All the State Rooms and Saloons are amidships, so that there will be very little motion felt in steamers of this great size. The majority of the State Rooms are on the Bridge Deck, a position for which very high fares are usually charged. **FIRST-CLASS PASSENGERS ONLY.** Table and attendance First Class.

SCHEDULE OF FARES.—£13 10s., £16 10s., and upwards. Children under 10 years half-price. Infants under 12 months £1.—For particulars of passage apply to

R. WIGRAM, Esq.

The National Provincial Bank of England, Limited, having numerous Branches in England and Wales, as well as Agents and Correspondents at home and abroad, affords great facilities to its customers, who may have money transmitted to the credit of their Accounts through any of the Branches, free of charge.

At Head Office and Metropolitan Branches, Deposits are received and interest allowed thereon at the rates advertised by the Bank in the London newspapers from time to time, and Current Accounts are conducted on the usual terms.

At the Country Branches, Current Accounts are opened, Deposits received, and all other Banking business conducted.

The Bank undertakes the Agency of Private and Joint Stock Banks, also the Purchase and Sale of all British and Foreign Stocks and Shares, and the collection of Dividends, Annuities, &c.

Circular Notes and Letters of Credit, payable at the principal towns abroad, are issued for the use of Travellers.

The Officers of the Bank are bound to secrecy as regards the transactions of its customers.

Copies of the Annual Report of the Bank, Lists of Branches, Agents and Correspondents may be had on application at the Head Office, and at any of the Bank's branches.

R. T. HAINES,

T. ESTALL,

D. J. H. CUNNICK,

} *Joint General Managers.*

CURRENT ACCOUNTS are kept in conformity with the usual practice in London and the country respectively. Customers keeping Current Accounts have the facility of discounting approved Bills, of obtaining loans upon negotiable Securities, of depositing Bills, Coupons, &c., for collection. The Bank will take charge of Foreign and Colonial Bonds, &c., and will detach and collect the Coupons as they become due, passing the interest to the credit of Customers as received. Sums of money may be paid into any Office for transmission to any other Office of the Bank for the credit of customers, free of charge. Every facility afforded for the transmission of money between London, Liverpool, Manchester, Scotland and Ireland, and for the receipt and delivery of Sums, Shares, &c. LETTERS OF CREDIT AND CIRCULAR NOTES, payable at any of the Chief Commercial Towns and Cities of the World, are issued.

PURCHASES.—The Society purchases Reversions and Remainders, whether absolute or contingent, Life Interests, whether in possession or deferred, and generally all Interests (in approved property) that depend upon the duration of human life.

LOANS.—The Society also grants Loans on the security of such Interests, either on Ordinary Mortgage or by way of Reversionary Charge. The latter mode meets the convenience of borrowers who do not wish to make any payment for either principal or interest until their Reversionary Property falls into possession. The amount to which the Society will then be entitled is fixed at the outset, and does not depend on the time elapsing between the grant of the Loan and its repayment. The option of redeeming the Charge during the first three or five years can usually be combined with this form of Loan.

Forms of Proposal and full information can be obtained at the Society's Offices.

Favourably reviewed by over 100 Influential Newspapers.

"HOW TO SELECT A LIFE OFFICE."

By G. M. DENT, F.S.S.

Extracts from a few Press Opinions.

MORNING POST.—"Mr. G. M. Dent, who is a Fellow of the Royal Statistical Society, has written a valuable pamphlet on Life Assurance, in which all the more important questions connected with the subject are discussed by a firm of merchants and an insurance broker. . . . There are two carefully-prepared tables."

PALL MALL GAZETTE.—"Deals very clearly with the main points to be borne in mind in selecting an office, and the tabular matter is very useful. Armed with this pamphlet, and blessed with a little commonsense, the ordinary man cannot go very far wrong."

DAILY CHRONICLE.—"Cannot fail to be instructive."

STATIST.—"The form of question and answer relieves the work very much from the heavy character of a statistical inquiry." "To those who may contemplate insurance, the expenditure of 1s. on this pamphlet will be a judicious outlay."

FINANCIAL TIMES.—"Carefully and skilfully compiled."

POLICY-HOLDER.—"Life Assurance as an investment, and Endowment Assurance, are both explained in a very attractive way."

UNITED SERVICE GAZETTE.—"The fact that this pamphlet has now reached its third edition amply demonstrates the value of its contents. Illustrations, proving the great value of life assurance as an investment, accompany the pamphlet, which also shows how to determine the relative merit of Offices which are not altogether 'much of a muchness' as is generally believed."

BRADFORD OBSERVER.—"The remarks on Life Assurance as a paying investment, apart from its protection against the misfortune of premature death, deserve to be widely read."

CARDIFF TIMES.—"In terse and lucid fashion, Mr. Dent not merely emphasises the utility of Life Assurance as an investment, but also explains how the assurer may obtain the maximum of security and the largest return for money."

GLASGOW HERALD.—"The pamphlet takes the form of a dialogue, which, together with a series of tables, shows the features to which an intending assurer should direct his attention before selecting a company."

LIVERPOOL COURIER.—"The dialogue is smartly written, and touches on many of the most important elements that have to be considered before a policy is taken in any office. Appended are illustrative tables showing how widely different offices vary in their mode of doing business."

Price 1s. By post, 1s. 1d. (under four ounces).

Secretary: W. N. NEALE, Esq. *Actuary and Manager:* FRANK B. WYATT, Esq., F.I.A.

The Society offers the **BENEFITS** of **MUTUAL LIFE ASSURANCE** without
 Personal Liability on highly favourable terms to

THE CLERGY AND THEIR RELATIVES.

ALL PROFITS BELONG TO THE MEMBERS.

<i>Accumulated Fund</i>	- -	£4,439,825.
<i>Annual Income</i>	- -	£471,089.
<i>Bonuses Distributed</i>	- -	£4,256,464.

LOW PREMIUMS.**LARGE BONUSSES.****NEW AND SPECIAL POLICIES.**

Notwithstanding the **LOWNESS** of the Premiums charged, the **BONUSSES** are on an **EXCEPTIONALLY HIGH SCALE.**

Application is invited for the **PROSPECTUS**, and Leaflets explaining two new Policies, with valuable options, viz.:—

- 1. WHOLE-LIFE CONVERTIBLE ASSURANCES.** Very Low Premium—about one-half the usual rate—during first ten years.
- 2. PENSION POLICIES.** Premiums returnable with compound interest in case of death or surrender before pension age. Option to commute for Cash.

Assurances without profits, at low rates of premium, may be effected, and Life Annuities on favourable terms may be purchased, by any person irrespective of any special qualification by relationship to the Clergy.

ANNUAL PREMIUMS for £1,000 with PROFITS.

AGE NEXT BIRTHDAY.	£1,000. PAYABLE AT DEATH.			£1,000. PAYABLE AT AGE 60 OR EARLIER DEATH.		
	£	s.	d.	£	s.	d.
25	20	1	8	27	3	4
30	23	3	4	32	10	10
35	26	10	0	40	1	8
40	31	1	8	51	5	0

Note.—Under the Reduced Premium System (explained in Prospectus) four-fifths only of these premiums may be paid, the other one-fifth remaining a charge to be repaid out of Bonus.

IMPORTANT NOTICE.

No Agents employed and No Commission paid for the introduction of business, whereby **£10,000** a year is saved to the Members.

Assurances can be effected by **direct communication** with the Office, 2 & 3, THE SANCTUARY, WESTMINSTER, S.W.

FRIENDS' PROVIDENT INSTITUTION FOR MUTUAL LIFE ASSURANCE

ESTABLISHED 1832

ACCUMULATED FUND	- - - - -	£3,300,000
ANNUAL INCOME	- - - - -	£300,000

This Institution is the Life Assurance Office established by the Society of Friends (Quakers), and is under the management of Members of that Society.

The Scale of Premiums charged is low; but, owing to careful selection of lives and economical management, very satisfactory Bonuses have been realised.

The advantages of the Institution are open to those persons who are or have been Friends; and to others who are of Quaker descent, or are connected with Friends by ties of kindred, marriage, or education, or by partnership in business.

APPLICATIONS FOR AGENCIES INVITED.

THE LONDON LIFE ASSOCIATION LIMITED

(A MUTUAL LIFE ASSURANCE OFFICE ESTABLISHED IN 1806),

81 King William Street, London, E. C.

HALF PREMIUM SYSTEM.

This popular method of providing a maximum assurance at a minimum cost depends on the use, as security for the advances made, of the large surrender value allowed by the Association. It is specially provided for those who would otherwise intend to effect a further policy at the end of seven years when the original premium will first become subject to reduction, for they may thus double the amount of a fully participating policy at the outset without substantially increasing the initial annual cash payment, and be covered for an additional sum paying the premium, attaching to the younger age only. Under the system in question, a fully participating policy (which it is not necessary to lodge at the office) may be taken out with a condition that a sum (of at least £10) not exceeding a half of the ordinary premium shall be advanced in each of the first seven years as a first charge thereon towards payment of the premium, interest at four per cent. being yearly paid: but there is no obligation on the assured to accept all the advances if he should prefer on any occasion to pay the full premium in cash; while an advance may at any time after the first six months be repaid in one sum or by reasonable instalments, or it may remain until the policy becomes a claim. It is anticipated that the eighth year's premium will be reduced by not less than 55 per cent. with the prospect of further *gradual* diminution in after years. The following example has reference to the yearly premiums payable during life on an assurance for the whole continuance thereof, but similar moieties of half-yearly and quarterly premiums, or of the premiums on any other form of fully participating assurance, may also be charged on a policy.

Nearest Age (not Age next Birthday).	Annual Premium per cent.	
	Moiety during first seven years.	Estimated for eighth year.
	£ s. d.	£ s. d.
20	1 3 9	1 1 5
25	1 6 6	1 3 11
30	1 10 0	1 7 0
35	1 14 3	1 10 10
40	1 19 6	1 15 7
45	2 6 0	2 1 5
50	2 14 0	2 8 8
55	3 4 0	2 17 8
60	3 16 4	3 8 9
65	4 11 7	4 2 5

For example, an entrant at nearest age 21 would, under this system and the estimate mentioned, pay in cash for an assurance of £1,000 receivable at death, at an annual premium of £24 5s. 0d. not more than—

	£ s. d.	£
1st year (Half Premium Equitable Charge Stamp ..	12 5 0	a loan being made of 12
2nd " (Half Premium ..	12 5 0	
3rd " (Half Premium ..	12 5 0	" 12
4th " (Half Premium ..	12 5 0	
5th " (Half Premium ..	12 5 0	" 12
6th " (Half Premium ..	12 5 0	
7th " (Half Premium ..	12 5 0	" 12
8th " (Half Premium ..	12 5 0	
Total Premium as reduced ..	10 18 3	Total Loan ..
Interest ..	3 7 3	£84

and so on, or really rather less, for income tax would be deducted from the interest. Then, until the loan is repaid, the net amount of assurance (after deduction of the advance), namely £916, would be secured by an annual payment not, it is anticipated, exceeding £14 5s. 6d. (premium and interest), that is at the rate of £1 11s. 2d. per cent. only, with the prospect of gradual diminution in due course.

Premiums for other Ages and Durations will be quoted on application: Half-yearly or Quarterly Premiums also.

MARINE & GENERAL MUTUAL LIFE ASSURANCE SOCIETY.

can be effected with the

NORWICH UNION MUTUAL LIFE OFFICE.

"One of the best Life Offices in the World."—*Standard.*

Early Provident

£6 10s. per annum will secure for a child aged 2 next birthday a policy of £1000 at death after age 25 with Valuable Options at 25 and return of premiums in the event of earlier death.

Educational Annuities

£18 per annum from the birth of a child till he is 16 will secure for him an Annuity of £100 a year for 4 years from age 16. Money returned in the event of the death of the child.

(THESE ARE TWO SPLENDID SCHEMES FOR CHILDREN.)

Half Premium Endowment Policy is a very attractive

form of insurance for professional and business men. At age 23 next birthday a premium of £22 10s. a year for 5 years and £35 13s. 4d. a year for 25 years secures a policy of £1000 with added Bonuses payable at the end of 30 years or at previous death.

Eight Option Policy (very popular).

£28 9s. 7d. per annum at age 30 next birthday insures a healthy man for £1000 until he is 60, when he can exercise one of the EIGHT IMPORTANT OPTIONS absolutely guaranteed under the policy.

Pensions for later years should be provided as early as possible. Write for pamphlet showing what £10 a year will do: If delayed too long, there comes a time when *Annuities* alone are available.

Favourably reviewed by over 100 Influential Newspapers.

"HOW TO SELECT A LIFE OFFICE."

By G. M. DENT, F.S.S.

EXTRACTS FROM A FEW PRESS OPINIONS.

"An instructive pamphlet. Insurers in search of knowledge might advantageously expend a shilling on this book."—*Statist.*

"The statistics as to Endowment assurance policies as investments are highly interesting and convincing."—*Citizen.*

"To those who contemplate taking out life policies, the expenditure of a shilling on this pamphlet may be recommended as about the wisest step they could take. Everyone should read it."—*Fairplay.*

"There is no doubt Mr. Dent has expended a vast amount of research on his pamphlet, and the elaborate tables which he publishes are distinctly valuable."—*Financial Times.*

"An interesting study of the dialogues and tables given will more than repay the shilling outlay."—*Dundee Advertiser.*

"All who intend to insure their lives will find much useful information in this pamphlet."—*Belfast News-Letter.*

"The publication is of value to the insurance broker and other professional men, but of more value still to the intending insurer."—*Halifax Courier.*

"A cleverly-written dialogue. Both tables are explained with great lucidity."—*Law Journal.*

"All who contemplate insuring their lives should read, mark, learn, and inwardly digest this able and interesting treatise."—*Leeds Times.*

"A well-written pamphlet. Anyone proposing to insure his life will easily find from the author's 'three interviews' how to spend his money to the best advantage."—*Liverpool Mercury.*

"Cannot fail to be instructive."—*Daily Chronicle.*

"A valuable pamphlet on life assurance. . . . There are two carefully prepared tables—No. 1, 'exhibiting in a concentrated form the more essential points to be considered in the selection of a Life Office,' and No. 2, 'showing the different results to policy-holders produced by the payment of the same money to the various offices.'"—*Morning Post.*

"A most valuable and exhaustive pamphlet."—*Nonconformist.*

"One special branch of the question, which is most lucidly treated, is the value of life assurance considered simply as an investment."—*Southport Guardian.*

Price 1s. By post, 1s. 1d. (under four ounces).

SCOTTISH AMICABLE

Life Assurance Society.

For Mutual Life Assurance.

No Shareholders.

Funds, £5,200,000. Claims Paid, £8,900,000.

HEAD OFFICE—St. Vincent Place, GLASGOW.

London Office—1, Threadneedle Street, E.C.

"It seems only the other day that the Scottish Amicable surprised the insurance world by setting aside Reserves which provided a larger margin for security and profits than any other Company kept in hand before or since. Yet this was ten years ago, and now another Valuation Report reminds us that the Society is even stronger than before."—*Standard*.

At the Quinquennial Investigation and Division of Profits as at 31st December, 1905, the large

Compound Bonus

OF

£1 15s. 0d.

per cent. per annum was again declared by the SCOTTISH AMICABLE LIFE ASSURANCE SOCIETY to all With Profit Policies.

Intending Proposers are invited to apply for Prospectus containing Rates and full Information.

[168]

THE SCOTTISH EQUITABLE

LIFE ASSURANCE SOCIETY.

ESTABLISHED IN 1831—FOR MUTUAL LIFE ASSURANCE.

Head Office: 28 ST. ANDREW SQUARE, EDINBURGH.

*President—HIS GRACE THE DUKE OF BUCCLEUCH AND QUEENSBERRY, K.T.
Manager and Actuary—G. M. Low. Secretary—J. J. M'LAUCHLAN.*

A PURELY MUTUAL OFFICE. FUNDS, £5,626,337.

THE WHOLE PROFITS belong to the Assured, who by the Society's Special Act of Parliament are **expressly protected** against any individual liability.

BONUSES are calculated on the **Compound System**—that is, on **Previous Bonus** as well as on the sum assured.

NEW SCHEMES OF ASSURANCE :—**Minimum Rates**—with **Profits**, and **PENSIONS** combined with **Family Provision**.

POLICIES ARE WORLD-WIDE from the outset in most cases.

GUARANTEED SURRENDER VALUES are stated in the Policies.

THE NON-FORFEITURE SYSTEM obviates the risk of loss from omission to pay a premium.

CLAIMS ARE PAYABLE IMMEDIATELY on proof of death and title.

THE SOCIETY TRANSACTS every description of Life Insurance Business.

INSURANCES AGAINST ISSUE are effected at moderate rates of premium.

LOANS ARE GRANTED on Life Interests and other approved security, Reversions are purchased and Annuities are granted.

Prospectuses, Forms of Proposal, &c., may be obtained on application to the Society's London Office—

19 KING WILLIAM STREET, E.C.

Telephone No. 492 Bank.

Telegraphic Address: "LIFE, LONDON."

Secretary—F. R. LEFTWICH. [10]

SCOTTISH TEMPERANCE LIFE ASSURANCE CO., LTD.

Head Office: 105, ST. VINCENT STREET, GLASGOW.

London Office: 3, CHEAPSIDE, E.C.

TOTAL ASSETS - - - - - £1,481,916

The special features of the Company are—

Reduced Premiums to Total Abstainers.

Very favourable rates under Life, Accident, and all Sickness Policies.

An Immediate Mortgage Scheme for House Purchase. Loan cancelled in event of death.

Repayments over 10, 15, or 20 years at rates little more than in cheapest Building Societies. Ordinary mortgage expenses paid by the Company. Send for prospectus. [264

ROYAL BLIND PENSION SOCIETY

Patron—HIS MAJESTY THE KING.

Vice-Patrons—

H.R.H. THE PRINCE OF WALES, K.G. | H.R.H. THE DUKE OF CONNAUGHT, K.G.

President—THE DUKE OF GRAFTON, K.G.

Honorary Secretaries—Messrs. GEORGE POCOCK and PERCY R. POCOCK.

This Society grants Pensions to the Blind Poor at their own homes in sums ranging from 10s. to 25s. per month.

There are at present 1,290 pensioners, residing in various parts of the Kingdom, among whom upwards of £9,000 is annually distributed in pensions, paid monthly, through the kind agency of Honorary Almoners.

Elections take place in May and November in each year.

In addition to those elected by the votes of Subscribers, not less than two are added at every election in order of priority. Others are nominated from time to time to receive Memorial and other special Pensions.

To be eligible, applicants must be totally blind, above 21 years of age, of good moral character, and in receipt of an income not exceeding £20, if single, and £30 if married. No distinction is made in regard to sex or creed; nor is the receipt of parish relief a disqualification.

Application must be made on the printed forms provided by the Society.

Subscribers of 10s. 6d. annually, or Donors of Five Guineas, are entitled to One Vote at every election, and multiples thereof in proportion. They can also assist in the Nomination of a Candidate.

The payment of a Legacy to the Society confers upon each Executor the privilege of One Life Vote for every £25 bequeathed.

The yearly report, containing the rules, accounts and all information, will be forwarded on application.

Contributions will be gratefully received by the Treasurer, or by the BANK OF ENGLAND, or Messrs. Barclay and Co.

237, SOUTHWARK BRIDGE ROAD, LONDON.

JOHN C. BUMSTED, Esq., *Treasurer*.

W. ELLIOTT TERRY, *Secretary*. [167]

The Cancer Hospital

(FREE, FOUNDED 1851),

BROMPTON, LONDON, S.W.

The only Special Hospital in London for the treatment of Cancer.

A special refuge for poor persons afflicted with this fearful disease, who are admitted free without letters of recommendation.

A number of beds are provided for the use of Patients who may remain for Life.

Out-patients are seen on their own application, daily, at 2 o'clock, except Sundays.

***New Annual Subscriptions and Donations are urgently solicited
for General Expenses and for the Research Department.***

FRED. W. HOWELL, *Secretary*.

FORM OF BEQUEST.

"I give and bequeath unto the Treasurer for the time being of THE CANCER HOSPITAL (FREE), situate in the Putnam Road, Brompton, London, Middlesex, the sum of
(free of Legacy Duty), to be applied towards carrying on the charitable
design of the said Institution."

[92]

*Treasurer—SIR J. MURRAY SCOTT, BART.
Secretary—H. C. STANILAND SMITH.*

[126a]

GENERAL LYING-IN HOSPITAL, York Road, Lambeth, S.E. ESTABLISHED 1765.

Patrons—H.M. Queen Alexandra, H.R.H. the Princess of Wales.

This Hospital is situated in one of the poorest parts of London, in the district South of the Thames, with a population of nearly two millions.

Married women in indigent circumstances, especially the wives of Soldiers and Sailors, and certain single women (with their first child, after investigation by the Committee), are admitted to the Hospital from all parts of the kingdom, but mainly from the immediate neighbourhood, from which, owing to its poverty, little pecuniary help is obtainable.

Subscriptions and Donations thankfully received by the Treasurer, or Miss ROSE E. WHITE, the Secretary, at the Hospital. [122]

THE GIRLS' FRIENDLY SOCIETY.

*Patroness—HER MAJESTY QUEEN ALEXANDRA.
Presidents and Vice-Presidents—THE ARCHBISHOPS AND BISHOPS.*

The G.F.S. is a National Society which links together in friendly bonds over 300,000 women of all ages and of all ranks of society in all parts of the world for mutual help. Its aim is to set before its members a high ideal of purity of thought, word, and deed; to help them to be true to that ideal; to be a standing witness to the possibility of purity of life and conduct for every woman and girl in the land; to guard the hundreds of thousands of girls who are growing up to womanhood from acknowledged dangers, and to extend to them the priceless boon of loving Christian fellowship and of fellowship in Christian work.

The various Departments of G.F.S. work include help for Sick Members, the care of Work-house Children, Registry Work (address of Central Employment Office is 14, Victoria Street, S.W.), protection in Emigration and in Travelling, the provision of Homes of Rest, Lodges and Recreation Rooms, Industrial Training, and the encouragement of Temperance and Thrift.

The Publications of the Society, Price Lists of the Needlework Depot, and all further information, can be obtained from THE SECRETARY, G.F.S. Central Office, 33, Victoria Street, Westminster, S.W.

Telegrams: "AEGUST, LONDON."

Telephone: 2521 VICTORIA.

[113]

THE GORDON BOYS' HOME

(THE NATIONAL MEMORIAL TO GENERAL GORDON).

Patron—THE KING.

Vice-Patron—H.M. QUEEN ALEXANDRA.

President—H.R.H. THE PRINCE OF WALES, K.G.

Chairman of Committee—General Sir GEORGE W. A. HIGGINSON, G.C.B.

THE HOME IS SITUATED AT WEST END, WOKING, NEAR BROOKWOOD.

OFFICES—5, YORK STREET, ST. JAMES'S, S.W.

The Home is constructed to accommodate 250 Boys, chosen from the homeless and destitute, between the ages of 14 and 16, and give them a training, up to the age of 18, which will fit them alike for civil life in this country or its Colonies, and for service in the Army, Navy or Mercantile Marine.

CONDITIONS OF ADMISSION.—1. None are admitted below 14 years of age or above 16. 2. A boy must, in the opinion of the Committee, be really necessitous. 3. He must be free from such physical or mental infirmity as would disqualify him for service in the Army or Navy, or for civil employment in the Colonies or elsewhere, which would require active bodily exertion. 4. Boys of known bad character are ineligible.

Free admission is given to such number of boys as above as can be provided for out of the general income of the Home. A guaranteed payment of £22 annually during his stay at the Home will give a right of nomination for a lad fulfilling the conditions of admission. There are now 250 Boys in the Home. Subscriptions and Donations are urgently needed in order that this number may be maintained.

Subscriptions are received by THE LONDON COUNTY AND WESTMINSTER BANK, 1, St. James's Square, S.W.; by the Treasurer, General the Right Hon. Sir DIGHTON PROBYN, G.C.B., V.C., Buckingham Palace, S.W.; and by the Secretary, at the Office, 5, York Street, St. James's, S.W., from whom any further information can be obtained.

MICHAEL L. MELVILLE, Esq., Secretary.

GUYS' HOSPITAL

LONDON BRIDGE, S.E.

BEDS, 620. IN-PATIENTS (1908), 8,565. OUT-PATIENTS, 132,288.

The Governors Earnestly Appeal for:—

1. New Annual Subscriptions and Donations to meet the large difference between assured income and ordinary outgoings, for which the Hospital is from year to year dependent on **VOLUNTARY SUPPORT.**

2. £60,000 to provide:

- (a) Separate Children's Wards.
- (b) Increase of Beds for Special Departments.
- (c) The Rebuilding of Clinical House.

H. COSMO O. BONSOR, Treasurer.

NOVEMBER, 1909.

Bankers—THE BANK OF ENGLAND.

[115]

HOMES OF HOPE,

Nos. 4, 5, & 6, Regent Square, Gray's Inn Rd., London, W.C.

(Established 1860.)

THIS Society is doing **Valuable Maternity Work** for the restoration of the **first fallen**. Those who have taken the **one false step**. The applications for admission are **painfully urgent**, and the Committee are in **immediate want** of **£1,000** to clear off debt and carry out some **urgent repairs and dilapidations**.

Most of the cases admitted are those of young girls who up to the time of their betrayal and desertion have led commendable and virtuous lives.

Special efforts are made on behalf of these poor, betrayed young women, who have taken **one false step**. They are received into the Homes and receive **Skilful Medical Maternity Attendance and Nursing**. They are also **trained in Household and Domestic Duties**, and after a nurse-mother has been found for the infant the mother is put in the way of **earning a respectable living for herself and the child**. Every endeavour is used to trace the father and make him jointly responsible with the mother for the maintenance of the infants born to them. **A solid, practical, and permanent kind of Rescue Work.**

Contributions may be sent to Secretary at above addresses, or to the Treasurer, **ALFRED HOARE, Esq., 37, Fleet Street, E.C.**

THE TEMPORARY

Home for Lost and Starving Dogs,

Battersea Park Road, South Lambeth, London, S.W.,
And HACKBRIDGE, SURREY.

An Institution for the Protection of Dogs and Cats.

PATRON:

His Most Gracious Majesty the King.
President: His Grace the DUKE OF PORTLAND, K.G.

Bis dat qui cito dat.

OBJECTS:

1. To provide shelter and food for the lost, deserted and dangerous dogs of London.
2. To restore lost dogs to their rightful owners.
3. When good dogs are unclaimed, to find suitable homes for them at nominal charges.
4. To destroy, by a merciful and painless operation, all valueless and diseased dogs.

Contributions towards the Maintenance of the RECENTLY EXTENDED BATTERSEA HOME and the COUNTRY HOME at HACKBRIDGE will be thankfully received by

HENRY J. WARD, *Secretary.*

HOME MISSIONS OF THE CHURCH

(Additional Curates Society).

THE ADDITIONAL CURATES SOCIETY exists to help poor parishes to obtain the assistant Clergy they require, and could not have without money assistance from outside their own borders.

The Society's work now reaches over the whole of England; it also deals with Wales, the Channel Islands, the Isles of Scilly, and the Isle of Man. It touches the slums in the centre of large cities, the poorer suburbs outside the cities, and also the mining and other industrial towns and villages. Grants are now given to more than 1,000 parishes, which help to maintain 1,300 additional Clergymen.

Churchmen who do not as yet subscribe to A.C.S. are earnestly asked to do so. The A.C.S. Office is at 14, Great Smith Street, Westminster. Secretary: Canon PETIT.

The COMMITTEE VERY EARNESTLY APPEAL for FUNDS for the maintenance of those ladies who were left provided for by charges on Irish landed property, who are incapacitated by age or infirmity from earning a living, and who, owing to the non-receipt of their incomes, are in absolute poverty.

OFFICE AND WORK DEPOT—7A, LOWER GROSVENOR PLACE, LONDON, S.W. [100]

WEST END

Hospital for Diseases of the Nervous System

PARALYSIS AND EPILEPSY,

73, WELBECK STREET, CAVENDISH SQUARE, W.

Instituted 1878.

Patron—HER MAJESTY THE QUEEN.

With Special Wards for Paralysed Children. 77 Beds.

Applicants must be in attendance at the Hospital for Examination by the Physicians at half-past one o'clock upon Mondays, Wednesdays, Thursdays, or Fridays, or half-past five o'clock upon Tuesday and Friday evenings.

Patients contribute according to their means. The indigent are immediately and gratuitously treated upon production of a Certificate signed by a Subscriber to the Hospital, a Minister of Religion or Registered Medical Practitioner, that the applicant is known by the donor to be deserving of free Hospital Relief.

Urgent cases treated in the first instance without letter.

N.B.—Annual Subscriptions are earnestly solicited

H. C. WILLOCK-POLLEN, Treasurer.
ALFRED J. WISE, Secretary.

THE HOSPITAL FOR DISEASES OF THE SKIN,

52, STAMFORD STREET, BLACKFRIARS, S.E.

Telephone: 5653 Central.

ESTABLISHED 1841.

Patroness—HER MOST GRACIOUS MAJESTY QUEEN ALEXANDRA.

Vice-Patron—THE RIGHT HON. LORD HAVERSHAM.

Treasurer—ROBERT BARCLAY, Esq.

Nearly 460,000 Patients have been cured or relieved at this Hospital, which was the first and for many years the only institution in the United Kingdom for the Special Treatment of Cutaneous Diseases.

PATIENTS are admitted on small payment, entitling them to four weeks' treatment, or by Subscriber's letter of recommendation. Indigent persons are admitted entirely free.

OUT-PATIENTS are received daily at 1 p.m. Medical Men and Students are admitted free to the daily practice on presentation of their cards.

Light Treatment—Lupus Lamps, X Ray, High Frequency, and Radium, daily—towards the expense of erecting and maintaining which Donations and Subscriptions are earnestly solicited, and will be thankfully received and acknowledged by the Secretary, or the Bankers, Messrs. BARCLAY, Ltd., 54, Lombard Street, E.C.

300 TO 400 OF THE SUFFERING POOR ARE WEEKLY RELIEVED BY THIS CHARITY, and every addition to the Fund would extend its advantages to a larger number.

FREDERICK HAYTER, Secretary.

N.B.—Property of every kind may be given by will for religious or charitable purposes.

THE

LONDON HOSPITAL MEDICAL COLLEGE.

ONE HUNDRED AND TWENTY-FIFTH SESSION.

**The SUMMER SESSION will commence on May 1st,
the WINTER SESSION on Oct. 1st.**

The largest General Hospital in England; 922 Beds are in constant use, and no beds are closed. Being the only General Hospital for East London—i.e., for a million and a half people—the practice is immense. In-patients last year, 14,781; out-patients, 242,875; accidents, 14,006; operations under Anaesthesia, 16,615.

APPOINTMENTS.—Owing to the enormous number of patients, more appointments, salaried and resident, are open to students than at any other hospital. One hundred of these qualified appointments are made annually, and more than 150 Dressers, Clinical Clerks, &c., appointed every three months. All are free to Students of the College. Holders of resident appointments have free board.

SCHOLARSHIPS AND PRIZES.—Thirty-six Scholarships and Prizes are given annually. SEVEN ENTRANCE SCHOLARSHIPS will be offered in October.

SPECIAL CLASSES are held for the University of London and other Higher Examinations. Special entries for Medical and Surgical Practice can be made. A reduction of 15 Guineas is made to the sons of members of the profession entering for the full course.

ENLARGEMENT OF THE HOSPITAL COLLEGE.—The New Pathological Institute and the laboratories and class-rooms for Bacteriology, Public Health, Operative Surgery, Physiology, Physics, Chemistry, Biology, are now open.

The Clubs Union Athletic Ground is within easy reach of the Hospital.

Luncheons and Dinners at moderate charges can be obtained in the Students' Club.

The Central Metropolitan and other railways have stations close to the Hospital and College.

For prospectus and information as to residence, &c., apply, personally or by letter, to

METROPOLITAN DRINKING FOUNTAIN AND CATTLE TROUGH ASSOCIATION.

Patroness: HER MOST GRACIOUS MAJESTY QUEEN ALEXANDRA.

President: HIS GRACE THE DUKE OF PORTLAND, K.G.

Chairman: Major-General LORD CHEYLESMORE, G.C.V.O.

FUNDS URGENTLY NEEDED.

Secretary: Capt. W. SIMPSON, 70, VICTORIA STREET, WESTMINSTER.

This Association is the only one of its kind. It has erected 778 Drinking Fountains for human beings and over 1,455 Troughs for horses and dogs. Supported by Voluntary Contributions. It is estimated that 250,000,000 drink at the Association's Troughs and Fountains in one year. It promotes temperance. Confers the blessing of a refreshing drink of water on the hard-worked horses in the streets. Encourages kindness to animals.

Assistance is required to erect more Fountains and Troughs in the streets to keep pace with the rapid and enormous growth of the Metropolis and Provincial Towns.

[244]

METROPOLITAN HOSPITAL,

KINGSLAND ROAD, N.E.

Supported by Voluntary Contributions.

Patron: HIS MAJESTY THE KING.

Chairman: THE RIGHT HON. LORD HOWARD DE WALDEN.

**Treasurers: { THE RIGHT HON. LORD HILLINGDON.
LEOPOLD DE ROTHSCHILD, Esq., C.V.O.**

Chairman of Committees: C. J. THOMAS, Esq., C.C., F.R.G.S.

SPECIAL APPEAL.

The Metropolitan Hospital is in the Kingsland Road, far removed from the rich, and ministers to a population of nearly half-a-million of the poorest inhabitants of London.

More than 1,800 In and 43,000 Out-Patients are treated annually, the attendances of the latter amounting to upwards of 130,000.

At the present time there are 117 beds available for In-Patients, including a Ward especially for Children, and two Wards, with special kitchens, &c., for Jewish patients.

Every care is taken to avoid abuse of the charity; and a trained Almoner is employed for this purpose and for the further purpose of forming a link between the Hospital and outside charities to assist patients to any extra help that they may require.

While the necessary expenditure averages £14,000 a year the income from invested property is about £500. The difference has every year to be collected from the charitable public.

Appeal is also made for Funds to build the NURSES' HOME on the Hospital's land behind the Ward blocks.

**Bankers: (GLYN, MILLS & CO.
LLOYDS BANK LIMITED.**

J. C. BUCHANAN,
Secretary.

HELP URGENTLY NEEDED.

The METROPOLITAN VISITING and RELIEF ASSOCIATION,

Including the Metropolitan Portions of the Dioceses of London,
Southwark, and St. Albans.

President—THE LORD BISHOP OF LONDON.

Treasurer—GENERAL CLIVE.

Secretary—GRANT MARSTON, Esq.

OFFICE: 46A, PALL MALL, S.W.

1. The aim of the Association is to Distribute such Funds as may be committed to it in grants to the Local Committees of poor parishes, proportionate to the needs of each.
2. The Clergy and District Visitors are the unpaid Agents of Relief, and possess the indispensable qualification of personal knowledge of the poor.
3. The overburdened Clergy are hereby greatly assisted in dealing with the distressing cases constantly before them. The religious persuasion of the poor is no obstacle to their relief.
4. Every penny contributed is devoted to the relief of destitution, all the working expenses being otherwise provided for.

Annual report will be forwarded on application to the Secretary.

Subscriptions to enable the Committee to carry on the work efficiently are greatly needed.

Cheques, payable to GRANT MARSTON, should be sent to the Office, 46A, Pall Mall, S.W., or to LLOYDS BANKING Co., LTD., 16, St. James's Street, S.W. [117]

HER MAJESTY QUEEN ALEXANDRA.

PRESIDENT—HIS ROYAL HIGHNESS THE PRINCE OF WALES, K.G.

Bankers—COURTIS & CO., London.

Secretary—E. G. FAIRHOLME.

Upon this Institution, founded in 1822, rests a heavy responsibility. It is earnestly and respectfully submitted that it has in consequence a strong claim upon the benevolence of the humane and charitable.

The Council respectfully appeal to the Public to extend a hearty assistance—

I. By supplying early information of all acts of cruelty witnessed.

II. By increasing the revenue of the Society by annual subscriptions, by donations, by testamentary gifts, and particularly by inducing their friends to become members.

Trained Officers are despatched to all parts of the Kingdom. Over 7,000 convictions annually.

The increased operations of the Society necessitate a continual drain on the funds of the Society on account of the inadequacy of the yearly Subscription. The Council need much greater assistance, and unless such additional support be extended to them, this most righteous cause of humanity must suffer from insufficiency of means to carry out those many urgent measures which every well-wisher of this Society has so deeply at heart.

SUPPORTED ONLY BY VOLUNTARY CONTRIBUTIONS.

SUGGESTION TO PERSONS MAKING THEIR WILLS.

"I give and bequeath the sum of . . . to be paid to the Treasurer for the time being of THE ROYAL SOCIETY FOR THE PREVENTION OF CRUELTY TO ANIMALS, established 1824; to be at the disposal of the Council for the time being of the said Society; and I direct that the same be paid free of legacy duty." SOCIETY FOR RELIEF OF DISTRESSED JEWS. (SYRIAN COLONIZATION FUND.)

The Jews in Russia have no security for life—and thousands seek shelter in Palestine, where, though destitute, they are safe. The Turkish Government are willing to admit 20,000 more.

This Society gives Relief in Food and Clothes to 1,500 families of the sick and feeble, and work at Abraham's Vineyard to over 70 men and boys.

FUNDS NEEDED that more may be helped "IN TOKEN OF CHRISTIAN SYMPATHY." The gift of Drinking Water is warmly appreciated by the Jews.

DONATIONS RECEIVED by:-

F. A. BEVAN, Esq., J.P., D.L., *President & Hon. Treas.*, 54, LOMBARD STREET, E.C.;
MESSRS. DRUMMOND, *Bankers*, 49, CHANCERY CROSS, S.W.; and by
E. A. FINN, *Secretary*, 117, VICTORIA ST., S.W. (late 41, Parliament St.).

SHELTERING HOMES FOR DESTITUTE CHILDREN, MYRTLE STREET, LIVERPOOL,

Where over **200** Children yearly are rescued from starvation and moral danger, are emigrated and placed in Canadian families of good standing and repute.

£500 additional income is urgently required to keep up this work.

THE SMALLEST GIFT WELCOMED.

Chairman: JAMES SMITH, Esq., J.P.

Hon. Treasurer: E. C. THIN, Esq., 24, Chapel Street, Liverpool.

Secretary and Superintendent: MRS. LOUISA BIRT, Myrtle Street, Liverpool [221]

SONS OF THE CLERGY CORPORATION.

Founded A.D. 1855. Incorporated 1873.

For the Relief of Necessitous Clergymen, their Widows, Aged Single Daughters and Children, of every Diocese of England and Wales:

President—THE ARCHBISHOP OF CANTERBURY.

BY FAR THE OLDEST, LARGEST AND MOST COMPREHENSIVE OF THE CLERGY CHARITIES.

Donors of **30 Guineas** are elected Governors of the Corporation.

MORE ANNUAL SUBSCRIPTIONS AND DONATIONS ARE URGENTLY NEEDED.

Legacies also form a most important feature in the annual receipts of this ancient Society.

SIR PAGET BOWMAN, Bt., *Regr.*, Corporation House, Bloomsbury Place, London, W.C. [128]

THE SURGICAL AID SOCIETY.

Chief Office—SALISBURY SQUARE, FLEET STREET, E.C.

Patron—HIS MAJESTY THE KING.

President—The Right Hon. the EARL OF ABERDEEN, P.C., G.C.M.G., K.T.

This Society was established in 1862 to supply Spinal Supports, Leg Instruments, Trusses, Elastic Stockings, Artificial Limbs, &c., and every other description of mechanical support to the Poor, without limit as to locality or disease.

WATER BEDS and INVALID CHAIRS and CARRIAGES are Lent to the Afflicted.

It provides against imposition by supplying the appliance on the certificate of a Surgeon only. By special grants it ensures that every deserving applicant shall receive prompt assistance.

39,204 Appliances given in the year ending September 30, 1909.

Annual Subscription of £0 10 6 } Entitles to two recommendations

Life Subscription of 5 5 0 } per annum.

Contributions are earnestly Solicited. *Bankers—Messrs. BARCLAY & Co., Ltd., Lombard St.*
RICHARD C. TRESIDDER, *Secretary.* [236]

Society for the Abolition of Vivisection

23, NORTHUMBERLAND AVENUE, LONDON.

According to the latest Parliamentary Return, the number of experiments made in 1908 was 88,834. A large number of these were inoculation experiments, and, as the report says, "are attended by no considerable, if appreciable, pain."

The pain does not lie in the operation itself, but in the after effects.

The following is an example of what may ensue in the dog after the "little needle prick"—

"A dog was inoculated on January 23rd. In a few days it began to show signs of wasting, then the head became swelled and dropsical, and also the fore-legs and paws; later on this swelling disappeared, but the dog seemed very ill and weak, and there was a thickening of the membrane of both eyes. Two days before its death it refused food and seemed very thirsty. On February 20th it died."—Abridged from the *Journal of Pathology and Bacteriology*, March, 1906.

CONTRIBUTIONS TO THE SOCIETY GRATEFULLY ACKNOWLEDGED.

Society for the Propagation of the Gospel in Foreign Parts.

15, TUFTON STREET, WESTMINSTER, S.W.

This Society carries on the work of the Church in our Colonies and in Heathen Lands. The number of Ordained Missionaries is **878**, of whom **13** are Bishops and **222** are Natives; also there are **200** Women Missionaries. It further supports **3,000** Lay Teachers, and has **3,200** Students in the Society's Colleges, and **40,000** children in Mission Schools. Its Literature consists of "The East and The West" (quarterly), "The Mission Field," "The Church Abroad," "The King's Messengers" (all monthly), and a Quarterly Intercession paper (circulation 100,000). All information may be obtained from

The SECRETARY, 15, Tufton Street, Westminster, S.W.

The United Kingdom Beneficent Association.

Secretary—F. BURTON OSBORN, Esq.

Office: 7, Arundel Street, Strand, W.C.

Under the Patronage of H.M. THE KING and H.M. THE QUEEN.

PRESIDENT: His Grace the DUKE OF ABERCORN, K.G., C.B.

The Association grants Annuities to Widows and Daughters of Clergymen, Medical Men, Officers of the Navy and Army, members of the Legal Profession, landed proprietors, and others of the upper and middle classes of gentle birth, above forty years of age, free from any unseasonable illness of mind, and medically certified to be unable, from age or bodily infirmity, to earn their own livelihood. Persons in possession of more than £30 per annum are not eligible for the benefits of the Association.

Since the foundation of the Association in 1863, annuities have been granted to 2,431 persons, of whom 1,150 are now living. Over 450 Candidates, many of them absolutely without income, are waiting to receive annuities. Waiting Candidates are assisted from time to time from the Temporary Relief Fund, and Candidates and Annuitants share alike in the benefits of the Clothing Department and the Department of Visiting Friends.

Permanent Memorial Annuities can be established. The cost and conditions may be ascertained upon application.

CONSUMPTION.

VENTNOR: THE ROYAL NATIONAL HOSPITAL FOR CONSUMPTION,

on the Separate Principle, at Ventnor, affords Hospital Treatment with Home-like Comforts to Sufferers from Consumption and other Chest affections. It consists of Eleven Blocks of Buildings (standing in Twenty-two acres), with a separate Bedroom for each Patient, every house facing the South and overlooking the Sea: its situation is in the sheltered Undercliff of the Isle of Wight. Facilities for Open-Air Treatment are afforded. The results achieved with upwards of **20,000** Cases already admitted have been most encouraging. 163 Beds are constantly occupied.

An Annual Subscription of **Five Guineas** or a Life Donation of **Fifty Guineas** constitutes a Governor, with the usual privileges of recommendation.

FUNDS FOR MAINTENANCE ARE URGENTLY NEEDED.

The yearly expenses amount to **£13,000**.

Bankers—THE LONDON COUNTY AND WESTMINSTER, 1, St. James's Square, S.W.

CHURCH OF ENGLAND

WAIFS AND STRAYS SOCIETY

PATRON—H.M. THE KING.

PATRON OF THE "CHILDREN'S UNION"—H.M. QUEEN ALEXANDRA.

NEEDS AND PLEADS for Help on behalf of its large family of over 4,000 Children, once Homeless, Destitute, and Cruelly Treated.

Over 14,700 Children have been Rescued.

Over 100 Homes, including Farm, Industrial, and Cripples' Homes.

Secretary : Rev. E. de M. RUDOLF, Old Town Hall, Kennington, London, S.E. [16]

WEST LONDON HOSPITAL, HAMMERSMITH ROAD, W.

(Incorporated by Royal Charter, Nov. 1st, 1894.) Supported by Voluntary Contributions.

Patron—HIS MAJESTY THE KING. President and Chairman—His Grace the Duke of ABERCORN, K.G., P.C.

Treasurer—Rt. Hon. LORD ROTHSCHILD, G.C.V.O., P.C.

IT needs :—£63,000 to carry out the scheme of extension for which plans have been accepted, and by which provision is made for about 250 beds; £10,000 to pay off debt; and £14,000 annually to maintain the present work of relieving about 2,300 In-Patients and 40,000 Out-Patients. Its endowments yield an annual income of about £600. Wherefore it relies upon voluntary contributions for £13,400 wherewith to meet its annual expenditure of £14,000.

It is the nearest General Hospital for Hammersmith, Fulham, Acton, Chiswick, Brentford, and for large portions of Kensington and Barnes. The population it serves numbers more than 500,000 persons. It is entitled to receive and hold devises of freehold land or any other property.

A Personal Matter

that you
cannot
afford to
neglect

No matter can be more in-
timately personal than one's
skin. To keep it in health is
a first duty. Without skin health
there cannot be skin beauty,
and the best aid to both is

PEARS

THE
LEADING
ANALYSTS
AND SKIN
SPECIALISTS
OF THE LAST
120 YEARS
HAVE CERTIFIED
THAT PEARS
IS THE BEST OF
ALL SOAPS FOR THE
SKIN AND COMPLEXION.

because it possesses precisely
those emollient qualities that,
while making the skin daintily soft
and fine, impart to it the loveliness
and charm of a delicate pink and
white bloom. This is natural, not
artificial beauty. It is a skin beauty
that endures, because produced by
proper hygienic means.

Pears' is also the
most economical
of Toilet Soaps.

"We are as old as our arteries."—*Virchow.*

"The cause of Old Age is the accumulation of waste matters in the body. Under the influence of these poisons nutrition is impaired, the ordinary functions of life are disturbed, and the arteries, as well as other tissues, take on degenerative changes and result in a calcareous condition. The smaller branches of the arteries shrivel up, thus interfering with the circulation of the blood through the organs of digestion and the heart itself, and the mental and physical feebleness of old age supervenes. . . . It is the disturbance of the nutritive processes that results from the over accumulations of tissue poisons."—*Kellogg.*

*"Thy thoughts, thy feelings, shall not die
Nor leave thee when grey hairs come nigh
A melancholy slave:
But an old age, serene and bright,
And lovely as a Lapland night
Shall lead thee to thy grave."*—*WORDSWORTH.*

There is no simpler, safer, or more agreeable remedy which will, by natural means, get rid of dangerous waste matter, without depressing the spirits or lowering the vitality than

ENO'S FRUIT SALT

Where it has been taken in the earliest stages of a disease, it has, in innumerable instances, prevented a Serious Illness. Its effect upon any Disordered, Sleepless, or Feverish Condition is simply Marvellous. It is, in fact, Nature's Own Remedy, and an Unsurpassed One.

CAUTION.

Examine the capsule and see that it is marked ENO'S 'FRUIT SALT.' Without it you have the sincerest form of flattery—IMITATION.
